### **Technical Bulletin for System Update software release (patch 1-H23O1) for EX3535 v1.0, EX7750 v1.0, X12 v2.0**

System Updates is a print server service that keeps the system software on your print server up-to-date with the latest Microsoft security updates. It runs in the background on the print server and automatically checks for updates by contacting an update server periodically (every 24 hours by default) through the Internet. If one or more updates are available, System Updates alerts you to download and install the updates, or downloads and installs updates automatically without any user interaction. You can turn off automatic checking and use System Updates to check for and install updates manually at any time.

System Updates runs on print servers running Microsoft Windows XPe.

Once System Updates is in place, all future Microsoft security patches will be available through this software tool.

System updates will only install patches released after October 2004. Previous patch releases must be installed manually and are available at [www.xerox.com](http://www.xerox.com).

#### **Currently, the following patches are available for download from the new System Updates software:**

MS04-022 (KB841873) EFI Patch = 1-FVWDL

MS04-023 (Q840315) EFI Patch = 1-FVWS6

MS04-024 (Q839645) EFI Patch = 1-FVWRU

(KB870669) EFI Patch = 1-FVWRO

MS04-030(824151) EFI Patch = 1-GH1LE

MS04-031(841533) EFI Patch = 1-GH1L6I

MS04-032(840987) EFI Patch = 1-GH1KD

MS04-034(873376) EFI patch = 1-GH1KY

MS04-037(841356) EFI Patch = 1-GH1KK

---

## ***Office Group***

MS04-038(834707)	EFI patch = 1-GH1KR
MS04-040(889293)	EFI Patch =1-H219X
MS04-041(885836)	EFI patch = 1-H911T
MS04-043(873339)	EFI patch = 1-H9123
MS04-044(885835)	EFI patch = 1-H9128

System Update is a PS patch named 1-H23O1.ps. To install, process the PS file through CWS and restart the Fiery.

To verify for patch installation, the patch ID number will be added to Fiery Configuration page

Important Note:

For the EX3535 v1.0 the only previously released patched not available through the new System Updates software are patches 1-DSRD9 and 1-G6ZLT.

For EX7750 v1.0 and X12 v2.0, the only previously released patches not available through new System Updates is patch 1-G6ZLT.

The previously released security patches and new System Updates software will bring the XPe servers up-to-date with the following exception. MS04-012 will be addressed with a future patch to be released from EFI.
