XEROX

DC230LP NetWare® 4.x NDS Quick Install

Installation Requirements:

If this is a Token Ring installation, the Token Ring card must be installed by your Xerox service representative and configured before performing this procedure. Refer to the *Token Ring Quick Install* card.

If running NLSP, be sure that RIP/SAP compatibility is configured on the same segment as the DC230LP.

Note: For a Bindery installation, refer to the *NetWare 3.1x/4.1x Bindery Quick Install* card.

Before Installation:

- Perform the network installation for the printer using the appropriate NetWare utility (PCONSOLE or NWADMIN).

Note: Define the printer as *Defined Elsewhere* or *Remote/Other*.

- Record the following information for use during setup at the DC230LP:

Print Server name: _____

Print Server Password: _____

NDS Tree: _____

NDS Name Context: _____

Frame Type: _____

Poll Interval: _____

This installation procedure assumes that you know how to navigate through the menu system on the DC230LP Control Panel. Refer to the quick reference card, *Using the Menu System* (701P96834) for assistance.

1. Connect the DC230LP to your network outlet or cable.
2. Access the System Administration menus:
 - a) Press **[Online]** to take the printer off line.  displays.
 - b) Press **[Menu]**.  displays.
 - c) Press **[▶]**, then press **[▲]** or **[▼]** until  displays.
 - d) Press **[▶]**.  displays.
 - e) Use the **[▲]** and **[▶]** keys to enter **[2222]**.

Note: 2222 is the factory default password and may be changed to suit your needs. Refer to the *DC230LP System Administration Guide, Network Installation and Troubleshooting*.

- f) Press **[Enter]**.  displays.
3. Access the NetWare menus:
 - a) Press **[▶]**.  displays.
 - b) Press **[▼]** until  displays.
 - c) Press **[▶]**.  displays.
 - d) Press **[▼]** until  displays.
 4. Enable NetWare:
 - a) Press **[▶]**.  displays.
 - b) Press **[▶]**.  displays.
 - c) Press **[▼]**.  displays.

DC230LP NetWare® 4.x NDS Quick Install

- d) Press **[Enter]**. **SAVED** displays momentarily, followed by

Enablement
Enabled >

5. Select the appropriate Interface for your network:

Note: Token Ring will not be available as a selection unless it has been installed and configured.

- a) Press **[▼]** until
- Interface
Ethernet >
- displays. If Ethernet is the desired interface, go to step 6.

- b) If Token Ring is the required interface, press **[▶]**, then press **[▼]** until
- Interface
Token Ring =
- displays.

- c) Press **[Enter]**. **SAVED** displays momentarily, followed by
- Interface
Token Ring >

6. Select the Frame Type for your network:

- a) Press **[▼]** until
- Enet Frame Type >
Ethernet II
- displays. If Ethernet II is the desired Frame Type, go to step 7.

- b) Press **[▶]**, then press **[▼]** until the required Frame Type displays

Enet Frame Type =
(required setting)

- c) Press **[Enter]**. **SAVED** displays momentarily, followed by

Enet Frame Type >
(your entry)

IMPORTANT: During the next two steps, be sure that the *Print Server Name* and *Print Server Password* are exactly the same as the values entered in PCONSOLE or NWADMIN.

7. Enter the Print Server Name:

- a) Press **[▼]** until
- Pserver Name >
(current entry)
- displays.

- b) Press **[▶]**. **Pserver Name =**
(current entry) * displays.

- c) Press **[▶]** repeatedly until the cursor reaches the end of the entry. A tone sounds indicating when the last character has been reached.

- d) Press **[◀]** repeatedly to delete the current entry.

- e) Use the **[▲]** and **[▶]** keys to enter the Print Server name.

- f) Press **[Enter]**. **SAVED** displays momentarily, followed by

Pserver Name >
(your entry)

8. Enter the Print Server Password:

- a) Press **[▼]** until
- Pserver Pswrd >

- displays.

- b) Press **[▶]**. **Pserver Pswrd =**
********* * displays.

- c) Use the **[▶]** to move to the last character of the current entry. A tone sounds when the last character has been reached.

- d) Press **[◀]** repeatedly to delete each character.

- e) Use the **[▲]** or **[▼]** key to enter the first character of the password.

- f) Press **[▶]** to move to the next character. Repeat this procedure to enter the entire password.

- g) Press **[Enter]**. **SAVED** displays momentarily, followed by your entry

Pserver Pswrd >

9. Enter a dash **[–]** as the File Server name:
