Network Multifunction Systems and Digital Copiers

Xerox Customer Education System Overview

The Xerox Customer Education System shows you how to maximize productivity by taking advantage of all the capabilities of your Document Centre® system. The Xerox Customer Education System covers:

- Basic operating concepts
- Key features and functions
- Customized training to fit your company's unique requirements
- Process and workflow guidance
- Problem solving and troubleshooting
- Practical applications
- Job programming and management
- Use of support documentation and services
- Maintenance requirements

X®

Do more work . . . do better work . . . and save money doing it.

For more information please call **1-800-ASK XEROX** or visit our Web site at **www.xerox.com.**

The Xerox Customer Education System offers two complementary educational approaches working together to help your office make the most of your Document Centre 555/545/535.

User Training and Information CD*

A CD with animated tutorials and interactive screens—when installed on your network is always available to everyone—helps users learn how to make the most of the Document Centre's features and functions.

- *Study Document Centre system's features and capabilities at your own pace.*
- *Study whenever it's convenient. Review what you've learned at any time.*

Instructor-Led Training

Basic User Training

- *Skilled Xerox professionals provide hands-on training and personal instruction on the basic features of the Document Centre system while introducing users to the power of our online User Training and Information.*

High-Value Training

- *Our experts review your more demanding tasks in order to recommend new ways to improve your processes and workflow using the Document Centre 555/545/535.*
