

# Recommended Materials for DocuColor 12 LP/CP (USA and Canada)

For use in the US and Canada

Revision 2.6, Publish Date: Sept. 27th, 2002

Last Revision 2.5 was published on July 3rd, 2002

For the most recent version of this quarterly published document, visit [www.xdss.com](http://www.xdss.com), select "Free Downloads", then "Color".

## Important Notes:

All media is listed by product, machine run mode, weight (standard gsm), re-order number, size, and tray runability. The additional information column is for hints and tips on how to run certain media applications.

Media recommendations made in this publication are based on qualification tests\* conducted using standard test images with moderate to heavy image area coverage. Test duration for each product/media type is based on the suggested machine monthly copy/print volume. Test machines are maintained within specifications defined by user documentation.

\* Testing Environment temperature range of 60-75 deg. F, Relative Humidity range 20-40%.

\*Machine reliability specifications may be affected by increased usage of Heavy Weight mode and Extra Heavy Weight mode. In addition, variances in machine reliability may occur due to extended use of some media types. Your Xerox Sales or Service representative can advise you on using Heavy Weight mode, Extra Heavy Weight mode or special application media types for long duration copy/print runs.

For specifications and a description of the various media types discussed in this publication, please refer to the Color Material Usage Guide (reorder number 701P34322) that comes with your equipment.

Additional Information

**WARRANTY DISCLAIMER**

Xerox makes no guarantees or warranties, either express or implied, concerning the performance, use or replacement of non-Xerox branded media or throughput products. Customers should inquire directly of their paper distributor or manufacturer for any guarantees they may offer. When purchasing a particular media product for the first time, customers are advised to purchase small quantities to insure that their expectations are met.

The quality of Xerox supplies is consistent from ream to ream, carton to carton, and it is backed by a Xerox 100% guarantee. The quality of non-Xerox branded paper may vary from ream to ream or carton to carton, so for optimum performance on Xerox color equipment, use only the best--Xerox Supplies.

# DIGITAL COLOR PHOTO GLOSSY PAPER

## STEPS FOR SUCCESS

1. Insert paper from *Paper Tray 5* only and the side facing up will be imaged.
2. When duplex printing:
  - image low gloss side of sheet first.
  - the lead edge/first edge out should be the lead edge/first edge fed from the *Paper Tray 5* on the second pass.
  - the side imaged first should be facing down when feeding through the *Paper Tray 5* on the second pass.

## TIPS

- Store product *flat* at all times, preferably with glossy side up.
- Place unused product in original box and store within the re-sealable plastic package between uses.
- Handle sheets by the edges to avoid fingerprints.
- Prior to use, condition paper to room temperature.
