URL: ftp://ftp.remotesensing.org/pub/libtiff/tiff-3.8.2.tar.gz
Group: User Space Libraries
Description: Tagged Image File Format (TIFF) is a file format for storing images, popular among Apple Macintosh owners, graphic artists, the publishing industry, and both amateur and professional photographers in general.
Common Usage: Library
Package Size: 4.85 MB
Folders / Files: 27 / 435
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

NOTICES:

tiff-3.8.2/tiff-3.8.2/readme

Use and Copyright - Silicon Graphics has seen fit to allow us to give this work away. It is free. There is no support or guarantee of any sort as to its operations, correctness, or whatever. If you do anything useful with all or parts of it you need to honor the copyright notices. I would also be interested in knowing about it and, hopefully, be acknowledged.

The legal way of saying that is:
Copyright (c) 1988-1997 Sam Leffler
Copyright (c) 1991-1997 Silicon Graphics, Inc.

Permission to use, copy, modify, distribute, and sell this software and its documentation for any purpose is hereby granted without fee, provided that (i) the above copyright notices and this permission notice appear in all copies of the software and related documentation, and (ii) the names of Sam Leffler and Silicon Graphics may not be used in any advertising or publicity relating to the software without the specific, prior written permission of Sam Leffler and Silicon Graphics.

THE SOFTWARE IS PROVIDED "AS-IS" AND WITHOUT WARRANTY OF ANY KIND, EXPRESS, IMPLIED OR OTHERWISE, INCLUDING WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

IN NO EVENT SHALL SAM LEFFLER OR SILICON GRAPHICS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES OF ANY KIND, OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER OR NOT ADVISED OF THE POSSIBILITY OF DAMAGE, AND ON ANY THEORY OF LIABILITY, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

♦♦♦

From:

tiff-3.8.2/tiff-3.8.2/ChangeLog

Removed LZW Compression to comply with Unisys patent extortion.

♦♦♦

From:

tiff-3.8.2/tiff-3.8.2/html/TIFFTechNote2.html

It should be noted that the optional arithmetic-coding extension is subject to several US and Japanese patents. To avoid patent problems, use of arithmetic coding processes in TIFF files intended for inter-application interchange is discouraged.

♦♦♦

From:

tiff-3.8.2/tiff-3.8.2/html/v3.5.3.html

Unisys has the patent on LZW compression and have been very active in their enforcement of late, demanding payments of \$5000 or more from websites using unlicensed software to create GIF's. They could well do the same do persons using libtiff to create LZW compressed TIFF images.

♦♦♦

From:

tiff-3.8.2/tiff-3.8.2/contrib/pds/tif_imageiter.c

This code was taken from TIFFReadRGBALmage() in tif_getimage.c of the original TIFF distribution, and simplified and generalized to provide this general iteration capability.

♦♦♦

From:

time 1.7-37

Software: time
Version: 1.7-37
File or Package: time-1.7-37.fc12.src.rpm
OSI Licenses: GPLv2, GPLv2+, MIT/X11
Other Licenses:
URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Fedora/source/SRPMS/time-1.7-37.fc12.src.rpm>
Group: User Space Apps / Applications/Utilities
Description: The GNU time utility runs another program, collects information about the resources used by that program while it is running, and displays the results. 'time' is a program that measures many of the CPU resources, such as time and memory, that other programs use. The GNU version can format the output in arbitrary ways by using a printf-style format string to include various resource measurements. Some systems do not provide much information about program resource use; 'time' reports unavailable information as zero values.
Common Usage: Tool, Utility
Package Size: 648 KB (0.63 MB)
Folders / Files: 3 / 34
Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

tipcutils 1.1.8

Software:	tipcutils
Version:	1.1.8
File or Package:	tipcutils-1.1.8.tar
OSI Licenses:	GPLv2, BSDv2
Other Licenses:	
URL:	http://cdnetworks-kr-1.dl.sourceforge.net/project/tipc/tipc-linux-extras/
Group:	User Space Apps
Description:	utilities tool for TIPC - TIPC is a reliable, efficient and transparent interprocess and interprocessor communication protocol. You will need a TIPC kernel module and this package to configure and manage TIPC on your system. Version %{version} of the tipc-config tool is required to configure and operate a system running TIPC %{_tipc_version}. It is recommended that the tipc-config tool only be used to remotely manage nodes running a compatible version of TIPC. NOTE: Future releases of TIPC %{_tipc_version} may include checks to ensure the wrong version of tipc-config is not used; for now, most commands will work anyway and those that can't should simply fail. For more information please read tipc_users_guide.txt

traceroute 2.0.15-1

Software: traceroute
Version: 2.0.15-1
File or Package: traceroute-2.0.15-1.fc13.src.rpm
OSI Licenses: GPLv2, GPLv2+, LGPLv2.1, LGPLv2.1+
Other Licenses:
URL: <http://download.fedora.redhat.com/pub/fedora/linux/updates/13/SRPMS/traceroute-2.0.15-1.fc13.src.rpm>
Group: User Space Apps / Applications/Internet
Description: Tracks the route packets take across an IPv4/IPv6 network on their way to a given host. It utilizes the IP protocol's time to live (TTL) field and attempts to elicit an ICMP TIME_EXCEEDED response from each gateway along the path to the host. The traceroute utility displays the route used by IP packets on their way to a specified network (or Internet) host. Traceroute displays the IP number and host name (if possible) of the machines along the route taken by the packets. Traceroute is used as a network debugging tool. If you're having network connectivity problems, traceroute will show you where the trouble is coming from along the route. Install traceroute if you need a tool for diagnosing network connectivity problems.
Common Usage: Utility
Package Size: 448 KB (0.44 MB)

♦♦♦

From:
<http://www.opencontent.org/openpub/> [as of 06/10/11]
Open Publication License v1.0, 8 June 1999

I. REQUIREMENTS ON BOTH UNMODIFIED AND MODIFIED VERSIONS

The Open Publication works may be reproduced and distributed in whole or in part, in any medium physical or electronic, provided that the terms of this license are adhered to, and that this license or an incorporation of it by reference (with any options elected by the author(s) and/or publisher) is displayed in the reproduction.

Proper form for an incorporation by reference is as follows:

Copyright (c) <year> by <author's name or designee>. This material may be distributed only subject to the terms and conditions set forth in the Open Publication License, vX.Y or later (the latest version is presently available at <http://www.opencontent.org/openpub/>).

The reference must be immediately followed with any options elected by the author(s) and/or publisher of the document (see section VI).

Commercial redistribution of Open Publication-licensed material is permitted.

Any publication in standard (paper) book form shall require the citation of the original publisher and author. The publisher and author's names shall appear on all outer surfaces of the book. On all outer surfaces of the book the original publisher's name shall be as large as the title of the work and cited as possessive with respect to the title.

II. COPYRIGHT

The copyright to each Open Publication is owned by its author(s) or designee.

III. SCOPE OF LICENSE

The following license terms apply to all Open Publication works, unless otherwise explicitly stated in the document.

Mere aggregation of Open Publication works or a portion of an Open Publication work with other works or programs on the same media shall not cause this license to apply to those other works. The aggregate work shall contain a notice specifying the inclusion of the Open Publication material and appropriate copyright notice.

SEVERABILITY. If any part of this license is found to be unenforceable in any jurisdiction, the remaining portions of the license remain in force.

NO WARRANTY. Open Publication works are licensed and provided "as is" without warranty of any kind, express or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose or a warranty of non-infringement.

IV. REQUIREMENTS ON MODIFIED WORKS

All modified versions of documents covered by this license, including translations, anthologies, compilations and partial documents, must meet the following requirements:

The modified version must be labeled as such.

The person making the modifications must be identified and the modifications dated.

Acknowledgement of the original author and publisher if applicable must be retained according to normal academic citation practices.

The location of the original unmodified document must be identified.

The original author's (or authors') name(s) may not be used to assert or imply endorsement of the resulting document without the original author's (or authors') permission.

V. GOOD-PRACTICE RECOMMENDATIONS

In addition to the requirements of this license, it is requested from and strongly recommended of redistributors that:

If you are distributing Open Publication works on hardcopy or CD-ROM, you provide email notification to the authors of your intent to redistribute at least thirty days before your manuscript or media freeze, to give the authors time to provide updated documents. This notification should describe modifications, if any, made to the document.

All substantive modifications (including deletions) be either clearly marked up in the document or else described in an attachment to the document.

Finally, while it is not mandatory under this license, it is considered good form to offer a free copy of any hardcopy and CD-ROM expression of an Open Publication-licensed work to its author(s).

VI. LICENSE OPTIONS

The author(s) and/or publisher of an Open Publication-licensed document may elect certain options by appending language to the reference to or copy of the license. These options are considered part of the license instance and must be included with the license (or its incorporation by reference) in derived works.

A. To prohibit distribution of substantively modified versions without the explicit permission of the author(s). "Substantive modification" is defined as a change to the semantic content of the document, and excludes mere changes in format or typographical corrections. To accomplish this, add the phrase 'Distribution of substantively modified versions of this document is prohibited without the explicit permission of the copyright holder.' to the license reference or copy.

B. To prohibit any publication of this work or derivative works in whole or in part in standard (paper) book form for commercial purposes unless prior permission is obtained from the copyright holder. To accomplish this, add the phrase 'Distribution of the work or derivative of the work in

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

any standard (paper) book form is prohibited unless prior permission is obtained from the copyright holder.' to the license reference or copy.

OPEN PUBLICATION POLICY APPENDIX:
(This is not considered part of the license.)

Open Publication works are available in source format via the Open Publication home page at <http://works.opencontent.org/>.

Open Publication authors who want to include their own license on Open Publication works may do so, as long as their terms are not more restrictive than the Open Publication license.

tslib 1.0

Software:	tslib
Version:	1.0
File or Package:	tslib-1.0.tar.bz2
OSI Licenses:	GPLv2, LGPLv2
Other Licenses:	
URL:	http://download.berlios.de/tslib/tslib-1.0.tar.bz2
Group:	User Space Libraries / Applications/Internet
Description:	Tslib is a Linux library for initializing and reading data from a range of touchscreen devices, using standard methods. Amongst other things, it can also be used to filter and smooth the data if required. The idea of tslib is to have a core library that provides standardised services, and a set of plugins to manage the conversion and filtering as needed.
Common Usage:	Library

ttf-arphic-ukai_0.1.20060928.orig/ttf-arphic-ukai-0.1.20060928/license/english/arphicpl.txt

ARPHIC PUBLIC LICENSE

Copyright (C) 1999 Arphic Technology Co., Ltd.

11Fl. No.168, Yung Chi Rd., Taipei, 110 Taiwan

All rights reserved except as specified below.

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is forbidden.

Preamble - The licenses for most software are designed to take away your freedom to share and change it. By contrast, the ARPHIC PUBLIC LICENSE specifically permits and encourages you to use this software, provided that you give the recipients all the rights that we gave you and make sure they can get the modifications of this software.

Legal Terms

0. Definitions:

Throughout this License, "Font" means the TrueType fonts "AR PL Mingti2L Big5", "AR PL KaitiM Big5" (BIG-5 character set) and "AR PL SungtiL GB", "AR PL KaitiM GB" (GB character set) which are originally distributed by Arphic, and the derivatives of those fonts created through any modification including modifying glyph, reordering glyph, converting format, changing font name, or adding/deleting some characters in/from glyph table.

"PL" means "Public License".

"Copyright Holder" means whoever is named in the copyright or copyrights for the Font.

"You" means the licensee, or person copying, redistributing or modifying the Font.

"Freely Available" means that you have the freedom to copy or modify the Font as well as redistribute copies of the Font under the same conditions you received, not price. If you wish, you can charge for this service.

1. Copying & Distribution

You may copy and distribute verbatim copies of this Font in any medium, without restriction, provided that you retain this license file (ARPHICPL.TXT) unaltered in all copies.

2. Modification

You may otherwise modify your copy of this Font in any way, including modifying glyph, reordering glyph, converting format, changing font name, or adding/deleting some characters in/from glyph table, and copy and distribute such modifications under the terms of Section 1 above, provided that the following conditions are met:

a) You must insert a prominent notice in each modified file stating how and when you changed that file.

b) You must make such modifications Freely Available as a whole to all third parties under the terms of this License, such as by offering access to copy the modifications from a designated place, or distributing the modifications on a medium customarily used for software interchange.

c) If the modified fonts normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a

document version 2.60

notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the Font under these conditions, and telling the user how to view a copy of this License.

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Font, and can be reasonably considered independent and separate works in themselves, then this License and its terms, do not apply to those sections when you distribute them as separate works. Therefore, mere aggregation of another work not based on the Font with the Font on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. Condition Subsequent

You may not copy, modify, sublicense, or distribute the Font except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Font will automatically retroactively void your rights under this License. However, parties who have received copies or rights from you under this License will keep their licenses valid so long as such parties remain in full compliance.

4. Acceptance

You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to copy, modify, sublicense or distribute the Font. These actions are prohibited by law if you do not accept this License. Therefore, by copying, modifying, sublicensing or distributing the Font, you indicate your acceptance of this License and all its terms and conditions.

5. Automatic Receipt

Each time you redistribute the Font, the recipient automatically receives a license from the original licensor to copy, distribute or modify the Font subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

6. Contradiction

If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Font at all. For example, if a patent license would not permit royalty-free redistribution of the Font by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Font.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

7. NO WARRANTY

BECAUSE THE FONT IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE FONT, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS OR OTHER PARTIES PROVIDE THE FONT "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO

Bitstream Vera Fonts Copyright

The fonts have a generous copyright, allowing derivative works (as long as "Bitstream" or "Vera" are not in the names), and full redistribution (so long as they are not *sold* by themselves). They can be bundled, redistributed and sold with any software. The fonts are distributed under the following copyright:

Copyright

Copyright (c) 2003 by Bitstream, Inc. All Rights Reserved.

Bitstream Vera is a trademark of Bitstream, Inc.

Permission is hereby granted, free of charge, to any person obtaining a copy of the fonts accompanying this license ("Fonts") and associated documentation files (the "Font Software"), to reproduce and distribute the Font Software, including without limitation the rights to use, copy, merge, publish, distribute, and/or sell copies of the Font Software, and to permit persons to whom the Font Software is furnished to do so, subject to the following conditions: The above copyright and trademark notices and this permission notice shall be included in all copies of one or more of the Font Software typefaces.

The Font Software may be modified, altered, or added to, and in particular the designs of glyphs or characters in the Fonts may be modified and additional glyphs or characters may be added to the Fonts, only if the fonts are renamed to names not containing either the words "Bitstream" or the word "Vera".

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

This License becomes null and void to the extent applicable to Fonts or Font Software that has been modified and is distributed under the "Bitstream Vera" names.

The Font Software may be sold as part of a larger software package but no copy of one or more of the Font Software typefaces may be sold by itself.

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT.

IN NO EVENT SHALL BITSTREAM OR THE GNOME FOUNDATION BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

Except as contained in this notice, the names of Gnome, the Gnome Foundation, and Bitstream Inc., shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Font Software without prior written authorization from the Gnome Foundation or Bitstream Inc., respectively. For further information, contact: fonts at gnome dot org.

Copyright FAQ

1. I don't understand the resale restriction... What gives?

Bitstream is giving away these fonts, but wishes to ensure its competitors can't just drop the fonts as is into a font sale system and sell them as is. It seems fair that if Bitstream can't make money from the Bitstream Vera fonts, their competitors should not be able to do so either. You can sell the fonts as part of any software package, however.

2. I want to package these fonts separately for distribution and sale as part of a larger software package or system. Can I do so?

Yes. A RPM or Debian package is a "larger software package" to begin with, and you aren't selling them independently by themselves. See 1. above.

3. Are derivative works allowed?

Yes!

4. Can I change or add to the font(s)?

Yes, but you must change the name(s) of the font(s).

5. Under what terms are derivative works allowed?

You must change the name(s) of the fonts. This is to ensure the quality of the fonts, both to protect Bitstream and Gnome. We want to ensure that if an application has opened a font specifically of these names, it gets what it expects (though of course, using fontconfig, substitutions could still could have occurred during font opening). You must include the Bitstream copyright. Additional copyrights can be added, as per copyright law. Happy Font Hacking!

6. If I have improvements for Bitstream Vera, is it possible they might get adopted in future versions?

Yes. The contract between the Gnome Foundation and Bitstream has provisions for working with Bitstream to ensure quality additions to the Bitstream Vera font family. Please contact us if you have such additions.

document version 2.60

Note, that in general, we will want such additions for the entire family, not just a single font, and that you'll have to keep both Gnome and Jim Lyles, Vera's designer, happy! To make sense to add glyphs to the font, they must be stylistically in keeping with Vera's design. Vera cannot become a "ransom note" font. Jim Lyles will be providing a document describing the design elements used in Vera, as a guide and aid for people interested in contributing to Vera.

7. I want to sell a software package that uses these fonts: Can I do so? Sure. Bundle the fonts with your software and sell your software with the fonts. That is the intent of the copyright.

8. If applications have built the names "Bitstream Vera" into them, can I override this somehow to use fonts of my choosing? This depends on exact details of the software. Most open source systems and software (e.g., Gnome, KDE, etc.) are now converting to use fontconfig (see www.fontconfig.org) to handle font configuration, selection and substitution; it has provisions for overriding font names and substituting alternatives. An example is provided by the supplied local.conf file, which chooses the family Bitstream Vera for "sans", "serif" and "monospace". Other software (e.g., the XFree86 core server) has other mechanisms for font substitution.

From: ttf-bitstream-vera-1.10@ttdesktop.org
Freetype may or may not be configured in ways that may implement execution of possibly patented (in some parts of the world) TrueType hinting algorithms, particularly at small sizes. Best results are obtained while using these algorithms. The freetype autohinter (used when the possibly patented algorithms are not used) continues to improve with each release. If you are using the autohinter, please ensure you are using an up to date version of freetype before reporting problems.

ttf-kochi 1.0.20030809

Software:	ttf-kochi-mincho
Version:	1.0.20030809
File or Package:	ttf-kochi_1.0.20030809.orig.tar.gz
OSI Licenses:	None identified
Other Licenses:	Public Domain
URL:	http://us.archive.ubuntu.com/ubuntu/pool/main/t/ttf-kochi/ttf-kochi_1.0.20030809.orig.tar.gz
Group:	X11
Description:	Kochi Subst Gothic & Mincho (ttf-kochi-mincho) is a Japanese mincho TrueType font without naga10, so it's DFSG-free. The family of ttf-kochi is very smooth compared with current free Japanese TrueType fonts. It has bitmap hinting information, so it's not jagged to display on the CRT. This font is suitable for both printing and displaying Japanese characters.
Common Usage:	Library
Package Size:	33.2 MB

If you as an individual use the distribution as font as such, or convert it, there is no necessity to inform the Wadalab group. But in case you redistribute it, we request you kindly to forward a note to ftp.ipl.t.u-tokyo.ac.jp with the additional information of what has been altered. At that location we also plan to store the upgrade, to give the user the possibility to receive always the latest version.

In case you want to point out mistakes in the outline of Kanjis or are not satisfied with the poor design, please do not hesitate to contact tanaka@ipl.t.u-tokyo.ac.jp.

REMOVAL OR MODIFICATION OF THIS HEADER IS STRICTLY PROHIBITED BY LAW

SciTech Nucleus License Agreement Version 1.0
PREAMBLE - SciTech Software has made a tremendous investment over many years in the development of SciTech Nucleus Device Driver architecture. SciTech is releasing the header files and device driver loader library source code under a special license that is different to the SciTech MGL Public License. The intent of this license is to all developers wishing to utilise the SciTech Nucleus device drivers in their applications or Operating Systems, the ability to do so without restriction.

However the SciTech Nucleus License Agreement specifically excludes use of the headers and source code to build device drivers that compete with SciTech Software's core, commercial products, free or otherwise. Hence if you are an application developer or operating system developer, you may use the headers and loader library source code to add support for Nucleus device drivers to your products. If you are a device driver developer, you may not use the Nucleus header files and loader library source to build device drivers products that are compatible with the SciTech Nucleus device driver architecture (ie: binary compatible drivers that can replace our commercial drivers).

1. Definitions.
 - 1.1. "SciTech" means SciTech Software Inc, located at 180 East 4th Street, Suite 300, Chico, CA 95928 USA (<http://www.scitechsoft.com>).
 - 1.2. "SciTech Display Doctor" means any version of the commercial device driver products developed and sold by SciTech.
 - 1.3. "Covered Code" means the Original Code.
 - 1.4. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.
 - 1.5. "Executable" means Covered Code in any form other than Source Code.
 - 1.6. "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.
 - 1.7. "License" means this document.

1.8. "Source Code" means the preferred form of the Covered Code, including all modules it contains.

1.9. "You" means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means

(a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or

(b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.

2. Source Code License.

2.1. The SciTech Grant.

SciTech hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims: (a) to use, reproduce, display, perform, sublicense and distribute the Original Code WITHOUT Modifications, or as part of a Larger Work.

2.2. Modifications.

You may NOT under any circumstances make and/or distribute modifications to the Source Code. You may only use and distribute unmodified official versions of the Source Code as published by SciTech.

3. Distribution Obligations.

3.1. Application of License.

The Source Code version of Covered Code may be distributed only under the terms of this License, and You must include a copy of this License with every copy of the Source Code You distribute. You may not offer or impose any terms on any Source Code version that alters or restricts the applicable version of this License or the recipients' rights hereunder.

3.2. Distribution of Executable Versions.

You may distribute Covered Code in Executable form only if the requirements of Section 3.1-3.3 have been met for that Covered Code. You may distribute the Executable version of Covered Code under a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License. You hereby agree to indemnify the SciTech for any liability incurred by the SciTech as a result of any such terms You offer.

3.3. Larger Works.

You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product, provided that the Larger Work is NOT a device driver product that competes with SciTech Display Doctor, whether the Larger Work is free or sold for profit.

4. Application of this License.

This License applies to code to which the SciTech has attached the notice in Exhibit A, and to related Covered Code.

5. DISCLAIMER OF WARRANTY.

COVERED CODE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT.

THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED CODE IS WITH YOU. SHOULD ANY COVERED CODE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE SciTech OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED CODE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

6. TERMINATION.

This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses to the Covered Code which are properly granted shall survive any termination of this License. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED CODE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO YOU OR ANY OTHER PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES.

THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THAT EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

8. U.S. GOVERNMENT END USERS.

The Covered Code is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" and "commercial computer software documentation," as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise), excluding its conflict-of-law provisions. With respect to disputes in which at least one party is a citizen of, or an entity chartered or registered to do business in, the United States of America:

(a) unless otherwise agreed in writing, all disputes relating to this License (excepting any dispute relating to intellectual property rights) shall be subject to final and binding arbitration, with the losing party paying all costs of arbitration;

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

(b) any arbitration relating to this Agreement shall be held in Butte County, California, under the auspices of JAMS/EndDispute; and

(c) any litigation relating to this Agreement shall be subject to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Butte County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys fees and expenses.

The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

10. RESPONSIBILITY FOR CLAIMS.

Except in cases where another Contributor has failed to comply with Section 3.4, You are responsible for damages arising, directly or indirectly, out of Your utilization of rights under this License, based on the number of copies of Covered Code you made available, the revenues you received from utilizing such rights, and other relevant factors. You agree to work with affected parties to distribute responsibility on an equitable basis.

Intended to follow the original Thompson and Ritchie "small and simple is beautiful" philosophy, which incidentally is a good match to today's BusyBox.

Copyright (C) 2000,2001 Larry Doolittle <larry@doolittle.boa.org>

Credits: The parser routines proper are all original material, first written Dec 2000 and Jan 2001 by Larry Doolittle. The execution engine, the builtins, and much of the underlying support has been adapted from busybox-0.49pre's lash, which is
Copyright (C) 2000 by Lineo, Inc., and written by Erik Andersen <andersen@lineo.com>, <andersee@debian.org>. That, in turn, is based in part on ladsh.c, by Michael K. Johnson and Erik W. Troan, which they placed in the public domain. I don't know how much of the Johnson/Troan code has survived the repeated rewrites.

NOTICES:

From:
u-boot-1.3.0-rc3/u-boot-1.3.0-rc3/copying
Copyright (C) 1989, 1991 Free Software Foundation, Inc.
[Above file contains a full copy of the GNU General Public License version 2 (GPLv2). A copy of the GPLv2 can be found in the addendum of this document.]
NOTE! This copyright does not cover the so-called "standalone" applications that use U-Boot services by means of the jump table provided by U-Boot exactly for this purpose - this is merely considered normal use of U-Boot, and does not fall under the heading of "derived work".

The header files "include/image.h" and "include/asm-u-boot.h" define interfaces to U-Boot. Including these (unmodified) header files in another file is considered normal use of U-Boot, and does not fall under the heading of "derived work". Also note that the GPL below is copyrighted by the Free Software Foundation, but the instance of code that it refers to (the U-Boot source code) is copyrighted by me and others who actually wrote it. - Wolfgang Denk

Based on code whose Original Author and Copyright information follows:

Copyright (c) 1998 by Michael Barr.

This software is placed into the public domain and may be used for any purpose. However, this notice must not be changed or removed and no warranty is either expressed or implied by its publication or distribution.

From:

u-boot-1.3.0-rc3/u-boot-1.3.0-rc3/common/hush.c

Intended to follow the original Thompson and Ritchie "small and simple is beautiful" philosophy, which incidentally is a good match to today's BusyBox.

Copyright (C) 2000,2001 Larry Doolittle <larry@doolittle.boa.org>

Credits: The parser routines proper are all original material, first written Dec 2000 and Jan 2001 by Larry Doolittle. The execution engine, the builtins, and much of the underlying support has been adapted from busybox-0.49pre's lash, which is

Copyright (C) 2000 by Lineo, Inc., and written by Erik Andersen <andersen@lineo.com>, <andersee@debian.org>. That, in turn, is based in part on ladsh.c, by Michael K. Johnson and Erik W. Troan, which they placed in the public domain. I don't know how much of the Johnson/Troan code has survived the repeated rewrites.

From:

u-boot-1.3.4/u-boot-1.3.4/copying

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

[Above file contains a full copy of the GNU General Public License version 2 (GPLv2). A copy of the GPLv2 can be found in the addendum of this document.]

NOTE! This copyright does not cover the so-called "standalone" applications that use U-Boot services by means of the jump table provided by U-Boot exactly for this purpose - this is merely considered normal use of U-Boot, and does not fall under the heading of "derived work".

The header files "include/image.h" and "include/asm- u-boot.h" define interfaces to U-Boot. Including these (unmodified) header files in another file is considered normal use of U-Boot, and does not fall under the heading of "derived work". Also note that the GPL below is copyrighted by the Free Software Foundation, but the instance of code that it refers to (the U-Boot source code) is copyrighted by me and others who actually wrote it. - Wolfgang Denk

NOTICES:

From:
u-boot-2008.10/u-boot-2008.10/copying
Copyright (C) 1989, 1991 Free Software Foundation, Inc.
[Above file contains a full copy of the GNU General Public License version 2 (GPLv2). A copy of the GPLv2 can be found in the addendum of this document.]
NOTE! This copyright does not cover the so-called "standalone" applications that use U-Boot services by means of the jump table provided by U-Boot exactly for this purpose - this is merely considered normal use of U-Boot, and does not fall under the heading of "derived work".

The header files "include/image.h" and "include/asm- u-boot.h" define interfaces to U-Boot. Including these (unmodified) header files in another file is considered normal use of U-Boot, and does not fall under the heading of "derived work". Also note that the GPL below is copyrighted by the Free Software Foundation, but the instance of code that it refers to (the U-Boot source code) is copyrighted by me and others who actually wrote it. - Wolfgang Denk

From:
u-boot-2008.10/u-boot-2008.10/lib_generic/lzma/lzma.txt
Copyright (C) 1999-2007 Igor Pavlov

LICENSE - LZMA SDK is available under any of the following licenses:

- 1) GNU Lesser General Public License (GNU LGPL)
- 2) Common Public License (CPL)
- 3) Simplified license for unmodified code (read SPECIAL EXCEPTION)
- 4) Proprietary license

It means that you can select one of these four options and follow rules of that license.

1,2) GNU LGPL and CPL licenses are pretty similar and both these licenses are classified as "Free software licenses" at <http://www.gnu.org/> "OSI-approved" at <http://www.opensource.org/>

3) SPECIAL EXCEPTION - Igor Pavlov, as the author of this code, expressly permits you to statically or dynamically link your code (or bind by name) to the files from LZMA SDK without subjecting your linked code to the terms of the CPL or GNU LGPL. Any modifications or additions to files from LZMA SDK, however, are subject to the GNU LGPL or CPL terms. SPECIAL EXCEPTION allows you to use LZMA SDK in applications with closed code, while you keep LZMA SDK code unmodified.

SPECIAL EXCEPTION 2: Igor Pavlov, as the author of this code, expressly permits you to use this code under the same terms and conditions contained in the License Agreement you have for any previous version of LZMA SDK developed by Igor Pavlov. SPECIAL EXCEPTION 2 allows owners of proprietary licenses to use latest version of LZMA SDK as update for previous versions.

SPECIAL EXCEPTION 3: Igor Pavlov, as the author of this code, expressly permits you to use code of the following files: BranchTypes.h, LzmaTypes.h, LzmaTest.c, LzmaStateTest.c, LzmaAlone.cpp, LzmaAlone.cs, LzmaAlone.java as public domain code.

4) Proprietary license - LZMA SDK also can be available under a proprietary license which can include: 1) Right to modify code without subjecting modified code to the terms of the CPL or GNU LGPL.

2) Technical support for code. To request such proprietary license or any additional consultations, send email message from that page: <http://www.7-zip.org/support.html>

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307. You should have received a copy of the Common Public License along with this library.

From:
u-boot-2008.10/u-boot-2008.10/doc/README.nios
The Nios port does NOT include ANY sources that Altera has the copyright. This was a conscious decision ... not an accident. The Altera license is not clear in terms of distributing Altera sources (when altera silicon is not involved). This isn't really a problem as little, if any, of the Altera source contains features that are not already available in U-Boot.

URL: http://www.denx.de/wiki/U-Boot
Group: Other
Description: This directory contains the source code for U-Boot, a boot loader for Embedded boards based on PowerPC, ARM, MIPS and several other processors, which can be installed in a boot ROM and used to initialize and test the hardware or to download and run application code. u-boot is built and loaded onto target boards as binary firmware. u-boot is used to load the kernel and boot the board.
Common Usage: tool
Package Size: 70.2 MB
Folders / Files: 677 / 5,667
Source Path:

NOTICES:

From:
u-boot-2009.01/u-boot-2009.01/copying
Copyright (C) 1989, 1991 Free Software Foundation, Inc.
[Above file contains a full copy of the GNU General Public License version 2 (GPLv2). A copy of the GPLv2 can be found in the addendum of this document.]
NOTE! This copyright does not cover the so-called "standalone" applications that use U-Boot services by means of the jump table provided by U-Boot exactly for this purpose - this is merely considered normal use of U-Boot, and does not fall under the heading of "derived work".

The header files "include/image.h" and "include/asm-u-boot.h" define interfaces to U-Boot. Including these (unmodified) header files in another file is considered normal use of U-Boot, and does not fall under the heading of "derived work".

Also note that the GPL below is copyrighted by the Free Software Foundation, but the instance of code that it refers to (the U-Boot source code) is copyrighted by me and others who actually wrote it. - Wolfgang Denk

From:

u-boot-2009.01/u-boot-2009.01/lib_generic/lzma/lzma.txt

Copyright (C) 1999-2007 Igor Pavlov

LICENSE - LZMA SDK is available under any of the following licenses:

- 1) GNU Lesser General Public License (GNU LGPL)
- 2) Common Public License (CPL)
- 3) Simplified license for unmodified code (read SPECIAL EXCEPTION)
- 4) Proprietary license

It means that you can select one of these four options and follow rules of that license.

1,2) GNU LGPL and CPL licenses are pretty similar and both these licenses are classified as

- "Free software licenses" at <http://www.gnu.org/>
- "OSI-approved" at <http://www.opensource.org/>

3) SPECIAL EXCEPTION

Igor Pavlov, as the author of this code, expressly permits you to statically or dynamically link your code (or bind by name) to the files from LZMA SDK without subjecting your linked code to the terms of the CPL or GNU LGPL. Any modifications or additions to files from LZMA SDK, however, are subject to the GNU LGPL or CPL terms.

SPECIAL EXCEPTION allows you to use LZMA SDK in applications with closed code, while you keep LZMA SDK code unmodified.

SPECIAL EXCEPTION 2: Igor Pavlov, as the author of this code, expressly permits you to use this code under the same terms and conditions contained in the License Agreement you have for any previous version of LZMA SDK developed by Igor Pavlov.

SPECIAL EXCEPTION 2 allows owners of proprietary licenses to use latest version of LZMA SDK as update for previous versions.

SPECIAL EXCEPTION 3: Igor Pavlov, as the author of this code, expressly permits you to use code of the following files:
BranchTypes.h, LzmaTypes.h, LzmaTest.c, LzmaStateTest.c, LzmaAlone.cpp, LzmaAlone.cs, LzmaAlone.java as public domain code.

4) Proprietary license

LZMA SDK also can be available under a proprietary license which can include:

- 1) Right to modify code without subjecting modified code to the terms of the CPL or GNU LGPL
- 2) Technical support for code

To request such proprietary license or any additional consultations, send email message from that page: <http://www.7-zip.org/support.html>

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307

You should have received a copy of the Common Public License along with this library.

Credits: The parser routines proper are all original material, first written Dec 2000 and Jan 2001 by Larry Doolittle. The execution engine, the builtins, and much of the underlying support has been adapted from busybox-0.49pre's lash, which is **Copyright (C) 2000 by Lineo, Inc.**, and written by Erik Andersen <andersen@lineo.com>, <andersee@debian.org>. That, in turn, is based in part on ladsh.c, by Michael K. Johnson and Erik W. Troan, which they placed in the public domain. I don't know how much of the Johnson/Troan code has survived the repeated rewrites.

This code implements the MD5 message-digest algorithm. The algorithm
is due to Ron Rivest. This code was written by Colin Plumb in 1993, no
copyright is claimed. This code is in the public domain; do with it what
you wish.

Equivalent code is available from RSA Data Security, Inc. This code has
been tested against that, and is equivalent, except that you don't need to
include two pages of legalese with every copy.

Description: This directory contains the source code for U-
Boot, a boot loader for Embedded boards based
on PowerPC, ARM, MIPS and several other
processors, which can be installed in a boot ROM
and used to initialize and test the hardware or to
download and run application code. u-boot is built
and loaded onto target boards as binary firmware.
u-boot is used to load the kernel and boot the
board.

Common Usage: tool
Package Size: 73.9 MB

NOTICES:

From:
u-boot-2009.06/u-boot-2009.06/copying
Copyright (C) 1989, 1991 Free Software Foundation, Inc.
[Above file contains a full copy of the GNU General Public License
version 2 (GPLv2). A copy of the GPLv2 can be found in the addendum
of this document.]

NOTE! This copyright does not cover the so-called "standalone"
applications that use U-Boot services by means of the jump table
provided by U-Boot exactly for this purpose - this is merely considered
normal use of U-Boot, and does not fall under the heading of "derived
work".

The header files "include/image.h" and "include/asm-u-boot.h" define
interfaces to U-Boot. Including these (unmodified) header files in another
file is considered normal use of U-Boot, and does not fall under the
heading of "derived work".

Also note that the GPL below is copyrighted by the Free Software
Foundation, but the instance of code that it refers to (the U-Boot source
code) is copyrighted by me and others who actually wrote it. - Wolfgang
Denk

eCos is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 or (at your option) any later version.

eCos is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with eCos; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307.

As a special exception, if other files instantiate templates or use macros or inline functions from this file, or you compile this file and link it with other works to produce a work based on this file, this file does not by itself cause the resulting work to be covered by the GNU General Public License. However the source code for this file must still be made available in accordance with section (3) of the GNU General Public License.

This exception does not invalidate any other reasons why a work based on this file might be covered by the GNU General Public License.

Alternative licenses for eCos may be arranged by contacting Red Hat, Inc. at <http://sources.redhat.com/ecos/ecos-license/>

From:
u-boot-2009.06/u-boot-2009.06/lib_generic/lzma/LzmaDecode.c
Copyright (c) 1999-2006 Igor Pavlov (2006-05-01) <http://www.7-zip.org/>

LZMA SDK is licensed under two licenses:
1) GNU Lesser General Public License (GNU LGPL)
2) Common Public License (CPL)

It means that you can select one of these two licenses and follow rules of that license.

SPECIAL EXCEPTION: Igor Pavlov, as the author of this Code, expressly permits you to statically or dynamically link your Code (or bind by name) to the interfaces of this file without subjecting your linked Code to the terms of the CPL or GNU LGPL. Any modifications or additions to this file, however, are subject to the LGPL or CPL terms.

♦♦♦

From:
u-boot-2009.06/u-boot-2009.06/lib_generic/lzma/lzma.txt
Copyright (C) 1999-2007 Igor Pavlov

LICENSE - LZMA SDK is available under any of the following licenses:
1) GNU Lesser General Public License (GNU LGPL)
2) Common Public License (CPL)
3) Simplified license for unmodified code (read SPECIAL EXCEPTION)
4) Proprietary license

It means that you can select one of these four options and follow rules of that license.

1,2) GNU LGPL and CPL licenses are pretty similar and both these licenses are classified as
- "Free software licenses" at <http://www.gnu.org/>
- "OSI-approved" at <http://www.opensource.org/>

3) **SPECIAL EXCEPTION**
Igor Pavlov, as the author of this code, expressly permits you to statically or dynamically link your code (or bind by name) to the files from LZMA SDK without subjecting your linked code to the terms of the CPL or GNU LGPL. Any modifications or additions to files from LZMA SDK, however, are subject to the GNU LGPL or CPL terms.

SPECIAL EXCEPTION allows you to use LZMA SDK in applications with closed code, while you keep LZMA SDK code unmodified.

SPECIAL EXCEPTION 2: Igor Pavlov, as the author of this code, expressly permits you to use this code under the same terms and conditions contained in the License Agreement you have for any previous version of LZMA SDK developed by Igor Pavlov.

SPECIAL EXCEPTION 2 allows owners of proprietary licenses to use latest version of LZMA SDK as update for previous versions.

SPECIAL EXCEPTION 3: Igor Pavlov, as the author of this code, expressly permits you to use code of the following files:
BranchTypes.h, LzmaTypes.h, LzmaTest.c, LzmaStateTest.c, LzmaAlone.cpp, LzmaAlone.cs, LzmaAlone.java as public domain code.

4) Proprietary license
LZMA SDK also can be available under a proprietary license which can include:
1) Right to modify code without subjecting modified code to the terms of the CPL or GNU LGPL
2) Technical support for code

To request such proprietary license or any additional consultations, send email message from that page:
<http://www.7-zip.org/support.html>

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307

You should have received a copy of the Common Public License along with this library.

From:
uboot-update/review/0512-Refresh-LZMA-lib-to-v4.65.patch
LZMA SDK 4.40 Copyright (c) 1999-2006 Igor Pavlov (2006-05-01)
<http://www.7-zip.org/>

LZMA SDK is licensed under two licenses:

- 1) GNU Lesser General Public License (GNU LGPL)
- 2) Common Public License (CPL)

It means that you can select one of these two licenses and follow rules of that license.

SPECIAL EXCEPTION: Igor Pavlov, as the author of this Code, expressly permits you to statically or dynamically link your Code (or bind by name) to the interfaces of this file without subjecting your linked Code
© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

to the terms of the CPL or GNU LGPL. Any modifications or additions to this file, however, are subject to the LGPL or CPL terms.

This file written and distributed to public domain by Igor Pavlov.

This file is part of LZMA SDK 4.40 (2006-05-01)
LZMA SDK Copyright (C) 1999-2007 Igor Pavlov
LZMA SDK provides the documentation, samples, header files, libraries, and tools you need to develop applications that use LZMA compression.

LICENSE - LZMA SDK is available under any of the following licenses:

- 1) GNU Lesser General Public License (GNU LGPL)
- 2) Common Public License (CPL)
- 3) Simplified license for unmodified code (read SPECIAL EXCEPTION)
- 4) Proprietary license

It means that you can select one of these four options and follow rules of that license.

1,2) GNU LGPL and CPL licenses are pretty similar and both these licenses are classified as

"Free software licenses" at <http://www.gnu.org/>
"OSI-approved" at <http://www.opensource.org/>

3) SPECIAL EXCEPTION

Igor Pavlov, as the author of this code, expressly permits you to statically or dynamically link your code (or bind by name) to the files from LZMA SDK without subjecting your linked code to the terms of the CPL or GNU LGPL. Any modifications or additions to files from LZMA SDK, however, are subject to the GNU LGPL or CPL terms.

SPECIAL EXCEPTION allows you to use LZMA SDK in applications with closed code, while you keep LZMA SDK code unmodified.

SPECIAL EXCEPTION 2: Igor Pavlov, as the author of this code, expressly permits you to use this code under the same terms and conditions contained in the License Agreement you have for any previous version of LZMA SDK developed by Igor Pavlov.

SPECIAL EXCEPTION 2 allows owners of proprietary licenses to use latest version of LZMA SDK as update for previous versions.

SPECIAL EXCEPTION 3: Igor Pavlov, as the author of this code, expressly permits you to use code of the following files: BranchTypes.h, LzmaTypes.h, LzmaTest.c, LzmaStateTest.c, LzmaAlone.cpp, LzmaAlone.cs, LzmaAlone.java as public domain code.

4) Proprietary license

LZMA SDK also can be available under a proprietary license which can include:

- 1) Right to modify code without subjecting modified code to the terms of the CPL or GNU LGPL
- 2) Technical support for code

To request such proprietary license or any additional consultations, send email message from that page: <http://www.7-zip.org/support.html>

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307

document version 2.60

You should have received a copy of the Common Public License along with this library. LZMA SDK is written and placed in the public domain by Igor Pavlov.

From:
uboot-update/review/0667-Dual-license-IBM-code-contributions.patch
It was brought to our attention that U-Boot contains code derived from the IBM OpenBIOS source code originally provided with some of the older PowerPC 4xx development boards. As a result, the original license of this code has been carried in the various files for a number of years in the U-Boot project.

IBM is dual-licensing the IBM code contributions already present in U-Boot under either the terms of the GNU General Public License version 2, or the original code license already present.

document version 2.60

Description: UCARP allows a couple of hosts to share common virtual IP addresses in order to provide automatic failover. It is a portable userland implementation of the secure and patent-free Common Address Redundancy Protocol (CARP, OpenBSD's alternative to the patents-bloated VRRP). Strong points of the CARP protocol are: very low overhead, cryptographically signed messages, interoperability between different operating systems and no need for any dedicated extra network link between redundant hosts. Home page is <http://www.ucarp.org/>

embedded Linux systems. uClibc was created to support uClinux, a version of Linux not requiring a memory management unit and thus suited for microcontrollers. uClibc is much smaller than the GNU C Library (glibc), the C library normally used with Linux distributions. While glibc is intended to fully support all relevant C standards across a wide range of hardware and kernel platforms, uClibc is specifically focused on embedded Linux. Features can be enabled or disabled according to space requirements. uClibc runs on standard and MMU-less Linux systems. It supports i386, x86-64, ARM (big/little endian), AVR32, Blackfin, h8300, m68k, MIPS (big/little endian), PowerPC, SuperH (big/little endian), SPARC, and v850 processors.

Common Usage: Library
Package Size: 26.2 MB
Folders / Files: 314 / 4,012
Source Path: wrlinux-4.0/layers/wrll-toolchain-4.4a-336/common/packages

Notes: The following software is intended to be used as a host utility to facilitate development of a target runtime image. If you choose to include it on a target runtime image, you may be subject to additional open source license compliance considerations. It is recommended you consult with your legal counsel for guidance and advice on your particular situation.

IN NO EVENT SHALL THE CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

Notice of general intent:

The linux operating system generally contains large amounts of code that fall under the GNU General Public License, or GPL for short. This file contains source code that by its very nature would always be linked with an application program, and because of this a GPL type of copyright on this file would place restrictions upon the distribution of binary-only commercial software. Since the goal of the Linux project as a whole is not to discourage the development and distribution of commercial software for Linux, this file has been placed under a more relaxed BSD-style of copyright.

It is the general understanding of the above contributors that a program executable linked to a library containing code that falls under the GPL or LGPL style of license is not subject to the terms of the GPL or LGPL license if the program executable(s) that are supplied are linked to a shared library form of the GPL or LGPL library, and as long as the form of the shared library is such that it is possible for the end user to modify and rebuild the library and use it in conjunction with the program executable.

you may include it directly
retain the testregex.c header comment
it uses a very free license to maximize distribution
you can copy that .c comment to any test data files you use using
comment style to be complete
let me know how it works with your libc
also pass on any new tests you cook up

On Wed, 1 Mar 2006 20:15:02 +0100 (CET) Peter S. Mazinger wrote:

Hello Glenn!

I would want to add testregex.c and the related .dat files to the uClibc testsuite. uClibc is licensed under LGPL v2.1. I haven't found any licensing related info on testregex. Is it allowed to use the code there, or should I accomodate the testsuite to download the needed files from the original site each time it is ran?

Thanks, Peter

From:

uclibc-0.9.30/uclibc-0.9.30/README

uClibc is maintained by Erik Andersen and is licensed under the GNU LESSER GENERAL PUBLIC LICENSE. This license allows you to make closed source commercial applications using an unmodified version of uClibc (Please consider sharing some of the money you make ;-). You do not need to give away all your source code just because you use uClibc and/or run on Linux. You should, however, carefully review the license and make certain you understand and abide by it strictly.

As a special exception, you may create a larger work that contains part or all of the Bison parser skeleton and distribute that work under terms of your choice, so long as that work isn't itself a parser generator using the skeleton or a modified version thereof as a parser skeleton. Alternatively, if you modify or redistribute the parser skeleton itself, you may (at your option) remove this special exception, which will cause the skeleton and the resulting Bison output files to be licensed under the GNU General Public License without this special exception. This special exception was added by the Free Software Foundation in version 2.2 of Bison.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Modification and redistribution in source and binary forms is permitted provided that due credit is given to the author and the OpenBSD project by leaving this copyright notice intact.

This code is derived from section 17.1 of Applied Cryptography, second edition, which describes a stream cipher allegedly compatible with RSA Labs "RC4" cipher (the actual description of which is a trade secret). The same algorithm is used as a stream cipher called "arcfour" in Tatu Ylonen's ssh package.

RC4 is a registered trademark of RSA Laboratories.

udev 161-4

Software:	udev
Version:	161-4
File or Package:	udev-161-4.fc14.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2.1, LGPLv2.1+, FDLv1.1+, BSDv2, MIT/X11, Academic, Public Domain
Other Licenses:	
URL:	
Group:	User Space Apps / System Environment/Base
Description:	udev is the device manager for the Linux 2.6 kernel series. Primarily, it manages device nodes in /dev. It is the successor of devfs and hotplug, which means that it handles the /dev directory and all user space actions when adding/removing devices, including firmware load. udev is a generic kernel device manager. It runs as a daemon on a Linux system and listens to uevents the kernel sends out (via netlink socket) if a new device is initialized or a device is removed from the system. The system provides a set of rules that match against exported values of the event and properties of the discovered device. A matching rule will possibly name and create a device node and run configured programs to set-up and configure the device.
Common Usage:	Utility

Other Licenses: Info-Zip (BSD variant), Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/core/development/source/SRPMS/unzip-5.52-2.2.1.src.rpm>
Group: Applications/Archiving
Description: A utility for unpacking zip files.
Common Usage: Utility
Package Size: 7.8 MB
Folders / Files: 45 / 380
Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

NOTICES:

From:
unzip-5.52-2.2.1.src/unzip552/unzip-5.52/license
This is version 2005-Feb-10 of the Info-ZIP copyright and license. The
definitive version of this document should be available at <ftp://ftp.info-zip.org/pub/infozip/license.html> indefinitely.

Copyright (c) 1990-2005 Info-ZIP. All rights reserved.

For the purposes of this copyright and license, "Info-ZIP" is defined as the
following set of individuals:

Mark Adler, John Bush, Karl Davis, Harald Denker, Jean-Michel Dubois, Jean-loup Gailly, Hunter Goatley, Ed Gordon, Ian Gorman, Chris Herborth, Dirk Haase, Greg Hartwig, Robert Heath, Jonathan Hudson, Paul Kienitz, David Kirschbaum, Johnny Lee, Onno van der Linden, Igor Mandrichenko, Steve P. Miller, Sergio Monesi, Keith Owens, George Petrov, Greg Roelofs, Kai Uwe Rommel, Steve Salisbury, Dave Smith, Steven M. Schweda, Christian Spieler, Cosmin Truta, Antoine Verheijen, Paul von Behren, Rich Wales, Mike White.

This software is provided "as is," without warranty of any kind, express or implied. In no event shall Info-ZIP or its contributors be held liable for any direct, indirect, incidental, special or consequential damages arising out of the use of or inability to use this software.

Permission is granted to anyone to use this software for any purpose, including commercial applications, and to alter it and redistribute it freely, subject to the following restrictions:

1. Redistributions of source code must retain the above copyright notice, definition, disclaimer, and this list of conditions.

2. Redistributions in binary form (compiled executables) must reproduce the above copyright notice, definition, disclaimer, and this list of conditions in documentation and/or other materials provided with the distribution. The sole exception to this condition is redistribution of a standard UnZipSFX binary (including SFXWiz) as part of a self-extracting archive; that is permitted without inclusion of this license, as long as the normal SFX banner has not been removed from the binary or disabled.

3. Altered versions--including, but not limited to, ports to new operating systems, existing ports with new graphical interfaces, and dynamic, shared, or static library versions--must be plainly marked as such and must not be misrepresented as being the original source. Such altered versions also must not be misrepresented as being Info-ZIP releases--including, but not limited to, labeling of the altered versions with the names "Info-ZIP" (or any variation thereof, including, but not limited to, different capitalizations), "Pocket UnZip," "WiZ" or "MacZip" without the document version 2.60

explicit permission of Info-ZIP. Such altered versions are further prohibited from misrepresentative use of the Zip-Bugs or Info-ZIP e-mail addresses or of the Info-ZIP URL(s).

4. Info-ZIP retains the right to use the names "Info-ZIP," "Zip," "UnZip," "UnZipSFX," "WiZ," "Pocket UnZip," "Pocket Zip," and "MacZip" for its own source and binary releases.

♦♦♦

From:

unzip-5.52-2.2.1.src/unzip552/unzip-5.52/copying.old

This is the Info-ZIP file COPYING (for UnZip), last updated 17 Jul 2000.

FIRST NOTE: This file contains some details about the copyright history of contributions to the UnZip project. Additionally, it summarises some exceptions to the general BSD-like copyright found in LICENSE that covers our generic code and most of the system specific ports. Please read LICENSE first to find out what is allowed to do with Info-ZIP's UnZip code.

There are currently two explicit copyrights on portions of UnZip code (at least, of which Info-ZIP is aware): Jim Luther's Mac OS File Manager interface code; and Christopher Evans' MacBinaryIII coding code (for the MacOS port).. These copyrights are discussed in more detail below. All remaining code is now (starting with UnZip version 5.41) covered by the new Info-ZIP license. For details, please read the accompanying file LICENSE. The terms and conditions in this license supersede the copyright conditions of the contributions by Igor Mandrichenko (vms/vms.c), Greg Roelofs (zipinfo.c, new version of unshrink.c), Mike White (Windows DLL code in "windll"), Steve P. Miller (Pocket UnZip GUI "wince"), and Mark Adler (inflate/explode decompression core routines, previously put into the public domain). All these Info-ZIP contributors (or "primary" authors) have permitted us to replace their copyright notes by the Info-ZIP License.

Frequently Asked Questions regarding (re)distribution of Zip and UnZip are near the end of this file. There are no known patents on any of the code in UnZip. Unisys claims a patent on LZW encoding and on LZW decoding _in an apparatus that performs LZW encoding_, but the patent appears to exempt a stand-alone decoder (as in UnZip's unshrink.c). Unisys has publicly claimed otherwise, but the issue has never been tested in court. Since this point is unclear, unshrinking is not enabled by default. It is the responsibility of the user to make his or her peace with Unisys and its licensing requirements. (unshrink.c may be removed from future releases altogether.)

The original unzip source code has been extensively modified and almost entirely rewritten (changes include random zipfile access rather than sequential; replacement of unimplode() with explode(); replacement of old unshrink() with new (unrelated) unshrink(); replacement of output routines; addition of inflate(), wildcards, filename-mapping, text translation, ...; etc.).

As far as we can tell, only the core code of the unreduce method remained substantially similar to Mr. Smith's original source. As of UnZip 5.42, the complete core code is now covered by the Info-ZIP Licence. Therefore, support for the reduce method has been removed. The drop of the reduce method should only affect some test archives, reducing was never used in any publicly distributed Zip program. For pathologic cases where support for reduced archive entries is needed, the unreduce code copyrighted by Samuel H. Smith is available as a separate distribution (the restricted copyright of this code is cited below in the "historical" section).

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

The following copyright applies to the Mac OS File Manager interface code (macos/source/macstuff.[ch]), distributed with UnZip 5.4 and later: MoreFiles - A collection of File Manager and related routines by Jim Luther (Apple Macintosh Developer Technical Support Emeritus) with significant code contributions by Nitin Ganatra (Apple Macintosh Developer Technical Support Emeritus)

Copyright 1992-1998 Apple Computer, Inc.

Portions **copyright 1995 Jim Luther All rights reserved.**

The Package "More Files" is distributed under the following license terms: "You may incorporate this sample code into your applications without restriction, though the sample code has been provided "AS IS" and the responsibility for its operation is 100% yours. However, what you are not permitted to do is to redistribute the source as "DSC Sample Code" after having made changes. If you're going to redistribute the source, we require that you make it clear in the source that the code was descended from Apple Sample Code, but that you've made changes."

The usage terms of this copyright note are compatible with the Info-ZIP license, they do not add further restrictions. The following copyright applies to the Mac OS "macbin3" decoding code (extra field compatibility with ZipIt): MacBinaryIII.h

Copyright 1997 Christopher Evans (cevens@poppybank.com)

Basic encoding and decoding of Macintosh files to the MacBinary III spec. This source is **copyrighted by Christopher Evans** (cevens@poppybank.com) (available at ftp://ftp.lazerware.com/MacBinaryIII_src_C.sit homepage of Leonard Rosenthol leonardr@netcom.com)

This copyright note does not contain any usage terms. So, we assume that this code is freely reusable until we are proved wrong...

The remaining copyright notes have been superseded by the new Info-ZIP license, with explicit permission from the respective original authors. They are cited here for historical reasons, only: The following copyright applies to the full-featured unreduce.c (now distributed separately):

Copyright 1989 Samuel H. Smith; All rights reserved

Do not distribute modified versions without my permission. Do not remove or alter this notice or any other copyright notice. If you use this in your own program you must distribute source code. Do not use any of this in a commercial product.

Regarding the first stipulation, Mr. Smith was tracked down in southern California some years back [Samuel H. Smith, The Tool Shop; as of mid-May 1994, (213) 851-9969 (voice), (213) 887-2127(?) (subscription BBS), 71150.2731@compuserve.com]: "He says that he thought that whoever contacted him understood that he has no objection to the Info-ZIP group's inclusion of his code. His primary concern is that it remain freely distributable, he said."

Despite the fact that our "normal" code has been entirely rewritten and by default no longer contains any of Mr. Smith's code, Info-ZIP remains indebted and grateful to him. We hope he finds our contributions as useful as we have his. Note that the third and fourth stipulations still apply to any company that wishes to incorporate the unreduce code into its products; if you wish to do so, you must contact Mr. Smith directly regarding licensing.

document version 2.60

The following copyright applied to most of the VMS code in vms.c, distributed with UnZip version 4.2 and later:

Copyright (c) 1992-93 Igor Mandrichenko.

Permission is granted to any individual or institution to use, copy, or redistribute this software so long as all of the original files are included unmodified and that this copyright notice is retained.

The following copyright applied to the new version of unshrink.c, distributed with UnZip version 5.2 and later:

Copyright (c) 1994 Greg Roelofs.

Permission is granted to any individual/institution/corporate entity to use, copy, redistribute or modify this software for any purpose whatsoever, subject to the conditions noted in the Frequently Asked Questions section below, plus one additional condition: namely, that my name not be removed from the source code. (Other names may, of course, be added as modifications are made.) Corporate legal staff (like at IBM:-)) who have problems understanding this can contact me through Zip-Bugs...

The following copyright applied to the Windows DLL code (windll), distributed with UnZip version 5.2 and later:

Copyright (c) 1996 Mike White.

Permission is granted to any individual or institution to use, copy, or redistribute this software so long as all of the original files are included, that it is not sold for profit, and that this copyright notice is retained.

The following copyright applied to the Windows CE GUI port, "Pocket UnZip," distributed with UnZip version 5.3 and later: All the source files for Pocket UnZip, except for components written by the Info-ZIP group, are

copyrighted 1997 by Steve P. Miller.

The product "Pocket UnZip" itself is property of the author and cannot be altered in any way without written consent from Steve P. Miller.

The remaining code was written by many people associated with the Info-ZIP group, with large contributions from (but not limited to): Greg Roelofs (overall program logic, ZipInfo, unshrink, filename mapping/portability, etc.), Mark Adler (inflate, explode, funzip), Kai Uwe Rommel (OS/2), John Bush and Paul Kienitz (Amiga), Antoine Verheijen (Macintosh), Hunter Goatley (more VMS), Mike White (Windows DLLs), Christian Spieler (overall logic, optimization, VMS, etc.) and others. See the file CONTRIBS in the source distribution for a much more complete list of contributors.

The decompression core code for the deflate method (inflate[ch], explode.c) was originally written by Mark Adler who submitted it as public domain code.

From:
userspace-rcu-0.5.4/userspace-rcu-0.5.4/lgpl-relicensing.txt
Mathieu Desnoyers May 13th, 2009

IBM Corporation allowed LGPLv2.1+ licensing of their contribution to the userspace RCU library in a patch submitted on May 8, 2009 from Paul E. McKenney and reviewed by Steven L. Bennett:

<http://lists.casi.polymtl.ca/pipermail/ltt-dev/2009-May/001584.html>

I (**Mathieu Desnoyers**) re-implemented ACCESS_ONCE(), likely(), unlikely() and barrier() from scratch without reference to the original code.

commit id : 2dc5fa0f7cfbfb0a64a7a67b39626650e863f16a

Bert Wesarg <bert.wesarg@googlemail.com> approved LGPL relicensing of his patch in an email dated May 13, 2009 : <http://lkml.org/lkml/2009/5/13/16>

xchg() primitives has been rewritten from a MIT-licensed cmpxchg for Intel and powerpc. They are MIT-licensed and therefore usable in LGPL code. This cmpxchg code was obtained from the atomic_ops project: http://www.hpl.hp.com/research/linux/atomic_ops/

I (**Mathieu Desnoyers**) wrote the remainder of the code.

The license for the library files in this project was therefore changed to LGPLv2.1 on May 13, 2009, as detailed in LICENSE.

♦♦♦

From:
userspace-rcu-0.5.4/userspace-rcu-0.5.4/license
Userspace RCU library licensing
Mathieu Desnoyers May 10, 2009
LGPLv2.1

The library part is distributed under LGPLv2.1 or later. See lgpl-2.1.txt for details. This applies to : urcu.h, urcu.c, urcu-static.h, arch_x86.h, arch_ppc.h

LGPL-compatible source code can statically use the library header using:

```
define _LGPL_SOURCE
include <urcu.h>
```

Dynamic-only linking with the LGPL library is used if _LGPL_SOURCE is not defined. It permits relinking with newer versions of the library, which is required by the LGPL license. See lgpl-relicensing.txt for details.

MIT-style license :
xchg() primitive has been rewritten from scratch starting from atomic_ops 1.2 which has a MIT-style license that is intended to allow use in both free and proprietary software:
http://www.hpl.hp.com/research/linux/atomic_ops/LICENSEING.txt
http://www.hpl.hp.com/personal/Hans_Boehm/gc/gc_source/

This license applies to : arch_atomic_x86.h, arch_atomic_ppc.h, arch_atomic_s390.h, arch_s390.h, compiler.h

GPLv2
Library test code is distributed under the GPLv2 license. See gpl-2.0.txt for details. This applies to : urcutorture.h, urcutorture.c, api_x86.h, api_ppc.h, api_gcc.h, test_urcu.c, test_urcu_yield.c, test_rwlock_timing.c, urcu-asm.c

Group: Analyst Tools / User Space Apps

Description: userspace lttng (linux trace toolkit) Gather runtime information from applications. LTTng userspace tracer; ust is a library and set of tools used to trace events in userspace code. The LTTng Userspace Tracer (UST) is a library accompanied by a set of tools to trace userspace code. Code may be instrumented with either markers or tracepoints. A highly efficient lockless tracer records these events to a trace buffers. These buffers are reaped by a daemon which writes trace data to disk. High performance is achieved by the use of lockless buffering algorithms, RCU and per-cpu buffers. In addition, special care is taken to minimize cache impact. The userspace tracer is designed to provide detailed information about userspace activity. Like the kernel tracer, performance is the main goal. Tracing does not require system calls or traps. UST instrumentation points may be added in any userspace code including signal handlers and libraries.

Common Usage: Client, API, Daemon, Library, Tool

Package Size: 4.86 MB

Folders / Files: 41 / 259

ust-0.15b-wrs/ust-0.15b/doc/info/ust.texi
The LTTng Userspace Tracer is intended to be linkable to open source software as well as to proprietary applications. This was accomplished by licensing the code that needs to be linked to the traced program as LGPL.

Components licensed as LGPL v2.1: libust, libinterfork, libustcomm
Components licensed as GPL v2: ustctl, libustctl, ust-consumerd

 Solving the LICENSE problem - The License for the code is MIT, new-BSD, LGPL, etc. ... if you need another license to help compatibility, just ask for it. It's basically public domain, without all the legal problems for everyone that trying to make something public domain entails.

util-linux_2.16.orig/util-linux-ng-2.16/readme.licensing

The project util-linux-ng doesn't use same license for all code. There are code with:

GPLv3+ (GNU General Public License version 3, or any later version)

GPLv2+ (GNU General Public License version 2, or any later version)

GPLv2 (GNU General Public License version 2)

BSD with advertising

This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by **Colin Plumb in 1993**, no copyright is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

util-linux-ng 2.16-2.wrs

Software:	util-linux-ng
Version:	2.16-2.wrs
File or Package:	util-linux-ng-2.16-2.wrs.src.rpm
OSI Licenses:	GPLv1+, GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1+, FreeBSD, BSDv1 (UCB & non-UCB), BSDv2, MIT/X11, Academic, Public Domain
Other Licenses:	Custom
URL:	
Group:	User Space Apps / System Environment/Base / Development/Libraries
Description:	Collection of basic system utilities. The util-linux-ng package contains a large variety of low-level system utilities that are necessary for a Linux system to function. Among others, Util-linux contains the fdisk configuration tool and the login program. The util-linux-ng is a fork of the original util-linux project. The goal of the util-linux-ng is a transparent and reliable development that follows the Linux kernel and Linux distributions.
Common Usage:	Utility
Package Size:	174.8 MB
Folders / Files:	129 / 924
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

util-linux-ng-2.16-2.wrs.src/util-linux-ng-2.16-wrs/util-linux-ng-2.16/readme.licensing
The project util-linux-ng doesn't use same license for all code. There are code with:
GPLv3+ (GNU General Public License version 3, or any later version)
GPLv2+ (GNU General Public License version 2, or any later version)
GPLv2 (GNU General Public License version 2)
BSD with advertising
Public Domain

Please, check source code for more details. A license is usually at the start of each source file. The /COPYING file (GPLv2+) is the default license for code without an explicitly defined license.

util-linux-ng-2.16-2.wrs.src/util-linux-ng-2.16-wrs/util-linux-ng-2.16/fdisk/sfdisk.c
Copyright (C) 1995 Andries E. Brouwer (aeb@cw.nl)

This program is free software. You can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation: either Version 1 or (at your option) any later version.

A.V. Le Blanc (LeBlanc@mcc.ac.uk) wrote Linux fdisk 1992-1994, patched by various people (faith@cs.unc.edu, martin@cs.unc.edu, leisner@sdsp.mc.xerox.com, esr@snark.thyrsus.com, aeb@cw.nl) 1993-1995, with version numbers (as far as I have seen) 0.93 - 2.0e. This program had (head,sector,cylinder) as basic unit, and was (therefore) broken in several ways for the use on larger disks - for example, my last patch (from 2.0d to 2.0e) was required to allow a partition to cross cylinder 8064, and to write an extended partition past the 4GB mark.

♦♦♦

From:
util-linux-ng-2.16-2.wrs.src/util-linux-ng-2.16-wrs/util-linux-ng-2.16/lib/md5.c

This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by **Colin Plumb in 1993, no copyright** is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

♦♦♦

From:
util-linux-ng-2.16-2.wrs.src/util-linux-ng-2.16-wrs/util-linux-ng-2.16/m4/tls.m4

This was licensed under the GPL with the following exception:

As a special exception, the respective Autoconf Macro's copyright owner gives unlimited permission to copy, distribute and modify the configure scripts that are the output of Autoconf when processing the Macro. You need not follow the terms of the GNU General Public License when using or distributing such scripts, even though portions of the text of the Macro appear in them. The GNU General Public License (GPL) does govern all other use of the material that constitutes the Autoconf Macro.

This special exception to the GPL applies to versions of the Autoconf Macro released by the Autoconf Macro Archive. When you make and distribute a modified version of the Autoconf Macro, you may extend this special exception to the GPL to apply to your modified version as well.

document version 2.60

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

util-linux-ng-2.16-2.wrs.src/util-linux-ng-2.16-wrs/util-linux-ng-2.16/fdisk/gpt.c

Based on libparted and util-linux/partx.

From:

util-linux-ng-2.16-2.wrs.src/util-linux-ng-2.16-wrs/util-linux-ng-2.16/hwclock/clock-ppc.c

With the new code, which is partially taken from the kernel sources

From:

util-linux-ng-2.16-2.wrs.src/util-linux-ng-2.16-wrs/util-linux-ng-2.16/hwclock/clock-ppc.c

Stolen from linux/arch/i386/kernel/time.c.

From:

util-linux-ng-2.16-2.wrs.src/util-linux-ng-2.16-wrs/util-linux-ng-2.16/include/bitops.h

Byte swab macros (based on linux/byteorder/swab.h)

From:

util-linux-ng-2.16-2.wrs.src/util-linux-ng-2.16-wrs/util-linux-ng-2.16/lib/setproctitle.c

(Code borrowed from sendmail.)

From:

util-linux-ng-2.16-2.wrs.src/util-linux-ng-2.16-wrs/util-linux-ng-2.16/login-utils/agetty.c

The present code is taken from login.c, so if this is changed, maybe login has to be changed as well.

valgrind 3.6.1-1

Software:	valgrind
Version:	3.6.1-1
File or Package:	valgrind-3.6.1-1.fc16.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2+ w/exception, LGPLv2.1+, FDLv1.2, FDLv1.2+, MIT/X11, zlib/libpng, SIL Open Font v1.1, Academic, Public Domain
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/development/source/SRPMS/valgrind-3.6.1-1.fc16.src.rpm
Group:	Analyst Tools / User Space Apps / Development/Debuggers
Description:	Valgrind is a tool to help you find memory-management problems in your programs. When a program is run under Valgrind's supervision, all reads and writes of memory are checked, and

calls to malloc/new/free/delete are intercepted. As a result, Valgrind can detect a lot of problems that are otherwise very hard to find/diagnose.

Valgrind is an instrumentation framework for building dynamic analysis tools. It comes with a set of tools each of which performs some kind of debugging, profiling, or similar task that helps you improve your programs. A number of useful tools are supplied as standard. 1. Memcheck is a memory error detector. It helps you make your programs, particularly those written in C and C++, more correct. 2. Cachegrind is a cache and branch-prediction profiler. It helps you make your programs run faster. 3. Callgrind is a call-graph generating cache profiler. It has some overlap with Cachegrind, but also gathers some information that Cachegrind does not. 4. Helgrind is a thread error detector. It helps you make your multi-threaded programs more correct. 5. DRD is also a thread error detector. It is similar to Helgrind but uses different analysis techniques and so may find different problems. 6. Massif is a heap profiler. It helps you make your programs use less memory. 7. Ptrcheck is an experimental heap, stack and global array overrun detector. Its functionality overlaps somewhat with Memcheck's, but it can find some problems that Memcheck would miss. 8. BBV is an experimental SimPoint basic block vector generator. It is useful to people doing computer architecture research and development.

Valgrind is an award-winning instrumentation framework for building dynamic analysis tools. There are Valgrind tools that can automatically detect many memory management and threading bugs, and profile your programs in detail. You can also use Valgrind to build new tools.

The Valgrind distribution currently includes six production-quality tools: a memory error detector, two thread error detectors, a cache and branch-prediction profiler, a call-graph generating cache profiler, and a heap profiler. It also includes two experimental tools: a heap/stack/global array overrun detector, and a SimPoint basic block vector generator.

Valgrind is closely tied to details of the CPU, operating system and to a lesser extent, compiler and basic C libraries. This makes it difficult to make it portable.

This Font Software is licensed under the SIL Open Font License, Version 1.1. This license is copied below, and is also available with a FAQ at: <http://scripts.sil.org/OFL>

SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007

PREAMBLE - The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

DEFINITIONS
"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting - in part or in whole - any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

PERMISSION & CONDITIONS

Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.

2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.

3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as presented to the users.

4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.

5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

TERMINATION

This license becomes null and void if any of the above conditions are not met.

DISCLAIMER

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT.

IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1-s390x-2.patch
Instruction set detection code borrowed from ppc above.

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-3.6.1/callgrind/callgrind_control.in
Parts more or less copied from ct_annotate (author: Nicholas Nethercote)

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-3.6.1/configure
This mess was copied from the GNU getpagesize.h.

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_aspacemgr/aspacemgr-linux.c
derived from sync_check_mapping_callback()

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_coredump/coredump-elf.c
copied from gdb5.1/include/elf/common.h

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_debuginfo/priv_readpdb.h
derived from readelf.c and valgrind-20031012-wine/vg_syntab2.c
derived from wine-1.0/tools/winedump/pdb.c and msc.c

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_debuginfo/priv_storage.h
Sorted tables of stuff we snarfed from the file. This is the eventual
product of reading the debug info. All this stuff lives in VG_AR_DINFO.

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_debuginfo/readdwarf.c
end of enums taken from gdb-6.0 sources

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_debuginfo/readelf.c
Find the file offset corresponding to SVMA by using the program headers.
This is taken from binutils-2.17/binutils/readelf.c

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_debuginfo/readpdb.c
the following DOS and WINDOWS structures, defines and PE/PDB
parsing code are copied or derived from the WINE project -
<http://www.winehq.com/>

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_demangle/cplus-dem.c
replaced by the sprintf that follows. This is to avoid use of sscanf. This
hack is merely copied from the old demangler port (by Michael Matz,

Simon Hausmann?) - I have no idea if it is really correct/safe, but it looks
ok.

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_demangle/vg_libciface.h
Taken from libiberty.h:

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_sigframe/sigframe-x86-darwin.c
Cheap-ass hack copied from ppc32-aix5 code, just to get started.

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_sigframe/sigframe-ppc64-linux.c
Many of these byzantine details derived from linux-
2.6.13/arch/ppc64/kernel/signal.c

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/m_syswrap/syswrap-darwin.c
Largely copied from PRE(sys_execve) in syswrap-generic.c, and from the
simpler AIX equivalent (syswrap-aix5.c).
Now follows a bunch of logic copied from PRE(sys_execve) in syswrap-
generic.c.
Mach port tracking (based on syswrap-generic's fd tracker).
Terminating this thread. Copied from sys_exit.

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/pub_core_initimg.h
Initial values for guest int registers (GPR0 .. GPR31, PC, CR, LR, CTR,
XER). Copied from the CIL.

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/coregrind/vg_preloaded.c
GrP fixme copied from m_libcproc

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-
3.6.1/drd/tests/omp_prime.c
An OpenMP example. Based on the example listed on the following web
page:
http://developers.sun.com/sunstudio/downloads/ssx/tha/tha_using.html

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-3.6.1/drd/tests/pth_detached_sem.c
Test whether detached threads are handled properly. This test program is based on pth_detached.c

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-3.6.1/exp-bbv/tests/x86-linux/ll.S
linux_logo in x86_64 assembly language based on the code from ll_asm-0.36 By Vince Weaver <vince_at_deater.net>
LZSS decompression algorithm implementation by Stephan Walter 2002, based on LZSS.C by Haruhiko Okumura 1989 optimized some more by Vince Weaver

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-3.6.1/exp-ptrcheck/sg_main.c
copied from .descr->szB

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-3.6.1/helgrind/hg_main.c
Cleanup actions (next 5 lines) copied from end of evh_pre_thread_ll_exit

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-3.6.1/helgrind/libhb_core.c
Copied from exp-ptrcheck/sg_main.c

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-3.6.1/include/vki/vki-x86-linux.h
VgLdtEntry and has to be translated into such. The logic for doing so, in vg_ldt.c, is copied from the kernel sources.

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-3.6.1/memcheck/mc_replace_strmem.c
Copied from glibc-2.5/debug/test-strcpy_chk.c.

♦♦♦

From:
valgrind-3.6.1-1.fc16.src/valgrind-3.6.1/valgrind-3.6.1/memcheck/tests/darwin/scalar.c
all these are copied from x86-linux/scalar.c.

releases/15/Fedora/source/SRPMS/
vim-7.3.138-1.fc15.src.rpm

Group: User Space Apps / Applications/Editors

Description: Vim is a highly configurable text editor built to enable efficient text editing. It is an improved version of the vi editor distributed with most UNIX systems. The name "Vim" is an acronym for "Vi IMproved because Vim was created as an extended version of the vi editor, with many additional features designed to be helpful in editing program source code. Vim is an advanced text editor that seeks to provide the power of the de-facto Unix editor 'Vi', with a more complete feature set. It's useful whether you're already using vi or using a different editor. Users of Vim 5 and 6 should consider upgrading to Vim 7.

Vim is a highly configurable text editor built to enable efficient text editing. It is an improved version of the vi editor distributed with most UNIX systems. Vim is often called a "programmer's editor, and so useful for programming that many consider it an entire IDE. It's not just for programmers, though. Vim is perfect for all kinds of text editing, from composing email to editing configuration files. Despite what the above comic suggests, Vim can be configured to work in a very simple (Notepad-like) way, called evim or Easy Vim. Vim is charityware. Its license is GPL-compatible, so it's distributed freely, but we ask that if you find it useful you make a donation to help children in Uganda through the ICCF. The full license text can be found in the documentation. Much more information about charityware on Charityware.info

Common Usage: Standalone, Tool, Utility

Description - VIM (V)isual editor iMproved is an updated and improved version of the vi editor. Vi was the first real screen-based editor for UNIX, and is still very popular. VIM improves on vi by adding new features: multiple windows, multi-level undo, block highlighting and more.

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/doc/Uganda.txt
SUMMARY

Vim is Charityware. You can use and copy it as much as you like, but you are encouraged to make a donation for needy children in Uganda. Please see [kcc] below or visit the ICCF web site, available at these URLs: <http://iccf-holland.org/>, <http://www.vim.org/iccf/>, <http://www.iccf.nl/>. You can also sponsor the development of Vim. Vim sponsors can vote for features. See [sponsor]. The money goes to Uganda anyway. The Open Publication License applies to the Vim documentation, see [manual-copyright].

VIM LICENSE

I) There are no restrictions on distributing unmodified copies of Vim except that they must include this license text. You can also distribute unmodified parts of Vim, likewise unrestricted except that they must include this license text. You are also allowed to include executables that you made from the unmodified Vim sources, plus your own usage examples and Vim scripts.

II) It is allowed to distribute a modified (or extended) version of Vim, including executables and/or source code, when the following four conditions are met:

1) This license text must be included unmodified.

2) The modified Vim must be distributed in one of the following five ways:

a) If you make changes to Vim yourself, you must clearly describe in the distribution how to contact you. When the maintainer asks you (in any way) for a copy of the modified Vim you distributed, you must make your changes, including source code, available to the maintainer without fee. The maintainer reserves the right to include your changes in the official version of Vim. What the maintainer will do with your changes and under what license they will be distributed is negotiable. If there has been no negotiation then this license, or a later version, also applies to your changes. The current maintainer is Bram Moolenaar <Bram@vim.org>. If this changes it will be announced in appropriate places (most likely vim.sf.net, www.vim.org and/or comp.editors.org). When

it is completely impossible to contact the maintainer, the obligation to send him your changes ceases. Once the maintainer has confirmed that he has received your changes they will not have to be sent again.

b) If you have received a modified Vim that was distributed as mentioned under a) you are allowed to further distribute it unmodified, as mentioned at I). If you make additional changes the text under a) applies to those changes.

c) Provide all the changes, including source code, with every copy of the modified Vim you distribute. This may be done in the form of a context diff. You can choose what license to use for new code you add. The changes and their license must not restrict others from making their own changes to the official version of Vim.

d) When you have a modified Vim which includes changes as mentioned under c), you can distribute it without the source code for the changes if the following three conditions are met:

- The license that applies to the changes permits you to distribute the changes to the Vim maintainer without fee or restriction, and permits the Vim maintainer to include the changes in the official version of Vim without fee or restriction.

- You keep the changes for at least three years after last distributing the corresponding modified Vim. When the maintainer or someone who you distributed the modified Vim to asks you (in any way) for the changes within this period, you must make them available to him.

- You clearly describe in the distribution how to contact you. This contact information must remain valid for at least three years after last distributing the corresponding modified Vim, or as long as possible.

e) When the GNU General Public License (GPL) applies to the changes, you can distribute the modified Vim under the GNU GPL version 2 or any later version.

3) A message must be added, at least in the output of the ":version" command and in the intro screen, such that the user of the modified Vim is able to see that it was modified. When distributing as mentioned under 2)e) adding the message is only required for as far as this does not conflict with the license used for the changes.

4) The contact information as required under 2)a) and 2)d) must not be removed or changed, except that the person himself can make corrections.

© 2009-2011 Wind River Systems, Inc.

document version 2.60

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

III) If you distribute a modified version of Vim, you are encouraged to use the Vim license for your changes and make them available to the maintainer, including the source code. The preferred way to do this is by e-mail or by uploading the files to a server and e-mailing the URL. If the number of changes is small (e.g., a modified Makefile) e-mailing a context diff will do. The e-mail address to be used is <maintainer@vim.org>

IV) It is not allowed to remove this license from the distribution of the Vim sources, parts of it or from a modified version. You may use this license for previous Vim releases instead of the license that they came with, at your option.

Note: If you are happy with Vim, please express that by reading the rest of this file and consider helping needy children in Uganda. If you want to support further Vim development consider becoming a [sponsor]. The money goes to Uganda anyway.

According to Richard Stallman the Vim license is GNU GPL compatible. A few minor changes have been made since he checked it, but that should not make a difference. If you link Vim with a library that goes under the GNU GPL, this limits further distribution to the GNU GPL. Also when you didn't actually change anything in Vim. Once a change is included that goes under the GNU GPL, this forces all further changes to also be made under the GNU GPL or a compatible license. If you distribute a modified version of Vim, you can include your name and contact information with the "-with-modified-by configure argument or the MODIFIED_BY define.

Kibaale Children's Centre kcc Kibaale charity - Kibaale Children's Centre (KCC) is located in Kibaale, a small town in the south of Uganda, near Tanzania, in East Africa. The area is known as Rakai District. The population is mostly farmers. Although people are poor, there is enough food. But this district is suffering from AIDS more than any other part of the world. Some say that it started there. Estimations are that 10 to 30% of the Ugandans are infected with HIV. Because parents die, there are many orphans. In this district about 60,000 children have lost one or both parents, out of a population of 350,000. And this is still continuing.

The children need a lot of help. The KCC is working hard to provide the needy with food, medical care and education. Food and medical care to keep them healthy now, and education so that they can take care of themselves in the future. KCC works on a Christian base, but help is given to children of any religion.

The key to solving the problems in this area is education. This has been neglected in the past years with president Idi Amin and the following civil wars. Now that the government is stable again, the children and parents have to learn how to take care of themselves and how to avoid infections. There is also help for people who are ill and hungry, but the primary goal is to prevent people from getting ill and to teach them how to grow healthy food.

Most of the orphans are living in an extended family. An uncle or older sister is taking care of them. Because these families are big and the income (if any) is low, a child is lucky if it gets healthy food. Clothes, medical care and schooling is beyond its reach. To help these needy children, a sponsorship program was put into place. A child can be financially adopted. For a few dollars a month KCC sees to it that the child gets indispensable items, is healthy, goes to school and KCC takes care of anything else that needs to be done for the child and the family that supports it.

Besides helping the child directly, the environment where the child grows up needs to be improved. KCC helps schools to improve their teaching

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

methods. There is a demonstration school at the centre and teacher trainings are given. Health workers are being trained, hygiene education is carried out and households are stimulated to build a proper latrine. I helped setting up a production site for cement slabs. These are used to build a good latrine. They are sold below cost price.

There is a small clinic at the project, which provides children and their family with medical help. When needed, transport to a hospital is offered. Immunization programs are carried out and help is provided when an epidemic is breaking out (measles and cholera have been a problem).

donate - Summer 1994 to summer 1995 I spent a whole year at the centre, working as a volunteer. I have helped to expand the centre and worked in the area of water and sanitation. I learned that the help that the KCC provides really helps. When I came back to Holland, I wanted to continue supporting KCC. To do this I'm raising funds and organizing the sponsorship program. Please consider one of these possibilities:

1. Sponsor a child in primary school: 17 euro a month (or more).
2. Sponsor a child in secondary school: 25 euro a month (or more).
3. Sponsor the clinic: Any amount a month or quarter
4. A one-time donation

Compared with other organizations that do child sponsorship the amounts are very low. This is because the money goes directly to the centre. Less than 5% is used for administration. This is possible because this is a small organization that works with volunteers. If you would like to sponsor a child, you should have the intention to do this for at least one year.

How do you know that the money will be spent right? First of all you have my personal guarantee as the author of Vim. I trust the people that are working at the centre, I know them personally. Further more, the centre has been co-sponsored and inspected by World Vision, Save the Children Fund and is now under the supervision of Pacific Academy Outreach Society. The centre is visited about once a year to check the progress (at our own cost). I have visited the centre myself many times, starting in 1993. The visit reports are on the ICCF web site. If you have any further questions, send me e-mail: <Bram@vim.org>. The address of the centre is: Kibaale Children's Centre, p.o. box 1658, Masaka, Uganda, East Africa

Sending money: iccf-donations

Check the ICCF web site for the latest information! See [iccf] for the URL.

USA: The methods mentioned below can be used. Sending a check to the Nehemiah Group Outreach Society (NGOS) is no longer possible, unfortunately. We are looking for another way to get you an IRS tax receipt. For sponsoring a child contact KCF in Canada (see below). US checks can be sent to them to lower banking costs.

Canada: Contact Kibaale Children's Fund (KCF) in Surrey, Canada. They take care of the Canadian sponsors for the children in Kibaale. KCF forwards 100% of the money to the project in Uganda. You can send them a one time donation directly. Please send me a note so that I know what has been donated because of Vim. Ask KCF for information about sponsorship. Kibaale Children's Fund c/o Pacific Academy 10238-168 Street Surrey, B.C. V4N 1Z4 Canada Phone: 604-581-5353. If you make a donation to Kibaale Children's Fund (KCF) you will receive a tax receipt which can be submitted with your tax return.

Holland: Transfer to the account of "Stichting ICCF Holland in Lisse. This will allow for tax deduction if you live in Holland. Postbank, nr. 4548774

document version 2.60

Germany: It is possible to make donations that allow for a tax return. Check the ICCF web site for the latest information: <http://iccf-holland.org/germany.html>

World: Use a postal money order. That should be possible from any country, mostly from the post office. Use this name (which is in my passport): "Abraham Moolenaar". Use Euro for the currency if possible.

Europe: Use a bank transfer if possible. Your bank should have a form that you can use for this. See "Others below for the swift code and IBAN number. Any other method should work. Ask for information about sponsorship.

Credit Card: You can use PayPal to send money with a Credit card. This is the most widely used Internet based payment system. It's really simple to use. Use this link to find more info: https://www.paypal.com/en_US/mrb/pal=XAC62PML3GF8Q The e-mail address for sending the money to is: Bram@iccf-holland.org For amounts above 400 Euro (\$500) sending a check is preferred.

Others: Transfer to one of these accounts if possible: Postbank, account 4548774 Swift code: INGB NL 2A IBAN: NL47 PSTB 0004 5487 74 under the name "stichting ICCF Holland", Lisse

If that doesn't work: Rabobank Lisse, account 3765.05.117 Swift code: RABO NL 2U under the name "Bram Moolenaar", Lisse Otherwise, send a check in euro or US dollars to the address below. Minimal amount: \$70 (my bank does not accept smaller amounts for foreign check, sorry)

Address to send checks to: stichting ICCF Holland, Bram Moolenaar Finsterruethof 1 8134 Adliswil Switzerland. This address is expected to be valid for a long time.

Copyright manual-copyright
The Vim user manual and reference manual are
Copyright (c) 1988-2003 by Bram Moolenaar.

This material may be distributed only subject to the terms and conditions set forth in the Open Publication License, v1.0 or later. The latest version is presently available at: <http://www.opencontent.org/openpub/>. People who contribute to the manuals must agree with the above copyright notice.

frombook

Parts of the user manual come from the book "Vi Improved - Vim by Steve Oualline (published by New Riders Publishing, ISBN: 0735710015). The Open Publication License applies to this book. Only selected parts are included and these have been modified (e.g., by removing the pictures, updating the text for Vim 6.0 and later, fixing mistakes). The omission of the [frombook] tag does not mean that the text does not come from the book.

Many thanks to Steve Oualline and New Riders for creating this book and publishing it under the OPL! It has been a great help while writing the user manual. Not only by providing literal text, but also by setting the tone and style. If you make money through selling the manuals, you are strongly encouraged to donate part of the profit to help AIDS victims in Uganda. See [iccf].

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

From:

<http://www.opencontent.org/openpub/> [as of 09/08/11]
Open Publication License v1.0, 8 June 1999

I. REQUIREMENTS ON BOTH UNMODIFIED AND MODIFIED VERSIONS

The Open Publication works may be reproduced and distributed in whole or in part, in any medium physical or electronic, provided that the terms of this license are adhered to, and that this license or an incorporation of it by reference (with any options elected by the author(s) and/or publisher) is displayed in the reproduction.

Proper form for an incorporation by reference is as follows: Copyright (c) <year> by <author's name or designee>. This material may be distributed only subject to the terms and conditions set forth in the Open Publication License, vX.Y or later (the latest version is presently available at <http://www.opencontent.org/openpub/>).

The reference must be immediately followed with any options elected by the author(s) and/or publisher of the document (see section VI). Commercial redistribution of Open Publication-licensed material is permitted. Any publication in standard (paper) book form shall require the citation of the original publisher and author. The publisher and author's names shall appear on all outer surfaces of the book. On all outer surfaces of the book the original publisher's name shall be as large as the title of the work and cited as possessive with respect to the title.

II. COPYRIGHT

The copyright to each Open Publication is owned by its author(s) or designee.

III. SCOPE OF LICENSE

The following license terms apply to all Open Publication works, unless otherwise explicitly stated in the document.

Mere aggregation of Open Publication works or a portion of an Open Publication work with other works or programs on the same media shall not cause this license to apply to those other works. The aggregate work shall contain a notice specifying the inclusion of the Open Publication material and appropriate copyright notice.

SEVERABILITY. If any part of this license is found to be unenforceable in any jurisdiction, the remaining portions of the license remain in force.

NO WARRANTY. Open Publication works are licensed and provided "as is without warranty of any kind, express or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose or a warranty of non-infringement.

IV. REQUIREMENTS ON MODIFIED WORKS

All modified versions of documents covered by this license, including translations, anthologies, compilations and partial documents, must meet the following requirements:

1. The modified version must be labeled as such.
2. The person making the modifications must be identified and the modifications dated.
3. Acknowledgement of the original author and publisher if applicable must be retained according to normal academic citation practices.
4. The location of the original unmodified document must be identified.

document version 2.60

5. The original author's (or authors') name(s) may not be used to assert or imply endorsement of the resulting document without the original author's (or authors') permission.

V. GOOD-PRACTICE RECOMMENDATIONS

In addition to the requirements of this license, it is requested from and strongly recommended of redistributors that:

1. If you are distributing Open Publication works on hardcopy or CD-ROM, you provide email notification to the authors of your intent to redistribute at least thirty days before your manuscript or media freeze, to give the authors time to provide updated documents. This notification should describe modifications, if any, made to the document.

2. All substantive modifications (including deletions) be either clearly marked up in the document or else described in an attachment to the document.

3. Finally, while it is not mandatory under this license, it is considered good form to offer a free copy of any hardcopy and CD-ROM expression of an Open Publication-licensed work to its author(s).

VI. LICENSE OPTIONS

The author(s) and/or publisher of an Open Publication-licensed document may elect certain options by appending language to the reference to or copy of the license. These options are considered part of the license instance and must be included with the license (or its incorporation by reference) in derived works.

A. To prohibit distribution of substantively modified versions without the explicit permission of the author(s). "Substantive modification is defined as a change to the semantic content of the document, and excludes mere changes in format or typographical corrections. To accomplish this, add the phrase 'Distribution of substantively modified versions of this document is prohibited without the explicit permission of the copyright holder.' to the license reference or copy.

B. To prohibit any publication of this work or derivative works in whole or in part in standard (paper) book form for commercial purposes unless prior permission is obtained from the copyright holder. To accomplish this, add the phrase 'Distribution of the work or derivative of the work in any standard (paper) book form is prohibited unless prior permission is obtained from the copyright holder.' to the license reference or copy.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

This dictionary is based on a subset of the original English wordlist created by Kevin Atkinson for Pspell and Aspell and thus is covered by his original LGPL license. The affix file is a heavily modified version of the original english.aff file which was released as part of Geoff Kuenning's Ispell and as such is covered by his BSD license. Thanks to both authors for their wonderful work.

en_AU:

This dictionary was based on the en_GB Myspell dictionary which in turn was initially based on a subset of the original English wordlist created by Kevin Atkinson for Pspell and Aspell and thus is covered by his original LGPL licence. The credit for this en_AU dictionary goes to: Kelvin Eldridge (maintainer), Jean Hollis Weber, David Wilson

Words incorrect in Australian English removed

a list from the previously removed words with corrected spelling was added

a list of major rivers was added

a list of place names was added

a list of Australian mammals was added

a list of Aboriginal/Koori words commonly used was added

A total of 119,267 words are now recognized by the dictionary. Of course, special thanks go to the editors of the en_GB dictionary (David Bartlett, Brian Kelk and Andrew Brown) which provided the starting point for this dictionary. The affix file is currently a duplicate of the en_AU.aff created completely from scratch by David Bartlett and Andrew Brown, based on the published rules for MySpell and is also provided under the LGPL. If you find omissions or bugs or have new words to add to the dictionary, please contact the en_AU maintainer at: "Kelvin <audictionary@onlineconnections.com.au>

en_CA:

The dictionary file was created using the "final English and Canadian SCOWL (Spell Checker Oriented Word Lists) wordlists available at Kevin's Word Lists Page (<http://wordlist.sourceforge.net>). Lists with the suffixes 10, 20, 35, 50, 65 and 65 were used. Lists with the suffixes 70, 80 and 95 were excluded. Copyright information for SCOWL and the wordlists used in creating it is reproduced below. The affix file is identical to the MySpell English (United States) affix file. It is a heavily modified version of the original english.aff file which was released as part of Geoff Kuenning's Ispell and as such is covered by his BSD license.

COPYRIGHT, SOURCES, and CREDITS from SCOWL readme file:

The collective work is **Copyright 2000 by Kevin Atkinson** as well as any of the copyrights mentioned below:

Copyright 2000 by Kevin Atkinson

Permission to use, copy, modify, distribute and sell these word lists, the associated scripts, the output created from the scripts, and its documentation for any purpose is hereby granted without fee, provided that the above copyright notice appears in all copies and that both that copyright notice and this permission notice appear in supporting documentation. Kevin Atkinson makes no representations about the suitability of this array for any purpose. It is provided "as is without express or implied warranty.

Alan Beale <biljir@pobox.com> also deserves special credit as he has, in addition to providing the 12Dicts package and being a major contributor to the ENABLE word list, given me an incredible amount of feedback and created a number of special lists (those found in the Supplement) in order to help improve the overall quality of SCOWL.

The 10 level includes the 1000 most common English words (according to the Moby (TM) Words II [MWords] package), a subset of the 1000 most common words on the Internet (again, according to Moby Words II), and frequently class 16 from Brian Kelk's "UK English Wordlist with Frequency Classification".

The MWords package was explicitly placed in the public domain: The Moby lexicon project is complete and has been placed into the public domain. Use, sell, rework, excerpt and use in any way on any platform. Placing this material on internal or public servers is also encouraged. The compiler is not aware of any export restrictions so freely distribute worldwide. You can verify the public domain status by contacting **Grady Ward**, 3449 Martha Ct., Arcata, CA 95521-4884 grady@netcom.com, grady@northcoast.com

The "UK English Wordlist With Frequency Classification" is also in the Public Domain:

Date: Sat, 08 Jul 2000 20:27:21 0100

From: **Brian Kelk** <Brian.Kelk@cl.cam.ac.uk>

> I was wondering what the copyright status of your "UK English Wordlist With Frequency Classification" word list as it seems to be lacking any copyright notice.

There were many many sources in total, but any text marked "copyright" was avoided. Locally-written documentation was one source. An earlier version of the list resided in a filesystem called PUBLIC on the University mainframe, because it was considered public domain.

Date: Tue, 11 Jul 2000 19:31:34 0100

> So are you saying your word list is also in the public domain?
That is the intention.

The 20 level includes frequency classes 7-15 from Brian's word list. The 35 level includes frequency classes 2-6 and words appearing in at least 11 of 12 dictionaries as indicated in the 12Dicts package. All words from the 12Dicts package have had likely inflections added via my inflection database. The 12Dicts package and Supplement is in the Public Domain. The WordNet database, which was used in the creation of the Inflections database, is under the following copyright:

This software and database is being provided to you, the LICENSEE, by **Princeton University** under the following license. By obtaining, using and/or copying this software and database, you agree that you have read, understood, and will comply with these terms and conditions.:

Permission to use, copy, modify and distribute this software and database and its documentation for any purpose and without fee or royalty is hereby granted, provided that you agree to comply with the following copyright notice and statements, including the disclaimer, and that the same appear on ALL copies of the software, database and documentation, including modifications that you make for internal use or for distribution.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

NOT INFRINGE ANY THIRD PARTY PATENTS, COPYRIGHTS, TRADEMARKS OR OTHER RIGHTS.

The name of Princeton University or Princeton may not be used in advertising or publicity pertaining to distribution of the software and/or database. Title to copyright in this software, database and any associated documentation shall at all times remain with Princeton University and LICENSEE agrees to preserve same.

The 50 level includes Brian's frequency class 1, words appearing in at least 5 of 12 of the dictionaries as indicated in the 12Dicts package, and uppercase words in at least 4 of the previous 12 dictionaries. A decent number of proper names is also included: The top 1000 male, female, and Last names from the 1990 Census report; a list of names sent to me by Alan Beale; and a few names that I added myself. Finally a small list of abbreviations not commonly found in other word lists is included. The name files from the Census report is a government document which I don't think can be copyrighted.

The name list from Alan Beale is also derived from the linux words list, which is derived from the DEC list. He also added a bunch of miscellaneous names to the list, which he released to the Public Domain.

The DEC Word list doesn't have a formal name. It is labeled as "FILE: english.words; VERSION: DEC-SRC-92-04-05 and was put together by Jorge Stolfi <stolfi@src.dec.com> DEC Systems Research Center. The DEC Word list has the following copyright statement:

(NON-)COPYRIGHT STATUS

To the best of my knowledge, all the files I used to build these wordlists were available for public distribution and use, at least for non-commercial purposes. I have confirmed this assumption with the authors of the lists, whenever they were known. Therefore, it is safe to assume that the wordlists in this package can also be freely copied, distributed, modified, and used for personal, educational, and research purposes. (Use of these files in commercial products may require written permission from **DEC and/or the authors** of the original lists.)

Whenever you distribute any of these wordlists, please distribute also the accompanying README file. If you distribute a modified copy of one of these wordlists, please include the original README file with a note explaining your modifications. Your users will surely appreciate that.

(NO-)WARRANTY DISCLAIMER

These files, like the original wordlists on which they are based, are still very incomplete, uneven, and inconsistent, and probably contain many errors. They are offered "as is" without any warranty of correctness or fitness for any particular purpose. Neither I nor my employer can be held responsible for any losses or damages that may result from their use. However since this Word List is used in the linux.words package which the author claims is free of any copyright I assume it is OK to use for most purposes. If you want to use this in a commercial project and this concerns you the information from the DEC word list can easily be removed without much sacrifice in quality as only the name lists were used.

The file special-jargon.50 uses common.lst and word.lst from the "Unofficial Jargon File Word Lists" which is derived from "The Jargon File". All of which is in the Public Domain. This file also contains a few extra UNIX terms which are found in the file "unix-terms" in the special/ directory. The 60 level includes Brian's frequency class 0 and all words appearing in at least 2 of the 12 dictionaries as indicated by the 12Dicts package. A large number of names are also included: The 4,946 female names and 3,897 male names from the MWords package and the files

document version 2.60

"computer.names", "misc.names", and "org.names from the DEC package. The 65 level includes words found in the Ispell "medium word list. The Ispell word lists are under the same copyright of Ispell itself which is:

Copyright 1993, Geoff Kuenning, Granada Hills, CA All rights reserved.

The 70 level includes the 74,550 common dictionary words and the 21,986 names list from the MWords package. The common dictionary words, like those from the 12Dicts package, have had all likely inflections added. The 80 level includes the ENABLE word list, all the lists in the ENABLE supplement package (except for ABLE), the "UK Advanced Cryptics Dictionary (UKACD), the list of signature words in from YAWL package, and the 10,196 places list from the MWords package. The ENABLE package, maintained by M/Cooper <thegrendel@theriver.com>, is in the Public Domain:

The ENABLE master word list, WORD.LST, is herewith formally released into the Public Domain. Anyone is free to use it or distribute it in any manner they see fit. No fee or registration is required for its use nor are "contributions solicited (if you feel you absolutely must contribute something for your own peace of mind, the authors of the ENABLE list ask that you make a donation on their behalf to your favorite charity). This

word list is our gift to the Scrabble community, as an alternate to "official word lists. Game designers may feel free to incorporate the WORD.LST into their games. Please mention the source and credit us as originators of the list. Note that if you, as a game designer, use the WORD.LST in your product, you may still copyright and protect your product, but you may not legally copyright or in any way restrict redistribution of the WORD.LST portion of your product. This may under law restrict your rights to restrict your users' rights, but that is only fair.

UKACD, by J Ross Beresford <ross@bryson.demon.co.uk>, is under the following copyright:

Copyright (c) J Ross Beresford 1993-1999. All Rights Reserved.

The following restriction is placed on the use of this publication: if The UK Advanced Cryptics Dictionary is used in a software package or redistributed in any form, the copyright notice must be prominently displayed and the text of this document must be included verbatim. There are no other restrictions: I would like to see the list distributed as widely as possible.

The 95 level includes the 354,984 single words and 256,772 compound words from the MWords package, ABLE.LST from the ENABLE Supplement, and some additional words found in my part-of-speech database that were not found anywhere else. Accent information was taken from UKACD. My VARCON package was used to create the American, British, and Canadian word list. Since the original word lists used in the VARCON package came from the Ispell distribution they are under the Ispell copyright. The variant word lists were created from a list of variants found in the 12dicts supplement package as well as a list of variants I created myself.

en_GB:

This dictionary was initially based on a subset of the original English wordlist created by **Kevin Atkinson** for Pspell and Aspell and thus is covered by his original LGPL licence. It has been extensively updated by **David Bartlett, Brian Kelk and Andrew Brown:**

numerous Americanism have been removed
numerous American spellings have been corrected
missing words have been added
many errors have been corrected
compound hyphenated words have been added where appropriate

Valuable inputs to this process were received from many other people - far too numerous to name. Serious thanks to you all for your greatly appreciated help. This word list is intended to be a good representation of current modern British English and thus it should be a good basis for Commonwealth English in most countries of the world outside North America.

The affix file has been created completely from scratch by **David Bartlett and Andrew Brown**, based on the published rules for MySpell and is also provided under the LGPL.

In creating the affix rules an attempt has been made to reproduce the most general rules for English word formation, rather than merely use it as a means to compress the size of the dictionary. It is hoped that this will facilitate future localisation to other variants of English. Please let David Bartlett <dwb@openoffice.org> know of any errors that you find. The current release is R 1.18, 11/04/05

en_NZ:

1. Copyright

NZ English Dictionary v0.9 beta - Build 06SEP03

document version 2.60

NB This is an initial version, please check:

http://lingucomponent.openoffice.org/download_dictionary.html or
<http://www.girlza.com/dictionary/download.html> for a final version, after a
little while (no hurry). This dictionary is based on the en_GB Myspell
dictionary which in turn was initially based on a subset of the original
English wordlist created by Kevin Atkinson for Pspell and Aspell and thus
is covered by his original LGPL licence.

Introduction

en_NZ.dic has been altered to include New Zealand places, including
major cities and towns, and major suburbs. It also contains NZ words,
organisations and expressions. en_NZ.aff has had a few REPlace strings
added, but is basically unchanged.

Acknowledgements

Thanks must go to the original creators of the British dictionary, David
Bartlett, Brian Kelk and Andrew Brown. I wouldn't have started this
without seeing the Australian dictionary, thanks Kelvin Eldridge, Jean
Hollis Weber and David Wilson. And thank you to all who've contributed
to OpenOffice.org.

License

This dictionary is covered by the GNU Lesser General Public License,
viewable at <http://www.gnu.org/copyleft/lesser.html>

Issues

Many of the proper nouns already in the dictionary do not have an affix
for 's. All my new words start after the z's of the original dictionary.

Contact

Contact Tristan Burtenshaw (hooty@slingshot.co.nz) with any words,
places or other suggestions for the dictionary.

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/regex.c
This is NOT the original regular expression code as written by Henry Spencer. This code has been modified specifically for use with the VIM editor, and should not be used separately from Vim. If you want a good regular expression library, get the original code. The copyright notice that follows is from the original.

Copyright (c) 1986 by University of Toronto.
Written by Henry Spencer. Not derived from licensed software.

Permission is granted to anyone to use this software for any purpose on any computer system, and to redistribute it freely, subject to the following restrictions:

1. The author is not responsible for the consequences of use of this software, no matter how awful, even if they arise from defects in it.
2. The origin of this software must not be misrepresented, either by explicit claim or by omission.

3. Altered versions must be plainly marked as such, and must not be misrepresented as being the original software.

Beware that some of this code is subtly aware of the way operator precedence is structured in regular expressions. Serious changes in regular-expression syntax might require a total rethink.

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/doc/if_cscope.txt
7. Cscope availability and information cscope-info

If you do not already have cscope (it did not come with your compiler license or OS distribution), then you can download it for free from:
<http://cscope.sourceforge.net/> This is released by SCO under the BSD license. If you want a newer version of cscope, you will probably have to buy it. According to the (old) nvi documentation:

You can buy version 13.3 source with an unrestricted license for \$400 from AT&T Software Solutions by calling 1-800-462-8146. Also you can download cscope 13.x and mlcscope 14.x (multi-lingual cscope which supports C, C, Java, lex, yacc, breakpoint listing, Ingres, and SDL) from World-Wide Exptools Open Source packages page: <http://www.bell-labs.com/project/wwexptools/packages.html>

In Solaris 2.x, if you have the C compiler license, you will also have cscope. Both are usually located under /opt/SUNWspro/bin. SGI developers can also get it. Search for Cscope on this page:
<http://freeware.sgi.com/index-by-alpha.html>,
<https://toolbox.sgi.com/toolbox/utilities/cscope/>. The second one is for those who have a password for the SGI toolbox. There is source to an older version of a cscope clone (called "cs") available on the net. Due to various reasons, this is not supported with Vim.

The cscope interface/support for Vim was originally written by **Andy Kahn** <ackahn@netapp.com>. The original structure (as well as a tiny bit of code) was adapted from the cscope interface in nvi. Please report any problems, suggestions, patches, et al., you have for the usage of cscope within Vim to him.

cscope-win32 - For a cscope version for Win32 see:
<http://code.google.com/p/cscope-win32/>. Win32 support was added by

♦♦♦

From:
<http://cscope.sourceforge.net/> [as of 09/08/11]
Cscope is a developer's tool for browsing source code. It has an impeccable Unix pedigree, having been originally developed at Bell Labs back in the days of the PDP-11. Cscope was part of the official AT&T Unix distribution for many years, and has been used to manage projects involving 20 million lines of code! In April, 2000, thanks to the **Santa Cruz Operation, Inc. (SCO)** (since merged with Caldera), the code for Cscope was open sourced under the BSD license.

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/if_cscope.c
This piece of code was taken/adapted from nvi. do we need to add the
BSD license notice?

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/if_cscope.h
CScope support for Vim added by **Andy Kahn** <kahn@zk3.dec.com>
Ported to Win32 by Sergey Khorev <sergey.khorev@gmail.com>

The basic idea/structure of cscope for Vim was borrowed from Nvi. There
might be a few lines of code that look similar to what Nvi has. If this is a
problem and requires inclusion of the annoying BSD license, then sue
me; I'm not worth much anyway.

♦♦♦

vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/doc/vim.1
Vim is based on Stevie, worked on by:
Tim Thompson, Tony Andrews and G.R. (Fred) Walter.
Although hardly any of the original code remains.

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/sqr.vim
(based on the UltraEdit syntax file for SQR 6.1.4 found at
http://www.ontko.com/sqr/editor_config_files)

♦♦♦

From:
http://www.ontko.com/sqr/editor_config_files [as of 09/08/11]
SQR Library - SQR is a programming language specifically designed for
SQL database reporting and information processing. It includes a unique
blend of procedural and structured programming constructs (if, while,
begin-procedure, etc.) and features to facilitate report writing (on-break,
next-column, next-listing, new-report). SQR runs on a variety of operating
platforms (MS-Windows, many flavors of Unix, VMS, MVS, VM, etc.) and
SQL databases (Oracle, Sybase, DB2, Informix, SQLBase, etc.). For this
reason, it is a popular tool among database application vendors (such as
PeopleSoft) as a way of allowing their applications to be implemented in
a variety of technical environments. SQR is developed and marketed by
Oracle. SQR was originally marketed by SQRIBE Technologies until that
company was acquired by Brio in August 1999. Then Hyperion acquired
Brio in late 2003, and **Oracle** acquired Hyperion in April 2007. Included
below are links to documents, utility programs, libraries, procedures, and
even links to other resources. Feel free to use these on your projects.
Suggestions welcomed. Let us know what you find to be useful.

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/message.c
This code is based on snprintf.c - a portable implementation of snprintf by
Mark Martinec <mark.martinec@ijs.si>, Version 2.2, **2000-10-06**.

Included with permission. It was heavily modified to fit in Vim. The original
code, including useful comments, can be found here:
<http://www.ijs.si/software/snprintf/>

document version 2.60

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/groovy.vim
I must directly or indirectly thank the author of java.vim and ruby.vim: I copied from them most of the stuff :-)

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/doc/if_tcl.txt
This procedure runs an Ex command on each buffer (idea stolen from Ron Aaron)

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/doc/print.txt
Derived from Ghostview.

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/doc/tips.txt
[the idea for this comes from Andreas Kutschera]

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/ftplugin/ocaml.vim
Copied from Stefano's original plugin

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/ftplugin/perl6.vim
Based on ftplugin/perl.vim by Dan Sharp <dwsharp at hotmail dot com>

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/indent/awk.vim
Mmm, copied from the tcl indent program. Is this okay?

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/keymap/ukrainian-jcuken.vim
Derived from russian-jcuken.vim by Artem Chuprina <ran@ran.pp.ru>

♦♦♦

vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/keymap/ukrainian-dvorak.vim
Derived from ukrainian-jcuken.vim by Anatoli Sakhnik <sakhnik@gmail.com>

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/macros/matchit.vim
A lot of this is copied from s:Match_wrapper().

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/spell/en/en_NZ.diff
This comes from Aspell en_phonet.dat, version 1.1, 2000-01-07

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/dylan.vim
This syntax file is based on the Haskell, Perl, Scheme, and C syntax files.

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/ecd.vim
This syntax file was derived from apachestyle.vim by Christian Hammers <ch@westend.com>

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/fan.vim
Based on Java syntax file by Claudio Fleiner <claudio@fleiner.com>

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/groovy.vim
Java stuff taken from java.vim

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/hastepreproc.vim
some parts have been taken from vhdl, verilog, and C syntax files

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/jal.vim
It is based on the Source Forge compiler source code.
<https://sourceforge.net/projects/jal/>

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/ldapconf.vim
Taken from <http://www.iana.org/assignments/sasl-mechanisms>.

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/lisp.vim
taken from the HyperSpec

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/mysql.vim
Note: The definitions below are taken from the mysql user manual as of
April 2002, for version 3.23

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/perl6.vim
mostly stolen from perl.vim, might need more work

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/pfmain.vim
Based on Postfix 2.3.x defaults.

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/plp.vim
Cloned From: aspperl.vim

♦♦♦

vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/slrnc.vim
Slrn setup file (based on slrn 0.9.8.1)

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/spice.vim
This is based on sh.vim by Lennart Schultz but greatly simplified

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/sqlj.vim
This file is based on sql.vim && java.vim (thanx)

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/sqr.vim
based on the UltraEdit syntax file for SQR 6.1.4 found at
http://www.ontko.com/sqr/editor_config_files)

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/tads.vim
Stolen from: Bram Moolenaar's C language file

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/syntax/valgrind.vim
Notes: mostly based on strace.vim and xml.vim

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/tools/blink.c
(based on an idea from John Lange).

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/runtime/tools/vimspell.sh
Based on a program from Krishna Gadepalli
<krishna@stdavids.picker.com>.

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/Make_mvc.mak
(default derived from nmake if undefined)

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/Makefile
This Makefile is loosely based on the GNU Makefile conventions found in
standards.info.

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/arabic.h
(based on Unicode)

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/blowfish.c
Based on <http://www.schneier.com/blowfish.html> by Bruce Schneier.

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/charset.c
Table for EBCDIC to ASCII conversion unashamedly taken from xxd.c

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/configure.in
stolen from the LYNX port to z/OS Unix

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/ex_docmd.c
This is all pretty much copied from do_one_cmd()

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/gui_at_sb.c
Comes from Xaw/Scrollbar.c.

♦♦♦

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/gui_gtk_f.c
The following chunk of code is taken from gtkcontainer.c.

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/gui_mac.c
This routine was pretty much taken from example code in the Silicon
Graphics OSF/Motif Programmer's Guide.
Multibyte computation taken from gui_w32.c
Taken from MoreAppleEvents:ProcessHelpers

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/gui_motif.c
The code below was originally taken from
/usr/examples/motif/xmsamplers/xmeditor.c on Digital Unix 4.0d, but
heavily modified.

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/gui_w32.c
stolen from gui_x11.x
partially stolen from gui_beval.c

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/if_cscope.c
The basic idea/structure of cscope for Vim was borrowed from Nvi. There
might be a few lines of code that look similar to what Nvi has.

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/if_mzsch.c
Exception handling code - cribbed from the MzScheme sources and
Matthew Flatt's Inside PLT MzSchemedocument.
Original work by Brent Fulgham <bfulgham@debian.org> (Based on lots
of help from Matthew Flatt)

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/if_sniff.c
derived from buflist_findname()
derived from cursor_pos_info() [buffer.c]

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/mbyte.c
Based on code from Markus Kuhn.

From:
vim-7.3.138-1.fc15.src/vim-7.3/vim73/src/misc1.c
Most of this originally comes from Eric Fischer.

Group:	User Space Libraries
Description:	VTE is a library (libvte) implementing a terminal emulator widget for GTK+, and a minimal sample application (vte) using that. Vte is mainly used in gnome-terminal, but can also be used to embed a console/terminal in games, editors, IDEs, etc. VTE supports Unicode and character set conversion, as well as emulating any terminal known to the

watchdog 5.9

Software:	watchdog
Version:	5.9
File or Package:	watchdog-5.9.tar.gz
OSI Licenses:	GPLv1+, GPLv2, GPLv2+, GPLv2+ w/exception, MIT/X11, Academic
Other Licenses:	Custom
URL:	http://dl.sf.net/watchdog/watchdog-5.9.tar.gz
Group:	User Space Apps / System Environment/Daemons
Description:	The Linux kernel can reset the system if serious problems are detected. This can be implemented via special watchdog hardware, or via a slightly less reliable software-only watchdog inside the kernel. Watchdog is a daemon that tells the kernel the system is working fine. If the daemon stops doing that, the system is reset.
Common Usage:	Tool, Utility
Package Size:	853 KB (0.83 MB)
Folders / Files:	10 / 112

document version 2.60

wiggle 0.8

Software:	wiggle
Version:	0.8
File or Package:	wiggle-0.8.tar.gz
OSI Licenses:	GPLv2, GPLv2+
Other Licenses:	Custom
URL:	http://neil.brown.name/wiggle/wiggle-0.8.tar.gz
Group:	User Space Apps / Development/Tools
Description:	This is a host-tools package that may be used by customers patching the kernel. The purpose of the package is to make patching easier. Wiggle is a program for applying patches that 'patch' cannot apply due to conflicting changes in the original. Wiggle will always apply all changes in the patch to the original. If it cannot find a way to cleanly apply a patch, it inserts it in the original in a manner similar to 'merge', and report an unresolvable conflict.
Common Usage:	Standalone, Utility
Package Size:	7.9 MB
Folders / Files:	40 / 218
Source Path:	wrlinux-4.0/layers/wrll-kernel/packages

wpa_supplicant 0.6.8-9

Software: wpa_supplicant
Version: 0.6.8-9
File or Package: wpa_supplicant-0.6.8-9.fc13.src.rpm

document version 2.60

OSI Licenses: GPLv2, BSDv1 (non-UCB), BSDv2, BSD (version undefined), MIT/X11, Academic, Public Domain
Other Licenses: Custom
URL: http://download.fedora.redhat.com/pub/fedora/linux/core/development/source/SRPMS/wpa_supplicant-0.6.8-9.fc13.src.rpm

Group: System Environment/Base
Description: wpa_supplicant is a WPA Supplicant for Linux, BSD and Windows with support for WPA and WPA2 (IEEE 802.11i / RSN). Supplicant is the IEEE 802.1X/WPA component that is used in the client stations. It implements key negotiation with a WPA Authenticator and it controls the roaming and IEEE 802.11 authentication/association of the wlan driver. wpa_supplicant is designed to be a "daemon" program that runs in the background and acts as the backend component controlling the wireless connection.

wpa_supplicant supports separate frontend programs and a text-based frontend (wpa_cli) and a GUI (wpa_gui) are included with wpa_supplicant. A daemon program that runs in the background and acts as the backend component controlling the wireless connection. wpa_supplicant supports separate frontend programs and a text-based frontend (wpa_cli) and a GUI (wpa_gui) are included with wpa_supplicant. wpa_supplicant is a free software implementation of an IEEE 802.11i supplicant for Linux, BSD and Microsoft Windows.

In addition to being a full-featured WPA2 supplicant, it also has support for WPA and older wireless LAN security protocols. Supported features include: WPA and full IEEE 802.11i/RSN/WPA2; WPA-PSK and WPA2-PSK (pre-shared key) ("WPA-Personal"); WPA with EAP (e.g., with RADIUS authentication server) ("WPA-Enterprise"); key management for CCMP, TKIP, WEP (both 104/128 and 40/64 bit); RSN: PMKSA caching, pre-authentication. Included with the supplicant are a graphical user interface and a command line interface utility for interacting with the running supplicant.

From either of these interfaces it is possible to review a list of currently visible networks, select one of them, provide any additional security information needed to authenticate with the network (e.g. a passphrase or username and password) and add it to the preference list to enable automatic reconnection in the future.

Common Usage: Utility

This code implements the MD4 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by Colin Plumb in 1993, no copyright is claimed. This code is in the public domain; do with it what you wish.

Todd C. Miller modified the MD5 code to do MD4 based on RFC 1186. Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

From:

wpa_supplicant-0.6.8-9.fc13.src/wpa_supplicant-0.6.8/wpa_supplicant-0.6.8/wpa_supplicant/defconfig

When building a wpa_cli binary for distribution, please note that these libraries are licensed under GPL and as such, BSD license may not apply for the resulting binary.

You need CONFIG_TLS=gnutls for this to have any effect. Please note that even though the core GnuTLS library is released under LGPL, this extra library uses GPL and as such, the terms of GPL apply to the combination of wpa_supplicant and GnuTLS if this option is enabled. BSD license may not apply for distribution of the resulting binary.

document version 2.60

This is based on SHA256 implementation in LibTomCrypt that was released into public domain by **Tom St Denis**.

From:
wpa_supplicant-0.6.8-9.fc13.src/wpa_supplicant-0.6.8/wpa_supplicant-0.6.8/src/tls/libtommath.c
http://libtom.org/files/ltm-0.41.tar.bz2
This library was released in public domain by **Tom St Denis**.

From:
wpa_supplicant-0.6.8-9.fc13.src/wpa_supplicant-0.6.8/wpa_supplicant-0.6.8/src/common/wireless_copy.h
Copyright (c) 1997-2005 Jean Tourrilhes, All Rights Reserved.

From:
wpa_supplicant-0.6.8-9.fc13.src/wpa_supplicant-0.6.8/wpa_supplicant-0.6.8/wpa_supplicant/README
This is a generic Linux driver for Broadcom IEEE 802.11a/g cards. However, it is proprietary driver that is not publicly available except for couple of exceptions, mainly Broadcom-based APs/wireless routers that use Linux. The driver binary can be downloaded, e.g., from Linksys support site (<http://www.linksys.com/support/gpl.asp>) for Linksys WRT54G. The GPL tarball includes cross-compiler and the needed header file, wlioclt.h, for compiling wpa_supplicant. This driver support in wpa_supplicant is expected to work also with other devices based on Broadcom driver (assuming the driver includes client mode support). Please note that the newer Broadcom driver ("hybrid Linux driver") supports Linux wireless extensions and does not need (or even work) with the specific driver wrapper. Use -Dwext with that driver.

From:
wpa_supplicant-0.6.8-9.fc13.src/wpa_supplicant-0.6.8/wpa_supplicant-0.6.8/src/drivers/driver_roboswitch.c
Copied from the kernel-only part of mii.h.

From:
wpa_supplicant-0.6.8-9.fc13.src/wpa_supplicant-0.6.8/wpa_supplicant-0.6.8/src/tls/libtommath.c
Based on Algorithm 14.12 on pp.595 of HAC.

wrs-kernheaders 4.0

Software:	wrs-kernheaders
Version:	4.0
File or Package:	wrs-kernheaders-4.0.tgz
OSI Licenses:	GPLv2, GPLv2+, LGPLv2, LGPLv2+, LGPLv2.1, LGPLv2.1+, FDLv1.1+, FreeBSD, BSDv1 (non-UCB), BSDv2, MIT/X11, Academic
Other Licenses:	Custom
URL:	
Group:	Development/System
Description:	Header files from the Linux kernel for use by glibc. Kernel-headers includes the C header document version 2.60

files that specify the interface between the Linux kernel and userspace libraries and programs. The header files define structures and constants that are needed for building most standard programs and are also needed for rebuilding the glibc package.

Common Usage: Library
Package Size: 8.2 MB
Folders / Files: 52 / 1,381
Source Path: wrlinux-4.0/layers/wrll-linux-2.6.34/packages

NOTICES:

♦♦♦

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-
src/include/linux/netfilter_ipv6.h
this header was blatantly ripped from netfilter_ipv4.h

♦♦♦

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-src/include/asm-
xtensa/posix_types.h
Largely copied from include/asm-ppc/posix_types.h

♦♦♦

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-src/include/asm-
xtensa/signal.h
Swiped from SH.

♦♦♦

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-src/include/asm-
xtensa/socket.h
Copied from i386.

♦♦♦

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-src/include/asm-
xtensa/sockios.h
Copied from MIPS.

♦♦♦

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-
src/include/linux/atm_idt77105.h
Written 1999 by Greg Banks <gnb@linuxfan.com>. Copied from
atm_suni.h.

♦♦♦

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-src/include/linux/iso_fs.h
This part borrowed from the bsd386 isofs

♦♦♦

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-
src/include/linux/netfilter/nfnetlink_compat.h
FIXME: Apart from NFNL_NFA_NESTED shamelessly copy and pasted
from rtnetlink.h, it's time to put this in a generic file

♦♦♦

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-
src/include/linux/netfilter_bridge/ebtables.h
blatently stolen from ip_tables.h

♦♦♦

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-src/include/linux/pkt_cls.h
I think i could have done better macros ; for now this is stolen from some
arch/mips code – jhs

♦♦♦

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-src/include/asm-s390/mman.h
Derived from "include/asm-i386/mman.h"

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-src/include/asm-parisc/pdc.h
based on work by Jason Eckhardt (jason@equator.com)

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-
src/include/linux/netfilter_ipv6/ip6t_hl.h
Based on HW's TTL module

From:
wrs-kernheaders-4.0/wrs_kernheaders-4.0-src/include/linux/ppp-comp.h
The return value from decompress routine is the length of the
decompressed packet if successful, otherwise DECOMP_ERROR or
DECOMP_FATALERROR if an error occurred. We need to make this
distinction so that we can disable certain useful functionality, namely
sending a CCP reset-request as a result of an error detected after
decompression. This is to avoid infringing a patent held by Motorola.
Don't you just love software patents.

wrs-ttf-dejavu 2.19

Software:	wrs-ttf-dejavu
Version:	2.19
File or Package:	wrs-ttf-dejavu-2.19.tar.bz2
OSI Licenses:	MIT/X11 (variant), Public Domain
Other Licenses:	Custom
URL:	
Group:	X11
Description:	75 dpi fonts; the DejaVu fonts are a font family based on the Vera Fonts. Their purpose is to provide a wider range of characters while maintaining the original look and feel through the process of collaborative development, under a free license.
Common Usage:	Library
Package Size:	55.4 MB
Folders / Files:	3 / 79
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

NOTICES:

From:
wrs-ttf-dejavu-2.19/dejavu-sfd-2.19/license
Fonts are
(c) Bitstream (see below).
DejaVu changes are in public domain.
Glyphs imported from Arev fonts are
(c) Tavmjong Bah (see below)

Bitstream Vera Fonts Copyright
Copyright (c) 2003 by Bitstream, Inc. All Rights Reserved.
Bitstream Vera is a trademark of Bitstream, Inc.

Permission is hereby granted, free of charge, to any person obtaining a copy of the fonts accompanying this license ("Fonts") and associated documentation files (the "Font Software"), to reproduce and distribute the Font Software, including without limitation the rights to use, copy, merge,

publish, distribute, and/or sell copies of the Font Software, and to permit persons to whom the Font Software is furnished to do so, subject to the following conditions: The above copyright and trademark notices and this permission notice shall be included in all copies of one or more of the Font Software typefaces.

The Font Software may be modified, altered, or added to, and in particular the designs of glyphs or characters in the Fonts may be modified and additional glyphs or characters may be added to the Fonts, only if the fonts are renamed to names not containing either the words "Bitstream" or the word "Vera".

This License becomes null and void to the extent applicable to Fonts or Font Software that has been modified and is distributed under the "Bitstream Vera" names.

The Font Software may be sold as part of a larger software package but no copy of one or more of the Font Software typefaces may be sold by itself.

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT.

xcb-proto 1.6

Software:	xcb-proto
Version:	1.6
File or Package:	xcb-proto-1.6.tar.bz2
OSI Licenses:	GPLv2+ w/exception, MIT/X11, Academic
Other Licenses:	
URL:	http://xcb.freedesktop.org/dist/xcb-proto-1.6.tar.bz2
Group:	User Space Libraries
Description:	XCB: an X protocol C binding; XCB is a project to enable efficient language bindings to the X11 protocol. This package contains the protocol descriptions themselves. Language bindings use these protocol descriptions to generate code for marshalling the protocol. The xcb-proto package provides the XML-XCB protocol descriptions that libxcb uses to generate the majority of its code and API.
Common Usage:	Library
Package Size:	459 KB (0.45 MB)
Folders / Files:	5 / 53
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

xcb-util 0.3.6

Software: xcb-util
Version: 0.3.6

document version 2.60

File or Package: xcb-util-0.3.6.tar.bz2
OSI Licenses: GPLv2+ w/exception, MIT/X11, Academic
Other Licenses:
URL: <http://xcb.freedesktop.org/dist/xcb-util-0.3.6.tar.bz2>
Group: User Space Libraries
Description: XCB: an X protocol C binding; The xcb-util module provides a number of libraries which sit on top of libxcb, the core X protocol library, and some of the extension libraries. These experimental libraries provide convenience functions and interfaces which make the raw X protocol more usable. Some of the libraries also provide client-side code which is not strictly part of the X protocol but which have traditionally been provided by Xlib.

Other Licenses:	Custom
URL:	http://www.apache.org/dist/xml/xerces-c/xerces-c-src_2_8_0.tar.gz
Group:	Applications/Development

document version 2.60

Description: Xerces-C++ is a validating XML parser written in a portable subset of C++. Xerces-C++ makes it easy to give your application the ability to read and write XML data. A shared library is provided for parsing, generating, manipulating, and validating XML documents using the DOM, SAX, and SAX2 APIs. The parser provides high performance, modularity, and scalability. Source code, samples and API documentation are provided with the parser. For portability, care has been taken to make minimal use of templates, no RTTI, and minimal use of ifdefs.

xfsdump 3.0.4-1

Software:	xfsdump
Version:	3.0.4-1
File or Package:	xfsdump-3.0.4-1.fc13.src.rpm
OSI Licenses:	GPLv2, GPLv2+ w/exception
Other Licenses:	
URL:	ftp://oss.sgi.com/projects/xfs/cmd_tars/ xfsdump-3.0.4-1.fc13.src.rpm
Group:	User Space Apps/Applications/Archiving/System
Description:	Administrative utilities for the XFS filesystem. The xfsdump package contains xfsdump, xfsrestore and a number of other administrative utilities for managing XFS filesystems. xfsdump examines files in a filesystem, determines which need to be backed up, and copies those files to a specified disk, tape or other storage medium. It uses XFS-specific directives for optimizing the dump of an XFS filesystem, and also knows how to backup XFS extended attributes. Backups created with xfsdump are "endian safe" and can thus be transferred between Linux machines of different architectures and also between IRIX machines. xfsrestore performs the inverse function of xfsdump; it can restore a full backup of a filesystem. Subsequent incremental backups can then be layered on top of the full backup. Single files and directory sub-trees may be restored from full or partial backups.

xfspgros 3.1.1-5

Software:	xfspgros
Version:	3.1.1-5
File or Package:	xfspgros-3.1.1-5.fc13.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2.1
Other Licenses:	Custom
URL:	http://oss.sgi.com/projects/xfspgros-3.1.1-5.fc13.src.rpm
Group:	Applications/System / System Environment/Base
Description:	Utilities for managing the XFS filesystem. xfspgros is a set of commands to use the XFS filesystem, including mkfs.xfs. XFS is a high performance journaling filesystem which originated on the SGI IRIX platform. XFS combines advanced journaling technology with full 64-bit addressing and scalable structures and algorithms. It is completely multi-threaded, can support large files and large filesystems, extended attributes, variable block sizes, is extent based, and makes extensive use of Btrees (directories, extents, free space) to aid both performance and scalability.
Common Usage:	Utility
Package Size:	9.4 MB
Folders / Files:	30 / 435
Source Path:	wrlinux-4.0/layers/wrl-kernel/packages

From:

xfsprogs-3.1.1-5.fc13.src/xfsprogs.spec

Summary: Utilities for managing the XFS filesystem

Name: xfsprogs

Version: 3.1.1

Release: 5%{?dist}

Licensing based on generic "GNU GENERAL PUBLIC LICENSE" in source, with no mention of version. doc/COPYING file specifies what is GPL and what is LGPL but no mention of versions in the source.

License: GPL+ and LGPLv2+

Group: System Environment/Base

URL: <http://oss.sgi.com/projects/xfs/>

XFS is a high performance journaling filesystem which originated on the SGI IRIX platform. It is completely multi-threaded, can support large files and large filesystems, extended attributes, variable block sizes, is extent based, and makes extensive use of Btrees (directories, extents, free space) to aid both performance and scalability. Refer to the

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

documentation at <http://oss.sgi.com/projects/xfs/> for complete details. This implementation is on-disk compatible with the IRIX version of XFS.

From:

xfsprogs-3.1.1-5.fc13.src/xfsprogs-3.1.1/xfsprogs-3.1.1/fsr/xfs_fsr.c

This code was borrowed from mv.c with some minor mods.

From:

xfsprogs-3.1.1-5.fc13.src/xfsprogs-3.1.1/xfsprogs-3.1.1/libxfs/trans.c

Originally derived from xfs_trans_mod_sb().

Originally based on xfs_trans_unlock_chunk() - adapted for libxfs transactions though.

From:

xfsprogs-3.1.1-5.fc13.src/xfsprogs-3.1.1/xfsprogs-3.1.1/libxfs/util.c

Originally based on xfs_iflush_int() from xfs_inode.c in the kernel.
