อนุญาตให้ทำซ้ำ เผยแพร่ และ/หรือ ดัดแปลงเอกสารนี้ได้ ภายใต้เงื่อนไขของ GNU Free Documentation License (GFDL) รุ่น 1.1 หรือรุ่นถัดมาใดๆ ที่เผยแพร่โดยมูลนิธิซอฟต์แวร์เสรี (Free Software Foundation) โดยไม่มี "หัวข้อห้ามเปลี่ยน" (Invariant Sections), ไม่มี "ข้อความปกหน้า" (Front-Cover Texts) และไม่มี "ข้อความปกหลัง" (Back-Cover Texts)

document version 2.60

คุณสามารถอ่านสำเนาของ GFDL ได้จาก ลิงก์นี้ หรือในแฟ้ม COPYING-DOCS
ที่เผยแพร่พร้อมกับคู่มือนี้

คู่มือนี้ เป็นส่วนหนึ่งของชุดคู่มือ GNOME ที่เผยแพร่ภายใต้ GFDL
ถ้าคุณต้องการเผยแพร่คู่มือนี้แยกต่างหากจากชุด
คุณสามารถทำได้โดยเพิ่มสำเนาของสัญญาอนุญาตไปกับคู่มือ ตามที่อธิบายในข้อ
6 ของสัญญาอนุญาต มีชื่อหลายชื่อที่บริษัทต่างๆ
ใช้แยกความแตกต่างของผลิตภัณฑ์และบริการของตนจากบริษัทอื่น
และอ้างเป็นเครื่องหมายการค้า ที่ใดก็ตามที่ชื่อเหล่านี้ปรากฏในเอกสารของ
GNOME และสมาชิกโครงการเอกสาร GNOME
ได้รับทราบเกี่ยวกับเครื่องหมายการค้าเหล่านั้น
ชื่อเหล่านี้จะเขียนด้วยตัวพิมพ์ใหญ่ หรือขึ้นต้นด้วยตัวพิมพ์ใหญ่
เอกสารนี้และฉบับดัดแปลงของเอกสารนี้ เผยแพร่ภายใต้เงื่อนไขของ GNU FREE
DOCUMENTATION LICENSE พร้อมด้วยความเข้าใจในสิ่งต่อไปนี้:

เอกสารนี้ เผยแพร่ตามสภาพที่เป็น โดยไม่มีการรับประกันใดๆ ทั้งสิ้น
ไม่ว่าจะโดยชัดแจ้งหรือโดยนัย
ซึ่งรวมถึงโดยไม่ได้จำกัดเพียงการรับประกันว่าเอกสารนี้หรือฉบับดัดแปลงของเอก
สารนี้จะปลอดจากข้อผิดพลาดที่อาจเรียกหรือสร้างความเสียหายได้
หรือเหมาะกับวัตถุประสงค์เฉพาะใดๆ หรือไม่มีการละเมิดสิทธิ
ความเสี่ยงทั้งหมดเกี่ยวกับคุณภาพ ความถูกต้อง
และประสิทธิภาพของเอกสารนี้หรือฉบับดัดแปลงของเอกสารนี้ อยู่ที่ตัวคุณ
หากมีการพิสูจน์พบว่าเอกสารนี้หรือฉบับดัดแปลงมีข้อบกพร่องในแง่ใดๆ ก็ตาม
คุณ (ไม่ใช่ผู้เขียนเริ่มแรก หรือผู้ร่วมสมทบใดๆ)
จะรับการค่าใช้จ่ายของการให้บริการ การซ่อมแซมหรือแก้ไขที่จำเป็น
ค่าปฏิเสธความรับผิดชอบเกี่ยวกับการรับประกันนี้
เป็นส่วนสำคัญของสัญญาอนุญาตนี้
ไม่อนุญาตให้ใช้เอกสารนี้หรือฉบับดัดแปลงของเอกสารนี้
นอกจากจะอยู่ภายใต้ค่าปฏิเสธความรับผิดชอบนี้ และ

ไม่มีสภาวะใดและทฤษฎีทางกฎหมายใด ไม่ว่าจะมีการล่วงละเมิด
(รวมถึงการละเลย), ในสัญญา หรืออื่นๆ ที่ผู้เขียน ผู้เขียนเริ่มแรก ผู้ร่วมสมทบใดๆ
หรือผู้เผยแพร่เอกสารนี้หรือฉบับดัดแปลง หรือผู้สนับสนุนแก่กลุ่มคนดังกล่าว
จะมีภาระผูกพันต่อบุคคลใดในความเสียหายโดยตรง โดยอ้อม โดยพิเศษ
โดยบังเอิญ หรือโดยผลพวง ของสิ่งใด
รวมถึงโดยไม่จำกัดเพียงความเสียหายในเรื่องความสูญเสียเจตนาดี
การสะดุดของงาน ความล้มเหลวหรือการทำงานผิดพลาดของคอมพิวเตอร์
หรือความเสียหายหรือความสูญเสียอื่นใดทั้งหมด ที่เกิดขึ้นจาก
หรือเกี่ยวข้องกับการใช้เอกสารนี้หรือฉบับดัดแปลง
แม้กลุ่มบุคคลเหล่านั้นจะได้รับทราบความเป็นไปได้ของความเสียหายดังกล่าวก็ตาม

Дозволяється копіювати, розповсюджувати та/або змінювати цей
документ на умовах ліцензії GNU Free Documentation License (GFDL),
версії 1.1 або будь-якої старшої версії, що опублікована Free
Software Foundation без інваріантних розділів, тексту титульної
сторінки, та тексту фінальної сторінки. Копію GFDL можна знайти за
адресою або у файлі COPYING-DOCS, що постачається з цією
довідкою.

Ця довідка є частиною збірки документації GNOME, що постачається
на умовах ліцензії GFDL. Якщо ви бажаєте розповсюджувати її
окремо від збірки, ви можете це робити, якщо додасте копію ліцензії
до документу, як описано у розділі 6 цієї ліцензії.

Більшість назв, що використовуються компаніями для
розповсюдження їх продуктів та послуг є торговими марками. Якщо
такі назви зустрічаються у документації з GNOME та учасникам
проекту документування GNOME відомо, що вони є торговими
марками, тоді ці назви пишуться великими літерами або
починаються з великої літери.

ДОКУМЕНТ ТА ЗМІНЕНІ ВЕРСІЇ ЦЬОГО ДОКУМЕНТУ
ПОСТАЧАЮТЬСЯ НА УМОВАХ ВІЛЬНОЇ ЛІЦЕНЗІЇ ДЛЯ
ДОКУМЕНТАЦІЇ GNU З ПОДАЛЬШИМ РОЗУМІННЯМ ЩО:

ДОКУМЕНТ НАДАЄТЬСЯ "ЯК Є", БЕЗ БУДЬ-ЯКИХ ГАРАНТІЇ, ЯВНИХ
ЧИ НЕЯВНИХ, ВКЛЮЧАЮЧИ, АЛЕ НЕ ОБМЕЖУЮЧИСЬ, ГАРАНТІЙ
ЩО ЦЕЙ ДОКУМЕНТ ЧИ ЗМІНЕНА ВЕРСІЯ ДОКУМЕНТА ВІЛЬНІ ВІД
ДЕФЕКТІВ, ПРИДАТНІ ДО ПРОДАЖУ, ВІДПОВІДАЮТЬ ПЕВНІЙ МЕТІ
АБО НЕ ПОРУШУЮТЬ ЧИЙСЬ ПРАВА. ВЕСЬ РИЗИК ЗА ЯКІСТЬ,
ТОЧНІСТЬ, ТА ЧИННІСТЬ ЦЬОГО ДОКУМЕНТУ АБО ЙОГО
ЗМІНЕНИХ ВЕРСІЙ ЛЕЖИТЬ НА ВАС. ЯКЩО БУДЬ-ЯКИЙ
ДОКУМЕНТ ЧИ ЗМІНЕНА ВЕРСІЯ БУДУТЬ ВИЗНАНІ ДЕФЕКТНИМИ
У БУДЬ-ЯКОМУ ВІДНОШЕННІ, ВИ (НЕ ПОЧАТКОВИЙ УКЛАДАЧ,
АВТОР АБО БУДЬ-ЯКИЙ СПІВАВТОР) БЕРЕТЕ НА СЕБЕ ВІТРАТИ
ЗА БУДЬ-ЯКЕ НЕОБХІДНЕ ОБСЛУГОВУВАННЯ, РЕМОНТ ЧИ
ВИПРАВЛЕННЯ. ЦЯ ВІДМОВА ВІД ГАРАНТІЙ СКЛАДАЄ ВАЖЛИВУ
ЧАСТИНУ ЦЬОЇ ЛІЦЕНЗІЇ. НЕ ДОПУСКАЄТЬСЯ ВИКОРИСТАННЯ
ЦЬОГО ДОКУМЕНТУ АБО ЙОГО ЗМІНЕНОЇ ВЕРСІЇ БЕЗ
ПРИЙНЯТТЯ ЦЬОЇ ВІДМОВИ; ТА

НІ ЗА ЯКИХ ОБСТАВИН ТА ЗА БУДЬ-ЯКОГО ЗАКОНОДАВСТВА, ЧИ
ТО ГРОМАДЯНСЬКОЇ ВІДПОВІДАЛЬНОСТІ (ВКЛЮЧАЮЧИ
ХАЛАТНІСТЬ), ДОГОВОРУ, ЧИ ЧОГОСЬ ІНШОГО, АВТОР,
ПОЧАТКОВИЙ УКЛАДАЧ, БУДЬ-ЯКИЙ СПІВАВТОР, АБО
ДИСТРИБ'ЮТОР ДОКУМЕНТУ ЧИ ЗМІНЕНОЇ ВЕРСІЇ ДОКУМЕНТУ,
АБО БУДЬ-ЯКИЙ ПОСТАЧАЛЬНИК БУДЬ-ЯКОЇ З ЦИХ СТОРІН, НЕ
НЕСЕ ВІДПОВІДАЛЬНІСТЬ ПЕРЕД БУДЬ-ЯКОЮ ОСОБОЮ ЗА БУДЬ-
ЯКІ ПРЯМІ, НЕПРЯМІ, ОСОБЛИВІ, ВИПАДКОВІ, АБО ІСТОТНІ
ЗБИТКИ БУДЬ-ЯКОГО ХАРАКТЕРУ ВКЛЮЧАЮЧИ, АЛЕ НЕ
ОБМЕЖУЮЧИСЬ, ЗБИТКАМИ ВІД ВТРАТИ ПРЕСТИЖУ, ЗУПИНКИ
РОБОТИ, ЗБОЇВ АБО НЕСПРАВНОСТЕЙ КОМП'ЮТЕРА, АБО БУДЬ-
ЯКІ ІНШІ ЗБИТКИ АБО ВТРАТИ ЩО ВИНИКЛИ БЕЗВІДНОСНО АБО

document version 2.60

ВНАСЛІДОК ВИКОРИСТАННЯ ЦЬОГО ДОКУМЕНТУ ТА ЗМІНЕНИХ ВЕРСІЙ ЦЬОГО ДОКУМЕНТУ, НАВІТЬ ЯКЩО ЦІ СТОРОНИ, МОЖЛИВО, БУЛИ ПРОІНФОРМОВАНІ ПРО МОЖЛИВІСТЬ ТАКИХ ЗБИТКІВ.

对于本文档的复制、分发和/或修改必须遵循自由软件基金会 (Free Software Foundation) 发布的 GNU 自由文档许可证 (GFDL) 版本 1.1 或更高版本, 该许可证没有固定的部分、没有封面和背页文本。您可以在 [此链接](#) 上或在随本手册一起分发的 COPYING-DOCS 文件找到 GFDL 的副本。本手册是在 GFDL 许可之下分发的 GNOME 手册集合的一部分。如果想要单独分发此手册, 可以在手册中添加该许可证的一份副本然后分发, 如该许可证的第 6 部分所述。

各个公司使用的许多用于区别它们产品和服务的名称都声明为商标。在所有的 GNOME 文档以及 GNOME 文档项目的成员中, 这些名称都是以全大写字母或首字母大写显示, 从而表明它们是商标。本文档以及文档的修改版本都是在遵循 GNU 自由文档许可证的条款下提供, 这表示具有以下含义:

文档按“原样”提供, 不提供任何明示或暗示的保证, 包括但不限于: 文档或文档的修改版本没有适销性方面的缺陷、适合特定目的的适用性, 以及没有侵权行为。您将自行承担本文件以及文档修改版本的质量、准确性以及性能方面的风险。如果任何文档或文档修改版本存在缺陷, 您 (而不是最初的编写者、作者或撰写人) 将承担所有必需的服务、维修或更正的费用。此免责声明是本许可证的重

无论在任何情况以及在任何法律理论下, 本文件或文档修改版本的作者、最初的编写者、任何撰写人或任何分发者, 或者任意这些方的任何提供者都不对任何人由于使用本文件或文档修改版本引起或带来的任何直接的、间接的、特殊的、偶然的或继发的损失承担任何民事 (包括疏忽)、合同或其它方面的责任, 这些损失包括但不限于信誉损失、工作停止、计算机失败或故障, 或任何以及所有其它损失或由此引发的或与之相关的损失, 即使这些方已被告知存在出现此类损失的可能性时也是如此。

根據自由軟件基金會 (Free Software Foundation) 所發佈的 GNU 自由文件授權 (GNU Free Documentation License, GFDL) 1.1 (含) 以後版本, 使用者可以複製、散佈, 或修改本文件, 但不得增刪章節, 不得加上封面文字, 亦不得加上封底文字。如要取得 GFDL 的副本, 請參閱 [此連結](#), 或是參閱與本手冊一同隨附的 COPYING-DOCS 案。本手冊是屬於根據 GFDL 授權所發佈之 GNOME 手冊集中的一部份。如果你只要單獨散佈本手冊, 根據授權聲明第六節之敘述, 你必須另外將授權聲明加入本手冊中。

許多公司為了突顯其產品與服務, 會使用特別名稱, 並亦已聲明這些名稱為其商標。當這些名稱出現在 GNOME 文件中, 同時 GNOME 文件專案小組成員亦明白這些名稱為商標時, 這些名稱會以大寫字母或是首字母大寫表示。本文件及其修正版本的提供, 是基於 GNU 自由文件授權聲明的條款, 同時亦有下列共識:

文件提供是以其「原樣」呈現, 不管明示或暗示, 皆不具任何保證, 包括 (但不限於) 文件或修正版毫無錯誤、可販售、具特殊用途, 或不侵權。關於本文件與修正版文件之品質、正確性及功用, 其風險你必須自行承擔。若本文件或修正版有任何缺陷, 任何必須之保養, 修理及更正, 應由你自行承擔, 原始作者、作者或任何散佈者無須負責。本免責聲明是本授權聲明極重要與必要的一部份, 因此任何文件或修正版的授權, 皆須在同意本免責聲明的情況下進行; 同時

在任何情況或法律理論下, 亦即不管是在侵權 (包括疏忽)、契約或其他情形, 或是已預先告知會有下列損害之可能時, 本文件或修正版的任何作者、原始作者、投稿人以及散佈者, 或是任何提供單位, 對於因使用本文件及修正版, 或與本文件及修正版使用相關所造成的任何直接、間接、特殊、偶然或必然之損害, 包括 (但不限於) 信譽受損、工作停止、電腦當機或不正常運作, 或任何所有其他損害, 上述人等皆不需負任何責任。

Das vorliegende Dokument kann gemäß den Bedingungen der GNU Free Documentation License (GFDL), Version 1.1 oder jeder späteren, von der Free Software Foundation veröffentlichten Version ohne unveränderbare Abschnitte sowie ohne Texte auf dem vorderen und hinteren Buchdeckel kopiert, verteilt und/oder modifiziert werden. Eine Kopie der GFDL finden Sie unter diesem Link oder in der mit diesem Handbuch gelieferten Datei COPYING-DOCS.

Dieses Handbuch ist Teil einer Sammlung von GNOME-Handbüchern, die unter der GFDL veröffentlicht werden. Wenn Sie dieses Handbuch getrennt von der Sammlung weiterverbreiten möchten, können Sie das tun, indem Sie eine Kopie der Lizenz zum Handbuch hinzufügen, wie es in Abschnitt 6 der Lizenz beschrieben ist.

Bei vielen der von Firmen zur Unterscheidung ihrer Produkte und Dienstleistungen verwendeten Namen handelt es sich um Marken. An den Stellen, an denen derartige Namen in einer GNOME-Dokumentation vorkommen und wenn die Mitglieder des GNOME-Dokumentationsprojekts über diese Marken informiert wurden, sind die Namen in Grossbuchstaben oder mit großen Anfangsbuchstaben geschrieben.

DAS DOKUMENT UND MODIFIZIERTE VERSIONEN DES DOKUMENTS WERDEN GEMÄSS DEN BEDINGUNGEN DER GNU FREE DOCUMENTATION LICENSE MIT DER FOLGENDEN VEREINBARUNG BEREITGESTELLT:

DAS DOKUMENT WIRD »WIE VORLIEGEND« GELIEFERT, OHNE JEGLICHE GEWÄHRLEISTUNG, WEDER AUSDRÜCKLICH NOCH STILLSCHWEIGEND, EINSCHLIESSLICH, ABER NICHT BESCHRÄNKT AUF, GEWÄHRLEISTUNGEN, DASS DAS DOKUMENT ODER EINE MODIFIZIERTE VERSION DES DOKUMENTS FREI VON HANDELSÜBLICHEN FEHLERN UND FÜR EINEN BESTIMMTEN ZWECK GEEIGNET IST UND KEINE RECHTE DRITTER VERLETZT. JEGLICHES RISIKO IN BEZUG AUF DIE QUALITÄT, GENAUIGKEIT UND LEISTUNG DES DOKUMENTS ODER EINER MODIFIZIERTEN VERSION DES DOKUMENTS TRAGEN SIE. SOLLTE SICH EIN DOKUMENT ODER EINE MODIFIZIERTE VERSION DAVON IN IRGEND EINER WEISE ALS FEHLERHAFT ERWEISEN, TRAGEN SIE (NICHT DER URSPRÜNGLICHE VERFASSER, AUTOR ODER EIN MITWIRKENDER) DIE KOSTEN FÜR JEGLICHE ERFORDERLICHE SERVICE-, REPARATUR- UND KORREKTURMASSNAHMEN: DIESE BESCHRÄNKUNG DER GEWÄHRLEISTUNG IST WESENTLICHER BESTANDTEIL DIESER LIZENZ. JEDE VERWENDUNG EINES DOKUMENTS ODER EINER MODIFIZIERTEN VERSION DES DOKUMENTS UNTERLIEGT DIESER BESCHRÄNKUNG; UND

UNTER KEINEN UMSTÄNDEN UND GEMÄSS KEINER RECHTSLEHRE, WEDER AUFGRUND VON UNERLAUBTEN HANDLUNGEN (EINSCHLIESSLICH FAHRLÄSSIGKEIT), VERTRÄGEN ODER SONSTIGEM, KANN DER AUTOR, DER URSPRÜNGLICHE VERFASSER, EIN MITWIRKENDER ODER EIN VERTEILER DES DOKUMENTS ODER EINER MODIFIZIERTEN VERSION DES DOKUMENTS ODER EIN LIEFERANT EINER DIESER PARTEIEN VON EINER PERSON FÜR DIREKTE, INDIREKTE, BESONDERE, ZUFÄLLIGE ODER ALS FOLGE AUFGETRETENE SCHÄDEN IRGEND EINER ART, EINSCHLIESSLICH, ABER NICHT BESCHRÄNKT AUF, SCHÄDEN DURCH GESCHÄFTSWERTVERLUSTE, ARBEITS-AUSFÄLLE, COMPUTERAUSFÄLLE ODER -

From:

gnome-python2-2.28.1-4.fc15.src/gnome-python-2.28.1/gnome-python-2.28.1/examples/canvas/canvas-curve.py

python port of canvas-curve.c from demos dir of libgnomecanvas as such, under GPL

gnome-terminal 2.26.3

Software: gnome-terminal

Version: 2.26.3

File or Package: gnome-terminal-2.26.3.tar.bz2

OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception (autoconf, libtool), LGPLv2+, GFDLv1.1+, MIT/X11, Attribution, Permissive Public Domain

Other Licenses:

URL: <http://ftp.gnome.org/pub/GNOME/sources/gnome-terminal/2.26/gnome-terminal-2.26.3.tar.bz2>

Group: User Space Apps

Description: This is the GNOME terminal emulator application. gnome-terminal is only the shell (menubar, prefs dialog); the terminal emulation ("stuff in the middle") comes from the VTE widget. Remember this when choosing a bugzilla component. ;-) GNOME Terminal is a terminal emulator for the GNOME desktop environment written by Havoc Pennington and others. Terminal emulators allow users to execute commands using a real UNIX shell while remaining on their graphical desktop.

Common Usage: Standalone

Package Size: 16.64 MB

Folders / Files: 43 / 281

Source Path: [wrlinux-4.0/layers/wrll-userspace/graphics/packages](#)

NOTICES:

document version 2.60

Permission is granted to copy, distribute and/or modify this document under the terms of the GNU Free Documentation License (GFDL), Version 1.1 or any later version published by the Free Software Foundation with no Invariant Sections, no Front-Cover Texts, and no Back-Cover Texts. You can find a copy of the GFDL at this link or in the file COPYING-DOCS distributed with this manual.

This manual is part of a collection of GNOME manuals distributed under the GFDL. If you want to distribute this manual separately from the collection, you can do so by adding a copy of the licence to the manual, as described in section 6 of the licence.

Many of the names used by companies to distinguish their products and services are claimed as trademarks. Where those names appear in any GNOME documentation, and the members of the GNOME Documentation Project are made aware of those trademarks, then the names are in capital letters or initial capital letters.

DOCUMENT AND MODIFIED VERSIONS OF THE DOCUMENT ARE PROVIDED UNDER THE TERMS OF THE GNU FREE DOCUMENTATION LICENSE WITH THE FURTHER UNDERSTANDING THAT:

DOCUMENT IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE DOCUMENT OR MODIFIED VERSION OF THE DOCUMENT IS FREE OF DEFECTS MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY, ACCURACY, AND PERFORMANCE OF THE DOCUMENT OR MODIFIED VERSION OF THE DOCUMENT IS WITH YOU. SHOULD ANY DOCUMENT OR MODIFIED VERSION PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL WRITER, AUTHOR OR ANY CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY DOCUMENT OR MODIFIED VERSION OF THE DOCUMENT IS AUTHORISED HEREUNDER EXCEPT UNDER THIS DISCLAIMER; AND

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER IN TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL THE AUTHOR, INITIAL WRITER, ANY CONTRIBUTOR, OR ANY DISTRIBUTOR OF THE DOCUMENT OR MODIFIED VERSION OF THE DOCUMENT, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER DAMAGES OR LOSSES ARISING OUT OF OR RELATING TO USE OF THE DOCUMENT AND MODIFIED VERSIONS OF THE DOCUMENT, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES.

Se concede autorizaci3n para copiar, distribuir o modificar este documento seg3n los t3rminos de la GFDL (GNU Free Documentation License), Versi3n 1.1, o cualquier otra versi3n posterior publicada por Free Software Foundation sin secciones invariables, textos de portada ni textos de contraportada. Podr3a encontrar una copia de la GFDL en este enlace o en el archivo COPYING-DOCS distribuido con este manual.

Este manual es parte de la colecci3n de manuales GNOME distribuidos bajo el GFDL. Si quiere distribuir este manual separadamente de la colecci3n, puede hacerlo a3adiendo una copia de la licencia al manual, como est3a descrito en la secci3n 6 de la licencia.

Muchos de los nombres usados por empresas para distinguir sus productos y servicios se mencionan como marcas comerciales. Donde aparezcan dichos nombres en cualquier documentaci3n GNOME, y para que los miembros del proyecto de documentaci3n reconozcan dichas marcas comerciales, dichos nombres se imprimen en may3sculas o iniciales may3sculas.

EL DOCUMENTO Y VERSIONES MODIFICADAS SE PROPORCIONAN BAJO LOS T3RMINOS DE LA LICENCIA LIBRE DE DOCUMENTACI3N DE GNU Y TENIENDO EN CUENTA QUE:

EL DOCUMENTO SE PROPORCIONA "TAL CUAL", SIN GARANT3AS DE NING3N TIPO, NI EXPRESAS NI IMPL3CITAS, INCLUYENDO, SIN LIMITACI3N, CUALQUIER GARANT3A DE QUE EL DOCUMENTO O UNA VERSI3N MODIFICADA DEL MISMO CAREZCAN DE DEFECTOS, SEA COMERCIALIZABLE, ADECUADO PARA UNA FINALIDAD DETERMINADA O QUE NO CONSTITUYA NINGUNA INFRACCI3N. TODO EL RIESGO EN CUANTO A LA CALIDAD, PRECISI3N Y UTILIDAD DEL DOCUMENTO O DE CUALQUIER VERSI3N MODIFICADA DEL MISMO LE CORRESPONDE A USTED. EN CASO DE QUE CUALQUIER DOCUMENTO O VERSI3N MODIFICADA RESULTARA DEFECTUOSO EN CUALQUIER SENTIDO, SER3 USTED (Y NO EL REDACTOR INICIAL, NI EL AUTOR NI CUALQUIER PERSONA QUE HAYA CONTRIBUIDO) QUIEN ASUMIR3 EL COSTE DE CUALQUIER SERVICIO T3CNICO, REPARACI3N O CORRECCI3N NECESARIOS. ESTA LIMITACI3N DE LAS GARANT3AS CONSTITUYE UNA PARTE ESENCIAL DE ESTA LICENCIA. NO SE AUTORIZA NING3N USO DE CUALQUIER DOCUMENTO O VERSI3N MODIFICADA DEL MISMO SI NO ES CON SUJECI3N A ESTA LIMITACI3N DE LAS GARANT3AS; Y

EN NINGUNA CIRCUNSTANCIA NI SEG3N NING3N ARGUMENTO LEGAL, SEA POR MOTIVOS CULPOSOS (INCLUIDA LA NEGLIGENCIA), CONTRACTUALES O DE OTRO TIPO, NI EL AUTOR, NI EL REDACTOR INICIAL, NI CUALQUIER COLABORADOR, NI CUALQUIER DISTRIBUIDOR DEL DOCUMENTO O VERSI3N MODIFICADA DEL MISMO, NI CUALQUIER PROVEEDOR DE CUALQUIERA DE DICHAS PARTES, SER3 N RESPONSABLES,

Tillstånd att kopiera, distribuera och/eller modifiera detta dokument ges under villkoren i GNU Free Documentation License (GFDL), version 1.1 eller senare, utgivet av Free Software Foundation utan standardavsnitt och omslagstexter. En kopia av GFDL finns att hämta på denna länk eller i filen COPYING-DOCS som medföljer denna handbok.

Denna handbok utgör en av flera GNOME-handböcker som distribueras under villkoren i GFDL. Om du vill distribuera denna handbok separat från övriga handböcker kan du göra detta genom att lägga till en kopia av licensavtalet i handboken enligt instruktionerna i avsnitt 6 i licensavtalet.

Flera namn på produkter och tjänster är registrerade varumärken. I de fall dessa namn förekommer i GNOME-dokumentation - och medlemmarna i GNOME-dokumentationsprojektet är medvetna om dessa varumärken - är de skrivna med versaler eller med inledande versal.

DOKUMENTET OCH MODIFIERADE VERSIONER AV DOKUMENTET TILLHANDAHÅLLS UNDER VILLKOREN I GNU FREE DOCUMENTATION LICENSE ENDAST UNDER FÖLJANDE FÖRUTSÄTTNINGAR:

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Більшість назв, що використовуються компаніями для
розповсюдження їх продуктів та послуг є торговими марками. Якщо
такі назви зустрічаються у документації з GNOME та учасникам
проекту документування GNOME відомо, що вони є торговими
марками, тоді ці назви пишуться великими літерами або
починаються з великої літери.

ДОКУМЕНТ ТА ЗМІНЕНІ ВЕРСІЇ ЦЬОГО ДОКУМЕНТУ
ПОСТАЧАЮТЬСЯ НА УМОВАХ ВІЛЬНОЇ ЛІЦЕНЗІЇ ДЛЯ
ДОКУМЕНТАЦІЇ GNU З ПОДАЛЬШИМ РОЗУМІННЯМ ЦЬО:

ДОКУМЕНТ НАДАЄТЬСЯ "ЯК Є", БЕЗ БУДЬ-ЯКИХ ГАРАНТІЇ, ЯВНИХ
ЧИ НЕЯВНИХ, ВКЛЮЧАЮЧИ, АЛЕ НЕ ОБМЕЖУЮЧИСЬ, ГАРАНТІЙ
ЩО ЦЕЙ ДОКУМЕНТ ЧИ ЗМІНЕНА ВЕРСІЯ ДОКУМЕНТА ВІЛЬНІ ВІД
ДЕФЕКТІВ, ПРИДАТНІ ДО ПРОДАЖУ, ВІДПОВІДАЮТЬ ПЕВНІЙ МЕТІ
АБО НЕ ПОРУШУЮТЬ ЧІЙСЬ ПРАВА. ВЕСЬ РИЗИК ЗА ЯКІСТЬ,
ТОЧНІСТЬ, ТА ЧИННІСТЬ ЦЬОГО ДОКУМЕНТУ АБО ЙОГО
ЗМІНЕНИХ ВЕРСІЙ ЛЕЖИТЬ НА ВАС. ЯКЩО БУДЬ-ЯКИЙ
ДОКУМЕНТ ЧИ ЗМІНЕНА ВЕРСІЯ БУДУТЬ ВІЗНАНІ ДЕФЕКТНИМИ
У БУДЬ-ЯКОМУ ВІДНОШЕННІ, ВИ (НЕ ПОЧАТКОВИЙ УКЛАДАЧ,
АВТОР АБО БУДЬ-ЯКИЙ СПІВАВТОР) БЕРЕТЕ НА СЕБЕ ВІТРАТИ
ЗА БУДЬ-ЯКЕ НЕОБХІДНЕ ОБСЛУГОВУВАННЯ, РЕМОТ ЧИ
ВІПРАВЛЕННЯ. ЦЯ ВІДМОВА ВІД ГАРАНТІЙ СКАДАЄ ВАЖЛИВУ
ЧАСТИНУ ЦІЄЇ ЛІЦЕНЗІЇ. НЕ ДОПУСКАЄТЬСЯ ВИКОРИСТАННЯ
ЦЬОГО ДОКУМЕНТУ АБО ЙОГО ЗМІНЕНОЇ ВЕРСІЇ БЕЗ
ПРИЙНЯТТЯ ЦІЄЇ ВІДМОВИ; ТА

НІ ЗА ЯКИХ ОБСТАВІН ТА ЗА БУДЬ-ЯКОГО ЗАКОНОДАВСТВА, ЧИ
ТО ГРОМАДЯНСЬКОЇ ВІДПОВІДАЛЬНОСТІ (ВКЛЮЧАЮЧИ
ХАЛАТНІСТЬ), ДОГОВОРУ, ЧИ ЧОГОСЬ ІНШОГО, АВТОР,
ПОЧАТКОВИЙ УКЛАДАЧ, БУДЬ-ЯКИЙ СПІВАВТОР, АБО
ДИСТРИБ'ЮТОР ДОКУМЕНТУ ЧИ ЗМІНЕНОЇ ВЕРСІЇ ДОКУМЕНТУ,
АБО БУДЬ-ЯКИЙ ПОСТАЧАЛЬНИК БУДЬ-ЯКОЇ З ЦІХ СТОРІН, НЕ
НЕСЕ ВІДПОВІДАЛЬНІСТЬ ПЕРЕД БУДЬ-ЯКОЮ ОСОБОЮ ЗА БУДЬ-
ЯКІ ПРЯМІ, НЕПРЯМІ, ОСОБЛИВІ, ВІПАДКОВІ, АБО ІСТОТНІ
ЗБИТКИ БУДЬ-ЯКОГО ХАРАКТЕРУ ВКЛЮЧАЮЧИ, АЛЕ НЕ
ОБМЕЖУЮЧИСЬ, ЗБИТКАМИ ВІД ВТРАТИ ПРЕСТИЖУ, ЗУПИНКИ
РОБОТИ, ЗБОЇВ АБО НЕСПРАВНОСТЕЙ КОМП'ЮТЕРА, АБО БУДЬ-
ЯКІ ІНШІ ЗБИТКИ АБО ВТРАТИ ЩО ВІНИКЛИ БЕЗВІДНОСНО АБО
ВНАСЛІДОК ВИКОРИСТАННЯ ЦЬОГО ДОКУМЕНТУ ТА ЗМІНЕНИХ
ВЕРСІЙ ЦЬОГО ДОКУМЕНТУ, НАВІТЬ ЯКЩО ЦІ СТОРОНИ,
МОЖЛИВО, БУЛИ ПРОІНФОРМОВАНІ ПРО МОЖЛИВІСТЬ ТАКИХ
ЗБИТКІВ.

From:
gnome-terminal-2.26.3/gnome-terminal-2.26.3/src/skey/md5.c
This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by **Colin Plumb in 1993**, no copyright is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

document version 2.60

gnupg2 2.0.4-1

Software: gnupg2
Version: 2.0.4-1
File or Package: gnupg2-2.0.4-1.fc6.src.rpm
OSI Licenses: GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1+, MIT/X11, BSDv2
Other Licenses: Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/extras/6/SRPMS/gnupg2-2.0.4-1.fc6.src.rpm>
Group: Applications
Description: GnuPG is GNU's tool for secure communication and data storage. It can be used to encrypt data and to create digital signatures. It includes an advanced key management facility and is compliant with the proposed OpenPGP Internet standard as described in RFC2440 and the S/MIME standard as described by several RFCs.
Common Usage: Utility
Package Size: 26.4 MB
Folders / Files: 25 / 651

Free Software Foundation, Inc.

GnuPG is GNU's tool for secure communication and data storage. It can be used to encrypt data and to create digital signatures. It includes an advanced key management facility and is compliant with the proposed OpenPGP Internet standard as described in RFC2440 and the S/MIME standard as described by several RFCs.

GnuPG is distributed under the terms of the GNU General Public License. See the file COPYING for details. GnuPG works best on GNU/Linux or BSD systems. Most other Unices are also supported but are not as well tested as the Free Unices.

This file is Free Software; as a special exception the authors gives unlimited permission to copy and/or distribute it, with or without modifications, as long as this notice is preserved. For conditions of the whole package, please see the file COPYING.

This file is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY, to the extent permitted by law; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.

From:
gnupg2-2.0.4-1.fc6.src/gnupg-2.0.4/gnupg-2.0.4/authors
GnuPG is distributed under the GNU General Public License, version 2 or later. A few files are under the Lesser General Public License, a few other files carry the all permissive license note as found at the bottom of this file. Certain files in keyserver/ allow one specific exception:

In addition, as a special exception, the Free Software Foundation gives permission to link the code of the keyserver helper tools:

gpgkeys_ldap, gpgkeys_curl and gpgkeys_hkp with the OpenSSL project's "OpenSSL" library (or with modified versions of it that use the same license as the "OpenSSL" library), and distribute the linked executables. You must obey the GNU General Public License in all respects for all of the code used other than "OpenSSL". If you modify this file, you may extend this exception to your version of the file, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version. Note that the gpgkeys_ binaries are currently installed under the name gpg2keys_.

OSI Licenses:	GPLv3, GPLv3+, GPLv3+ w/exception, GPLv2+ w/exception (autoconf, libtool), LGPLv2.1, LGPLv2.1+, GFDLv1.3, GFDLv1.3+, MIT/X11, SIL Open Font v1.1, Attribution, Permissive, Public Domain
Other Licenses:	Custom
URL:	
Group:	User Space Libraries / System Environment/Libraries
Description:	GnuTLS (pronounced like Gu-Noodles), the GNU Transport Layer Security Library, is a free software implementation of the SSL and TLS protocols. Its purpose is to offer an application programming interface (API) for applications to enable secure communication protocols over their network transport layer. This is a TLS (Transport Layer Security) 1.0 and SSL (Secure Sockets Layer) 3.0 implementation for the GNU project. Currently the GnuTLS library implements the proposed standards by the IETF's TLS working group.
Common Usage:	Library, Utility
Package Size:	51.70 MB

LICENSE ISSUES

Since the 0.4.2 version the gnutls library is covered under the GNU Lesser GPL. Previously released versions were licensed under the GNU GPL. We changed the license for most of GnuTLS because other free libraries already exist that do the same jobs and have lax licenses. We want GnuTLS to be usable in all the same places as those other libraries. We kept some parts of GnuTLS under the GPL because they are unique, and with the GPL they provide free software projects (which deserve our help) an advantage over non-free projects (which do not deserve our help, since they refuse to share with us). For more explanation, see <http://www.gnu.org/philosophy/why-not-lgpl.html>. The GNU Lesser GPL license applies to the main gnutls library, while the gnutls-extra library is under the GPL. The gnutls-extra library contains the code for "GnuTLS Inner Application" support and the OpenSSL compatibility layer. The gnutls library is located in the lib/ directory, while the gnutls-extra library is at libextra/.

This Font Software is licensed under the SIL Open Font License, Version 1.1. This license is in the accompanying file OFL.txt, and is also available with a FAQ at: <http://scripts.sil.org/OFL>.

From:
<http://scripts.sil.org/OFL> [as of 09/14/11]
Overview

The SIL Open Font License (OFL) is a free and open source license specifically designed for fonts and related software based on our experience in font design and linguistic software engineering. The main purpose is to enable a true open typographic community to spring up and grow. The OFL provides a legal framework and infrastructure for worldwide development, sharing and improvement of fonts and related software in a collaborative manner. It enables font authors to release their work under a common license that allows bundling, modification and redistribution. It encourages shared value, is not limited to any specific computing platform or environment, and can be used by other organisations or individuals.

The OFL meets the specific needs of typographic design and engineering as well as the gold standards of the FLOSS (Free/Libre and Open Source Software) community, namely the cultural values and guidelines from the FSF 1, the Debian Free Software Guidelines2, as well as the Open Source Definition3. It draws inspiration from some concepts and elements found in other free and open licenses, but we believe our

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

improvements in the specific area of fonts will make the licensing model work better than other models currently in use.

SIL International is a worldwide development and educational organisation. By facilitating language-based development, we serve the peoples of the world through research, translation, and literacy. We have been thinking about more open and participative models for a while, especially with recent partnerships with UNESCO (Initiative B@bel) and our work on the Gentium typeface.

We want to:
enable others to participate in our projects
enable others to cater to needs for which we don't have the resources
share our wealth of knowledge and experience in the area of writing systems and pass on our tools
equip the community to meet its font needs

We serve the peoples of the world without regard to their material wealth, so we are grateful to those that do fund our work. Visit this page for information on supporting our efforts.

Documents

We have worked hard to make our license readable and easily understood by users, designers and software developers as well as package maintainers and distributors. To make the OFL even more human-readable, we have provided a FAQ to help everyone understand the intent and the practical aspects of using the license itself. Although it already covers many items, the FAQ will grow as needed.

Current version - 1.1

We recommend all authors use version 1.1 of the OFL, but version 1.0 is given here for reference. A full list of changes from 1.0 to 1.1 can be found on the OFL Review page. The most important change for authors is that no font names are reserved by default. Reserved Font Names must be explicitly listed alongside the copyright statement in the OFL header.

[Editor's Note: Tabular license data truncated for brevity]

Translations

We also recognise the need for people who are not familiar with English to be able to understand the OFL and this FAQ better - in their own language. If you are an experienced translator, you are very welcome to help by translating the OFL and its FAQ so that designers and users in your language community can understand the license better. But only the original English version of the license has legal value and has been approved by the community. Translations do not count as legal substitutes and should only serve as a way to explain the original license. SIL - as the author and steward of the license for the community at large - does not approve any translation of the OFL as legally valid because even small translation ambiguities could be abused and create problems. We give permission to publish unofficial translations into other languages provided that they comply with the following guidelines:

1) Put the following disclaimer in both English and the target language stating clearly that the translation is unofficial: "This is an unofficial translation of the SIL Open Font License into \$language. It was not published by SIL International, and does not legally state the distribution terms for fonts that use the OFL. A release under the OFL is only valid when using the original English text. However, we recognize that this unofficial translation will help users and designers not familiar with English to understand the SIL OFL better and make it easier to use and release font families under this collaborative font design model. We encourage designers who consider releasing their creation under the

document version 2.60

OFL to read the FAQ in their own language if it is available. Please go to <http://scripts.sil.org/OFL> for the official version of the license and the accompanying FAQ."

2) Keep your unofficial translation current and update it at our request if needed, for example, if there is any ambiguity which could lead to confusion. If you start such a unofficial translation effort of the OFL and its accompanying FAQ please let us know, thank you.

Using the OFL

It is relatively simple to use the OFL for your own font project. If you are the copyright owner you only need to do the following:

Put your copyright and reserved names information in the beginning of the main OFL file (simply use the dedicated placeholders).

Put your copyright and the OFL references in your various font files (such as in the copyright, license and description fields) and in your other components (build scripts, glyph databases, documentation, rendering samples, etc). Accurate metadata in your font files is beneficial to you as an increasing number of applications are exposing this information to the user. For example, clickable links can bring users back to your website and let them know about other work you have done or services you provide. Depending on the format of your fonts and sources, you can use template human-readable headers or machine-readable metadata.

Write an initial FONTLOG for your font and include it in the release package.

Include the OFL in your release package.

We also highly recommend you include the relevant practical documentation on the license by putting the OFL-FAQ in your package.

If you wish, you can use the OFL Graphics on your web page.

More information can be found in the OFL-FAQ.

♦ ♦ ♦

From:

http://scripts.sil.org/cms/scripts/render_download.php?format=file&media_id=OFL_plaintext&filename=OFL.txt [as of 09/14/11]

This Font Software is licensed under the SIL Open Font License, Version 1.1. This license is copied below, and is also available with a FAQ at: <http://scripts.sil.org/OFL>

SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007 PREAMBLE

The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

DEFINITIONS

"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting -- in part or in whole -- any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

PERMISSION & CONDITIONS

Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.

2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.

3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as presented to the users.

4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.

5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

TERMINATION

This license becomes null and void if any of the above conditions are not met.

DISCLAIMER

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT.

IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY

document version 2.60

GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

For our legal department, I'd like a clarification of the license on the data, would you agree to release the certificates under the following license?

Copyright (c) 1996 Marc Stevens, Arjen K. Lenstra, Benne de Weger

Copying and distribution of this file, with or without modification, are permitted in any medium without royalty provided the copyright notice and this notice are preserved.

Also, if any other authors contributed, they would have to agree to this license as well. Are there other authors?

Best regards, and thanks in advance, Simon

Hi, Thanks!

I can't speak for my coauthors, but it's all fine with me, though I find the year in your proposed copyright statement a bit odd (I would have expected 2006). There are no more authros involved.

gnutls-2.10.5-1.fc15.src/gnutls-2.10.5-nosrp/gnutls-2.10.5/NEWS
Change from GPLv2 to GPLv3 for command-line tools, libgnutls-extra, etc. Notice that liblzo2 2.02 is licensed under GPLv2 only. Earlier versions, such as 2.01 which is included with GnuTLS, is available under GPLv2 or later. If this incompatibility causes problems, we recommend you to disable LZO using --without-lzo. LZO compression is not a standard TLS compression algorithm, so the impact should be minimal.

gphotofs 0.4.0

Software:	gphotofs
Version:	0.4.0
File or Package:	gphotofs-0.4.0.tar.bz2
OSI Licenses:	GPLv2, GPLv2+ w/exception, MIT/X11
Other Licenses:	Custom
URL:	http://downloads.sourceforge.net/gphoto/gphotofs-0.4.0.tar.bz2
Group:	User Space Apps / File Tools
Description:	GPhotoFS is a filesystem client based on libgphoto2 that exposes supported cameras as filesystems; while some cameras implement the USB Mass Storage class and already appear as filesystems (making this program redundant), many use the Picture Transfer Protocol (PTP) or some other custom protocol. But as long as the camera is supported by libgphoto2, it can be mounted as a filesystem using this program.

grep 2.5.1a-61

Software: grep
Version: 2.5.1a-61
File or Package: grep-2.5.1a-61.fc10.src.rpm
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+,
FDLv1.1, MIT/X11
Other Licenses: Custom
URL: <http://kojipkgs.fedoraproject.org/packages/grep/2.5.1a/61.fc10/src/grep-2.5.1a-61.fc10.src.rpm>
Group: User Space Apps / Applications/Text
Description: The GNU versions of commonly used grep utilities.
Grep searches through textual input for lines which
contain a match to a specified pattern and then prints
the matching lines. GNU's grep utilities include grep,
egrep and fgrep. You should install grep on your
system, because it is a very useful utility for
searching through text.

This is GNU grep, the "fastest grep in the west" (we hope). All bugs reported in previous releases have been fixed. Many exciting new bugs have probably been introduced in this revision. GNU grep is provided "as is" with no warranty. The exact terms under which you may use and (re)distribute this program are detailed in the GNU General Public License, in the file COPYING.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

ansi2knr is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY. No author or distributor accepts responsibility to anyone for the consequences of using it or for whether it serves any particular purpose or works at all, unless he says so in writing. Refer to the GNU General Public License (the "GPL") for full details.

Everyone is granted permission to copy, modify and redistribute ansi2knr, but only under the conditions described in the GPL. A copy of this license is supposed to have been given to you along with ansi2knr so you can know your rights and responsibilities. It should be in a file named COPYLEFT, or, if there is no file named COPYLEFT, a file named COPYING. Among other things, the copyright notice and this notice must be preserved on all copies.

We explicitly state here what we believe is already implied by the GPL: if the ansi2knr program is distributed as a separate set of sources and a separate executable file which are aggregated on a storage medium together with another program, this in itself does not bring the other program under the GPL, nor does the mere fact that such a program or the procedures for constructing it invoke the ansi2knr executable bring any other part of the program under the GPL.

document version 2.60

URL: <http://archives.fedoraproject.org/pub/archive/fedora/linux/releases/7/Everything/source/SRPMS/groff-1.18.1.4-2.src.rpm>

Group: Applications/Publishing

Description: Groff is a document formatting system. Groff takes standard text and formatting commands as input and produces formatted output. The created documents can be shown on a display or printed on a printer. Groff's formatting commands allow you to specify font type and size, bold type, italic type, the number and size of columns on a page, and more. Groff can also be used to format man pages. If you are going to use groff with the X Window System, you will also need to install the groff-gxditview package. Groff is the GNU replacement for the troff and nroff text formatters. It is an original implementation written primarily in C++ by James Clark and is modeled after ditroff, including many extensions. Groff was developed as free software to provide an easily-obtained replacement for the standard AT&T troff/nroff package, which at the time was proprietary, and was not always available even on branded UNIX systems.

TERMS AND CONDITIONS

This program is free software; it is dual licensed, the terms of the "Frontier Artistic License" or the "GNU General Public License" can be chosen at your discretion. The chosen license then applies solely and in its entirety. Both licenses come with this Kit.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the license for more details.

You should have received a copy of the "Frontier Artistic License" with this Kit in the file named LICENSE.txt, and the copy of the "GNU General Public License" in the file named LICENSE-GPL.txt. If not, I'll be glad to provide one.

Copyright 1999-2002 Mark Martinec.

Dual licensed: Frontier Artistic License or GNU General Public License applies.

it appears the Artistic License and its variant the Frontier Artistic License are incompatible with GPL and precludes this work to be included with GPL-licensed work. This was not my intention. The fact that this package is dual licensed comes to the rescue.

Permission is granted to copy, distribute and/or modify this document under the terms of the GNU Free Documentation License, Version 1.1 or any later version published by the Free Software Foundation; with the Invariant Sections being this .ig-section and AUTHORS, with no Front-Cover Texts, and with no Back-Cover Texts.

A copy of the Free Documentation License is included as a file called FDL in the main directory of the groff source package. The source code of both the ancient Unix and classical troff weren't available for two decades. Fortunately, Caldera bought SCO UNIX in 2001. In the following, Caldera made the ancient source code accessible on-line for non-commercial use, cf. section

"Free roff"

None of the commercial roff systems could attain the status of a successor for the general roff development. Everyone was only interested in their own stuff. This led to a steep downfall of the once excellent Unix operating system during the 1980s. As a counter measure to the galloping commercialization, AT&T Bell Labs tried to launch a rescue project with their I Plan/9 operating system. It is freely available for non-commercial use, even the source code, but has a proprietary license that impedes the free development.

This is the etherboot intel etherexpress Pro/100B driver. It was written from scratch, with Donald Beckers eeepro100.c kernel driver as a guideline. Mostly the 82557 related definitions and the lower level routines have been cut-and-pasted into this source. The driver was finished before Intel got the NDA out of the closet. I still don't have the docs.

URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/10/Fedora/source/SRPMS/gstreamer-0.10.21-2.fc10.src.rpm
Group:	Applications/Multimedia
Description:	GStreamer is a pipeline based multimedia framework written in the C programming language with the type system based on GObject. GStreamer allows a programmer to create a variety of media-handling components, including simple audio playback, audio and video playback, recording, streaming, and editing. The pipeline design serves as a base to create many types of multimedia applications such as video editors, streaming media broadcasters, and media players. Designed to be cross-platform, it is known to work on Linux (x86, PowerPC and ARM), Solaris (x86 and SPARC), Mac OS X, Microsoft Windows and OS/400. GStreamer has bindings for programming-languages like Python, C++, Perl, GNU Guile and Ruby.

This originates from X11R5 (mit/util/scripts/install.sh), which was later released in X11R6 (xc/config/util/install.sh) with the following copyright and license.

Copyright (C) 1994 X Consortium

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions: The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT.

IN NO EVENT SHALL THE X CONSORTIUM BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Except as contained in this notice, the name of the X Consortium shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Software without prior written authorization from the X Consortium. FSF changes to this file are in the public domain.

As a special exception, the respective Autoconf Macro's copyright owner gives unlimited permission to copy, distribute and modify the configure scripts that are the output of Autoconf when processing the Macro. You need not follow the terms of the GNU General Public License when using or distributing such scripts, even though portions of the text of the Macro appear in them. The GNU General Public License (GPL) does govern all other use of the material that constitutes the Autoconf Macro.

This special exception to the GPL applies to versions of the Autoconf Macro released by the Autoconf Macro Archive. When you make and distribute a modified version of the Autoconf Macro, you may extend this special exception to the GPL to apply to your modified version as well.

This material may be distributed only subject to the terms and conditions set forth in the Open Publication License, v1.0 or later (the latest version is presently available at <http://www.opencontent.org/opl.shtml>)

   

From:

<http://www.opencontent.org/opl.shtml>

OpenContent License (OPL) Version 1.0, July 14, 1998.

This document outlines the principles underlying the OpenContent (OC) movement and may be redistributed provided it remains unaltered. For legal purposes, this document is the license under which OpenContent is made available for use. The original version of this document may be found at <http://opencontent.org/opl.shtml>

LICENSE

Terms and Conditions for Copying, Distributing, and Modifying Items other than copying, distributing, and modifying the Content with which this license was distributed (such as using, etc.) are outside the scope of this license.

1. You may copy and distribute exact replicas of the OpenContent (OC) as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the OC a copy of this License along with the OC.

You may at your option charge a fee for the media and/or handling involved in creating a unique copy of the OC for use offline, you may at your option offer instructional support for the OC in exchange for a fee, or you may at your option offer warranty in exchange for a fee. You may not charge a fee for the OC itself. You may not charge a fee for the sole

document version 2.60

service of providing access to and/or use of the OC via a network (e.g. the Internet), whether it be via the world wide web, FTP, or any other method.

2. You may modify your copy or copies of the OpenContent or any portion of it, thus forming works based on the Content, and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified content to carry prominent notices stating that you changed it, the exact nature and content of the changes, and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the OC or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License, unless otherwise permitted under applicable Fair Use law. These requirements apply to the modified work as a whole.

If identifiable sections of that work are not derived from the OC, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the OC, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it. Exceptions are made to this requirement to release modified works free of charge under this license only in compliance with Fair Use law where applicable.

3. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to copy, distribute or modify the OC. These actions are prohibited by law if you do not accept this License. Therefore, by distributing or translating the OC, or by deriving works herefrom, you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or translating the OC.

NO WARRANTY

4. BECAUSE THE OPENCONTENT (OC) IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE OC, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE OC "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK OF USE OF THE OC IS WITH YOU. SHOULD THE OC PROVE FAULTY, INACCURATE, OR OTHERWISE UNACCEPTABLE YOU ASSUME THE COST OF ALL NECESSARY REPAIR OR CORRECTION.

5. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MIRROR AND/OR REDISTRIBUTE THE OC AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE OC, EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

From:

gststreamer-0.10.21-2.fc10.src/gststreamer-0.10.21/gststreamer-0.10.21/docs/faq/legal.xml

GStreamer Legal Issues - This part of the FAQ is based on a series of questions we asked the FSF to understand how the GPL works and how patents affects the GPL. These questions were answered by the FSF lawyers, so we view them as the final interpretation on how the GPL and LGPL interact with patents in our opinion. This consultancy was paid for by Fluendo in order to obtain clear and quotable answers. These answers were certified by the FSF lawyer team and verified by FSF lawyer and law professor Eben Moglen.

Can someone distribute the combination of GStreamer, the LGPL library MyPlayer, a GPL playback application The binary-only Sorenson decoder together in one distribution/operating system ? If not, what needs to be changed to make this possible ?

This would be a problem, because the GStreamer and MyPlayer licenses would forbid it. In order to link GStreamer to MyPlayer, you need to use section 3 of the LGPL to convert GStreamer to GPL. The GPL version of GStreamer forbids linking to the Sorenson decoder. Anyway, the MyPlayer GPL license forbids this. If the authors of MyPlayer want to permit this, we have an exception for them: the controlled interface exception from the FAQ. The idea of this is that you can't get around the GPL just by including a LGPL bit in the middle.

Note: MyPlayer is a completely fictitious application at the time of writing.

Suppose Apple wants to write a binary-only proprietary plugin for GStreamer to decode Sorenson video, which will be shipped stand-alone, not part of a package like in the question above. Can Apple distribute this binary-only plugin ?

Yes, modulo certain reverse engineering requirements in section 6 of the LGPL.

If a program released under the GPL uses a library that is LGPL, and this library can dlopen plug-ins at runtime, what are the requirements for the license of the plug-in ?

You may not distribute the plug-in with the GPL application. Distributing the plug-in alone, with the knowledge that it will be used primarily by GPL software is a bit of an edge case. We will not advise you that it would be safe to do so, but we also will not advise you that it would be absolutely forbidden.

Can someone in a country that does not have software patents distribute code covered by US patents under the GPL to people in, for example, Norway ? If he/she visits the US, can he/she be arrested ?

Yes, he can. No, there are no criminal penalties for patent infringement in the US.

Can someone from the US distribute software covered by US patents under the GPL to people in Norway ? To people in the US ?

This might infringe some patents, but the GPL would not forbid it absent some actual restriction, such as a court judgement or agreement. The US

government is empowered to refuse importation of patent infringing devices, including software.

There are a lot of GPL- or LGPL-licensed libraries that handle media codecs which have patents. Take mad, an mp3 decoding library, as an example. It is licensed under the GPL. In countries where patents are valid, does this invalidate the GPL license for this project ?

The mere existence of a patent which might read on the program does not change anything. However, if a court judgement or other agreement prevents you from distributing libmad under GPL terms, you can not distribute it at all.

The GPL and LGPL say (sections 7 and 11): If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all.

So let's say there is a court judgement. Does this mean that the GPL license is invalid for the project everywhere, or only in the countries where it conflicts with the applicable patents ?

The GPL operates on a per-action, not per-program basis. That is, if you are in a country which has software patents, and a court tells you that you cannot distribute (say) libmad in source code form, then you cannot distribute libmad at all. This doesn't affect anyone else.

Patented decoding can be implemented in GStreamer either by having a binary-only plugin do the decoding, or by writing a plugin (with any applicable license) that links to a binary-only library. Does this affect the licensing issues involved in regards to GPL/LGPL?

No.

Is it correct that you cannot distribute the GPL mad library to decode mp3's, even in the case where you have obtained a valid license for decoding mp3 ?

The only GPL-compatible patent licenses are those which are open to all parties possessing copies of GPL software which practices the teachings of the patent.

If you take a license which doesn't allow others to distribute original or modified versions of libmad practicing the same patent claims as the version you distribute, then you may not distribute at all.

From:

gststreamer-0.10.21-2.fc10.src/gststreamer-0.10.21/gststreamer-0.10.21/docs/manual/appendix-licensing.xml

How to license the applications you build with GStreamer - The licensing of GStreamer is no different from a lot of other libraries out there like GTK+ or glibc: we use the LGPL. What complicates things with regards to GStreamer is its plugin-based design and the heavily patented and proprietary nature of many multimedia codecs.

While patents on software are currently only allowed in a small minority of world countries (the US and Australia being the most important of those), the problem is that due to the central place the US hold in the world economy and the computing industry, software patents are hard to ignore wherever you are. Due to this situation, many companies, including major GNU/Linux distributions, get trapped in a situation where they either get bad reviews due to lacking out-of-the-box media playback capabilities

document version 2.60

(and attempts to educate the reviewers have met with little success so far), or go against their own - and the free software movement's - wish to avoid proprietary software.

Due to competitive pressure, most choose to add some support. Doing that through pure free software solutions would have them risk heavy litigation and punishment from patent owners. So when the decision is made to include support for patented codecs, it leaves them the choice of either using special proprietary applications, or try to integrate the support for these codecs through proprietary plugins into the multimedia infrastructure provided by GStreamer. Faced with one of these two evils the GStreamer community of course prefer the second option.

The problem which arises is that most free software and open source applications developed use the GPL as their license. While this is generally a good thing, it creates a dilemma for people who want to put together a distribution. The dilemma they face is that if they include proprietary plugins in GStreamer to support patented formats in a way that is legal for them, they do risk running afoul of the GPL license of the applications. We have gotten some conflicting reports from lawyers on whether this is actually a problem, but the official stance of the FSF is that it is a problem. We view the FSF as an authority on this matter, so we are inclined to follow their interpretation of the GPL license.

So what does this mean for you as an application developer? Well, it means you have to make an active decision on whether you want your application to be used together with proprietary plugins or not. What you decide here will also influence the chances of commercial distributions and Unix vendors shipping your application. The GStreamer community suggest you license your software using a license that will allow proprietary plugins to be bundled with GStreamer and your applications, in order to make sure that as many vendors as possible go with GStreamer instead of less free solutions. This in turn we hope and think will let GStreamer be a vehicle for wider use of free formats like the Xiph.org formats.

If you do decide that you want to allow for non-free plugins to be used with your application you have a variety of choices. One of the simplest is using licenses like LGPL, MPL or BSD for your application instead of the GPL. Or you can add an exception clause to your GPL license stating that you except GStreamer plugins from the obligations of the GPL.

A good example of such a GPL exception clause would be, using the Totem video player project as an example: The authors of the Totem video player project hereby grants permission for non-GPL-compatible GStreamer plugins to be used and distributed together with GStreamer and Totem. This permission goes above and beyond the permissions granted by the GPL license Totem is covered by. Our suggestion among these choices is to use the LGPL license, as it is what resembles the GPL most and it makes it a good licensing fit with the major GNU/Linux desktop projects like GNOME and KDE. It also allows you to share code more openly with projects that have compatible licenses. Obviously, pure GPL code without the above-mentioned clause is not usable in your application as such. By choosing the LGPL, there is no need for an exception clause and thus code can be shared more freely.

I have above outlined the practical reasons for why the GStreamer community suggests you allow non-free plugins to be used with your applications. We feel that in the multimedia arena, the free software community is still not strong enough to set the agenda and that blocking non-free plugins to be used in our infrastructure hurts us more than it hurts the patent owners and their ilk. This view is not shared by everyone.

Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

The Free Software Foundation urges you to use an unmodified GPL for your applications, so as to push back against the temptation to use non-free plug-ins. They say that since not everyone else has the strength to reject them because they are unethical, they ask your help to give them a legal reason to do so. This advisory is part of a bigger advisory with a FAQ which you can find on the Website <http://gstreamer.freedesktop.org/documentation/licensing.html>

As a special exception, the respective Autoconf Macro's copyright owner gives unlimited permission to copy, distribute and modify the configure scripts that are the output of Autoconf when processing the Macro. You need not follow the terms of the GNU General Public License when using or distributing such scripts, even though portions of the text of the Macro appear in them. The GNU General Public License (GPL) does govern all other use of the material that constitutes the Autoconf Macro.

This special exception to the GPL applies to versions of the Autoconf Macro released by the Autoconf Macro Archive. When you make and distribute a modified version of the Autoconf Macro, you may extend this special exception to the GPL to apply to your modified version as well.

From:
gststreamer-plugins-bad-0.10.9-1.fc10.src/gst-plugins-bad-0.10.9/gst-
plugins-bad-0.10.9/readme
WHAT IT IS - This is GStreamer Bad Plug-ins. This package is in the
0.9.x series. This means that this is a development series leading up to a
stable 0.10.x series. You have been warned.

GStreamer 0.9 development series - Hung by a Thread
Starring...

GSTREAMER - The core around which all other modules revolve. Base
functionality and libraries, some essential elements, documentation, and
testing.

BASE - A well-groomed and well-maintained collection of GStreamer
plug-ins and elements, spanning the range of possible types of elements
one would want to write for GStreamer. And introducing, for the first time
ever, on the development screen ...

THE GOOD -
"Such ingratitude. After all the times I've saved your life."

A collection of plug-ins you'd want to have right next to you on the
battlefield. Shooting sharp and making no mistakes, these plug-ins have
it all: good looks, good code, and good licensing. Documented and
dressed up in tests. If you're looking for a role model to base your own
plug-in on, here it is. If you find a plot hole or a badly lip-synced line of
code in them, let us know - it is a matter of honour for us to ensure
Blondie doesn't look like he's been walking 100 miles through the desert
without water.

THE UGLY -
"When you have to shoot, shoot. Don't talk."

There are times when the world needs a color between black and white.
Quality code to match the good's, but two-timing, backstabbing and ready
to sell your freedom down the river. These plug-ins might have a patent
noose around their neck, or a lock-up license, or any other problem that
makes you think twice about shipping them. We don't call them ugly
because we like them less. Does a mother love her son less because
he's not as pretty as the other ones? No - she commends him on his
great personality. These plug-ins are the life of the party. And we'll still
step in and set them straight if you report any unacceptable behaviour -
because there are two kinds of people in the world, my friend: those with
a rope around their neck and the people who do the cutting.

THE BAD -
"That an accusation?"

No perfectly groomed moustache or any amount of fine clothing is going
to cover up the truth - these plug-ins are Bad with a capital B. They look
fine on the outside, and might even appear to get the job done, but at the
end of the day they're a black sheep. Without a golden-haired angel to
watch over them, they'll probably land in an unmarked grave at the final
showdown. Don't bug us about their quality - exercise your Free Software

document version 2.60

rights, patch up the offender and send us the patch on the fastest steed you can steal from the Confederates. Because you see, in this world, there's two kinds of people, my friend: those with loaded guns and those who dig. You dig.

The Lowdown -

"I've never seen so many plug-ins wasted so badly."

GStreamer Plug-ins has grown so big that it's hard to separate the wheat from the chaff. Also, distributors have brought up issues about the legal status of some of the plug-ins we ship. To remedy this, we've divided the previous set of available plug-ins into four modules:

- `gst-plugins-base`: a small and fixed set of plug-ins, covering a wide range of possible types of elements; these are continuously kept up-to-date with any core changes during the development series.
- We believe distributors can safely ship these plug-ins.
- People writing elements should base their code on these elements.
- These elements come with examples, documentation, and regression tests.

- `gst-plugins-good`: a set of plug-ins that we consider to have good quality code, correct functionality, our preferred license (LGPL for the plug-in code, LGPL or LGPL-compatible for the supporting library).
- We believe distributors can safely ship these plug-ins.
- People writing elements should base their code on these elements.

- `gst-plugins-ugly`: a set of plug-ins that have good quality and correct functionality, but distributing them might pose problems. The license on either the plug-ins or the supporting libraries might not be how we'd like. The code might be widely known to present patent problems.
- Distributors should check if they want/can ship these plug-ins.
- People writing elements should base their code on these elements.

- `gst-plugins-bad`: a set of plug-ins that aren't up to par compared to the rest. They might be close to being good quality, but they're missing something - be it a good code review, some documentation, a set of tests, a real live maintainer, or some actual wide use. If the blanks are filled in they might be upgraded to become part of either `gst-plugins-good` or `gst-plugins-ugly`, depending on the other factors.
- If the plug-ins break, you can't complain - instead, you can fix the problem and send us a patch, or bribe someone into fixing them for you.
- New contributors can start here for things to work on.

PLUG-IN DEPENDENCIES AND LICENSES - GStreamer is developed under the terms of the LGPL (see LICENSE file for details). Some of our plug-ins however rely on libraries which are available under other licenses. This means that if you are using an application which has a non-GPL compatible license (for instance a closed-source application) with GStreamer, you have to make sure not to use GPL-linked plug-ins. When using GPL-linked plug-ins, GStreamer is for all practical reasons under the GPL itself.

HISTORY - The fundamental design comes from the video pipeline at Oregon Graduate Institute, as well as some ideas from DirectMedia. It's based on plug-ins that will provide the various codec and other functionality. The interface hopefully is generic enough for various companies (ahem, Apple) to release binary codecs for Linux, until such time as they get a clue and release the source.

gstreamer-plugins-base 0.10.21-2

Software: gstreamer-plugins-base

As a special exception, the respective Autoconf Macro's copyright owner gives unlimited permission to copy, distribute and modify the configure scripts that are the output of Autoconf when processing the Macro. You need not follow the terms of the GNU General Public License when using or distributing such scripts, even though portions of the text of the Macro appear in them.

The GNU General Public License (GPL) does govern all other use of the material that constitutes the Autoconf Macro. This special exception to the GPL applies to versions of the Autoconf Macro released by the Autoconf Macro Archive. When you make and distribute a modified version of the Autoconf Macro, you may extend this special exception to the GPL to apply to your modified version as well.

This is the copyright holder that gets inserted into the header of the \$(DOMAIN).pot file. Set this to the copyright holder of the surrounding package. (Note that the msgstr strings, extracted from the package's sources, belong to the copyright holder of the package.) Translators are expected to transfer the copyright for their translations to this person or entity, or to disclaim their copyright. The empty string stands for the public domain; in this case the translators are expected to disclaim their copyright.

gstreamer-plugins-good 0.10.11-1

Software: gstreamer-plugins-good
Version: 0.10.11-1
File or Package: gstreamer-plugins-good-0.10.11-1.fc10.src.rpm
OSI Licenses: GPLv2+ w/exception, LGPLv2+, LGPLv2.1+, MIT/X11, BSDv2
Other Licenses: Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/10/Fedora/source/SRPMS/gstreamer-plugins-good-0.10.11-1.fc10.src.rpm>
Group: Applications/Multimedia
Description: GStreamer is a streaming media framework, based on graphs of filters which operate on media data. Applications using this library can do anything from real-time sound processing to playing videos, and just about anything else media-related. Its plugin-based architecture means that new data types or processing capabilities can be added simply by installing new plug-ins. GStreamer plug-ins with good code and licensing.
Common Usage: Plug-in
Package Size: 23.2 MB
Folders / Files: 101 / 1,395
Source Path: wrlinux-4.0/layers/wrll-userspace/media/packages

As a special exception, the respective Autoconf Macro's copyright owner gives unlimited permission to copy, distribute and modify the configure scripts that are the output of Autoconf when processing the Macro. You need not follow the terms of the GNU General Public License when using or distributing such scripts, even though portions of the text of the Macro appear in them. The GNU General Public License (GPL) does govern all other use of the material that constitutes the Autoconf Macro.

document version 2.60

This special exception to the GPL applies to versions of the Autoconf Macro released by the Autoconf Macro Archive. When you make and distribute a modified version of the Autoconf Macro, you may extend this special exception to the GPL to apply to your modified version as well.

Based on code with

Copyright (C) 2001 David Robinson <David@Robinson.org>

and Glen Sawyer <glensawyer@hotmail.com>,

which is distributed under the LGPL as part of the vorbisgain program.

The original code also mentions Frank Klemm (<http://www.uni-jena.de/~ptk/mpp/>) for having contributed lots of good code. Specifically, this is based on the file "gain_analysis.c" from vorbisgain version 0.34.

gstreamer-plugins-ugly 0.10.9-1

Software: gstreamer-plugins-ugly
Version: 0.10.9-1
File or Package: gstreamer-plugins-ugly-0.10.9-1.fc9.src.rpm
OSI Licenses: GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1, LGPLv2.1+, MIT/X11, Python
Other Licenses: Custom
URL: ftp://ftp.pbone.net/mirror/ftp.freshrpms.net/pub/freshrpms/fedora/linux/testing/9/elisa/i386/gstreamer-plugins-ugly-0.10.9-1.fc9/gstreamer-plugins-ugly-0.10.9-1.fc9.src.rpm
Group: Applications/Multimedia
Description: Ugly plugins set for gstreamer
Common Usage: Plug-in
Package Size: 8.6 MB
Folders / Files: 44 / 438
Source Path: wrlinux-4.0/layers/wrll-userspace/media/packages

As a special exception, the respective Autoconf Macro's copyright owner gives unlimited permission to copy, distribute and modify the configure scripts that are the output of Autoconf when processing the Macro. You need not follow the terms of the GNU General Public License when using or distributing such scripts, even though portions of the text of the Macro appear in them. The GNU General Public License (GPL) does govern all other use of the material that constitutes the Autoconf Macro.

This special exception to the GPL applies to versions of the Autoconf Macro released by the Autoconf Macro Archive. When you make and distribute a modified version of the Autoconf Macro, you may extend this special exception to the GPL to apply to your modified version as well.

This element encodes raw integer audio into an MPEG-1 layer 3 (MP3) stream. Note that MP3 is not a free format, there are licensing and patent issues to take into consideration. See <http://www.vorbis.com> Ogg/Vorbis for a royalty free (and often higher quality) alternative.

Starring...

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

GSTREAMER - The core around which all other modules revolve. Base functionality and libraries, some essential elements, documentation, and testing.

BASE - A well-groomed and well-maintained collection of GStreamer plug-ins and elements, spanning the range of possible types of elements one would want to write for GStreamer.

And introducing, for the first time ever, on the development screen ...

THE GOOD -

"Such ingratitude. After all the times I've saved your life."

A collection of plug-ins you'd want to have right next to you on the battlefield. Shooting sharp and making no mistakes, these plug-ins have it all: good looks, good code, and good licensing. Documented and dressed up in tests. If you're looking for a role model to base your own plug-in on, here it is. If you find a plot hole or a badly lip-synced line of code in them, let us know - it is a matter of honour for us to ensure Blondie doesn't look like he's been walking 100 miles through the desert without water.

THE UGLY -

"When you have to shoot, shoot. Don't talk."

There are times when the world needs a color between black and white. Quality code to match the good's, but two-timing, backstabbing and ready to sell your freedom down the river. These plug-ins might have a patent noose around their neck, or a lock-up license, or any other problem that makes you think twice about shipping them.

We don't call them ugly because we like them less. Does a mother love her son less because he's not as pretty as the other ones ? No - she commends him on his great personality. These plug-ins are the life of the party. And we'll still step in and set them straight if you report any unacceptable behaviour - because there are two kinds of people in the world, my friend: those with a rope around their neck and the people who do the cutting.

THE BAD -

"That an accusation?"

No perfectly groomed moustache or any amount of fine clothing is going to cover up the truth - these plug-ins are Bad with a capital B. They look fine on the outside, and might even appear to get the job done, but at the end of the day they're a black sheep. Without a golden-haired angel to watch over them, they'll probably land in an unmarked grave at the final showdown.

Don't bug us about their quality - exercise your Free Software rights, patch up the offender and send us the patch on the fastest steed you can steal from the Confederates. Because you see, in this world, there's two kinds of people, my friend: those with loaded guns and those who dig. You dig.

The Lowdown

"I've never seen so many plug-ins wasted so badly."

GStreamer Plug-ins has grown so big that it's hard to separate the wheat from the chaff. Also, distributors have brought up issues about the legal status of some of the plug-ins we ship. To remedy this, we've divided the previous set of available plug-ins into four modules:

document version 2.60

- **gst-plugins-base**: a small and fixed set of plug-ins, covering a wide range of possible types of elements; these are continuously kept up-to-date with any core changes during the development series.
- We believe distributors can safely ship these plug-ins.
- People writing elements should base their code on these elements.
- These elements come with examples, documentation, and regression tests.

- **gst-plugins-good**: a set of plug-ins that we consider to have good quality code, correct functionality, our preferred license (LGPL for the plug-in code, LGPL or LGPL-compatible for the supporting library).
- We believe distributors can safely ship these plug-ins.
- People writing elements should base their code on these elements.

- **gst-plugins-ugly**: a set of plug-ins that have good quality and correct functionality, but distributing them might pose problems. The license on either the plug-ins or the supporting libraries might not be how we'd like. The code might be widely known to present patent problems.
- Distributors should check if they want/can ship these plug-ins.
- People writing elements should base their code on these elements.

- **gst-plugins-bad**: a set of plug-ins that aren't up to par compared to the rest. They might be close to being good quality, but they're missing something - be it a good code review, some documentation, a set of tests, a real live maintainer, or some actual wide use. If the blanks are filled in they might be upgraded to become part of either **gst-plugins-good** or **gst-plugins-ugly**, depending on the other factors.
- If the plug-ins break, you can't complain - instead, you can fix the problem and send us a patch, or bribe someone into fixing them for you.
- New contributors can start here for things to work on.

PLUG-IN DEPENDENCIES AND LICENSES - GStreamer is developed under the terms of the LGPL (see LICENSE file for details). Some of our plug-ins however rely on libraries which are available under other licenses. This means that if you are distributing an application which has a non-GPL compatible license (for instance a closed-source application) with GStreamer, you have to make sure not to distribute GPL-linked plug-ins. When using GPL-linked plug-ins, GStreamer is for all practical reasons under the GPL itself.

HISTORY - The fundamental design comes from the video pipeline at Oregon Graduate Institute, as well as some ideas from DirectMedia. It's based on plug-ins that will provide the various codec and other functionality. The interface hopefully is generic enough for various companies (ahem, Apple) to release binary codecs for Linux, until such time as they get a clue and release the source.

gststreamer-python 0.10.8 aka gst-python

Software:	gst-python
Version:	0.10.8.orig
File or Package:	gst0.10-python_0.10.8.orig.tar.gz
OSI Licenses:	GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1, LGPLv2.1+, MIT/X11
Other Licenses:	Custom
URL:	http://us.archive.ubuntu.com/ubuntu/pool/main/p/python-gst/gst0.10-python_0.10.8.orig.tar.gz
Group:	Development/Language
Description:	Generic media-playing framework (Python bindings); 'gst-python' is a wrapper for the GStreamer library for use in Python programs.

gtk+ 2.22.1

Software:	gtk+
Version:	2.22.1
File or Package:	gtk+-2.22.1.tar.bz2
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, LGPLv2.1, LGPLv2.1+, MIT/X11, Mozilla Public (MPL) v1.1, Academic, Public Domain
Other Licenses:	Custom
URL:	http://download.gnome.org/sources/gtk+/2.22/ gtk+-2.22.1.tar.bz2
Group:	User Space Libraries / System Environment/Libraries
Description:	The GIMP ToolKit (GTK+), a library for creating GUIs for X GTK+ is a multi-platform toolkit for creating graphical user interfaces. Offering a complete set of widgets, GTK+ is suitable for projects ranging from small one-off tools to complete application. GTK+ is free software and part of the GNU Project. However, the licensing terms for GTK+, the GNU LGPL, allow it to be used by all developers, including those developing proprietary software, without any license fees or royalties.
Common Usage:	Library
Package Size:	77.4 MB
Folders / Files:	107 / 3,542
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

Modified by the GTK+ Team and others 1997-2000. See the AUTHORS file for a list of people on the GTK+ Team. See the ChangeLog files for a list of changes. These files are distributed with GTK+ at <ftp://ftp.gtk.org/pub/gtk/>.

The following functions are originally from Tk8.0, but heavily modified. Here are tk's licensing terms. I hope these terms don't conflict with the GNU Lesser General Public License? They shouldn't, as they are looser than the GPL, yes?

This software is **copyrighted by the Regents of the University of California, Sun Microsystems, Inc., and other parties.**

The following terms apply to all files associated with the software unless explicitly disclaimed in individual files. The authors hereby grant permission to use, copy, modify, distribute, and license this software and its documentation for any purpose, provided that existing copyright notices are retained in all copies and that this notice is included verbatim in any distributions. No written agreement, license, or royalty fee is required for any of the authorized uses. Modifications to this software may be copyrighted by their authors and need not follow the licensing terms described here, provided that the new terms are clearly indicated on the first page of each file where they apply.

IN NO EVENT SHALL THE AUTHORS OR DISTRIBUTORS BE LIABLE TO ANY PARTY FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF THIS SOFTWARE, ITS DOCUMENTATION, OR ANY DERIVATIVES THEREOF, EVEN IF THE AUTHORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

THE AUTHORS AND DISTRIBUTORS SPECIFICALLY DISCLAIM ANY WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT. THIS SOFTWARE IS PROVIDED ON AN "AS IS" BASIS, AND THE AUTHORS AND DISTRIBUTORS HAVE NO OBLIGATION TO PROVIDE MAINTENANCE, SUPPORT, UPDATES, ENHANCEMENTS, OR MODIFICATIONS.

GOVERNMENT USE: If you are acquiring this software on behalf of the U.S. government, the Government shall have only "Restricted Rights" in the software and related documentation as defined in the Federal Acquisition Regulations (FARs) in Clause 52.227.19 (c) (2). If you are acquiring the software on behalf of the Department of Defense, the software shall be classified as "Commercial Computer Software" and the Government shall have only "Restricted Rights" as defined in Clause 252.227-7013 (c) (1) of DFARs. Notwithstanding the foregoing, the authors grant the U.S. Government and others acting in its behalf permission to use and distribute the software in accordance with the terms specified in this license.

gtk-doc 1.14

Software: gtk-doc
Version: 1.14
File or Package: gtk-doc-1.14.tar.bz2
OSI Licenses: GPLv3, GPLv2+, GPLv2+ w/exception, FDLv1.1, FDLv1.1+, MIT/X11, Academic, Public Domain
Other Licenses:
URL: <http://ftp.gnome.org/pub/GNOME/sources/gtk-doc/1.14/gtk-doc-1.14.tar.bz2>
Group: User Space Apps / Development/Tools / Utilities/Text
Description: gtk documentation utilities; API documentation generation tool for GTK+ and GNOME; GTK-Doc is used to document C code. It is typically used to document the public API of libraries, such as the GTK+ and GNOME libraries, but it can also be used to document application code.
Common Usage: Utility
Package Size: 3.67 MB
Folders / Files: 39 / 179
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

gtk-engines 2.20.2

Software:	gtk-engines
Version:	2.20.2
File or Package:	gtk-engines-2.20.2.tar.bz2
OSI Licenses:	GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1, LGPLv2.1+, MIT/X11, Academic
Other Licenses:	
URL:	ftp://ftp.gnome.org/pub/GNOME/sources/gtk-engines/gtk-engines-2.20.2.tar.bz2
Group:	User Space Apps / X11/Libraries
Description:	gtk-engines provides a central location for commonly used GTK+ engines.
Common Usage:	Standalone
Package Size:	3.51 MB
Folders / Files:	40 / 323
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

document version 2.60

gzip 1.3.12-11

Software: gzip
Version: 1.3.12-11
File or Package: gzip-1.3.12-11.fc12.src.rpm
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, FDLv1.2, MIT/X11
Other Licenses: Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Everything/source/SRPMS/gzip-1.3.12-11.fc12.src.rpm>
Group: User Space Apps / Applications/File
Description: The gzip package contains the popular GNU gzip data compression program. Gzipped files have a

document version 2.60

.gz extension. Gzip should be installed on your system, because it is a very commonly used data compression program.

Common Usage: Tool, Utility
Package Size: 3.0 MB
Folders / Files: 16 / 187
Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

From:

gzip-1.3.12-11.fc12.src/gzip-1.3.12/gzip-1.3.12/readme

gzip (GNU zip) is a compression utility designed to be a replacement for 'compress'. Its main advantages over compress are much better compression and freedom from patented algorithms. The GNU Project uses it as the standard compression program for its system.

hal 0.5.13-9

Software:	hal
Version:	0.5.13-9
File or Package:	hal-0.5.13-9.fc12.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, FDLv1.1+, MIT/X11, BSDv2, Academic Free (AFL) v2.1
Other Licenses:	Custom
URL:	ftp://download.fedora.redhat.com/pub/fedora/linux/development/13/source/SRPMS/hal-0.5.14-3.fc13.src.rpm
Group:	User Space Apps / System Environment/Libraries
Description:	HAL is daemon for collection and maintaining information from several sources about the hardware on the system. A hardware abstraction layer (HAL) is an abstraction layer, implemented in software, between the physical hardware of a computer and the software that runs on that computer. Its function is to hide differences in hardware from most of the operating system kernel, so that most of the kernel-mode code does not need to be changed to run on systems with different hardware. On a PC, HAL can basically be considered to be the driver for the motherboard and allows instructions from higher level computer languages to communicate with lower level components, such as directly with hardware. The Windows NT operating system has a HAL in the kernel space, between hardware and kernel, drivers, executive services.
Common Usage:	Library, Utility

[Above file contains a full copy of the GNU General Public License version 2 (GPLv2). A copy of the GPLv2 can be found in the addendum of this document.]
HAL is licensed to you under your choice of the Academic Free License version 2.1, or the GNU General Public License version 2. Both licenses are included here. Some individual source code files and/or binaries may be under the GPL only or under the LGPL. Each source code file is marked with the proper copyright information.

The Academic Free License v. 2.1
This Academic Free License (the "License") applies to any original work of authorship (the "Original Work") whose owner (the "Licensor") has placed the following notice immediately following the copyright notice for the Original Work:

Licensed under the Academic Free License version 2.1
1) Grant of Copyright License. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, sublicenseable license to do the following:

- a) to reproduce the Original Work in copies;
- b) to prepare derivative works ("Derivative Works") based upon the Original Work;
- c) to distribute copies of the Original Work and Derivative Works to the public;
- d) to perform the Original Work publicly; and
- e) to display the Original Work publicly.

2) Grant of Patent License.
Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, sublicenseable license, under patent claims owned or controlled by the Licensor that are embodied in the Original Work as furnished by the Licensor, to make, use, sell and offer for sale the Original Work and Derivative Works.

3) Grant of Source Code License.
The term "Source Code" means the preferred form of the Original Work for making modifications to it and all available documentation describing how to modify the Original Work. Licensor hereby agrees to provide a machine-readable copy of the Source Code of the Original Work along with each copy of the Original Work that Licensor distributes. Licensor reserves the right to satisfy this obligation by placing a machine-readable copy of the Source Code in an information repository reasonably calculated to permit inexpensive and convenient access by You for as long as Licensor continues to distribute the Original Work, and by publishing the address of that information repository in a notice immediately following the copyright notice that applies to the Original Work.

4) Exclusions From License Grant.
Neither the names of Licensor, nor the names of any contributors to the Original Work, nor any of their trademarks or service marks, may be used to endorse or promote products derived from this Original Work without express prior written permission of the Licensor. Nothing in this License shall be deemed to grant any rights to trademarks, copyrights, patents, trade secrets or any other intellectual property of Licensor except as document version 2.60

expressly stated herein. No patent license is granted to make, use, sell or offer to sell embodiments of any patent claims other than the licensed claims defined in Section 2. No right is granted to the trademarks of Licensor even if such marks are included in the Original Work. Nothing in this License shall be interpreted to prohibit Licensor from licensing under different terms from this License any Original Work that Licensor otherwise would have a right to license.

5) This section intentionally omitted.

6) Attribution Rights.

You must retain, in the Source Code of any Derivative Works that You create, all copyright, patent or trademark notices from the Source Code of the Original Work, as well as any notices of licensing and any descriptive text identified therein as an "Attribution Notice." You must cause the Source Code for any Derivative Works that You create to carry a prominent Attribution Notice reasonably calculated to inform recipients that You have modified the Original Work.

7) Warranty of Provenance and Disclaimer of Warranty.

Licensor warrants that the copyright in and to the Original Work and the patent rights granted herein by Licensor are owned by the Licensor or are sublicensed to You under the terms of this License with the permission of the contributor(s) of those copyrights and patent rights. Except as expressly stated in the immediately preceding sentence, the Original Work is provided under this License on an "AS IS" BASIS and WITHOUT WARRANTY, either express or implied, including, without limitation, the warranties of NON-INFRINGEMENT, MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY OF THE ORIGINAL WORK IS WITH YOU. This DISCLAIMER OF WARRANTY constitutes an essential part of this License. No license to Original Work is granted hereunder except under this disclaimer.

8) Limitation of Liability.

Under no circumstances and under no legal theory, whether in tort (including negligence), contract, or otherwise, shall the Licensor be liable to any person for any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or the use of the Original Work including, without limitation, damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses. This limitation of liability shall not apply to liability for death or personal injury resulting from Licensor's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

9) Acceptance and Termination.

If You distribute copies of the Original Work or a Derivative Work, You must make a reasonable effort under the circumstances to obtain the express assent of recipients to the terms of this License. Nothing else but this License (or another written agreement between Licensor and You) grants You permission to create Derivative Works based upon the Original Work or to exercise any of the rights granted in Section 1 herein, and any attempt to do so except under the terms of this License (or another written agreement between Licensor and You) is expressly prohibited by U.S. copyright law, the equivalent laws of other countries, and by international treaty. Therefore, by exercising any of the rights granted to You in Section 1 herein, You indicate Your acceptance of this License and all of its terms and conditions.

10) Termination for Patent Action.

This License shall terminate automatically and You may no longer exercise any of the rights granted to You by this License as of the date

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

You commence an action, including a cross-claim or counterclaim, against Licensor or any licensee alleging that the Original Work infringes a patent. This termination provision shall not apply for an action alleging patent infringement by combinations of the Original Work with other software or hardware.

11) Jurisdiction, Venue and Governing Law.

Any action or suit relating to this License may be brought only in the courts of a jurisdiction wherein the Licensor resides or in which Licensor conducts its primary business, and under the laws of that jurisdiction excluding its conflict-of-law provisions. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any use of the Original Work outside the scope of this License or after its termination shall be subject to the requirements and penalties of the U.S. Copyright Act, 17 U.S.C. § 101 et seq., the equivalent laws of other countries, and international treaty. This section shall survive the termination of this License.

12) Attorneys Fees.

In any action to enforce the terms of this License or seeking damages relating thereto, the prevailing party shall be entitled to recover its costs and expenses, including, without limitation, reasonable attorneys' fees and costs incurred in connection with such action, including any appeal of such action. This section shall survive the termination of this License.

13) Miscellaneous.

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

14) Definition of "You" in This License.

"You" throughout this License, whether in upper or lower case, means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with you. For purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

15) Right to Use.

You may use the Original Work in all ways not otherwise restricted or conditioned by this License or by law, and Licensor promises not to interfere with or be responsible for such uses by You.

This license is **Copyright (C) 2003-2004 Lawrence E. Rosen. All rights reserved.**

Permission is hereby granted to copy and distribute this license without modification. This license may not be modified without the express written permission of its copyright owner.

END OF ACADEMIC FREE LICENSE.

The following is intended to describe the essential differences between the Academic Free License (AFL) version 1.0 and other open source licenses:

The Academic Free License is similar to the BSD, MIT, UoI/NCSA and Apache licenses in many respects but it is intended to solve a few problems with those licenses.

The AFL is written so as to make it clear what software is being licensed (by the inclusion of a statement following the copyright notice in the

document version 2.60

software). This way, the license functions better than a template license. The BSD, MIT and Uol/NCSA licenses apply to unidentified software.

The AFL contains a complete copyright grant to the software. The BSD and Apache licenses are vague and incomplete in that respect.

The AFL contains a complete patent grant to the software. The BSD, MIT, Uol/NCSA and Apache licenses rely on an implied patent license and contain no explicit patent grant.

The AFL makes it clear that no trademark rights are granted to the licensor's trademarks. The Apache license contains such a provision, but the BSD, MIT and Uol/NCSA licenses do not.

The AFL includes the warranty by the licensor that it either owns the copyright or that it is distributing the software under a license. None of the other licenses contain that warranty. All other warranties are disclaimed, as is the case for the other licenses.

The AFL is itself copyrighted (with the right granted to copy and distribute without modification). This ensures that the owner of the copyright to the license will control changes. The Apache license contains a copyright notice, but the BSD, MIT and Uol/NCSA licenses do not.

heartbeat 3.0.0-0.6.0daab7da36a8

Software:	heartbeat
Version:	3.0.0-0.6.0daab7da36a8
File or Package:	heartbeat-3.0.0-0.6.0daab7da36a8.hg.fc13.src.rpm
OSI Licenses:	GPLv2, GPLv2+, LGPLv2.1, LGPLv2.1+, BSDv1 (UCB), Public Domain
Other Licenses:	Custom
URL:	
Group:	User Space Apps/System Environment/Daemons/Productivity/Clustering/HA
Description:	Heartbeat subsystem for High-Availability Linux; heartbeat is a basic high-availability subsystem for Linux-HA. It will run scripts at initialization, and when machines go up or down. This version will also perform IP address takeover using gratuitous ARPs. Heartbeat contains a cluster membership layer, fencing, and local and clusterwide resource management functionality. When used with Pacemaker, it supports "n-node" clusters with significant capabilities for managing resources and dependencies. In addition it continues to support the older release 1 style of 2-node clustering. It implements the following kinds of heartbeats: - Serial ports - UDP/IP multicast (ethernet, etc) - UDP/IP broadcast (ethernet, etc) - UDP/IP heartbeats - "ping" heartbeats (for routers, switches, etc.) (to be used for breaking ties in 2-node systems)
Common Usage:	Daemon
Package Size:	4.7 MB
Folders / Files:	50 / 360
Source Path:	wrlinux-4.0/layers/wrll-userspace/cgl/packages

This package was first debianized by Paolo Molaro lupus@debian.org on Wed, 17 Nov 1999 17:30:23 +0100. The original sources can be found at: <http://www.linux-ha.org/download/>

Upstream Authors (from doc/AUTHORS):

NOTE: The work of everyone on this project is dearly appreciated. If you are not listed here but should be, please notify us!

The following people have kindly helped with heartbeat development by providing code, documentation or testing, or fixes:

Alan Robertson alanr@unix.sh

Main architect. Things other people don't want to do.

Contributors, ordered by last name:

Eric Ayers eric@compgen.com

Nightware RPC100S, and WTI RPS10 support

Andrew Beekhof andrew@beekhof.net

Cluster Resource Manager

Darwin Cleanups

Stéphane Billiard stephane@reefedge.com - unicast support

Gregor Binder gbinder@sysfive.com - "meatware" STONITH support

Juan Pedro Paredes Caballero juampe@retemail.es - Debian support

Dusan Djordjevic dj.dule@linux.org.yu - documentation

Kevin Dwyer kevin@pheared.net - ipfail, bug fixes.

Joachim Gleissner jg@suse.de ssh STONITH support

Luis Claudio R. Gonçalves lclaudio@conectiva.com.br

nice_failback code, hb_standby code, fixes

Thomas Hepper th@ant.han.de

solaris and Debian support

Masaki Hasegawa masaki-h@pp.iij4u.or.jp - send_arp research, fix

Andrew Hildebrand andrew@pdi.com - IRIX port.

Horms horms@vergenet.net horms@verge.net.au

LVS support, ldirectord, many fixes

Gregor Howey ghowey@bremer-nachrichten.de

Holger Kiehl Holger.Kiehl@dwd.de

Kirk Lawson klawson@heapy.com - Audible alarm support

Mike Ledoux mwl@mclinux.com

APC master switch and WTI [WTI]PS-xxx support

David Lee t.d.lee@durham.ac.uk - autoconf and solaris support

Xiaoxiang Liu xiliu@ncsa.uiuc.edu

interprocess communication library

Friedrich Lobenstock fl@fl.priv.at - SuSE compatibility fixes

Lars Marowsky-Brée lmb@suse.de

LVM, ICP and ssh STONITH support, many fixes

SuSE package maintainer

STABLE_1_0 / 1.0.x release maintenance

Michael Moerz mike@cubit.at - automake support

Ram Pai linuxram@us.ibm.com - Consensus Membership module

Rudy Pawul rpawul@iso-ne.com

Documentation, first production customer

Andreas Piesk a.piesk@gmx.net

APC Masterswitch (snmp) and APCSmart support

Jacob Rief jacob.rief@tis.at - ldirectord

Stefan Salzer salt@cin.de

Mitja Sarp mitja@lysator.liu.se

Initial authentication support (first big contribution)

Guochun Shigshi@ncsa.uiuc.edu

Communication/core/membership layer support

Matthew Soffen sirgeek@mrsucko.org

FreeBSD port, Solaris fixes, and release manager

Guenther Thomsen thomsen@cs.tu-berlin.de

Debian compliance

Mike Tilstra conrad@sistina.com - VACM support

Marcelo Tosatti marcelo@conectiva.com.br

API support, initial plugin support

Iñaki Fernández Villanueva - debian support

Todd Wheeling wheeling@mclinux.com

APC master switch and WTI [WTI]PS-xxx support

Volker Wiegand Volker.Wiegand@suse.de

/proc file system, initial SuSE support, documentation

Chris Wright chris@wirex.com

Multicast support, inet_pton replacement, fixes

Code for the following pieces borrowed from code by:

Tom Vogt tom@lemuria.org (udp code)

yuri volobuev volobuev@t1.chem.umn.edu (send_arp.c)

'Network UPS Tools' by Russell Kroll rkroll@exploits.org

homepage: <http://www.exploits.org/nut/>

(Andreas Piesk borrowed code for APCSmart support)

David C. Teigland teigland@sistina.com

wrote original meatware support for GFS stomith

salz@pebbles.bbn.com - replacement scandir function

Internet Software Consortium (bind) - replacement inet_pton() function

heartbeat-3.0.0-0.6.0daab7da36a8.hg.fc13.src/0daab7da36a8/Linux-HA-Dev-0daab7da36a8/replace/scandir.c
This code borrowed from 'libit', which can be found here:
<http://www.iro.umontreal.ca/~pinard/libit/dist/scandir/>
The original author put this code in the public domain. It has been modified slightly to get rid of warnings, etc.

Below is the email I received from pinard@iro.umontreal.ca (François Pinard) when I sent him an email asking him about the license, etc. of this code which I obtained from his site. I think the correct spelling of his name is Rich Salz. I think he's now rsalz@datapower.com...

Rich Salz, Chief Security Architect
DataPower Technology <http://www.datapower.com>

Subject: Re: Scandir replacement function
Date: 18 May 2001 12:00:48 -0400
From: pinard@iro.umontreal.ca (François Pinard)
To: Alan Robertson alanr@unix.sh
References: 1
[Alan Robertson]

Hi, I'd like to use your scandir replacement function found here:
<http://www.iro.umontreal.ca/~pinard/libit/dist/scandir/> But, it does not indicate authorship or licensing terms in it. Could you tell me who wrote this code, under what license you distribute it, and whether and under what terms I may further distribute it?

Hello, Alan. These are (somewhat) explained in UNSHAR.HDR found in the same directory. The routines have been written by Rick Saltz (I'm not completely sure of the spelling) a long while ago. I think that nowadays, Rick is better known as the main author of the nice INN package.

I spent a little time verifying this with Rick Salz. The results are below:

yes, it's most definitely in the public domain. I'm glad you find it useful. I'm surprised it hasn't been replaced by, e.g., something in GLibC. I'm impressed you tracked me down. /r\$

Subject: scandir, ftw REDUX
Date: 1 Jan 88 00:47:01 GMT
From: rsalz@pebbles.bbn.com
Newsgroups: comp.sources.misc

Forget my previous message -- I just decided for completeness's sake to implement the SysV ftw(3) routine, too. To repeat, these are public-domain implementations of the SystemV ftw() routine, the BSD scandir() and alphasort() routines, and documentation for same. The FTW manpage could be more readable, but so it goes. Anyhow, feel free to post these, and incorporate them into your existing packages. I have readdir() routines for MSDOS and the Amiga if anyone wants them, and should have them for VMS by the end of January; let me know if you want copies.

Yours in filesystems, /r\$
Anyhow, feel free to post

hostapd 0.7.2

Software:	hostapd
Version:	0.7.2
File or Package:	hostapd-0.7.2.tar.gz
OSI Licenses:	GPLv2, GPLv2+, BSDv2, MIT/X11, Public Domain
Other Licenses:	
URL:	http://hostap.epitest.fi/releases/hostapd-0.7.2.tar.gz
Group:	User Space Apps
Description:	hostapd is a user space daemon for access point and authentication servers. It implements IEEE 802.11 access point management, IEEE 802.1X/WPA/WPA2/EAP Authenticators, RADIUS client, EAP server, and RADIUS authentication server. The current version supports Linux (Host AP, madwifi, Prism54, mac80211-based drivers) and FreeBSD (net80211). hostapd is designed to be a "daemon" program that runs in the background and acts as the backend component controlling authentication. hostapd supports separate frontend programs and an example text-based frontend, hostapd_cli, is included with hostapd.

Introduction - Originally, hostapd was an optional user space component for Host AP driver. It adds more features to the basic IEEE 802.11 management included in the kernel driver: using external RADIUS authentication server for MAC address based access control, IEEE 802.1X Authenticator and dynamic WEP keying, RADIUS accounting, WPA/WPA2 (IEEE 802.11i/RSN) Authenticator and dynamic TKIP/CCMP keying. The current version includes support for other drivers, an integrated EAP server (i.e., allow full authentication without requiring an external RADIUS authentication server), and RADIUS authentication server for EAP authentication.

This code implements the MD4 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by **Colin Plumb in 1993**, no copyright is claimed. This code is in the public domain; do with it what you wish. Todd C. Miller modified the MD5 code to do MD4 based on RFC 1186.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

Description:	The Apache HTTP Server is a powerful and flexible HTTP/1.1 compliant web server. Originally designed as a replacement for the NCSA HTTP Server, it has grown to be the most popular web server on the Internet. As a project of the Apache Software Foundation, the developers aim to collaboratively develop and maintain a robust, commercial-grade, standards-based server with freely available source code.

The Apache HTTP Server Project is a collaborative software development effort aimed at creating a robust, commercial-grade, featureful, and freely-available source code implementation of an HTTP (Web) server. The project is jointly managed by a group of volunteers located around the world, using the Internet and the Web to communicate, plan, and develop the server and its related documentation. This project is part of the Apache Software document version 2.60

Foundation. In addition, hundreds of users have contributed ideas, code, and documentation to the project. This file is intended to briefly describe the history of the Apache HTTP Server and recognize the many contributors.

<httpd-2.2.16/httpd-2.2.16/readme>
Cryptographic Software Notice
This distribution may include software that has been designed for use with cryptographic software. The country in which you currently reside may have restrictions on the import, possession, use, and/or re-export to another country, of encryption software. Before using any encryption software, please check your country's laws, regulations and policies concerning the import, possession, or use, and re-export of encryption software, to see if this is permitted. See <<http://www.wassenaar.org/>> for more information.

The U.S. Government Department of Commerce, Bureau of Industry and Security (BIS), has classified this software as Export Commodity Control Number (ECCN) 5D002.C.1, which includes information security software using or performing cryptographic functions with asymmetric algorithms. The form and manner of this Apache Software Foundation distribution makes it eligible for export under the License Exception ENC Technology Software Unrestricted (TSU) exception (see the BIS Export Administration Regulations, Section 740.13) for both object code and source code.

The following provides more details on the included files that may be subject to export controls on cryptographic software:

Apache httpd 2.0 and later versions include the mod_ssl module under modules/ssl/ for configuring and listening to connections over SSL encrypted network sockets by performing calls to a general-purpose encryption library, such as OpenSSL or the operating system's platform-specific SSL facilities.

In addition, some versions of apr-util provide an abstract interface for SSL encrypted network sockets in the files under the directory src/lib/apr-util/ssl/ that makes use of a general-purpose encryption library, such as OpenSSL or the operating system's platform-specific SSL facilities.

Apache httpd currently does not use that apr-util interface. Some object code distributions of Apache httpd, indicated with the word "crypto" in the package name, may include object code for the OpenSSL encryption library as distributed in open source form from <<http://www.openssl.org/source/>>.

The above files are optional and may be removed if the cryptographic functionality is not desired or needs to be excluded from redistribution. Distribution packages of Apache httpd that include the word "nossli" in the package name have been created without the above files and are therefore not subject to this notice.

Acknowledgments

We wish to acknowledge the following copyrighted works that make up portions of the Apache software:

Portions of this software were developed at the National Center for Supercomputing Applications (NCSA) at the University of Illinois at Urbana-Champaign.

This software contains code derived from the RSA Data Security Inc. MD5 Message-Digest Algorithm, including various modifications by Spyglass Inc., Carnegie Mellon University, and Bell Communications Research, Inc (Bellcore).

Regular expression support is provided by the PCRE library package, which is open source software, written by Philip Hazel, and **copyright by the University of Cambridge, England**. The original software is available from <ftp://ftp.csx.cam.ac.uk/pub/software/programming/pcre/>

Apache 2 relies heavily on the use of autoconf and libtool to provide a build environment.

<httpd-2.2.16/httpd-2.2.16/srclib/pcre/license>

PCRE LICENCE

PCRE is a library of functions to support regular expressions whose syntax and semantics are as close as possible to those of the Perl 5 language. Release 5 of PCRE is distributed under the terms of the "BSD" licence, as specified below. The documentation for PCRE, supplied in the "doc" directory, is distributed under the same terms as the software itself.

The following notes apply to the mod_mime_magic module and are included here for compliance with contributors' copyright restrictions that require their acknowledgment.

Copyright (c) 1996-1997 Cisco Systems, Inc.

Copyright (c) Ian F. Darwin, 1987

This software was submitted by Cisco Systems to the Apache Group in July 1997. Future revisions and derivatives of this source code must acknowledge Cisco Systems as the original contributor of this module. All other licensing and usage conditions are those of the Apache Group. Some of this code is derived from the free version of the file command originally posted to comp.sources.unix. Copyright info for that program is included below as required.

Copyright (c) Ian F. Darwin, 1987. Written by Ian F. Darwin.

This software is not subject to any license of the American Telephone and Telegraph Company or of the Regents of the University of California. Permission is granted to anyone to use this software for any purpose on any computer system, and to alter it and redistribute it freely, subject to the following restrictions:

The author is not responsible for the consequences of use of this software, no matter how awful, even if they arise from flaws in it.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

The origin of this software must not be misrepresented, either by explicit claim or by omission. Since few users ever read sources, credits must appear in the documentation.

Altered versions must be plainly marked as such, and must not be misrepresented as being the original software. Since few users ever read sources, credits must appear in the documentation.

This notice may not be removed or altered.

For compliance with Mr Darwin's terms: this has been very significantly modified from the free "file" command.

all-in-one file for compilation convenience when moving from one version of Apache to the next. Memory allocation is done through the Apache API's pool structure. All functions have had necessary Apache API request or server structures passed to them where necessary to call other Apache API routines. (i.e., usually for logging, files, or memory allocation in itself or a called function.) struct magic has been converted from an array to a single-ended linked list because it only grows one record at a time, it's only accessed sequentially, and the Apache API has no equivalent of realloc(). Functions have been changed to get their parameters from the server configuration instead of globals. (It should be reentrant now but has not been tested in a threaded environment.) Places where it used to print results to stdout now saves them in a list where they're used to set the MIME type in the Apache request record. Command-line flags have been removed since they will never be used here.

The apr_md5_encode() routine uses much code obtained from the FreeBSD 3.0 MD5 crypt() function, which is licenced as follows:

"THE BEER-WARE LICENSE" (Revision 42): <phk@login.dknet.dk> wrote this file. As long as you retain this notice you can do whatever you want with this stuff. If we meet some day, and you think this stuff is worth it, you can buy me a beer in return. **Poul-Henning Kamp**

♦♦♦

From:
<http://httpd-2.2.16/httpd-2.2.16/src/lib/apr/test/README>
CuTest is an open source test suite written by **Asim Jalis**.
It has been released under the zlib/libpng license. That license can be found in the CuTest.c and CuTest.h files.

♦♦♦

From:

document version 2.60

httpd-2.2.16/httpd-2.2.16/Makefile.win

These OpenSSL binaries were built for distribution from the U.S. without support for the patented encryption methods IDEA, MDC-2 or RC5.

imagemagick 6.3.8.1-4

Software: ImageMagick
Version: 6.3.8.1-4
File or Package: ImageMagick-6.3.8.1-4.fc9.src.rpm
OSI Licenses: GPLv2+ w/exception, LGPLv2+ w/exception, MIT/X11, FreeBSD, zlib/libpng
Other Licenses: Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/9/Fedora/source/SRPMS/ImageMagick-6.3.8.1-4.fc9.src.rpm>
Group: Applications/Multimedia
Description: An X application for displaying and manipulating images. ImageMagick® is a software suite to create, edit, and compose bitmap images. It can read, convert and write images in a variety of formats (about 100) including DPX, EXR, GIF, JPEG, JPEG-2000, PDF, PhotoCD, PNG, Postscript, SVG, and TIFF. Use ImageMagick to translate, flip, mirror, rotate, scale, shear and transform images, adjust image colors, apply various special effects, or draw text, lines, polygons, ellipses and Bézier curves. The functionality of ImageMagick is typically utilized from the command line or you can use the features from programs written in your favorite programming language.
Common Usage: Utility

ImageMagick-6.3.8.1-4.fc9.src/ImageMagick-6.3.8-1/ImageMagick-6.3.8/license
ImageMagick-6.3.8.1-4.fc9.src/ImageMagick-6.3.8-1/ImageMagick-6.3.8/www/license.html

The authoritative ImageMagick license can be found at <http://www.imagemagick.org/script/license.php> and ImageMagick notices at <http://www.imagemagick.org/script/notice.php>. Before we get to the text of the license lets just review what the license says in simple terms:

It allows you to: freely download and use ImageMagick software, in whole or in part, for personal, company internal, or commercial purposes; use ImageMagick software in packages or distributions that you create.

It forbids you to: redistribute any piece of ImageMagick-originated software without proper attribution; use any marks owned by ImageMagick Studio LLC in any way that might state or imply that ImageMagick Studio LLC endorses your distribution; use any marks owned by ImageMagick Studio LLC in any way that might state or imply that you created the ImageMagick software in question.

It requires you to: include a copy of the license in any redistribution you may make that includes ImageMagick software; provide clear attribution to ImageMagick Studio LLC for any distributions that include ImageMagick software.

It does not require you to: include the source of the ImageMagick software itself, or of any modifications you may have made to it, in any redistribution you may assemble that includes it; submit changes that you make to the software back to the ImageMagick Studio LLC (though such feedback is encouraged).

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

A few other clarifications include:

ImageMagick is freely available without charge; you may include ImageMagick on a CD-ROM as long as you comply with the terms of the license; you can give modified code away for free or sell it under the terms of the ImageMagick license or distribute the result under a different license, but you need to acknowledge the use of the ImageMagick software; the license is compatible with the GPL.

The legally binding and authoritative terms and conditions for use, reproduction, and distribution of ImageMagick follow:

Copyright 1999-2008 ImageMagick Studio LLC, a non-profit organization dedicated to making software imaging solutions freely available.

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication intentionally sent to the Licensor by its

document version 2.60

copyright holder or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

a. You must give any other recipients of the Work or Derivative Works a copy of this License; and

b. You must cause any modified files to carry prominent notices stating that You changed the files; and

c. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

d. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License.

From:

ImageMagick-6.3.8.1-4.fc9.src/ImageMagick-6.3.8-1/ImageMagick-6.3.8/notice

This product includes software developed by ImageMagick Studio LLC (<http://www.imagemagick.org>). ImageMagick incorporated a small portion of code from the gsview package to locate Ghostscript under Windows in `magick/nt-base.c`. The source code is distributed under the following license:

Copyright (C) 2000-2002, Ghostgum Software Pty Ltd. All rights reserved.

Permission is hereby granted, free of charge, to any person obtaining a copy of this file ("Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of this Software, and to permit persons to whom this file is furnished to do so, subject to the following conditions:

document version 2.60

This Software is distributed with NO WARRANTY OF ANY KIND. No author or distributor accepts any responsibility for the consequences of using it, or for whether it serves any particular purpose or works at all, unless he or she says so in writing.

The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

The Base64Decode() and Base64Encode() methods in magick/utility.c is based on source code obtained from OpenSSH. The source code is distributed under the following license:

Copyright (c) 2000 Markus Friedl. All rights reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

THIS SOFTWARE IS PROVIDED BY THE AUTHOR "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

ImageMagick includes patterns in coders/pattern.c which are derived from XFig and is distributed under the following license:

FIG: Facility for Interactive Generation of figures
Copyright (c) 1985-1988 by Supoj Sutanthavibul
Parts **Copyright (c) 1989-2000 by Brian V. Smith**
Parts **Copyright (c) 1991 by Paul King**

Any party obtaining a copy of these files is granted, free of charge, a full and unrestricted irrevocable, world-wide, paid up, royalty-free, nonexclusive right and license to deal in this software and documentation files (the "Software"), including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons who receive copies from any such party to do so, with the only requirement being that this copyright notice remain intact.

Portions of the magick/xml-tree.c was derived from ezxml which is licensed as follows:

Copyright 2004, 2005 Aaron Voisine <aaron@voisine.org>

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"),

ipmitool 1.8.11-4

Software:	ipmitool
Version:	1.8.11-4
File or Package:	ipmitool-1.8.11-4.fc12.src.rpm
OSI Licenses:	GPLv2+ w/ exception, LGPLv2.1+, BSDv2, MIT/X11, zlib/libpng
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Everything/source/SRPMS/ipmitool-1.8.11-4.fc12.src.rpm
Group:	User Space Apps / System Environment/Base
Description:	IPMITool is a utility for managing and configuring devices that support the Intelligent Platform Management Interface (IPMI) version 1.5 and version 2.0 specifications. IPMI is an open standard for monitoring, logging, recovery, inventory, and control of hardware that is implemented independent of the main CPU, BIOS, and OS. The service processor (or Baseboard Management Controller, BMC) is the brain behind platform management and its primary purpose is to handle the autonomous sensor monitoring and event logging features. The IPMITool program provides a simple command-line interface to this BMC. It features the ability to read the sensor data repository (SDR) and print sensor values, display the contents of the System Event Log (SEL), print Field Replaceable Unit (FRU) inventory information, read and set LAN configuration parameters, and perform remote chassis power control.

ippool 1.3-1

Software: ippool
Version: 1.3-1
File or Package: ippool-1.3-1.fc7.src.rpm
OSI Licenses: GPLv2, GPLv2+, LGPLv2.1, LGPLv2.1+, Academic
Other Licenses: Custom
URL: <http://cdnetworks-kr-2.dl.sourceforge.net/project/openl2tp/ippool/1.3/ippool-1.3-1.fc7.src.rpm>
Group: User Space Apps/System Environment/daemons
Description: IpPool is an IP address pool manager. IpPool is implemented as a separate server daemon to allow any application to use its address pools. This makes it possible to define address pools that are shared by PPP, L2TP, PPTP etc. It may be useful in some VPN server setups. IpPool comes with a command line management application, ippoolconfig to manage and query address pool status. A pppd plugin is supplied which allows pppd to request IP addresses from ippool. IpPool is a userspace daemon for managing one or more pools of IP addresses.

It was developed as part of the OpenL2TP project (<http://www.sourceforge.net/projects/openl2tp/>) but has since been repackaged so that it may be used independently of OpenL2TP. IpPool is not intended for use where DHCP is used. Rather, IpPool provides a generic IP address allocation mechanism for applications such as VPN servers which hand out IP addresses to VPN clients.

Common Usage: Daemon, Utility
Package Size: 760 KB (0.74 MB)

document version 2.60

From:

ippool-1.3-1.fc7.src/ippool-1.3/ippool-1.3/license

The Katalix Systems IpPool software is Dual Licensed. Users can choose to use the IpPool software as an Open Source/Free Software product under the terms of the GNU General Public License (<http://www.fsf.org/licenses/>) or can purchase a commercial license from Katalix Systems Ltd.

The IpPool software is released under the GNU General Public License (GPL). This means that the IpPool software can be used free of charge under the GPL. If you do not want to be bound by the GPL terms (such as the requirement that your application must also be GPL), you may purchase a commercial license for the same product from Katalix Systems Ltd. Since Katalix Systems Ltd owns the copyright to the IpPool source code, we are able to employ Dual Licensing, which means that the same product is available under GPL and under a commercial license. This does not in any way affect the Open Source commitment of Katalix Systems Ltd.

The IpPool software is released under the GNU General Public License (GPL). The formal terms of the GPL license can be found at <http://www.fsf.org/licenses/>. See also <http://www.fsf.org/licenses/gpl-faq.html>.

The GPL license is contagious in the sense that when a program is linked to a GPL program, all the source code for all the parts of the resulting product must also be released under the GPL. If you do not follow this GPL requirement, you break the license terms and forfeit your right to use the GPL program altogether. You also risk damages.

You need a commercial license under these conditions:

When you link a program with any GPL code from the IpPool software and don't want the resulting product to be licensed under GPL, perhaps because you want to build a commercial product or keep the added non-GPL code closed source for other reasons. When purchasing commercial licenses, you are not using the IpPool software under GPL even though it's the same code.

When you distribute a non-GPL application that works only with the IpPool software and ship it with the IpPool software. This type of solution is considered to be linking even if it's done over a network.

When you distribute copies of the IpPool software without providing the source code as required under the GPL license.

A special exception is made for IpPool plugins. Such plugins may be closed source and not come under GPL provided that they use IpPool's standard plugin interface. It is not permitted to make open source changes to IpPool in order to add new interfaces to IpPool and then write a closed source plugin that uses the new interface.

If you require a commercial license, you will need one license for each installation of the IpPool server software. One license is required for each CPU / memory subsystem that runs IpPool binaries. Multiple CPU "Symmetric Multi-Processor" (SMP) systems require only one license per SMP CPU group.

ipsec-tools 0.8.0-1

Software:	ipsec-tools
Version:	0.8.0-1
File or Package:	ipsec-tools-0.8.0-1.fc15.src.rpm
OSI Licenses:	GPLv2+ w/exception, GPLv3+ w/exception, MIT/X11, BSDv2, Academic, Public Domain
Other Licenses:	Custom
URL:	
Group:	User Space Libraries / User Space Apps / System Environment/Base / Productivity/Networking/Security
Description:	Enables the use of IPsec in Linux. This is the IPsec-Tools package. You need this package in order to really use the IPsec functionality in the linux-2.5+. IPsec-Tools is a Linux port of the user-space tools from KAME. It includes libipsec (a library with a PF_KEY implementation), setkey (a tool for manipulating and dumping the kernel Security Policy Database and Security Association Database), and racoon (Internet Key Exchange daemon for automatically keying IPsec connections). tools for configuring and using IPSEC functionality in kernel. This package contains tools necessary for establishing keys for IPSEC connections including the rekeying during the connection lifetime.
Common Usage:	API, Docs, Library, Tool, Utility
Package Size:	4.25 MB
Folders / Files:	23 / 242
Source Path:	wrlinux-4.0/layers/wrll-userspace/networking/packages

NOTICES:

From:
ipsec-tools-0.8.0-1.fc15.src/ipsec-tools.spec
Name: ipsec-tools
Version: 0.8.0
Release: 1%{?dist}
Summary: Tools for configuring and using IPSEC
License: BSD
Group: System Environment/Base
URL: <http://ipsec-tools.sourceforge.net/>
Source: <ftp://ftp.netbsd.org/pub/NetBSD/misc/ipsec-tools/0.8/ipsec-tools-%{version}.tar.bz2>

Description - This package contains tools necessary for establishing keys for IPSEC connections including the rekeying during the connection lifetime.

Description: Tools to manage Linux kernel packet filtering capabilities. iptables is a user space application program that allows a system administrator to configure the tables provided by the Linux kernel firewall (implemented as different Netfilter modules) and the chains and rules it stores.

Common Usage: Spec, Standalone, Tool, Utility
Package Size: 4.0 MB
Folders / Files: 18 / 321
Source Path: wrlinux-4.0/layers/wrll-kernel/packages

iputils 20101006-2

Software: iputils
Version: 20101006-2
File or Package: iputils-20101006-2.fc15.src.rpm
OSI Licenses: GPLv2, GPLv2+, BSDv1 (UCB), Academic, Public Domain
Other Licenses: Custom
URL: http://ftp.linux.ncsu.edu/pub/fedora/linux/updates/12/SRPMS/iputils-20101006-2.fc15.src.rpm
Group: System Environment/Daemons
Description: Network monitoring utilities including ping. The iputils package contains basic utilities for monitoring a network, including ping. The ping command sends a series of ICMP protocol ECHO_REQUEST packets to a specified network host to discover whether the target machine is alive and receiving network traffic.
Common Usage: Utilities, Daemon
Package Size: 988 KB (0.96 MB)
Folders / Files: 6 / 61
Source Path: wrllinux-4.0/layers/wrll-kernel/packages

I stole the idea for this program from Steve Deering. Since the first release, I've learned that had I attended the right IETF working group meetings, I also could have stolen it from Guy Almes or Matt Mathis. I don't know (or care) who came up with the idea first. I envy the originators' perspicacity and I'm glad they didn't keep the idea a secret.

irqbalance 0.55

Software: irqbalance
Version: 0.55
File or Package: irqbalance-0.55.tar.gz
OSI Licenses: GPLv2
Other Licenses:
URL: <http://www irqbalance.org/releases/irqbalance-0.55.tar.gz>
Group: User Space Apps
Description: irqbalance is a Linux daemon that distributes interrupts over the processors and cores you have in your computer system. The design goal of irqbalance is to do find a balance between power savings and optimal performance. To a large degree, the work irqbalance does is invisible to you; if irqbalance performs its job right, nobody will ever notice it's there or want to turn it off.
Common Usage: Tool, Utility
Package Size: 144 KB (0,14 MB)
Folders / Files: 2 / 19

document version 2.60

This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by Colin Plumb in 1993, no copyright is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

Changed so as no longer to depend on Colin Plumb's 'usual.h' header definitions; now uses stuff from dpkg's config.h.
- Ian Jackson <ijackson@nyx.cs.du.edu>.
Still in the public domain.

iso-codes 3.3

Software:	iso-codes
Version:	3.3
File or Package:	iso-codes-3.3.tar.gz
OSI Licenses:	GPLv2+, GPLv2+ w/exception, LGPLv2.1, LGPLv2.1+, MIT/X11, Perl Artistic, Academic
Other Licenses:	
URL:	http://autobuilder.yoctoproject.org/downloads/yocto-0.9/sources/iso-codes-3.3.tar.gz
Group:	User Space Libraries
Description:	This package provides lists of various ISO standards (e.g. country, language, language scripts, and currency names) in one place, rather than repeated in many programs throughout the system. Currently there are lists of languages and countries embedded in several different programs, which leads to dozens of lists of 200 languages, translated into more than 30 languages ... not very efficient. With this package, we create a single "gettext domain" for every supported ISO standard which contains the translations of that domain. It is easy for a programmer to re-use those translations instead of maintaining their own translation infrastructure. Moreover, the programmer does not need to follow changes in the ISO standard and will not work with outdated information.
Common Usage:	Standalone
Package Size:	25.24 MB
Folders / Files:	9 / 394
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

jpegsrc.v8b

Software: jpegsrc
Version: v8b
File or Package: jpegsrc.v8b.tar.gz
OSI Licenses: GPLv2, GPLv2+ w/exception, MIT/X11, Academic, Custom
Other Licenses:
URL: <http://www.iij.org/files/jpegsrc.v8b.tar.gz>
Group: User Space Libraries
Description: This package contains C software to implement JPEG image encoding, decoding, and transcoding. JPEG (pronounced "jay-peg") is a standardized compression method for full-color and gray-scale images. This software implements JPEG baseline, extended-sequential, and progressive compression processes. Provision is made for supporting all variants of these processes, although some uncommon parameter settings aren't implemented yet. We have made no provision for supporting the hierarchical or lossless processes defined in the standard. We provide a set of library routines for reading and writing JPEG image files, plus two sample applications "cjpeg" and "djpeg", which use the library to perform conversion between JPEG and some other popular image file formats. The library is intended to be reused in other applications.
Common Usage: API, Library
Package Size: 3.16 MB
Folders / Files: 2 / 181
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

NOTICES:

From:

jpegsrc.v8b/jpeg-8b/readme

This distribution contains the eighth public release of the Independent JPEG Group's free JPEG software. You are welcome to redistribute this software and to use it for any purpose, subject to the conditions under LEGAL ISSUES, below.

This software is the work of Tom Lane, Guido Vollbeding, Philip Gladstone, Bill Allombert, Jim Boucher, Lee Crocker, Bob Friesenhahn, Ben Jackson, Julian Minguillon, Luis Ortiz, George Phillips, Davide Rossi, Ge' Weijers, and other members of the Independent JPEG Group.

LEGAL ISSUES

In plain English:

1. We don't promise that this software works. (But if you find any bugs, please let us know!)
2. You can use this software for whatever you want. You don't have to pay us.
3. You may not pretend that you wrote this software. If you use it in a program, you must acknowledge somewhere in your documentation that you've used the IJG code.

In legalese:

The authors make NO WARRANTY or representation, either express or implied, with respect to this software, its quality, accuracy, merchantability, or fitness for a particular purpose. This software is provided "AS IS", and you, its user, assume the entire risk as to its quality and accuracy.

This software is
copyright (C) 1991-2010, Thomas G. Lane, Guido Vollbeding. All Rights Reserved
except as specified below.

Permission is hereby granted to use, copy, modify, and distribute this software (or portions thereof) for any purpose, without fee, subject to these conditions:

(1) If any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered; and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.

(2) If only executable code is distributed, then the accompanying documentation must state that "this software is based in part on the work of the Independent JPEG Group".

(3) Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the IJG code, not just to the unmodified library. If you use our work, you ought to acknowledge us.

Permission is NOT granted for the use of any IJG author's name or company name in advertising or publicity relating to this software or products derived from it. This software may be referred to only as "the Independent JPEG Group's software".

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

ansi2knr.c is included in this distribution by permission of **L. Peter Deutsch, sole proprietor of its copyright holder, Aladdin Enterprises of Menlo Park, CA.**

ansi2knr.c is NOT covered by the above copyright and conditions, but instead by the usual distribution terms of the Free Software Foundation; principally, that you must include source code if you redistribute it. (See the file ansi2knr.c for full details.) However, since ansi2knr.c is not needed as part of any program generated from the IJG code, this does not limit you more than the foregoing paragraphs do.

The Unix configuration script "configure" was produced with GNU Autoconf. It is **copyright by the Free Software Foundation** but is freely distributable.

The same holds for its supporting scripts (config.guess, config.sub, ltmain.sh). Another support script, install-sh, is **copyright by X Consortium** but is also freely distributable.

The IJG distribution formerly included code to read and write GIF files. To avoid entanglement with the Unisys LZW patent, GIF reading support has been removed altogether, and the GIF writer has been simplified to produce "uncompressed GIFs". This technique does not use the LZW algorithm; the resulting GIF files are larger than usual, but are readable by all standard GIF decoders.

We are required to state that "The Graphics Interchange Format(c) is the **Copyright property of CompuServe Incorporated.** GIF(sm) is a Service Mark property of CompuServe Incorporated."

Group: System Environment/Base
Description: Utilities to configuring the console (keyboard, virtual terminals, etc.) The kbd package contains tools for managing a Linux system's console's behavior, including the keyboard, the screen fonts, the virtual terminals and font files.
Common Usage: Utility
Package Size: 7.4 MB
Folders / Files: 58 / 781
Source Path: wrllinux-4.0/layers/wrll-userspace/core/packages

kbd-1.12-31.fc9.src/kbd-1.12/kbd-1.12/data/consolefonts/README.Ethiopic

Ethiopic fonts:

- o All fonts contain 353 Ethiopic characters which extends the Unicode specification by 7 characters (extras are relegated to the private use range).
- o Contain their own Unicode mapping table corresponding to "ethiopic.uni" which should be in your "consoletrans" directory.
- o Sizes 14 & 16 are prefixed by 159 Latin characters from iso01.f14 & iso01.f16. Size 12 fonts borrow Latin characters from lat1-12.psf.
- o Are redistributable under the GNU GPL version 2.0; with noted restrictions below:

Agafari: Donated by the Ethiopian Science and Technology Commission <ncic@padis.gn.apc.org> or <ncic@telecom.net.et> and may be redistributed for non-commercial use under Unix environments only.

Goha and GohaClassic: Donated by Yitna Firdyiwek <ybf2u@virgina.edu> of GohaTibeb Associates and may be redistributed without restriction under the GNU GPL 2.0.

The collection in this directory donated for Linux distributions is otherwise maintained by Daniel Jacob <Daniel_Yacob_at_UNECA@un.org> and <yacob@padis.gn.apc.org>.

<http://metalab.unc.edu/LDP/COPYRIGHT.html>
(redirected to <http://www.tldp.org/COPYRIGHT.html>)
LINUX DOCUMENTATION PROJECT LICENSE (LDPL) v2.0, 12 January 1998

COPYRIGHT - The copyright to each Linux Documentation Project (LDP) document is owned by its author or authors.

LICENSE - The following license terms apply to all LDP documents, unless otherwise stated in the document. The LDP documents may be reproduced and distributed in whole or in part, in any medium physical or electronic, provided that this license notice is displayed in the reproduction. Commercial redistribution is permitted and encouraged. Thirty days advance notice via email to the author(s) of redistribution is appreciated, to give the authors time to provide updated documents.

REQUIREMENTS OF MODIFIED WORKS - All modified documents, including translations, anthologies, and partial documents, must meet the following requirements:

- The modified version must be labeled as such.

document version 2.60

- The person making the modifications must be identified.
- Acknowledgement of the original author must be retained.
- The location of the original unmodified document be identified.
- The original author's (or authors') name(s) may not be used to assert or imply endorsement of the resulting document without the original author's (or authors') permission.

In addition it is requested that:

- The modifications (including deletions) be noted.
- The author be notified by email of the modification in advance of redistribution, if an email address is provided in the document.

As a special exception, anthologies of LDP documents may include a single copy of these license terms in a conspicuous location within the anthology and replace other copies of this license with a reference to the single copy of the license without the document being considered "modified" for the purposes of this section.

Mere aggregation of LDP documents with other documents or programs on the same media shall not cause this license to apply to those other works. All translations, derivative documents, or modified documents that incorporate any LDP document may not have more restrictive license terms than these, except that you may require distributors to make the resulting document available in source format. LDP documents are available in source format via the LDP home page at <http://sunsite.unc.edu/LDP/>.

LDP Policy Appendices TO USE THE LDP LICENSE

LDP authors who want to use the LDP License should put the following statement in their document: Copyright (c) by . This document may be distributed only subject to the terms and conditions set forth in the LDP License at .

Authors may include a copy of the license in their documents, as well. If they do so, they have the option of omitting the appendices.

TO USE THE LDP LICENSE, BUT PREVENT MODIFICATION

LDP authors who want to prevent modification to their document should put the following statement in their document:

Copyright (c) by . This document may be distributed only subject to the terms and conditions set forth in the LDP License at , except that this document must not be distributed in modified form without the author's consent.

TO USE YOUR OWN LICENSE

LDP authors who want to include their own license on LDP works may do so, as long as their terms are not more restrictive than the LDP license, except that they may require that the document may not be modified. If you have questions about the LDP License, please contact Guylhem Aznar, guylhem@metalab.unc.edu.

As a special exception, you may create a larger work that contains part or all of the Bison parser skeleton and distribute that work under terms of your choice, so long as that work isn't itself a parser generator using the skeleton or a modified version thereof as a parser skeleton. Alternatively, if you modify or redistribute the parser skeleton itself, you may (at your option) remove this special exception, which will cause the skeleton and the resulting Bison output files to be licensed under the GNU General Public License without this special exception. This special exception was added by the Free Software Foundation in version 2.2 of Bison.

Gemtek Corp still silently refuses to release any specifications of their multimedia devices, so the protocol still has to be reverse engineered. The v4l code was inspired by Jonas Munsin's Gemtek serial line radio device driver.

♦♦♦

From:
wr-4.0-std-kernel/kernel-4.0/drivers/media/radio/radio-gemtek.c
GemTek radio card driver for Linux
(C) 1998 Jonas Munsin <jmunsin@iki.fi>
GemTek hasn't released any specs on the card, so the protocol had to be reverse engineered with dosemu. Besides the protocol changes, this is mostly a copy of:

RadioTrack II driver for Linux radio support
(C) 1998 Ben Pfaff
Based on RadioTrack I/RadioReveal
(C) 1997 M. Kirkwood
Converted to new API by Alan Cox alan@lxorguk.ukuu.org.uk

(c) 2003 Gerd Knorr <kxrel@bytesex.org>

Lot of voodoo here. Even the data sheet doesn't help to understand what is going on here, the documentation for the audio part of the cx2388x chip is very bad. Some of this comes from party done linux driver sources I got from [undocumented]. Some comes from the dscaler sources, one of the dscaler driver guy works for Conexant ...

Many thanks to the authors of pl2303 driver: all functions in this file are heavily based on pl2303 code, buffering code is a 1-to-1 copy.

Warning! You use this driver on your own risk! The only official description of this device I have is datasheet from manufacturer, and it doesn't contain almost any information needed to write a driver. Almost all knowledge used while writing this driver was gathered by:

- analyzing traffic between device and the MS Windows 2000 driver,
- trying different bit combinations and checking pin states with a voltmeter,
- receiving malformed frames and producing buffer overflows to learn how errors are reported,

So, THIS CODE CAN DESTROY OTI-6858 AND ANY OTHER DEVICES, THAT ARE CONNECTED TO IT!

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Current development and maintenance by:
(c) 2000, 2001 Robert Baruch (autophile@starband.net)
(c) 2004, 2005 Daniel Drake <dsd@gentoo.org>
Developed with the assistance of:
(c) 2002 Alan Stern <stern@rowland.org>
Flash support based on earlier work by:
(c) 2002 Thomas Kreiling <usbdev@sm04.de>

Many originally ATAPI devices were slightly modified to meet the USB market by using some kind of translation from ATAPI to USB on the host, and the peripheral would translate from USB back to ATAPI. SCM Microsystems (www.scm-micro.com) makes a device, sold to OEM's only, which does the USB-to-ATAPI conversion. By obtaining the data sheet on their device under nondisclosure agreement, I have been able to write this driver for Linux.

From:
wr-4.0-std-kernel/kernel-4.0/firmware/WHENCE
This file attempts to document the origin and licensing information, if known, for each piece of firmware distributed for use with the Linux kernel.

Driver: ambassador Madge Ambassador (Collage PCI 155 Server) ATM NIC.
File: firmware/atmsar11.fw
Licence: Allegedly GPLv2+, but no source visible.
Marked: Madge Ambassador ATM Adapter microcode.
Copyright (C) 1995-1999 Madge Networks Ltd.

This microcode data is placed under the terms of the GNU General Public License. The GPL is contained in /usr/doc/copyright/GPL on a Debian system and in the file COPYING in the Linux kernel source.

We would prefer you not to distribute modified versions WITHOUT consultation and not to ask for assembly/other microcode source.

Driver: korg1212 Korg 1212 IO audio device
File: korg/k1212.dsp
Licence: Unknown
Found in alsa-firmware package in hex form; no licensing information.

Driver: maestro3 ESS Allegro Maestro3 audio device
File: ess/maestro3_assp_kernel.fw
File: ess/maestro3_assp_minisrc.fw
Licence: Unknown
Found in alsa-firmware package in hex form with a comment claiming to be GPLv2+, but without source and with another comment saying "ESS drops binary dsp code images on our heads, but we don't get to see specs on the dsp."

Driver: ymfpci Yamaha YMF724/740/744/754 audio devices
File: yamaha/ds1_ctrl.fw
File: yamaha/ds1_dsp.fw
File: yamaha/ds1e_ctrl.fw
Licence: Unknown
Found in alsa-firmware package in hex form, with the following comment:
Copyright (c) 1997-1999 Yamaha Corporation. All Rights Reserved.

Driver: SCSI_ADVANSYS - AdvanSys SCSI
File: advansys/mcode.bin

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. Driver: CPiA2 cameras based on Vision's CPiA2
File: cpia2/stv0672_vp4.bin
Licence: Allegedly GPLv2+, but no source visible.
Marked: **Copyright (C) 2001 STMicroelectronics, Inc.**
Contact: steve.miller@st.com
Description: This file contains patch data for the CPiA2 (stv0672) VP4.
Found in hex form in kernel source.

Driver: DABUSB Digital Audio Broadcasting (DAB) Receiver for USB and Linux
File: dabusb/firmware.fw
File: dabusb/bitstream.bin
Licence: Distributable
Copyright (C) 1999 BayCom GmbH
Redistribution and use in source and binary forms, with or without modification, are permitted provided that redistributions of source code retain the above copyright notice and this comment without modification.
Driver: USB_VICAM USB 3com HomeConnect (aka vicam)
File: vicam/firmware.fw
Licence: Unknown
Found in hex form in kernel source.

Driver: USB_SERIAL_EDGEPORT - USB Inside Out Edgeport Serial Driver
File: edgeport/boot.fw
File: edgeport/boot2.fw
File: edgeport/down.fw
File: edgeport/down2.fw
Licence: Allegedly GPLv2+, but no source visible.
Marked: Edgeport/4 Binary Image Generated by HEX2C v1.06
Copyright (C) 1998 Inside Out Networks, All rights reserved.
Found in hex form in kernel source.

Driver: USB_SERIAL_EDGEPORT_TI - USB Inside Out Edgeport Serial Driver (TI Devices)
File: edgeport/down3.bin

document version 2.60

Licence: Edgeport Binary Image (for TI based products) Generated by TIBin2C v2.00 (watchport)
Copyright (C) 2001 Inside Out Networks, All rights reserved.
Found in hex form in kernel source.

Driver: ATARI_DSP56K - Atari DSP56k support
File: dsp56k/bootstrap.bin
Source: dsp56k/bootstrap.asm
Licence: GPLv2 or later
DSP56001 assembler, possibly buildable with a56 from
<http://www.zdomain.com/a56.html>

Driver: SND_SB16_CSP - Sound Blaster 16/AWE CSP support
File: sb16/mulaw_main.csp
File: sb16/alaw_main.csp
File: sb16/ima_adpcm_init.csp
File: sb16/ima_adpcm_playback.csp
File: sb16/ima_adpcm_capture.csp
Licence: Allegedly GPLv2+, but no source visible.
Marked: **Copyright (c) 1994 Creative Technology Ltd.**
Microcode files for SB16 Advanced Signal Processor
Found in hex form in kernel source.

Driver: CASSINI - Sun Cassini
File: sun/cassini.bin
Licence: Unknown
Found in hex form in kernel source.

Driver: cxgb3 - Chelsio Terminator 3 1G/10G Ethernet adapter
File: cxgb3/t3b_psrpm-1.1.0.bin.ihex
File: cxgb3/t3c_psrpm-1.1.0.bin.ihex
file: cxgb3/t3fw-7.4.0.bin.ihex
Licence: GPLv2 or OpenIB.org BSD license, no source visible

Driver: cxgb3 - Chelsio Terminator 3 1G/10G Ethernet adapter
File: cxgb3/ael2005_opt_edc.bin.ihex
File: cxgb3/ael2005_twx_edc.bin.ihex
File: cxgb3/ael2020_twx_edc.bin.ihex
Licence: **Copyright (c) 2007-2009 NetLogic Microsystems, Inc.**

Permission is hereby granted for the distribution of this firmware data in hexadecimal or equivalent format, provided this copyright notice is accompanying it.
Found in hex form in kernel source.

Driver: e100 Intel PRO/100 Ethernet NIC
File: e100/d101m_ucose.bin
File: e100/d101s_ucose.bin
File: e100/d102e_ucose.bin
Licence: Unknown
Found in hex form in kernel source.

Driver: acenic Alteon AceNIC Gigabit Ethernet card
File: acenic/tg1.bin
File: acenic/tg2.bin
Licence: Unknown
Found in hex form in kernel source, but source allegedly available at
<http://alteon.shareable.org/>

Driver: tigon3 Broadcom Tigon3 based gigabit Ethernet cards
File: tigon/tg3.bin
File: tigon/tg3_tso.bin
File: tigon/tg3_tso5.bin

Found in hex form in kernel source.

Driver: YAM - YAM driver for AX.25
File: yam/1200.bin
File: yam/9600.bin
Licence: **(C) F6FBB 1998**
Found in hex form in kernel source.

Driver: 3C359 - 3Com 3C359 Token Link Velocity XL adapter
File: 3com/3C359.bin
Licence:
The firmware this driver downloads into the tokenring card is a separate program and is not GPL'd source code, even though the Linux side driver and the routine that loads this data into the card are. This firmware is licensed to you strictly for use in conjunction with the use of 3Com 3C359 TokenRing adapters. There is no warranty expressed or implied about its fitness for any purpose.

3c359_microcode.mac: 3Com 3C359 Tokenring microcode.
Notes:
- Loaded from xl_init upon adapter initialization. Available from 3Com as part of their standard 3C359 driver.
Found in hex form in kernel source.

Driver: PCMCIA_PCNET - NE2000 compatible PCMCIA adapter
File: cis/LA-PCM.cis
cis/PCMLM28.cis
cis/DP83903.cis
cis/NE2K.cis
cis/tamarack.cis
cis/PE-200.cis
cis/PE520.cis
Licence: GPL
Originally developed by the pcmcia-cs project

Driver: PCMCIA_3C589 - 3Com PCMCIA adapter
File: cis/3CXEM556.cis
Licence: GPL
Originally developed by the pcmcia-cs project

Driver: PCMCIA_3C574 - 3Com PCMCIA adapter
File: cis/3CCFEM556.cis
Licence: GPL
Originally developed by the pcmcia-cs project

Driver: SERIAL_8250_CS - Serial PCMCIA adapter
File: cis/MT5634ZLX.cis
cis/RS-COM-2P.cis
cis/COMpad2.cis

document version 2.60

From:
wr-4.0-std-kernel/kernel-4.0/arch/s390/crypto/des_check_key.c
Originally released as descrypt by Dana L. How <how@isl.stanford.edu>.
Modified by Raimar Falke <rf13@inf.tu-dresden.de> for the Linux-Kernel.
Derived from Cryptoapi and Nettle implementations, adapted for in-place
scatterlist interface. Changed LGPL to GPL per section 3 of the LGPL.

s390 Version:
Copyright IBM Corp. 2003
Author(s): Thomas Spatzier, Jan Glauber (jan.glauber@de.ibm.com)
Derived from "crypto/des.c"
Copyright (c) 1992 Dana L. How.
Copyright (c) Raimar Falke <rf13@inf.tu-dresden.de>
Copyright (c) Gisle Sflensminde <gisle@ii.uib.no>
Copyright (C) 2001 Niels Mvller.

History and Acknowledgments

The original Linux driver for SQ905 based cameras was written by Marcell Lengyel and further developed by many other contributors and is available from <http://sourceforge.net/projects/sqcam/>

This driver takes advantage of the reverse engineering work done for that driver and for libgphoto2 but shares no code with them. This driver has used as a base the finepix driver and other gspca based drivers and may still contain code fragments taken from those drivers.

document version 2.60

This source code is based heavily on the CPiA webcam driver which was written by Peter Pregler, Scott J. Bertin and Johannes Erdfelt. Portions of this code were also copied from usbvideo.c. Special thanks to the whole team at Sourceforge for help making this driver become a reality.

Notably: Andy Armstrong who reverse engineered the color encoding and Pavel Machek and Chris Cheney who worked on reverse engineering the camera controls and wrote the first generation driver.

wr-4.0-std-kernel/kernel-4.0/drivers/net/bsd_comp.c
Update: The Berkeley copyright was changed, and the change is retroactive to all "true" BSD software (ie everything from UCB as opposed to other peoples code that just carried the same license). The new copyright doesn't clash with the GPL, so the module-only restriction has been removed. Because this code is derived from the 4.3BSD compress source:

Copyright (c) 1985, 1986 The Regents of the University of California.
All rights reserved.

This code is derived from software contributed to Berkeley by James A. Woods, derived from original work by Spencer Thomas and Joseph Orost. Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgement: This product includes software developed by the University of California, Berkeley and its contributors.
4. Neither the name of the University nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE REGENTS AND CONTRIBUTORS ``AS IS'' AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

A lot of this driver was directly stolen from Erik H. Moe's PCI Qlogic ISP driver. Mucho kudos to him for this code. An even bigger kudos to John Grana at Performance Technologies for providing me with the hardware to write this driver, you rule John you really do.

From:
wr-4.0-std-kernel/kernel-4.0/drivers/usb/serial/ipw.c
Copyright (C) 2004 Roelf Diedericks <roelfd@inet.co.za>
Copyright (C) 2004 Greg Kroah-Hartman <greg@kroah.com>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

All information about the device was acquired using SnoopyPro on MSFT's O/S, and examining the MSFT drivers' debug output (insanely left _on_ in the enduser version). It was written out of frustration with the IPWireless USB modem supplied by Axity3G/Sentech South Africa not supporting Linux whatsoever. Nobody provided any proprietary information that was not already available for this device.

document version 2.60

From:
wr-4.0-std-kernel/kernel-4.0/drivers/usb/serial/kl5kusb105.c
Copyright (C) 2001 Utz-Uwe Haus <haus@uuhaus.de>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

All information about the device was acquired using SniffUSB and snoopUSB on Windows98. It was written out of frustration with the PalmConnect USB Serial adapter sold by Palm Inc. Neither Palm, nor their contractor (MCCI) or their supplier (KLSI) provided information that was not already available. It seems that KLSI bought some silicon-design information from ScanLogic, whose SL11R processor is at the core of the KL5KUSB chipset from KLSI. KLSI has firmware available for their devices; it is probable that the firmware differs from that used by KLSI in their products. If you have an original KLSI device and can provide some information on it, I would be most interested in adding support for it here. If you have any information on the protocol used (or find errors in my reverse-engineered stuff), please let me know.

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

document version 2.60

2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

THIS SOFTWARE IS PROVIDED BY THE AUTHOR AND CONTRIBUTORS ``AS IS'' AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

This code was derived from software contributed to Berkeley by Dave Yost. It was rewritten to support ANSI C by Tony Finch. The original version of unifdef carried the 4-clause BSD copyright licence. None of its code remains in this version (though some of the names remain) so it now carries a more liberal licence. The latest version is available from <http://dotat.at/prog/unifdef>

Redistributable under terms of the GNU General Public License.

For the avoidance of doubt the "preferred form" of this code is one which is in an open non patent encumbered format. Where cryptographic key signing forms part of the process of creating an executable the information including keys needed to generate an equivalently functional executable are deemed to be part of the source code. Check qlogicfas408.c for more credits and info.

♦♦♦

From:
wr-4.0-std-kernel/kernel-4.0/drivers/serial/mpsc.c
Author: Mark A. Greer <mgreer@mvista.com>

Based on an old MPSC driver that was in the linuxppc tree. It appears to have been created by Chris Zankel (formerly of MontaVista) but there is no proper Copyright so I'm not sure. Apparently, parts were also taken from PPCBoot (now U-Boot). Also based on drivers/serial/8250.c by Russell King.

2004 (c) MontaVista, Software, Inc.

This file is licensed under the terms of the GNU General Public License version 2. This program is licensed "as is" without any warranty of any kind, whether express or implied.

From:
wr-4.0-std-kernel/kernel-4.0/drivers/staging/wavelan/wavelan.p.h
The original copyrights and literature mention others' names and credits. I don't know what their part in this development was. By the way, for the copyright and legal stuff: almost everybody wrote code under the GNU or BSD license (or similar), and want their original copyright to remain somewhere in the code (for myself, I go with the GPL). Nobody wants to take responsibility for anything, except the fame.

This software was developed as a component of the Linux operating system. It is based on other device drivers and information either written or supplied by: Ajay Bakre <bakre@paul.rutgers.edu>, Donald Becker <becker@cesdis.gsfc.nasa.gov>, Loeke Brederveld <Loeke.Brederveld@Utrecht.NCR.com>, Brent Elphick <belpick@uwaterloo.ca>, Anders Klemets <klemets@it.kth.se>, Vladimir V. Kolpakov <w@stier.koenig.ru>, Marc Meertens <Marc.Meertens@Utrecht.NCR.com>, Pauline Middelink <middelink@polyware.iaf.nl>, Robert Morris <rtm@das.harvard.edu>, Jean Tourrilhes <jt@hpl.hp.com>, Girish Welling <welling@paul.rutgers.edu>, Clark Woodworth <clark@hiway1.exit109.com> Yongguang Zhang <ygz@isl.hrl.hac.com>
