Xerox Impika Compact Systems	Xerox FreeFlow Print Server 9.0

2. Compatible Printer Support

The following table lists the Xerox production printers and Controllers that are currently supported via an existing compatible print path. To submit jobs to the printers identified below, customers should select the corresponding compatibility print path from the FreeFlow application.

In some situations, not all features are supported when submitting jobs from FreeFlow via the compatibility print path. However, job properties for unsupported features may still be programmed at the Controller prior to printing the job.

Printer	Controller	Compatibility Path
Xerox 770 Digital Color Press	FreeFlow Print Server 8.0	Xerox 700 Digital Color Press/FreeFlow Print Server 8.0
Xerox 770 Digital Color Press	EX Print Server 1.0	Xerox 700 Digital Color Press/EX700i Print Server 1.0
