NewsML is a trademark of IPTC

DO NOT REMOVE THESE LICENCE CONDITIONS - LICENCE OF THE
IPTC NewsML TRADEMARK TO NON-MEMBERS OF THE IPTC
Use of the IPTC trademark shall be licensed by the IPTC ("the Licensor")
to a Non-Member ("the Licensee") in consideration of the following
obligations undertaken by the Licensee under the terms of this contract.

1. The Licensee recognises the Licensor as the sole owner of the
intellectual property protected by the trademark.

2. The Licensee recognises that the Licensor has the right to grant
licenses of the intellectual property protected by the trademark and has
agreed to grant such a licence to the Licensee in the terms set out in this
contract.

3. The Licensee shall not during the subsistence of this contract or at any
future time register to use in its own name as proprietor any of the
intellectual property protected by the trademark.

4. The Licensee shall not claim any right title or interest in the intellectual
property or any part of it save as is granted by this contract.

5. The Licensee shall immediately call to the attention of the Licensor the
use of any part of the intellectual property by any third party or any
activity of any third party which might in the opinion of the Licensee
amount to infringement of the rights protected by the trademark.

6. The Licensee shall not assign the benefit of this contract or grant any
sub-licence without the prior written consent of the Licensor.

7. Use of the IPTC trademark is licensed only to those Licensees who
comply with the requirements of the official published description of
NewsML.

8. The Licensee promises to respect the integrity and quality standard of
the trademark and shall refrain from all acts and omissions which
threaten the integrity of the trademark as a mark of quality.

9. The Licensee shall communicate immediately to the IPTC any
instances of actual or suspected misuse or non-compliance with the
official published description of NewsML which come to the attention of
the Licensee.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

10. The Licensee shall, at the request of the IPTC Management Committee acting unanimously, accede to any reasonable request of the IPTC to inspect the address of the Licensee to verify compliance and each Licensee shall afford to the IPTC such assistance as is requested by the IPTC in response to the latter's reasonable enquiries in instances of suspected non-compliance with the official published description of NewsML requirements. The Licensee shall from time to time provide the IPTC with the full address of its place of business and that place will be deemed the Licensee's address. The IPTC reserves the right to terminate the use of the trademark by the Licensee at any time without notice or without the need to give reasons to the Licensee for such termination.

This contract shall be governed and construed in accordance with the laws of England and Wales whose courts shall be courts of competent jurisdiction.

libXrandr 1.3.1

Software:	libXrandr
Version:	1.3.1
File or Package:	libXrandr-1.3.1.tar.bz2
OSI Licenses:	GPLv2+ w/exception, MIT/X11, Academic
Other Licenses:	
URL:	http://xorg.freedesktop.org/releases/individual/lib/libXrandr-1.3.1.tar.bz2
Group:	User Space Libraries
Description:	X11 Resize and Rotate extension library; X.Org X11 libXrandr runtime library; libXrandr provides an X Window System client interface to the RandR extension to the X protocol. The RandR extension allows for run-time configuration of display attributes such as resolution, rotation, and reflection. Xrandr is a simple library designed to interface the X Resize and Rotate Extension. This allows clients to change the size and rotation of the root window of a screen, along with the ability to reflect the screen about either axis.

libXrender 0.9.6

Software: libXrender
Version: 0.9.6
File or Package: libXrender-0.9.6.tar.bz2
OSI Licenses: GPLv2+ w/exception, MIT/X11, Academic
Other Licenses:
URL: <http://xorg.freedesktop.org/releases/individual/lib/libXrender-0.9.6.tar.bz2>
Group: User Space Libraries
Description: X11 Rendering Extension client library; X.Org X11 libXrender runtime library; The X Rendering Extension (Render) introduces digital image composition as the foundation of a new rendering model within the X Window System. Rendering geometric figures is accomplished by client-side tessellation into either triangles or trapezoids. Text is drawn by loading glyphs into the server and rendering sets of them. The Xrender library exposes this extension to X clients.
Common Usage: Library
Package Size: 1.61 MB
Folders / Files: 7 / 37
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

NOTICES:

libXslt 1.1.24-2

Software: libxslt
Version: 1.1.24-2
File or Package: libxslt-1.1.24-2.fc9.src.rpm
OSI Licenses: GPLv2+, GPLv2+ w/exception, FDLv1.1, MIT/X11
Other Licenses: Custom
URL: ftp://195.220.108.108/linux/fedora/updates/9/SRPMs.newkey/libxslt-1.1.24-2.fc9.src.rpm
Group: Development/Libraries
Description: Library providing the Gnome XSLT engine. Libxslt is the XSLT C library developed for the GNOME project. It provides an implementation of XSLT 1.0, plus most of the EXSLT set of processor-portable extensions functions and some of Saxon's evaluate and expressions extensions. Libxslt is based on libxml2, which it uses for XML parsing, tree manipulation and XPath support.
Common Usage: Library
Package Size: 30.8 MB
Folders / Files: 78 / 2,024
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

libXv 1.0.6

Software:	libXv
Version:	1.0.6
File or Package:	libXv-1.0.6.tar.bz2
OSI Licenses:	GPLv2+ w/exception, MIT/X11, Academic
Other Licenses:	
URL:	http://xorg.freedesktop.org/releases/individual/lib/libXv-1.0.6.tar.bz2
Group:	User Space Libraries
Description:	X11 Video extension library; X.Org X11 libXv runtime library; libXv provides an X Window System client interface to the XVideo extension to the X protocol. The XVideo extension allows for accelerated drawing of videos. Hardware adaptors are exposed to clients, which may draw in a number of colourspace, including YUV.

Description: User-space access to Linux Kernel SCTP. The Linux Kernel Stream Control Transmission Protocol (lksctp) project is an implementation of the Stream Control Transmission Protocol (SCTP) in the Linux kernel. The primary goal of this project is to provide users with the state of art implementation of SCTP protocol and various extensions. For the list of supported specifications see Current Features. In addition to the ongoing development effort, this project also aims to disseminate information about SCTP and to encourage deployment of SCTP in real user environments.

The Linux Kernel SCTP Reference Implementation is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2, or (at your option) any later version. For more information on licensing terms, please see the file COPYING in this directory.

SCTP (Stream Control Transmission Protocol) is a message oriented, reliable transport protocol, with congestion control, support for transparent multi-homing, and multiple ordered streams of messages. RFC2960 defines the core protocol. The IETF SIGTRAN Working Group developed SCTP. The primary architects are Randy Stewart and Qiaobing Xie.

The Kernel Reference is first and foremost an exposition of RFC2960 and related documents. You will find that the comments and variable names tie closely back to the RFC and Internet Drafts. This work was started by a small team of developers at Motorola. Throughout this document, "we" refers to that team. We intend for the meaning of "we" to expand to © 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

include the whole development community, all 27 million programmers on the planet. The Kernel Reference has loose origins in the SCTP User Space Reference by Randy Stewart and Qiaobing Xie.

document version 2.60

From:

lmbench-3.0-a9/lmbench-3.0-a9/copying-2

The set of programs and documentation known as "lmbench" are distributed under the Free Software Foundation's General Public License with the following additional restrictions (which override any conflicting restrictions in the GPL):

1. You may not distribute results in any public forum, in any publication, or in any other way if you have modified the benchmarks.
2. You may not distribute the results for a fee of any kind. This includes web sites which generate revenue from advertising.

If you have modifications or enhancements that you wish included in future versions, please mail those to me, Larry McVoy, at lm@bitmover.com.

Rationale for the publication restrictions:

In summary:

a) LMBench is designed to measure enough of an OS that if you do well in all categories, you've covered latency and bandwidth in networking, disks, file systems, VM systems, and memory systems.

b) Multiple times in the past people have wanted to report partial results. Without exception, they were doing so to show a skewed view of whatever it was they were measuring (for example, one OS fit small processes into segments and used the segment register to switch them, getting good results, but did not want to report large process context switches because those didn't look as good).

c) We insist that if you formally report LMBench results, you have to report all of them and make the raw results file easily available. Reporting all of them means in that same publication, a pointer does not count. Formally, in this context, means in a paper, on a web site, etc., but does not mean the exchange of results between OS developers who are tuning a particular subsystem.

We have a lot of history with benchmarking and feel strongly that there is little to be gained and a lot to be lost if we allowed the results to be published in isolation, without the complete story being told. There has been a lot of discussion about this, with people not liking this restriction, more or less on the freedom principle as far as I can tell. We're not swayed by that, our position is that we are doing the right thing for the OS community and will stick to our guns on this one.

It would be a different matter if there were 3 other competing benchmarking systems out there that did what LMBench does and didn't have the same reporting rules. There aren't and as long as that is the case, I see no reason to change my mind and lots of reasons not to do so. I'm sorry if I'm a pain in the ass on this topic, but I'm doing the right thing for you and the sooner people realize that the sooner we can get on to real work.

Operating system design is a largely an art of balancing tradeoffs. In many cases improving one part of the system has negative effects on other parts of the system. The art is choosing which parts to optimize and which to not optimize. Just like in computer architecture, you can optimize the common instructions (RISC) or the uncommon instructions (CISC), but in either case there is usually a cost to pay (in RISC uncommon instructions are more expensive than common instructions, and in CISC common instructions are more expensive than required). The art lies in

knowing which operations are important and optimizing those while minimizing the impact on the rest of the system.

Since lmbench gives a good overview of many important system features, users may see the performance of the system as a whole, and can see where tradeoffs may have been made. This is the driving force behind the publication restriction: any idiot can optimize certain subsystems while completely destroying overall system performance. If said idiot publishes only the numbers relating to the optimized subsystem, then the costs of the optimization are hidden and readers will mistakenly believe that the optimization is a good idea. By including the publication restriction readers would be able to detect that the optimization improved the subsystem performance while damaging the rest of the system performance and would be able to make an informed decision as to the merits of the optimization.

Note that these restrictions only apply to publications. We intend and encourage lmbench's use during design, development, and tweaking of systems and applications. If you are tuning the linux or BSD TCP stack, then by all means, use the networking benchmarks to evaluate the performance effects of various modifications; Swap results with other developers; use the networking numbers in isolation. The restrictions only kick in when you go to publish the results. If you sped up the TCP stack by a factor of 2 and want to publish a paper with the various tweaks or algorithms used to accomplish this goal, then you can publish the networking numbers to show the improvement. However, the paper must also include the rest of the standard lmbench numbers to show how your tweaks may (or may not) have impacted the rest of the system. The full set of numbers may be included in an appendix, but they must be included in the paper.

This helps protect the community from adopting flawed technologies based on incomplete data. It also helps protect the community from misleading marketing which tries to sell systems based on partial (skewed) lmbench performance results. We have seen many cases in the past where partial or misleading benchmark results have caused great harm to the community, and we want to ensure that our benchmark is not used to perpetrate further harm and support false or misleading claims.

logrotate 3.7.8-4

Software: logrotate
Version: 3.7.8-4
File or Package: logrotate-3.7.8-4.fc12.src.rpm
OSI Licenses: GPLv2
Other Licenses:
URL:
Group: System Environment/Base
Description: A bash script which can rotate log files and multilog log directories and archive them in a central location. The logrotate utility is designed to simplify the administration of log files on a system which generates a lot of log files. Logrotate allows for the automatic rotation compression, removal and mailing of log files. Logrotate can be set to handle a log file daily, weekly, monthly or when the log file gets to a certain size. Normally, logrotate runs as a daily cron job. Install the logrotate package if you need a utility to deal with the log files on your system.
Common Usage: Utility

By using this file, you agree to the terms and conditions set forth in the LICENSE file which can be found at the top level of the sendmail distribution. The LICENSE file may be found in the following comment section.

SENDMAIL LICENSE

The following license terms and conditions apply, unless a different license is obtained from Sendmail, Inc., 1401 Park Avenue, Emeryville, CA 94608, or by electronic mail at license@sendmail.com.

License Terms:

Use, Modification and Redistribution (including distribution of any modified or derived work) in source and binary forms is permitted only if each of the following conditions is met:

1. Redistributions qualify as "freeware" or "Open Source Software" under one of the following terms:

(a) Redistributions are made at no charge beyond the reasonable cost of materials and delivery.

(b) Redistributions are accompanied by a copy of the Source Code or by an irrevocable offer to provide a copy of the Source Code for up to three years at the cost of materials and delivery. Such redistributions must allow further use, modification, and redistribution of the Source Code under substantially the same terms as this license. For the purposes of redistribution "Source Code" means the complete source code of sendmail including all modifications.

Other forms of redistribution are allowed only under a separate royalty-free agreement permitting such redistribution subject to standard commercial terms and conditions. A copy of such agreement may be obtained from Sendmail, Inc. at the above address.

2. Redistributions of source code must retain the copyright notices as they appear in each source code file, these license terms, and the disclaimer/limitation of liability set forth as paragraph 6 below.

3. Redistributions in binary form must reproduce the Copyright Notice, these license terms, and the disclaimer/limitation of liability set forth as paragraph 6 below, in the documentation and/or other materials provided with the distribution. For the purposes of binary distribution the "Copyright Notice" refers to the following language: **"Copyright (c) 1998 Sendmail, Inc. All rights reserved."**

4. Neither the name of Sendmail, Inc. nor the University of California nor the names of their contributors may be used to endorse or promote products derived from this software without specific prior written permission. The name "sendmail" is a trademark of Sendmail, Inc.

5. All redistributions must comply with the conditions imposed by the University of California on certain embedded code, whose copyright notice and conditions for redistribution are as follows:

(a) Copyright (c) 1988, 1993 The Regents of the University of California. All rights reserved.

(b) Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

(i) Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

(ii) Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

(iii) All advertising materials mentioning features or use of this software must display the following acknowledgement: "This product includes software developed by the University of California, Berkeley and its contributors."

(iv) Neither the name of the University nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

6. Disclaimer/Limitation of Liability: THIS SOFTWARE IS PROVIDED BY SENDMAIL, INC. AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

IN NO EVENT SHALL SENDMAIL, INC., THE REGENTS OF THE UNIVERSITY OF CALIFORNIA OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

From:

Isof_4.84/Isof_4.84/Isof_4.84_src/Isof_4.84_src/00FAQ

1.9 Is there an Isof license?

No. The only restriction on the use or redistribution of Isof is contained in this copyright statement, found in every Isof source file. (The copyright year in or format of the notice may vary slightly.)

Copyright 2002 Purdue Research Foundation, West Lafayette, Indiana 47907. All rights reserved.

Written by Victor A. Abell

This software is not subject to any license of the American Telephone and Telegraph Company or the Regents of the University of California. Permission is granted to anyone to use this software for any purpose on any computer system, and to alter it and redistribute it freely, subject to the following restrictions:

1. Neither the authors nor Purdue University are responsible for any consequences of the use of this software.
2. The origin of this software must not be misrepresented, either by explicit claim or by omission. Credit to the authors and Purdue University must appear in documentation and sources.
3. Altered versions must be plainly marked as such, and must not be misrepresented as being the original software.
4. This notice may not be removed or altered.

1.11 Are any files in the Isof distribution copyrighted?

Yes. Most files carry the copyright of the Purdue Research Foundation and may be redistributed under the terms that accompany the copyright notice. Those terms may also be found in the answer to the question, "Is there an Isof license?"). A few files carry other copyright notices. Some are BSD notices and they explain the terms under which they are included in the Isof distribution. Those that carry vendor copyright notices have been reproduced in their original or modified forms with permission from the copyright owners. That permission is indicated in the README files that accompany the files.

Description:	The Linux Test Project is a joint project with SGI, IBM, OSDL, and Bull with a goal to deliver test suites to the open source community that validate the reliability, robustness, and stability of Linux. The Linux Test Project is a collection of tools for testing the Linux kernel and related features. Our goal is to improve the Linux kernel by bringing test automation to the kernel testing effort. Interested open source contributors are encouraged to join the project.
Common Usage:	Test
Package Size:	84.1 MB
Folders / Files:	1,301 / 10,474
Source Path:	wrlinux-4.0/layers/wrll-userspace/test/packages

This material may be distributed only subject to the terms and conditions set forth in the Open Publication License, v1.0 or later (the latest version is currently available at <http://www.opencontent.org/openpub/>). Distribution of substantively modified version of this document is prohibited without the explicit permission of the copyright holder. Other company, product, or service names may be trademarks or service marks of others.

document version 2.60

From:
<http://www.opencontent.org/openpub>
Open Publication License v1.0, 8 June 1999

I. REQUIREMENTS ON BOTH UNMODIFIED AND MODIFIED VERSIONS

The Open Publication works may be reproduced and distributed in whole or in part, in any medium physical or electronic, provided that the terms of this license are adhered to, and that this license or an incorporation of it by reference (with any options elected by the author(s) and/or publisher) is displayed in the reproduction.

Proper form for an incorporation by reference is as follows:

Copyright (c) <year> by <author's name or designee>. This material may be distributed only subject to the terms and conditions set forth in the Open Publication License, vX.Y or later (the latest version is presently available at <http://www.opencontent.org/openpub/>).

The reference must be immediately followed with any options elected by the author(s) and/or publisher of the document (see section VI).

Commercial redistribution of Open Publication-licensed material is permitted.

Any publication in standard (paper) book form shall require the citation of the original publisher and author. The publisher and author's names shall appear on all outer surfaces of the book. On all outer surfaces of the book the original publisher's name shall be as large as the title of the work and cited as possessive with respect to the title.

II. COPYRIGHT

The copyright to each Open Publication is owned by its author(s) or designee.

III. SCOPE OF LICENSE

The following license terms apply to all Open Publication works, unless otherwise explicitly stated in the document.

Mere aggregation of Open Publication works or a portion of an Open Publication work with other works or programs on the same media shall not cause this license to apply to those other works. The aggregate work shall contain a notice specifying the inclusion of the Open Publication material and appropriate copyright notice.

SEVERABILITY. If any part of this license is found to be unenforceable in any jurisdiction, the remaining portions of the license remain in force.

NO WARRANTY. Open Publication works are licensed and provided "as is" without warranty of any kind, express or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose or a warranty of non-infringement.

IV. REQUIREMENTS ON MODIFIED WORKS

All modified versions of documents covered by this license, including translations, anthologies, compilations and partial documents, must meet the following requirements:

1. The modified version must be labeled as such.
2. The person making the modifications must be identified and the modifications dated.

3. Acknowledgement of the original author and publisher if applicable must be retained according to normal academic citation practices.

4. The location of the original unmodified document must be identified.

5. The original author's (or authors') name(s) may not be used to assert or imply endorsement of the resulting document without the original author's (or authors') permission.

V. GOOD-PRACTICE RECOMMENDATIONS

In addition to the requirements of this license, it is requested from and strongly recommended of redistributors that:

1. If you are distributing Open Publication works on hardcopy or CD-ROM, you provide email notification to the authors of your intent to redistribute at least thirty days before your manuscript or media freeze, to give the authors time to provide updated documents. This notification should describe modifications, if any, made to the document.

2. All substantive modifications (including deletions) be either clearly marked up in the document or else described in an attachment to the document.

3. Finally, while it is not mandatory under this license, it is considered good form to offer a free copy of any hardcopy and CD-ROM expression of an Open Publication-licensed work to its author(s).

VI. LICENSE OPTIONS

The author(s) and/or publisher of an Open Publication-licensed document may elect certain options by appending language to the reference to or copy of the license. These options are considered part of the license instance and must be included with the license (or its incorporation by reference) in derived works.

A. To prohibit distribution of substantively modified versions without the explicit permission of the author(s). "Substantive modification" is defined as a change to the semantic content of the document, and excludes mere changes in format or typographical corrections.

To accomplish this, add the phrase 'Distribution of substantively modified versions of this document is prohibited without the explicit permission of the copyright holder.' to the license reference or copy.

B. To prohibit any publication of this work or derivative works in whole or in part in standard (paper) book form for commercial purposes unless prior permission is obtained from the copyright holder.

To accomplish this, add the phrase 'Distribution of the work or derivative of the work in any standard (paper) book form is prohibited unless prior permission is obtained from the copyright holder.' to the license reference or copy.

ltrace 0.5.1

Software:	ltrace
Version:	0.5.1
File or Package:	ltrace_0.5.1.orig.tar.gz
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, MIT/X11
Other Licenses:	Custom
URL:	ftp://sunsite.cnlab-switch.ch/mirror/debian/pool/ main/l/ltrace/ltrace_0.5.1.orig.tar.gz
Group:	Development/Debuggers
Description:	Tracks runtime library calls from dynamically linked executables. ltrace is a debugging program which runs a specified command until it exits. While the command is executing, ltrace intercepts and records the dynamic library calls which are called by the executed process and the signals received by that process. It can also intercept and print the system calls executed by the program. The program to be traced need not be recompiled for this, so you can use it on binaries for which you don't have the source handy. You should install ltrace if you need a sysadmin tool for tracking the execution of processes.
Common Usage:	utility
Package Size:	2.0 MB
Folders / Files:	23 / 204
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

Licenses - LTTng, UST and LTTV are developed by an open community. LTTng is released under a dual Gnu LGPLv2.1/GPLv2 license, except for very few kernel-specific files which are derived work from the Linux kernel. LTTV is available under the Gnu GPLv2. The low-level LTTV trace reading library is released under Gnu LGPLv2.1. The Eclipse LTTng trace analysis tool is released under the EPL and uses the LTTV trace reading library (LGPLv2.1). The UST (Userspace Tracing) and the Userspace RCU libraries are released under the LGPLv2.1 license, which allows linking with non-GPL (BSD, proprietary...) applications. The associated headers are released under MIT-style/BSD-style licenses. Please refer to each particular file licensing for details.

lua 5.1.4-7.5.moblin2

Software:	lua
Version:	5.1.4-7.5.moblin2
File or Package:	lua-5.1.4-7.5.moblin2.src.rpm
OSI Licenses:	GPLv2+ w/exception, MIT/X11
Other Licenses:	
URL:	http://ftp.moblin.org/moblin/releases/2.1/source/lua-5.1.4-7.5.moblin2.src.rpm
Group:	User Space Apps
Description:	Lua is a powerful, light-weight programming language designed for extending applications. Lua is also frequently used as a general-purpose, stand-alone language. Lua is free software. Lua is a powerful, fast, lightweight, embeddable scripting language. Lua combines simple procedural syntax with powerful data description constructs based on associative arrays and extensible semantics. Lua is dynamically typed, runs by interpreting bytecode for a register-based virtual machine, and has automatic memory management with incremental garbage collection, making it ideal for configuration, scripting, and rapid prototyping.
Common Usage:	Interpreter, Library
Package Size:	3.2 MB
Folders / Files:	7 / 108
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

From:

<http://www.lua.org/license.html>

License - Lua is free software: it can be used for any purpose, including commercial purposes, at absolutely no cost. No paperwork, no royalties, no GNU-like "copyleft" restrictions, either. Just download it and use it. Lua is certified Open Source software. Its licenses are compatible with GPL. Lua is not in the public domain and PUC-Rio keeps its copyright. The legal details are below. License for Lua 5.0 and later versions:

Since Lua 5.0, Lua is licensed under the terms of the MIT license reproduced below.

License for Lua 4.0 and earlier versions:

Until Lua 4.0, Lua used its own license, which was very close to the zlib license and others, but not quite the same. The spirit of both licenses is that you are free to use Lua for any purpose at no cost without having to ask us. The only requirement is that if you do use Lua, then you should give us credit by including the appropriate copyright notice somewhere in your product or its documentation. A nice, but optional, way to give us further credit is to include a Lua logo and a link to our site in a web page for your product. The Lua language is entirely designed, implemented, and maintained by a team at PUC-Rio in Brazil. The implementation is not derived from licensed software.

License for Lua 5.0 and later versions

lxc 0.7.4.2

Software:	lxc
Version:	0.7.4.2
File or Package:	lxc-0.7.4.2.tar.gz
OSI Licenses:	GPLv2, GPLv2+ w/exception (autoconf), MIT/X11, LGPLv2.1, LGPLv2.1+, Attribution, Permissive
Other Licenses:	Custom
URL:	
Group:	Kernel / Applications/System
Description:	The container technology is actively being pushed into the mainstream linux kernel. It provides the resource management through the control groups aka process containers and resource isolation through the namespaces. The linux containers, lxc, aims to use these new functionalities to provide an userspace container object which provides full resource isolation and resource control for an applications or a system. The first objective of this project is to make the life easier for the kernel developers involved in the containers project and especially to continue working on the Checkpoint/Restart new features. The lxc is small enough to easily manage a container with simple command lines and complete enough to be used for other purposes. It is very light, flexible, and provides a set of tools around the container like the monitoring with asynchronous

document version 2.60

events notification, or the freeze of the container. This package is useful to create Virtual Private Server, or to run isolated applications like bash or sshd. LXC is the userspace control package for Linux Containers, a lightweight virtual system mechanism sometimes described as "chroot on steroids". LXC builds up from chroot to implement complete virtual systems, adding resource management and isolation mechanisms to Linux's existing process management infrastructure.

Common Usage: Tool
Package Size: 1.77 MB

Name: lxc
Version: 0.7.4.2
Release: 1
URL: <http://lxc.sourceforge.net>
Source: <http://dl.sourceforge.net/sourceforge/%{name}/%{name}-%{version}.tar.gz>
Summary: %{name} : Linux Container
Group: Applications/System
License: LGPL
BuildRoot: %{_tmppath}/%{name}-%{version}-build
Requires: libcap
BuildRequires: libcap libcap-devel docbook-utils

Description - The package "%{name}" provides the command lines to create and manage containers. It contains a full featured container with the isolation / virtualization of the pids, the ipc, the utsname, the mount points, /proc, /sys, the network and it takes into account the control groups. It is very light, flexible, and provides a set of tools around the container like the monitoring with asynchronous events notification, or the freeze of the container. This package is useful to create Virtual Private Server, or to run isolated applications like bash or sshd.

Software:	Izma
Version:	4.32.7
File or Package:	Izma-4.32.7.tar.bz2
OSI Licenses:	GPLv3, GPLv3+, GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1, LGPLv2.1+, MIT/X11, Common Public (CPL), Public Domain
Other Licenses:	Custom
URL:	http://tukaani.org/izma/izma-4.32.7.tar.bz2
Group:	User Space Apps
Description:	LZMA Utils are legacy data compression software with high compression ratio. LZMA Utils are no longer developed, although critical bugs may be fixed as long as fixing them doesn't require huge changes to the code. LZMA Utils is an attempt to provide LZMA compression to POSIX-like systems. The idea is to have a gzip-like command line tool and a zlib-like library, which would make it easy to adapt the new compression technology to existing applications.
Common Usage:	Standalone

Izo 2.02-4

Software:	lzo
Version:	2.02-4
File or Package:	lzo-2.02-4.fc9.src.rpm
OSI Licenses:	GPLv2, GPLv2+ w/exception, MIT/X11
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/9/Fedora/source/SRPMS/lzo-2.02-4.fc9.src.rpm
Group:	System Environment/Libraries
Description:	LZO is a portable lossless data compression library written in ANSI C. It offers pretty fast compression and very fast decompression. Decompression requires no memory. In addition there are slower compression levels achieving a quite competitive compression ratio while still decompressing at this very high speed.
Common Usage:	Library
Package Size:	5.3 MB
Folders / Files:	36 / 384
Source Path:	wrlinux-4.0/layers/wrll-kernel/packages

there are slower compression levels achieving a quite competitive compression ratio while still decompressing at this very high speed. Lempel-Ziv-Oberhumer (LZO) is a lossless data compression algorithm that is focused on decompression speed. A free software tool which implements it is lzip. The original library was written in ANSI C, and it has been made available under the GNU General Public License. Versions of LZO are available for the Perl, Python and Java languages.

m4 1.4.8-2

Software:	m4
Version:	1.4.8-2
File or Package:	m4-1.4.8-2.fc7.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, FDLv1.2, MIT/X11
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/7/Fedora/source/SRPMS/m4-1.4.8-2.fc7.src.rpm
Group:	Applications/Text
Description:	A GNU implementation of the traditional UNIX macro processor. M4 is useful for writing text files which can be logically parsed, and is used by many programs as part of their build process. M4 has built-in functions for including files, running shell commands, doing arithmetic, etc. The autoconf program needs m4 for generating configure scripts, but not for running configure scripts. Install m4 if you need a macro processor.
Common Usage:	Utility
Package Size:	5.1 MB
Folders / Files:	9 / 430
Source Path:	wrlinux-4.0/layers/ldat-tools/packages

make 3.81-18

Software: make
Version: 3.81-18
File or Package: make-3.81-18.fc12.src.rpm
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, MIT/X11, FDLv1.1+, FDLv1.2, FDLv1.2+, Public Domain, Academic
Other Licenses: Custom
URL: <http://www.gnu.org/software/make/>
Group: Development/Tools
Description: A GNU tool which simplifies the build process for users. A GNU tool for controlling the generation of executables and other non-source files of a program from the program's source files. Make allows users to build and install packages without any significant knowledge about the details of the build process. The details about how the program should be built are provided for make in the program's makefile. make is a utility for automatically building executable programs and libraries from source code. Files called makefiles specify how to derive the target program from each of its dependencies. Make typically decides where to start through topological sorting. Though Integrated Development Environments and language-specific compiler features can also be

document version 2.60

used to manage the build process in modern systems, make remains widely used, especially in Unix-based platforms.

make-3.81-18.fc12.src/make-3.81/make-3.81/ansi2knr.c
Copyright (C) 1989, 2000 Aladdin Enterprises. All rights reserved.

document version 2.60

ansi2knr is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY. No author or distributor accepts responsibility to anyone for the consequences of using it or for whether it serves any particular purpose or works at all, unless he says so in writing. Refer to the GNU General Public License (the "GPL") for full details.

Everyone is granted permission to copy, modify and redistribute ansi2knr, but only under the conditions described in the GPL. A copy of this license is supposed to have been given to you along with ansi2knr so you can know your rights and responsibilities. It should be in a file named COPYLEFT, or, if there is no file named COPYLEFT, a file named COPYING. Among other things, the copyright notice and this notice must be preserved on all copies.

We explicitly state here what we believe is already implied by the GPL: if the ansi2knr program is distributed as a separate set of sources and a separate executable file which are aggregated on a storage medium together with another program, this in itself does not bring the other program under the GPL, nor does the mere fact that such a program or the procedures for constructing it invoke the ansi2knr executable bring any other part of the program under the GPL.

This document is in the public domain. The author requests, however, that semantically altered versions are not distributed without permission of the author, assuming the author can be contacted without an unreasonable effort.

In particular, please don't sent patches for this list to Linus, at least not without contacting me first. I do not have any information about these devices beyond what appears on this list. Any such information requests will be deleted without reply.

makedumpfile 1.3.5

Software:	makedumpfile
Version:	1.3.5
File or Package:	makedumpfile-1.3.5.tar.gz
OSI Licenses:	GPLv2, GPLv2+
Other Licenses:	
URL:	
Group:	User Space Apps / Applications/Text
Description:	Custom kdump dumpfile. By using the makedumpfile command, it is possible to shorten the dumpfile of kdump. When obtaining the debugging information from a kernel that crashed, it is possible that only some sections are of importance. makedumpfile allows removing the unnecessary sections and thus shortens the core dump file from potentially several gigabytes to mere megabytes.
Common Usage:	Tool, Others

From:
<http://www.opensource.org/licenses/osl-1.0.txt>
The Open Software License v. 1.0

This Open Software License (the "License") applies to any original work of authorship (the "Original Work") whose owner (the "Licensor") has placed the following notice immediately following the copyright notice for the Original Work: "Licensed under the Open Software License version 1.0" License Terms

1) Grant of Copyright License.

document version 2.60

Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, non-sublicenseable license to do the following:

- a) to reproduce the Original Work in copies;
- b) to prepare derivative works ("Derivative Works") based upon the Original Work;
- c) to distribute copies of the Original Work and Derivative Works to the public, with the proviso that copies of Original Work or Derivative Works that You distribute shall be licensed under the Open Software License;
- d) to perform the Original Work publicly; and
- e) to display the Original Work publicly.

2) Grant of Patent License.

Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, non-sublicenseable license, under patent claims owned or controlled by the Licensor that are embodied in the Original Work as furnished by the Licensor ("Licensed Claims") to make, use, sell and offer for sale the Original Work. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, non-sublicenseable license under the Licensed Claims to make, use, sell and offer for sale Derivative Works.

3) Grant of Source Code License.

The term "Source Code" means the preferred form of the Original Work for making modifications to it and all available documentation describing how to access and modify the Original Work. Licensor hereby agrees to provide a machine-readable copy of the Source Code of the Original Work along with each copy of the Original Work that Licensor distributes. Licensor reserves the right to satisfy this obligation by placing a machine-readable copy of the Source Code in an information repository reasonably calculated to permit inexpensive and convenient access by You for as long as Licensor continues to distribute the Original Work, and by publishing the address of that information repository in a notice immediately following the copyright notice that applies to the Original Work.

4) Exclusions From License Grant.

Nothing in this License shall be deemed to grant any rights to trademarks, copyrights, patents, trade secrets or any other intellectual property of Licensor except as expressly stated herein. No patent license is granted to make, use, sell or offer to sell embodiments of any patent claims other than the Licensed Claims defined in Section 2. No right is granted to the trademarks of Licensor even if such marks are included in the Original Work. Nothing in this License shall be interpreted to prohibit Licensor from licensing under different terms from this License any Original Work that Licensor otherwise would have a right to license.

5) External Deployment.

The term "External Deployment" means the use or distribution of the Original Work or Derivative Works in any way such that the Original Work or Derivative Works may be accessed or used by anyone other than You, whether the Original Work or Derivative Works are distributed to those persons, made available as an application intended for use over a computer network, or used to provide services or otherwise deliver content to anyone other than You. As an express condition for the grants of license hereunder, You agree that any External Deployment by You shall be deemed a distribution and shall be licensed to all under the terms of this License, as prescribed in section 1(c) herein.

6) Warranty and Disclaimer of Warranty.

LICENSOR WARRANTS THAT THE COPYRIGHT IN AND TO THE ORIGINAL WORK IS OWNED BY THE LICENSOR OR THAT THE ORIGINAL WORK IS DISTRIBUTED BY LICENSOR UNDER A VALID CURRENT LICENSE FROM THE COPYRIGHT OWNER. EXCEPT AS EXPRESSLY STATED IN THE IMMEDIATELY PRECEDING SENTENCE, THE ORIGINAL WORK IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY, EITHER EXPRESS OR IMPLIED, INCLUDING, WITHOUT LIMITATION, THE WARRANTY OF NON-INFRINGEMENT AND WARRANTIES THAT THE ORIGINAL WORK IS MERCHANTABLE OR FIT FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY OF THE ORIGINAL WORK IS WITH YOU. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO LICENSE TO ORIGINAL WORK IS GRANTED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

7) Limitation of Liability.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL THE LICENSOR BE LIABLE TO ANY PERSON FOR ANY DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER ARISING AS A RESULT OF THIS LICENSE OR THE USE OF THE ORIGINAL WORK INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PERSON SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

8) Acceptance and Termination.

Nothing else but this License (or another written agreement between Licensor and You) grants You permission to create Derivative Works based upon the Original Work, and any attempt to do so except under the terms of this License (or another written agreement between Licensor and You) is expressly prohibited by U.S. copyright law, the equivalent laws of other countries, and by international treaty. Therefore, by exercising any of the rights granted to You in Sections 1 and 2 herein, You indicate Your acceptance of this License and all of its terms and conditions. This license shall terminate immediately and you may no longer exercise any of the rights granted to You by this License upon Your failure to honor the proviso in Section 1(c) herein.

9) Mutual Termination for Patent Action.

This License shall terminate automatically and You may no longer exercise any of the rights granted to You by this License if You file a lawsuit in any court alleging that any OSI Certified open source software that is licensed under any license containing this "Mutual Termination for Patent Action" clause infringes any patent claims that are essential to use that software.

10) Jurisdiction, Venue and Governing Law.

You agree that any lawsuit arising under or relating to this License shall be maintained in the courts of the jurisdiction wherein the Licensor resides or in which Licensor conducts its primary business, and under the laws of that jurisdiction excluding its conflict-of-law provisions. The application of the United Nations Convention on Contracts for the

International Sale of Goods is expressly excluded. Any use of the Original Work outside the scope of this License or after its termination shall be subject to the requirements and penalties of the U.S. Copyright Act, 17 U.S.C. § 101 et seq., the equivalent laws of other countries, and international treaty. This section shall survive the termination of this License.

11) Attorneys Fees.

In any action to enforce the terms of this License or seeking damages relating thereto, the prevailing party shall be entitled to recover its costs and expenses, including, without limitation, reasonable attorneys' fees and costs incurred in connection with such action, including any appeal of such action. This section shall survive the termination of this License.

12) Miscellaneous.

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

13) Definition of "You" in This License.

"You" throughout this License, whether in upper or lower case, means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with you. For purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

This license is **Copyright (C) 2002 Lawrence E. Rosen. All rights reserved.**

Permission is hereby granted to copy and distribute this license without modification. This license may not be modified without the express written permission of its copyright owner.

man 1.6e-3

Software:	man
Version:	1.6e-3
File or Package:	man-1.6e-3.fc7.src.rpm
OSI Licenses:	GPLv1+, GPLv2, GPLv2+, MIT/X11, Academic
Other Licenses:	Non-commercial, Custom
URL:	http://archives.fedoraproject.org/pub/archive/fedora/linux/releases/7/Everything/source/SRPMS/man-1.6e-3.fc7.src.rpm
Group:	User Space Apps / System Environment/Base
Description:	A set of documentation tools: man, apropos and whatis. Command "man" was requested thus integrated man package and its dependent ones: texinfo and groff. The man package includes three tools for finding information and/or documentation about your Linux system: man, apropos, and whatis. The man system formats and displays on-line manual pages about commands or functions on your system. Apropos searches the whatis database (containing short descriptions of system commands) for a string. Whatis searches its own database for a complete word. The man package should be installed on your system because it is the primary way to find documentation on a Linux system.
Common Usage:	Utility
Package Size:	2.0 MB

3. Glimpse.
For the glimpse part, I quote Michael Hamilton:

To use the Glimpse full text searching, you will need to install glimpse in /usr/bin. Redhat rpm users can get glimpse from ftp://ftp.redhat.com/pub/contrib/i386/glimpse-4.0-6.i386.rpm The glimpse home ftp site is cs.arizona.edu.

N.B. glimpse is not freely redistributable for commercial use, I'd be very interested in a more liberal alternative.

mdadm 3.2.1

Software: mdadm
Version: 3.2.1
File or Package: mdadm-3.2.1.tar.bz2
OSI Licenses: GPLv2, GPLv2+, zlib/libpng, Public Domain
Other Licenses:
URL: http://www.kernel.org/pub/linux/utils/raid/mdadm/mdadm-3.2.1.tar.bz2
Group: User Space Apps / Utilities/System / System Environment/Base
Description: mdadm is used for controlling Linux md devices (aka RAID arrays). mdadm is a program that can be used to create, manage, and monitor Linux MD (Software RAID) devices. As such is provides similar functionality to the raidtools packages. The particular differences to raidtools is that mdadm is a single program, and it can perform (almost) all functions without a configuration file (that a config file can be used to help with some common tasks).
Common Usage: Utility
Package Size: 1.66 MB
Folders / Files: 4 / 190
Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

NOTICES:

MesaLib-7.10.2/Mesa-7.10.2/docs/license.html
Disclaimer - Mesa is a 3-D graphics library with an API which is very similar to that of OpenGL. To the extent that Mesa utilizes the OpenGL command syntax or state machine, it is being used with authorization from Silicon Graphics, Inc.(SGI). However, the author does not possess an OpenGL license from SGI, and makes no claim that Mesa is in any way a compatible replacement for OpenGL or associated with SGI. Those who want a licensed implementation of OpenGL should contact a licensed vendor. Please do not refer to the library as MesaGL (for legal

document version 2.60

reasons). It's just Mesa or The Mesa 3-D graphics library. OpenGL is a trademark of Silicon Graphics Incorporated.

License / Copyright Information

The Mesa distribution consists of several components. Different copyrights and licenses apply to different components. For example, GLUT is **copyrighted by Mark Kilgard**, some demo programs are **copyrighted by SGI**, some of the Mesa device drivers are copyrighted by their authors. See below for a list of Mesa's main components and the license for each. The core Mesa library is licensed according to the terms of the MIT license. This allows integration with the XFree86, Xorg and DRI projects. The default Mesa license is as follows:

Copyright (C) 1999-2007 Brian Paul All Rights Reserved.

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions: The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT.

IN NO EVENT SHALL BRIAN PAUL BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

Attention, Contributors

When contributing to the Mesa project you must agree to the licensing terms of the component to which you're contributing. The following section lists the primary components of the Mesa distribution and their respective licenses.

Mesa Component Licenses

Component Location License

Main Mesa code src/mesa/ Mesa (MIT)
Device drivers src/mesa/drivers MIT, generally
Ext headers include/GL/glx.h Khronos
GLUT src/glut/ Mark Kilgard's copyright
SGI GLU library src/glu/sgi/ SGI Free B
demo programs progs/demos/ see source files
X demos progs/xdemos/ see source files
SGI demos progs/samples/ SGI license
RedBook demos progs/redbook/ SGI license

In general, consult the source files for license terms.

License Applicability. Except to the extent portions of this file are made subject to an alternative license as permitted in the SGI Free Software License B, Version 1.1 (the "License"), the contents of this file are subject only to the provisions of the License. You may not use this file except in compliance with the License. You may obtain a copy of the License at Silicon Graphics, Inc., attn: Legal Services, 1600 Amphitheatre Parkway, Mountain View, CA 94043-1351, or at: <http://oss.sgi.com/projects/FreeB>

Note that, as provided in the License, the Software is distributed on an "AS IS" basis, with ALL EXPRESS AND IMPLIED WARRANTIES AND CONDITIONS DISCLAIMED, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT.

Original Code. The Original Code is: OpenGL Sample Implementation, Version 1.2.1, released January 26, 2000, developed by Silicon Graphics, Inc. The Original Code is **Copyright (c) 1991-2000 Silicon Graphics, Inc.** Copyright in any portions created by third parties is as indicated elsewhere herein. **All Rights Reserved.**

Additional Notice Provisions: The application programming interfaces established by SGI in conjunction with the Original Code are The OpenGL(R) Graphics System: A Specification (Version 1.2.1), released April 1, 1999; The OpenGL(R) Graphics System Utility Library (Version 1.3), released November 4, 1998; and OpenGL(R) Graphics with the X Window System(R) (Version 1.3), released October 19, 1998. This software was created using the OpenGL(R) version 1.2.1 Sample Implementation published by SGI, but has not been independently verified as being compliant with the OpenGL(R) version 1.2.1 Specification.

SGI FREE SOFTWARE LICENSE B (Version 1.1 [02/22/2000])

1. Definitions.

1.1. "Additional Notice Provisions" means such additional provisions as appear in the Notice in Original Code under the heading "Additional Notice Provisions."

1.2. "Covered Code" means the Original Code or Modifications, or any combination thereof.

1.3. "Hardware" means any physical device that accepts input, processes input, stores the results of processing, and/or provides output.

1.4. "Larger Work" means a work that combines Covered Code or portions thereof with code not governed by the terms of this License.

1.5. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.6. "License" means this document.

1.7. "Licensed Patents" means patent claims Licensable by SGI that are infringed by the use or sale of Original Code or any Modifications provided by SGI, or any combination thereof.

1.8. "Modifications" means any addition to or deletion from the substance or structure of the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:

A. Any addition to the contents of a file containing Original Code and/or addition to or deletion from the contents of a file containing previous Modifications.

B. Any new file that contains any part of the Original Code or previous Modifications.

1.9. "Notice" means any notice in Original Code or Covered Code, as required by and in compliance with this License.

1.10. "Original Code" means source code of computer software code that is described in the source code Notice required by Exhibit A as Original Code, and updates and error corrections specifically thereto.

1.11. "Recipient" means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License or a future version of this License issued under Section 8. For legal entities, "Recipient" includes any entity that controls, is controlled by, or is under common control with Recipient. For purposes of this definition, "control" of an entity means (a) the power, direct or indirect, to direct or manage such entity, or (b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.

1.12. "Recipient Patents" means patent claims Licensable by a Recipient that are infringed by the use or sale of Original Code or any Modifications provided by SGI, or any combination thereof.

1.13. "SGI" means Silicon Graphics, Inc. "SGI Patents" means patent claims Licensable by SGI other than the Licensed Patents.

2. License Grant and Restrictions.

2.1. SGI License Grant. Subject to the terms of this License and any third party intellectual property claims, for the duration of intellectual property protections inherent in the Original Code, SGI hereby grants Recipient a worldwide, royalty-free, non-exclusive license, to do the following: (i) under copyrights Licensable by SGI, to reproduce, distribute, create derivative works from, and, to the extent applicable, display and perform the Original Code and/or any Modifications provided by SGI alone and/or as part of a Larger Work; and (ii) under any Licensable Patents, to make, have made, use, sell, offer for sale, import and/or otherwise transfer the Original Code and/or any Modifications provided by SGI. Recipient accepts the terms and conditions of this License by undertaking any of the aforementioned actions. The patent license shall apply to the Covered Code if, at the time any related Modification is added, such addition of the Modification causes such combination to be covered by the Licensed Patents. The patent license in Section 2.1(ii) shall not apply

document version 2.60

to any other combinations that include the Modification. No patent license is provided under SGI Patents for infringements of SGI Patents by Modifications not provided by SGI or combinations of Original Code and Modifications not provided by SGI.

2.2. Recipient License Grant. Subject to the terms of this License and any third party intellectual property claims, Recipient hereby grants SGI and any other Recipients a worldwide, royalty-free, non-exclusive license, under any Recipient Patents, to make, have made, use, sell, offer for sale, import and/or otherwise transfer the Original Code and/or any Modifications provided by SGI.

2.3. No License For Hardware Implementations. The licenses granted in Section 2.1 and 2.2 are not applicable to implementation in Hardware of the algorithms embodied in the Original Code or any Modifications provided by SGI.

3. Redistributions.

3.1. Retention of Notice/Copy of License. The Notice set forth in Exhibit A, below, must be conspicuously retained or included in any and all redistributions of Covered Code. For distributions of the Covered Code in source code form, the Notice must appear in every file that can include a text comments field; in executable form, the Notice and a copy of this License must appear in related documentation or collateral where the Recipient's rights relating to Covered Code are described. Any Additional Notice Provisions which actually appears in the Original Code must also be retained or included in any and all redistributions of Covered Code.

3.2. Alternative License. Provided that Recipient is in compliance with the terms of this License, Recipient may, so long as without derogation of any of SGI's rights in and to the Original Code, distribute the source code and/or executable version(s) of Covered Code under (1) this License; (2) a license identical to this License but for only such changes as are necessary in order to clarify Recipient's role as licensor of Modifications; and/or (3) a license of Recipient's choosing, containing terms different from this License, provided that the license terms include this Section 3 and Sections 4, 6, 7, 10, 12, and 13, which terms may not be modified or superseded by any other terms of such license. If Recipient elects to use any license other than this License, Recipient must make it absolutely clear that any of its terms which differ from this License are offered by Recipient alone, and not by SGI. It is emphasized that this License is a limited license, and, regardless of the license form employed by Recipient in accordance with this Section 3.2, Recipient may relicense only such rights, in Original Code and Modifications by SGI, as it has actually been granted by SGI in this License.

3.3. Indemnity. Recipient hereby agrees to indemnify SGI for any liability incurred by SGI as a result of any such alternative license terms Recipient offers.

4. Termination. This License and the rights granted hereunder will terminate automatically if Recipient breaches any term herein and fails to cure such breach within 30 days thereof. Any sublicense to the Covered Code that is properly granted shall survive any termination of this License, absent termination by the terms of such sublicense. Provisions that, by their nature, must remain in effect beyond the termination of this License, shall survive.

5. No Trademark Or Other Rights. This License does not grant any rights to: (i) any software apart from the Covered Code, nor shall any other rights or licenses not expressly granted hereunder arise by implication, estoppel or otherwise with respect to the Covered Code; (ii) any trade name, trademark or service mark whatsoever, including without limitation any related right for purposes of endorsement or promotion of products derived from the Covered Code, without prior written permission of SGI; or (iii) any title to or ownership of the Original Code, which shall at all times remain with SGI. All rights in the Original Code not expressly granted under this License are reserved.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

6. Compliance with Laws; Non-Infringement. There are various worldwide laws, regulations, and executive orders applicable to dispositions of Covered Code, including without limitation export, re-export, and import control laws, regulations, and executive orders, of the U.S. government and other countries, and Recipient is reminded it is obliged to obey such laws, regulations, and executive orders. Recipient may not distribute Covered Code that (i) in any way infringes (directly or contributorily) any intellectual property rights of any kind of any other person or entity or (ii) breaches any representation or warranty, express, implied or statutory, to which, under any applicable law, it might be deemed to have been subject.

7. Claims of Infringement. If Recipient learns of any third party claim that any disposition of Covered Code and/or functionality wholly or partially infringes the third party's intellectual property rights, Recipient will promptly notify SGI of such claim.

8. Versions of the License. SGI may publish revised and/or new versions of the License from time to time, each with a distinguishing version number. Once Covered Code has been published under a particular version of the License, Recipient may, for the duration of the license, continue to use it under the terms of that version, or choose to use such Covered Code under the terms of any subsequent version published by SGI. Subject to the provisions of Sections 3 and 4 of this License, only SGI may modify the terms applicable to Covered Code created under this License.

9. DISCLAIMER OF WARRANTY. COVERED CODE IS PROVIDED "AS IS." ALL EXPRESS AND IMPLIED WARRANTIES AND CONDITIONS ARE DISCLAIMED, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY, SATISFACTORY QUALITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT. SGI ASSUMES NO RISK AS TO THE QUALITY AND PERFORMANCE OF THE SOFTWARE. SHOULD THE SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, SGI ASSUMES NO COST OR LIABILITY FOR SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY IS AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED CODE IS AUTHORIZED HEREUNDER EXCEPT SUBJECT TO THIS DISCLAIMER.

10. LIMITATION OF LIABILITY. UNDER NO CIRCUMSTANCES NOR LEGAL THEORY, WHETHER TORT (INCLUDING, WITHOUT LIMITATION, NEGLIGENCE OR STRICT LIABILITY), CONTRACT, OR OTHERWISE, SHALL SGI OR ANY SGI LICENSOR BE LIABLE FOR ANY DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, LOSS OF DATA, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SGI's NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THAT EXCLUSION AND LIMITATION MAY NOT APPLY TO RECIPIENT.

11. Indemnity. Recipient shall be solely responsible for damages arising, directly or indirectly, out of its utilization of rights under this License. Recipient will defend, indemnify and hold harmless Silicon Graphics, Inc. from and against any loss, liability, damages, costs or expenses

document version 2.60

(including the payment of reasonable attorneys fees) arising out of Recipient's use, modification, reproduction and distribution of the Covered Code or out of any representation or warranty made by Recipient.

12. U.S. Government End Users. The Covered Code is a "commercial item" consisting of "commercial computer software" as such terms are defined in title 48 of the Code of Federal Regulations and all U.S. Government End Users acquire only the rights set forth in this License and are subject to the terms of this License.

13. Miscellaneous. This License represents the complete agreement concerning the its subject matter. If any provision of this License is held to be unenforceable, such provision shall be reformed so as to achieve as nearly as possible the same legal and economic effect as the original provision and the remainder of this License will remain in effect. This License shall be governed by and construed in accordance with the laws of the United States and the State of California as applied to agreements entered into and to be performed entirely within California between California residents. Any litigation relating to this License shall be subject to the exclusive jurisdiction of the Federal Courts of the Northern District of California (or, absent subject matter jurisdiction in such courts, the courts of the State of California), with venue lying exclusively in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation that provides that the language of a contract shall be construed against the drafter shall not apply to this License.

Exhibit A

License Applicability. Except to the extent portions of this file are made subject to an alternative license as permitted in the SGI Free Software License B, Version 1.1 (the "License"), the contents of this file are subject only to the provisions of the License. You may not use this file except in compliance with the License. From:
MesaLib-7.10.2/Mesa-7.10.2/docs/README.MINGW32
The Mingw port for Mesa 3-D Graphics Library was created **August 30, 1998 by Paul Garceau.**

Updated January 13, 2000; June 3, 2005 - Paul Garceau
<pgarceau@users.sourceforge.net>

DISCLAIMER: I make this port of the Mesa 3-D Graphics Library as a service to the general public. I can, in no way support or make any guarantee that the build will work for your system.

Acknowledgements: Daniel Borca, whose work and commitment to maintaining the Mingw port of the Mesa 3-D Graphics Library has been, and will continue to be greatly appreciated by an overworked and underpaid developer such as myself. Without the creative inspiration and personal commitment provided by Mumit Khan, Jan-Jaap Vanderhagen and Colin Peters, Mingw would never have existed. Acknowledgements also need to be given to all of the developers who have worked on Mingw, Mesa and Msys over the years. Last, but certainly far from the least, Brian Paul, who has dedicated at least the last seven or eight years of his life to making Mesa 3-D Graphics Library what it is today and managing the development for all of those years.

Greetings,
Feel free to modify or change things related to the Mingw build as you see fit, just remember that, the author of the current build may not be able to support any modifications you might want to make to the files which have been included for the build. Mesa core components are licensed under XFree-86 (for more on licensing of Mesa 3-D Graphics Library, check out the Mesa homepage (<http://www.mesa3d.org>)).

The Mingw generated libraries themselves are licensed under the GNU-LGPL license. Source code for Mingw can be found at <http://www.mingw.org>. For licensing terms on Mingw, please visit <http://www.mingw.org>.

file ralloc.h
ralloc: a recursive memory allocator
The ralloc memory allocator creates a hierarchy of allocated objects. Every allocation is in reference to some parent, and every allocated object can in turn be used as the parent of a subsequent allocation. This allows for extremely convenient discarding of an entire tree/sub-tree of allocations by calling ralloc_free on any particular object to free it and all of its children.

The conceptual working of ralloc was directly inspired by Andrew Tridgell's talloc, but ralloc is an independent implementation released under the MIT license and tuned for Mesa.

The talloc implementation is available under the GNU Lesser General Public License (GNU LGPL), version 3 or later. It is more sophisticated than ralloc in that it includes reference counting and debugging features. See: <http://talloc.samba.org/>

From:
[MesaLib-7.10.2/Mesa-7.10.2/docs/faq.html](#)

4.3 Why isn't GL_EXT_texture_compression_s3tc implemented in Mesa?
The specification for the extension indicates that there are intellectual property (IP) and/or patent issues to be dealt with. We've been unsuccessful in getting a response from S3 (or whoever owns the IP nowadays) to indicate whether or not an open source project can implement the extension (specifically the compression/decompression algorithms). In the mean time, a 3rd party plug-in library is available.

♦♦♦

From:
[MesaLib-7.10.2/Mesa-7.10.2/src/gallium/state_trackers/python/st_sample.c](#)

We don't want to include the patent-encumbered DXT code here, so instead we store several uncompressed/compressed data pairs for hardware testing purposes.

♦♦♦

From:
[MesaLib-7.10.2/Mesa-7.10.2/src/gallium/state_trackers/wgl/stw_ext_pixelformat.c](#)

Bubble-sort the resulting scores. Pixelformats with higher scores go first.
TODO: Find out if there are any patent issues with it.

♦♦♦

From:
[MesaLib-7.10.2/Mesa-7.10.2/src/gallium/state_trackers/d3d1x/winedlls/version.rc.h](#)
all Wine DLLs claim to be from Microsoft, maybe it's needed for compatibility

♦♦♦

From:
[MesaLib-7.10.2/Mesa-7.10.2/acinclude.m4](#)
The platform checks have been shamelessly taken from libtool and stripped down to just what's needed for Mesa. See _LT_COMPILER_PIC in /usr/share/aclocal/libtool.m4 or <http://git.savannah.gnu.org/gitweb/?p=libtool.git;a=blob;f=libltdl/m4/libtool.m4;hb=HEAD>

♦♦♦

From:
[MesaLib-7.10.2/Mesa-7.10.2/docs/MESA_swap_frame_usage.spec](#)
Based on WGL_I3D_swap_frame_usage version 1.3.

♦♦♦

From:
[MesaLib-7.10.2/Mesa-7.10.2/docs/README.DJ](#)
Well, this "skeletal" GLUT implementation was taken from AllegGL project and heavily changed. Thanks should go to Bernhard Tschirren, Mark Kilgard, Brian Paul and probably others (or probably not :-). GLUT functionality will be extended only on an "as needed" basis. My keyboard driver used only scancodes; as GLUT requires ASCII values for keys, I borrowed the translation tables (and maybe more) from Allegro - many thanks to Shawn Hargreaves et co.

♦♦♦

From:
[MesaLib-7.10.2/Mesa-7.10.2/docs/egl.html](#)
This driver is based on Gallium3D.

♦♦♦

From:
[MesaLib-7.10.2/Mesa-7.10.2/src/gallium/auxiliary/gallivm/lp_bld_tgsi_soa.c](#)
Based on tgsi_sse2.c code written by Michal Krol, Keith Whitwell, Brian Paul, and others.

♦♦♦

From:
[MesaLib-7.10.2/Mesa-7.10.2/src/gallium/auxiliary/os/os_stream_std.c](#)
Stream implementation based on the Standard C Library.

♦♦♦

From:
[MesaLib-7.10.2/Mesa-7.10.2/src/gallium/auxiliary/util/u_cpu_detect.c](#)
this is borrowed from the libmpeg2 library

♦♦♦

metacity 2.22.0

Software: metacity
Version: 2.22.0
File or Package: metacity-2.22.0.tar.bz2
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1+, MIT/X11, Mozilla (MPL) v1.1, Academic, Public Domain
Other Licenses:
URL: <http://ftp.gnome.org/pub/GNOME/sources/metacity/2.22/metacity-2.22.0.tar.bz2>
Group: User Space Apps / System/GUI/GNOME
Description: A Fast Window Manager for the GNOME 2.x Desktop; a compositing window manager used by default in the GNOME desktop environment. Metacity is a window manager for GNOME. It uses GTK+ 2 for drawing window frames, meaning that it inherits colors, fonts, etc. from the GTK+ theme.
Common Usage: Utility
Package Size: 10.62 MB
Folders / Files: 20 / 344
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

NOTICES:

♦♦♦

From:

metacity-2.22.0/metacity-2.22.0/readme

Q: I think metacity sucks.

A: Feel free to use any WM you like. The reason metacity follows the ICCCM and EWMH specifications is that it makes metacity a modular, interchangeable part in the desktop. libwnck-based apps such as the GNOME window list will work just fine with any EWMH-compliant WM.

Q: Did you spend a lot of time on this?

A: Originally the answer was no. Sadly the answer is now yes.

Q: How can you claim that you are anti-crack, while still writing a window manager?

A: I have no comment on that.

From:
minicom-2.3-2.fc9.src/minicom-2.3/minicom-2.3/lib/snprintf.c
This version of snprintf() and vsnprintf() is based on Sprint from SIO by Panagiotis Tsirigotis, as included with xidentd-2.2.1. The modifications were made by The XFree86 Project, Inc and are
Copyright 1999 by The XFree86 Project, Inc.

These modifications consist of removing the support for writing to file streams, renaming some functions, ansification, and making some adjustments to achieve the semantics for snprintf and vsnprintf() as described in the relevant man page for FreeBSD 2.2.8.

The original version carries the following notice:
(c) Copyright 1992, 1993 by Panagiotis Tsirigotis

The author (Panagiotis Tsirigotis) grants permission to use, copy, and distribute this software and its documentation for any purpose and without fee, provided that a) the above copyright notice extant in files in this distribution is not removed from files included in any redistribution, and b) this file is also included in any redistribution.

Modifications to this software may be distributed, either by distributing the modified software or by distributing patches to the original software, under the following additional terms:

1. The version number will be modified as follows:
a. The first 3 components of the version number (i.e. <number>.<number>.<number>) will remain unchanged.
b. A new component will be appended to the version number to indicate the modification level. The form of this component is up to the author of the modifications.

2. The author of the modifications will include his/her name by appending it along with the new version number to this file and will be responsible for any wrong behavior of the modified software. The author makes no representations about the suitability of this software for any purpose. It is provided "as is" without any express or implied warranty.

mklibs r60232

Software: mklibs
Version: r60232
File or Package: mklibs-r60232.tar.bz2
OSI Licenses: GPLv2+
Other Licenses:
URL:
Group:
Description: Shared library reduction script; mklibs produces cut-down shared libraries that contain only the routines required by a particular set of executables. This is useful when building closed systems where disk space is at a premium, such as the Debian installer.

Common Usage: Library
Package Size: 192 KB (0.19 MB)
Folders / Files: 5 / 24
Source Path: wrlinux-4.0/layers/wrll-toolchain-4.4a-336/common/packages

Notes: The following software is intended to be used as a host utility to facilitate development of a target runtime image. If you choose to include it on a target runtime image, you may be subject to additional open source license compliance considerations. It is recommend you consult with your legal counsel for guidance and advice on your particular situation.

mktemp 1.5-25

Software: mktemp
Version: 1.5-25
File or Package: mktemp-1.5-25.fc7.src.rpm
OSI Licenses: GPLv2+ w/exception, BSDv1, BSDv2
Other Licenses: Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/8/Fedora/source/SRPMS/mktemp-1.5-25.fc7.src.rpm>
Group: System Environment/Base
Description: A small utility for safely making /tmp files. The mktemp utility takes a given file name template and overwrites a portion of it to create a unique file name. This allows shell scripts and other programs to safely create and use /tmp files. Install the mktemp package if you need to use shell scripts or other programs which will create and use unique /tmp files.

Common Usage: Utility
Package Size: 480 KB (0.48 MB)
Folders / Files: 3 / 26
Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

NOTICES:

document version 2.60

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

♦♦♦

From:
mpfr-2.4.2/mpfr-2.4.2/ansi2knr.c
Copyright (C) 1989, 2000 Aladdin Enterprises. All rights reserved.

ansi2knr is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY. No author or distributor accepts responsibility to anyone for the consequences of using it or for whether it serves any particular purpose or works at all, unless he says so in writing. Refer to the GNU General Public License (the "GPL") for full details.

Everyone is granted permission to copy, modify and redistribute ansi2knr, but only under the conditions described in the GPL. A copy of this license is supposed to have been given to you along with ansi2knr so you can know your rights and responsibilities. It should be in a file named COPYLEFT, or, if there is no file named COPYLEFT, a file named COPYING. Among other things, the copyright notice and this notice must be preserved on all copies.

We explicitly state here what we believe is already implied by the GPL: if the ansi2knr program is distributed as a separate set of sources and a separate executable file which are aggregated on a storage medium together with another program, this in itself does not bring the other program under the GPL, nor does the mere fact that such a program or

document version 2.60

the procedures for constructing it invoke the ansi2knr executable bring any other part of the program under the GPL.

Permission is granted to anyone to use this software for any purpose, including commercial applications, and to alter it and redistribute it freely, subject to the following restrictions:
document version 2.60

1. The origin of this software must not be misrepresented; you must not claim that you wrote the original software. If you use this software in a product, an acknowledgment in the product documentation would be appreciated but is not required.

2. Altered source versions must be plainly marked as such, and must not be misrepresented as being the original software.

3. This notice may not be removed or altered from any source distribution.

This code was altered September 2001

Changes are **Copyright (c) Erik Andersen** <andersen@codepoet.org>

In compliance with (2) above, this is hereby marked as an altered version of this software. It has been altered as follows:

- *) Listing a directory now mimics the behavior of 'ls -l'
 - *) Support for recursive listing has been added
 - *) Without options, does a recursive 'ls' on the whole filesystem
 - *) option parsing now uses getopt()
 - *) Now uses printf, and error messages go to stderr.
 - *) The copyright notice has been cleaned up and reformatted
 - *) The code has been reformatted
 - *) Several twisty code paths have been fixed so I can understand them.
- Erik, 1 September 2001

*) Made it show major/minor numbers for device nodes

*) Made it show symlink targets

-Erik, 13 September 2001

mtools 3.9.11

Software:	mtools
Version:	3.9.11
File or Package:	mtools-3.9.11.tar.bz2
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+
Other Licenses:	Custom
URL:	
Group:	Applications/System
Description:	Mtools is a public domain collection of tools to allow Unix systems to manipulate MS-DOS files: read, write, and move around files on an MS-DOS filesystem (typically a floppy disk). Where reasonable, each program attempts to emulate the MS-DOS equivalent command. However, unnecessary restrictions and oddities of DOS are not emulated. Mtools is sufficient to give access to MS-DOS filesystems.
Common Usage:	tool
Package Size:	1.8 MB
Folders / Files:	3 / 160
Source Path:	wrlinux-4.0/layers/ldat-tools/installer/packages

mutagen 1.11

Software: mutagen
Version: 1.11
File or Package: mutagen_1.11.orig.tar.gz
OSI Licenses: GPLv2
Other Licenses: Custom
URL: http://us.archive.ubuntu.com/ubuntu/pool/main/m/mutagen/mutagen_1.11.orig.tar.gz
Group: Python
Description: Mutagen is a Python module to handle audio metadata. It supports ASF, FLAC, M4A, Monkey's Audio, MP3, Musepack, Ogg FLAC, Ogg Speex, Ogg Theora, Ogg Vorbis, True Audio, WavPack and OptimFROG audio files. All versions of ID3v2 are supported, and all standard ID3v2.4 frames are parsed. It can read Xing headers to accurately calculate the bitrate and length of MP3s. ID3 and APEv2 tags can be edited regardless of audio format. It can also manipulate Ogg streams on an individual packet/page level.
Common Usage: library
Package Size: 1.9 MB
Folders / Files: 7 / 98
Source Path: wrlinux-4.0/layers/wrll-userspace/media/packages

mysql 5.1.50-2

Software: mysql
Version: 5.1.50-2
File or Package: mysql-5.1.50-2.fc15.src.rpm
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, GPLv3+ w/exception, FreeBSD, BSDv1 (UCB), BSDv2, MIT/X11, Free/Libre and Open Source Software ("FLOSS") v0.6, zlib/libpng, Academic, Public Domain
Other Licenses: Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/development/source/SRPMS/mysql-5.1.50-2.fc15.src.rpm>
Group: User Space Apps / Applications/Databases
Description: MySQL is a multi-user, multi-threaded SQL database server. MySQL is a client/server implementation consisting of a server daemon (mysqld) and many different client programs and libraries. The base package contains the MySQL client programs, the client shared libraries, and generic MySQL files. MySQL is a relational database management system (RDBMS) which has more than 6 million installations.

The program runs as a server providing multi-user access to a number of databases. MySQL is commonly used by free software projects which require a full-featured database management system, such as WordPress, phpBB and other software built on the LAMP software stack. It is also used in very high-scale World Wide Web products including Google and Facebook.

Use of any of this software is governed by the terms of the license below:

NOTICE

Copyright Abandoned, 1987, Fred Fish

This previously copyrighted work has been placed into the public Domain by the author and may be freely used for any purpose, private or commercial.

Because of the number of inquiries I was receiving about the use of this product in commercially developed works I have decided to simply make it public domain to further its unrestricted use. I specifically would be most happy to see this material become a part of the standard Unix distributions by AT&T and the Berkeley Computer Science Research Group, and a standard part of the GNU system from the Free Software Foundation. I would appreciate it, as a courtesy, if this notice is left in all copies and derivative works. Thank you.

The author makes no warranty of any kind with respect to this product and explicitly disclaims any implied warranties of merchantability or fitness for any particular purpose.

The following software may be included in this product: dbug_analyze.c (part of Fred Fish's Dbug Library)

Use of any of this software is governed by the terms of the license below:

document version 2.60

From:

mysql-5.1.50-2.fc15.src/mysql-5.1.50-nodocs/mysql-5.1.50/readme

This is a release of MySQL, a dual-license SQL database server. MySQL is brought to you by the MySQL team at Sun Microsystems, Inc. License information can be found in these files:

For GPL (free) distributions, see the COPYING file and the EXCEPTIONS-CLIENT file.

For commercial distributions, see the LICENSE.mysql file.

GPLv2 Disclaimer

For the avoidance of doubt, except that if any license choice other than GPL or LGPL is available it will apply instead, Sun elects to use only the General Public License version 2 (GPLv2) at this time for any software where a choice of GPL license versions is made available with the language indicating that GPLv2 or any later version may be used, or where a choice of which version of the GPL is applied is otherwise unspecified.

For further information about MySQL or additional documentation, see:

The latest information about MySQL: <http://www.mysql.com>

The current MySQL documentation: <http://dev.mysql.com/doc>

From:

mysql-5.1.50-2.fc15.src/mysql-5.1.50-nodocs/mysql-5.1.50/EXCEPTIONS-CLIENT

MySQL FLOSS License Exception

The MySQL AB Exception for Free/Libre and Open Source Software-only Applications Using MySQL Client Libraries (the "FLOSS Exception"). Version 0.6, 7 March 2007

Exception Intent

We want specified Free/Libre and Open Source Software ("FLOSS") applications to be able to use specified GPL-licensed MySQL client libraries (the "Program") despite the fact that not all FLOSS licenses are compatible with version 2 of the GNU General Public License (the "GPL").

Legal Terms and Conditions

As a special exception to the terms and conditions of version 2.0 of the GPL:

1. You are free to distribute a Derivative Work that is formed entirely from the Program and one or more works (each, a "FLOSS Work") licensed under one or more of the licenses listed below in section 1, as long as:

a. You obey the GPL in all respects for the Program and the Derivative Work, except for identifiable sections of the Derivative Work which are not derived from the Program, and which can reasonably be considered independent and separate works in themselves,

b. all identifiable sections of the Derivative Work which are not derived from the Program, and which can reasonably be considered independent and separate works in themselves,

i. are distributed subject to one of the FLOSS licenses listed below, and

ii. the object code or executable form of those sections are accompanied by the complete

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

corresponding machine-readable source code for those sections on the same medium and under the same FLOSS license as the corresponding object code or executable forms of those sections, and

c. any works which are aggregated with the Program or with a Derivative Work on a volume of a storage or distribution medium in accordance with the GPL, can reasonably be considered independent and separate works in themselves which are not derivatives of either the Program, a Derivative Work or a FLOSS Work. If the above conditions are not met, then the Program may only be copied, modified, distributed or used under the terms and conditions of the GPL or another valid licensing option from MySQL AB.

2. FLOSS License List

License name Version(s)/Copyright Date

Academic Free License 2.0

Apache Software License 1.0/1.1/2.0

Apple Public Source License 2.0

Artistic license From Perl 5.8.0

BSD license "July 22 1999"

Common Development and Distribution License (CDDL) 1.0

Common Public License 1.0

Eclipse Public License 1.0

GNU Library or "Lesser" General Public License (LGPL) 2.0/2.1

Jabber Open Source License 1.0

MIT license (As listed in file MIT-License.txt)

Mozilla Public License (MPL) 1.0/1.1

Open Software License 2.0

OpenSSL license (with original SSLeay license) "2003" ("1998")

PHP License 3.0

Python license (CNRI Python License)

Python Software Foundation License 2.1.1

Sleepycat License "1999"

University of Illinois/NCSA Open Source License

W3C License "2001"

X11 License "2001"

Zlib/libpng License

Zope Public License 2.0

Due to the many variants of some of the above licenses, we require that any version follow the 2003 version of the Free Software Foundation's Free Software Definition (<http://www.gnu.org/philosophy/free-sw.html>) or version 1.9 of the Open Source Definition by the Open Source Initiative (<http://www.opensource.org/docs/definition.php>).

3. Definitions

a. Terms used, but not defined, herein shall have the meaning provided in the GPL.

b. Derivative Work means a derivative work under copyright law.

4. Applicability:

This FLOSS Exception applies to all Programs that contain a notice placed by MySQL AB saying that the Program may be distributed under the terms of this FLOSS Exception. If you create or distribute a work which is a Derivative Work of both the Program and any other work licensed under the GPL, then this FLOSS Exception is not available for that work; thus, you must remove the FLOSS Exception notice from that work and comply with the GPL in all respects, including by retaining all GPL notices. You may choose to redistribute a copy of the Program exclusively under the terms of the GPL by removing the FLOSS

document version 2.60

Exception notice from that copy of the Program, provided that the copy has never been modified by you or any third party.

Appendix A. Qualified Libraries and Packages

The following is a non-exhaustive list of libraries and packages which are covered by the FLOSS License Exception. Please note that this appendix is provided merely as an additional service to specific FLOSS projects wishing to simplify licensing information for their users. Compliance with one of the licenses noted under the "FLOSS license list" section remains a prerequisite.

Package Name Qualifying License and Version
Apache Portable Runtime (APR) Apache Software License 2.0

If you use the zlib library in a product, we would appreciate not receiving lengthy legal documents to sign. The sources are provided for free but without warranty of any kind. The library has been entirely written by Jean-loup Gailly and Mark Adler; it does not include third-party code. If you redistribute modified sources, we would appreciate that you include in the file ChangeLog history information documenting your changes. Please read the FAQ for more information on the distribution of modified source versions.

Here's something you've all been waiting for: the AT&T public domain source for getopt(3). It is the code which was given out at the 1985 UNIFORUM conference in Dallas. I obtained it by electronic mail directly from AT&T. The people there assure me that it is indeed in the public domain. There is no manual page. That is because the one they gave out at UNIFORUM was slightly different from the current System V Release 2 manual page. The difference apparently involved a note about the famous rules 5 and 6, recommending using white space between an option and its first argument, and not grouping options that have arguments.

Getopt itself is currently lenient about both of these things White space is allowed, but not mandatory, and the last option in a group can have an argument. That particular version of the man page evidently has no official existence, and my source at AT&T did not send a copy. The current SVR2 man page reflects the actual behavior of this getopt.

However, I am not about to post a copy of anything licensed by AT&T. I will submit this source to Berkeley as a bug fix. I, personally, make no

document version 2.60

This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by **Colin Plumb in 1993, no copyright is claimed**. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy. To compute the message digest of a chunk of bytes, declare an MD5Context structure, pass it to MD5Init, call MD5Update as needed on buffers full of bytes, and then call MD5Final, which will fill a supplied 16-byte array with the digest.

This code was modified in 1997 by Jim Kingdon of Cyclic Software to not require an integer type which is exactly 32 bits. This work draws on the changes for the same purpose by Tatu Ylonen <ylo@cs.hut.fi> as part of SSH, but since I didn't actually use that code, there is no copyright issue. I hereby disclaim copyright in any changes I have made; this code remains in the public domain.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <<http://www.gnu.org/licenses/>>.

As a special exception, you may create a larger work that contains part or all of the Bison parser skeleton and distribute that work under terms of your choice, so long as that work isn't itself a parser generator using the skeleton or a modified version thereof as a parser skeleton. Alternatively, if you modify or redistribute the parser skeleton itself, you may (at your option) remove this special exception, which will cause the skeleton and the resulting Bison output files to be licensed under the GNU General Public License without this special exception. This special exception was added by the Free Software Foundation in version 2.2 of Bison.

mysql-connector-odbc 5.1.5r1144-6

Software:	mysql-connector-odbc
Version:	5.1.5r1144-6
File or Package:	mysql-connector-odbc-5.1.5r1144-6.fc12.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, MIT/X11, Free/Libre and Open Source Software v0.6 (FLOSS), Academic
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/development/source/SRPMS/mysql-connector-odbc-5.1.5r1144-6.fc12.src.rpm
Group:	
Description:	Open Database Connectivity (ODBC) is a widely accepted standard for reading/writing data. ODBC is designed in a similar manner to the MS Windows printing system in that it has a Driver Manager and Drivers. Connector/ODBC is a driver for the ODBC system which allows applications to communicate with the MySQL server using the ODBC standard. ODBC implementations exist on all popular platforms and Connector/ODBC is also available on those platforms. MySQL, the most popular Open Source SQL database, is provided by MySQL AB. MySQL AB is a commercial company that builds its business providing services around the MySQL database.
Common Usage:	User Space Libraries
Package Size:	6.8 MB

5.1.5r1144/mysql-connector-odbc-5.1.5r1144/license.exceptions
As a special exception to the MySQL Connector/ODBC GPL license, one is allowed to use the product with any ODBC manager, even if the ODBC document version 2.60

manager is not licensed under the GPL. In other words: The ODBC manager itself is not affected by the MySQL Connector/ODBC GPL license.

MySQL FLOSS License Exception

The MySQL AB Exception for Free/Libre and Open Source Software-only Applications Using MySQL Client Libraries (the "FLOSS Exception").
Version 0.6, 7 March 2007

Exception Intent

We want specified Free/Libre and Open Source Software ("FLOSS") applications to be able to use specified GPL-licensed MySQL client libraries (the "Program") despite the fact that not all FLOSS licenses are compatible with version 2 of the GNU General Public License (the "GPL").

Legal Terms and Conditions

As a special exception to the terms and conditions of version 2.0 of the GPL:

1. You are free to distribute a Derivative Work that is formed entirely from the Program and one or more works (each, a "FLOSS Work") licensed under one or more of the licenses listed below in section 1, as long as:

a. You obey the GPL in all respects for the Program and the Derivative Work, except for identifiable sections of the Derivative Work which are not derived from the Program, and which can reasonably be considered independent and separate works in themselves,

b. all identifiable sections of the Derivative Work which are not derived from the Program, and which can reasonably be considered independent and separate works in themselves,

i. are distributed subject to one of the FLOSS licenses listed below, and

ii. the object code or executable form of those sections are accompanied by the complete corresponding machine-readable source code for those sections on the same medium and under the same FLOSS license as the corresponding object code or executable forms of those sections, and

c. any works which are aggregated with the Program or with a Derivative Work on a volume of a storage or distribution medium in accordance with the GPL, can reasonably be considered independent and separate works in themselves which are not derivatives of either the Program, a Derivative Work or a FLOSS Work.

If the above conditions are not met, then the Program may only be copied, modified, distributed or used under the terms and conditions of the GPL or another valid licensing option from MySQL AB.

2. FLOSS License List

License name Version(s)/Copyright Date

Academic Free License 2.0

Apache Software License 1.0/1.1/2.0

Apple Public Source License 2.0

Artistic license From Perl 5.8.0

BSD license "July 22 1999"

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Common Development and Distribution License (CDDL) 1.0

Common Public License 1.0

Eclipse Public License 1.0

GNU Library or "Lesser" General Public License (LGPL) 2.0/2.1

Jabber Open Source License 1.0

MIT license (As listed in file MIT-License.txt)

Mozilla Public License (MPL) 1.0/1.1

Open Software License 2.0

OpenSSL license (with original SSLeay license) "2003" ("1998")

PHP License 3.0

Python license (CNRI Python License)

Python Software Foundation License 2.1.1

Sleepycat License "1999"

University of Illinois/NCSA Open Source License

W3C License "2001"

X11 License "2001"

Zlib/libpng License

Zope Public License 2.0

Due to the many variants of some of the above licenses, we require that any version follow the 2003 version of the Free Software Foundation's Free Software Definition (<http://www.gnu.org/philosophy/free-sw.html>) or version 1.9 of the Open Source Definition by the Open Source Initiative (<http://www.opensource.org/docs/definition.php>).

3. Definitions

a. Terms used, but not defined, herein shall have the meaning provided in the GPL.

b. Derivative Work means a derivative work under copyright law.

4. Applicability: This FLOSS Exception applies to all Programs that contain a notice placed by MySQL AB saying that the Program may be distributed under the terms of this FLOSS Exception. If you create or distribute a work which is a Derivative Work of both the Program and any other work licensed under the GPL, then this FLOSS Exception is not available for that work; thus, you must remove the FLOSS Exception notice from that work and comply with the GPL in all respects, including by retaining all GPL notices. You may choose to redistribute a copy of the Program exclusively under the terms of the GPL by removing the FLOSS Exception notice from that copy of the Program, provided that the copy has never been modified by you or any third party.

Appendix A. Qualified Libraries and Packages

The following is a non-exhaustive list of libraries and packages which are covered by the FLOSS License Exception. Please note that this appendix is provided merely as an additional service to specific FLOSS projects wishing to simplify licensing information for their users. Compliance with one of the licenses noted under the "FLOSS license list" section remains a prerequisite.

Package Name Qualifying License and Version

Apache Portable Runtime (APR) Apache Software License 2.0

SciTech MGL Public License Version 1.0

PREAMBLE - SciTech Software has made a tremendous investment over many years in the development of SciTech MGL. SciTech is releasing this source code under the SciTech MGL Public License in order to give all developers the power to enhance and extend it even further. Since

SciTech MGL compliments other SciTech products, SciTech is continuing active development of SciTech MGL under the terms of this License.

This public license agreement balances SciTech Software's goals and those of the free software development community. SciTech has used Netscape's 'Mozilla Public License' as the model for the SciTech MGL Public License. This license agreement is identical to the Mozilla Public License, except for the substitution of company and product names to SciTech and SciTech MGL respectively, and the addition of the Amendments section at the end.

1. Definitions.

1.1. "Contributor" means each entity that creates or contributes to the creation of Modifications.

1.2. "Contributor Version" means the combination of the Original Code, prior Modifications used by a Contributor, and the Modifications made by that particular Contributor.

1.3. "Covered Code" means the Original Code or Modifications or the combination of the Original Code and Modifications, in each case including portions thereof.

1.4. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.

1.5. "Executable" means Covered Code in any form other than Source Code.

1.6. "Initial Developer" means the individual or entity identified as the Initial Developer in the Source Code notice required by Exhibit A.

1.7. "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.

1.8. "License" means this document.

1.9. "Modifications" means any addition to or deletion from the substance or structure of either the Original Code or any previous Modifications. When Covered Code is released as a series of files, a Modification is:

A. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.

B. Any new file that contains any part of the Original Code or previous Modifications.

1.10. "Original Code" means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as Original Code, and which, at the time of its release under this License is not already Covered Code governed by this License.

1.11. "Source Code" means the preferred form of the Covered Code for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an Executable, or a list of source code differential comparisons against either the Original Code or another well known, available Covered Code of the Contributor's choice. The Source Code can be in a compressed or archival form, provided the appropriate decompression or de-archiving software is widely available for no charge.

1.12. "You" means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License or a future version of

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

this License issued under Section 6.1. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.

2. Source Code License.

2.1. The Initial Developer Grant.

The Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

(a) to use, reproduce, modify, display, perform, sublicense and distribute the Original Code (or portions thereof) with or without Modifications, or as part of a Larger Work; and

(b) under patents now or hereafter owned or controlled by Initial Developer, to make, have made, use and sell ("Utilize") the Original Code (or portions thereof), but solely to the extent that any such patent is reasonably necessary to enable You to Utilize the Original Code (or portions thereof) and not to any greater extent that may be necessary to Utilize further Modifications or combinations.

2.2. Contributor Grant.

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

(a) to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof) either on an unmodified basis, with other Modifications, as Covered Code or as part of a Larger Work; and

(b) under patents now or hereafter owned or controlled by Contributor, to Utilize the Contributor Version (or portions thereof), but solely to the extent that any such patent is reasonably necessary to enable You to Utilize the Contributor Version (or portions thereof), and not to any greater extent that may be necessary to Utilize further Modifications or combinations.

3. Distribution Obligations.

3.1. Application of License.

The Modifications which You create or to which You contribute are governed by the terms of this License, including without limitation Section 2.2. The Source Code version of Covered Code may be distributed only under the terms of this License or a future version of this License released under Section 6.1, and You must include a copy of this License with every copy of the Source Code You distribute. You may not offer or impose any terms on any Source Code version that alters or restricts the applicable version of this License or the recipients' rights hereunder. However, You may include an additional document offering the additional rights described in Section 3.5.

3.2. Availability of Source Code.

Any Modification which You create or to which You contribute must be made available in Source Code form under the terms of this License either on the same media as an Executable version or via an accepted Electronic Distribution Mechanism to anyone to whom you made an Executable version available; and if made available via Electronic Distribution Mechanism, must remain available for at least twelve (12) months after the date it initially became available, or at least six (6) months after a subsequent version of that particular Modification has

document version 2.60

been made available to such recipients. You are responsible for ensuring that the Source Code version remains available even if the Electronic Distribution Mechanism is maintained by a third party.

3.3. Description of Modifications.

You must cause all Covered Code to which you contribute to contain a file documenting the changes You made to create that Covered Code and the date of any change. You must include a prominent statement that the Modification is derived, directly or indirectly, from Original Code provided by the Initial Developer and including the name of the Initial Developer in (a) the Source Code, and (b) in any notice in an Executable version or related documentation in which You describe the origin or ownership of the Covered Code.

3.4. Intellectual Property Matters

(a) Third Party Claims. - If You have knowledge that a party claims an intellectual property right in particular functionality or code (or its utilization under this License), you must include a text file with the source code distribution titled "LEGAL" which describes the claim and the party making the claim in sufficient detail that a recipient will know whom to contact. If you obtain such knowledge after You make Your Modification available as described in Section 3.2, You shall promptly modify the LEGAL file in all copies You make available thereafter and shall take other steps (such as notifying appropriate mailing lists or newsgroups) reasonably calculated to inform those who received the Covered Code that new knowledge has been obtained.

(b) Contributor APIs. - If Your Modification is an application programming interface and You own or control patents which are reasonably necessary to implement that API, you must also include this information in the LEGAL file.

3.5. Required Notices. You must duplicate the notice in Exhibit A in each file of the Source Code, and this License in any documentation for the Source Code, where You describe recipients' rights relating to Covered Code. If You created one or more Modification(s), You may add your name as a Contributor to the notice described in Exhibit A. If it is not possible to put such notice in a particular Source Code file due to its structure, then you must include such notice in a location (such as a relevant directory file) where a user would be likely to look for such a notice.

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Code. However, You may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear than any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.6. Distribution of Executable Versions.

You may distribute Covered Code in Executable form only if the requirements of Section 3.1-3.5 have been met for that Covered Code, and if You include a notice stating that the Source Code version of the Covered Code is available under the terms of this License, including a description of how and where You have fulfilled the obligations of Section 3.2. The notice must be conspicuously included in any notice in an Executable version, related documentation or collateral in which You describe recipients' rights relating to the Covered Code.

You may distribute the Executable version of Covered Code under a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable version does not attempt to limit or alter the recipient's rights in the Source Code version from the rights set forth in this License. If You distribute the Executable version under a different license You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or any Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

3.7. Larger Works.

You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Code.

4. Inability to Comply Due to Statute or Regulation.

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Code due to statute or regulation then You must:

(a) comply with the terms of this License to the maximum extent possible; and

(b) describe the limitations and the code they affect. Such description must be included in the LEGAL file described in Section 3.4 and must be included with all distributions of the Source Code. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5. Application of this License.

This License applies to code to which the Initial Developer has attached the notice in Exhibit A, and to related Covered Code.

6. Versions of the License.

6.1. New Versions.

SciTech Software, Inc. ("SciTech") may publish revised and/or new versions of the License from time to time. Each version will be given a distinguishing version number.

6.2. Effect of New Versions.

Once Covered Code has been published under a particular version of the License, You may always continue to use it under the terms of that version. You may also choose to use such Covered Code under the terms of any subsequent version of the License published by SciTech. No one other than SciTech has the right to modify the terms applicable to Covered Code created under this License.

6.3. Derivative Works.

If you create or use a modified version of this License (which you may only do in order to apply it to code which is not already Covered Code governed by this License), you must (a) rename Your license so that the phrases "SciTech", "SciTech MGL Public License", "SMPL", or any confusingly similar phrase do not appear anywhere in your license and (b) otherwise make it clear that your version of the license contains terms which differ from the SciTech MGL Public License. (Filling in the name of the Initial Developer, Original Code or Contributor in the notice described in Exhibit A shall not of themselves be deemed to be modifications of this License.)

7. DISCLAIMER OF WARRANTY.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

COVERED CODE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED CODE IS FREE OF DEFECTS, MERCHANTABILITY, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT.

THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED CODE IS WITH YOU. SHOULD ANY COVERED CODE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED CODE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

8. TERMINATION.

This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses to the Covered Code which are properly granted shall survive any termination of this License. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

9. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED CODE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO YOU OR ANY OTHER PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THAT EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

10. U.S. GOVERNMENT END USERS.

The Covered Code is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" and "commercial computer software documentation," as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

11. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise), excluding its conflict-of-law provisions. With respect to disputes in which at least one party is a citizen of, or an entity chartered or registered to do business in, the United States of America:

(a) unless otherwise agreed in writing, all disputes relating to this License (excepting any dispute relating to intellectual property rights) shall be subject to final and binding arbitration, with the losing party paying all costs of arbitration;

(b) any arbitration relating to this Agreement shall be held in Butte County, California, under the auspices of JAMS/EndDispute; and

(c) any litigation relating to this Agreement shall be subject to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Butte County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys fees and expenses.

The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

12. RESPONSIBILITY FOR CLAIMS.

Except in cases where another Contributor has failed to comply with Section 3.4, You are responsible for damages arising, directly or indirectly, out of Your utilization of rights under this License, based on the number of copies of Covered Code you made available, the revenues you received from utilizing such rights, and other relevant factors. You agree to work with affected parties to distribute responsibility on an equitable basis.

AMENDMENTS - Additional Terms applicable to the SciTech MGL Public License.

I. Effect.

These additional terms described in this SciTech MGL Public License -- Amendments shall apply to the SciTech MGL Source Code and to all Original Code under this License.

II. Use of Original Code by Initial Developer.

V.1. In General. - The obligations of Section 3 apply to SciTech, except to the extent specified in this Amendment, Section V.2.

V.2. Other Products. - SciTech may include Original Code and Modifications contributed by SciTech in products other than the SciTech MGL, without such additional products becoming subject to the terms of this License, and may license such additional products on different terms from those contained in this License.

EXHIBIT A.

nc 110 aka netcat

Software: netcat (nc)
Version: 110
File or Package: nc110.tgz

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

OSI Licenses: None identified
Other Licenses: Public Domain, Custom
URL: http://www.securityfocus.com/data/tools/nc110.tgz
Group: User Space Apps / Applications/Internet / Applications/System
Description: The nc6 package contains Netcat6 (the program is actually nc6), a simple utility for reading and writing data across network connections, using the TCP or UDP protocols. Netcat6 is intended to be a reliable back-end tool which can be used directly or easily driven by other programs and scripts. Netcat is also a feature-rich network debugging and exploration tool, since it can create many different connections and has many built-in capabilities. You may want to install the netcat6 package if you are administering a network and you'd like to use its debugging and network exploration capabilities. TCP/IP swiss army knife.
Common Usage: Tool, Utility
Package Size: 340 KB (0.34 MB)
Folders / Files: 3 / 32
Source Path: wrlinux-4.0/layers/wrll-userspace/networking/packages

NOTICES:

From:
nc110/README
Netcat is entirely my own creation, although plenty of other code was used as examples. It is freely given away to the Internet community in the hope that it will be useful, with no restrictions except giving credit where it is due. No GPLs, Berkeley copyrights or any of that nonsense. The author assumes NO responsibility for how anyone uses it.

If netcat makes you rich somehow and you're feeling generous, mail me a check. If you are affiliated in any way with Microsoft Network, get a life. Always ski in control. Comments, questions, and patches to hobbit@avian.org.

nc6 1.0 aka netcat

ncurses-5.7-3.20090207.fc12.src/ncurses-5.7/ncurses-5.7/NEWS
2) **Pavel Curtis** has renounced his copyright to the public domain. This means that his original sources (posted to comp.sources.unix, volume 1) are now in the public domain. The current sources are NOT in the public domain, they are copyrighted by me. I'm entertaining ideas on what the new terms ncurses is released under.

From:

ncurses-5.7-3.20090207.fc12.src/ncurses-5.7/ncurses-5.7/misc/terminfo.src

This version of terminfo.src is distributed with ncurses and is maintained by Thomas E. Dickey (TD). Report bugs and new terminal descriptions to bug-ncurses@gnu.org

The original header is preserved below for reference. It is noted that there is a "newer" version which differs in some cosmetic details (but actually stopped updates several years ago); we have decided to not change the header unless there is also a change in content.

To further muddy the waters, it is noted that changes to this file as part of maintenance of ncurses (since 1996) are generally conceded to be copyright under the ncurses MIT-style license. That was the effect of the agreement which the principal authors of ncurses made in 1998. However, since much of the file itself is of unknown authorship (and the disclaimer below makes it obvious that Raymond cannot or will not convey rights over those parts), there is no explicit copyright notice on the file itself.

It would also be a nuisance to split the file into unknown/known authorship and move pieces as they are maintained, since many of the maintenance changes have been small corrections to Raymond's translations to/from termcap format, correcting the data but not the accompanying annotations.

In any case, note that almost half of this file is not data but annotations which reflect creative effort. Furthermore, the structure of entries to reuse common chunks also is creative (and subject to copyright). Finally, some portions of the data are derivative work under a compatible MIT-style license from xterm.

Some information has been merged in from terminfo files distributed by USL and SCO (see COPYRIGHTS AND OTHER DELUSIONS below). Much information comes from vendors who maintain official terminfos for their hardware (notably DEC and Wyse).

COPYRIGHTS AND OTHER DELUSIONS

The BSD ancestor of this file had a standard Regents of the University of California copyright with dates from 1980 to 1993.

Some information has been merged in from a terminfo file SCO distributes. It has an obnoxious boilerplate copyright which I'm ignoring because they took so much of the content from the ancestral BSD

versions of this file and didn't attribute it, thereby violating the BSD Regents' copyright.

Not that anyone should care. However many valid functions copyrights may serve, putting one on a termcap/terminfo file with hundreds of anonymous contributors makes about as much sense as copyrighting a wall-full of graffiti -- it's legally dubious, ethically bogus, and patently ridiculous.

This file deliberately has no copyright. It belongs to no one and everyone. If you claim you own it, you will merely succeed in looking like a fool. Use it as you like. Use it at your own risk. Copy and redistribute freely. There are no guarantees anywhere. Svaha!

ncurses-5.7-3.20090207.fc12.src/ncurses-5.7/ncurses-5.7/test/tclock.c
tclock - analog/digital clock for curses.

If it gives you joy, then

- (a) I'm glad
- (b) you need to get out more :-)

This program is **copyright Howard Jones, September 1994** (ha.jones@ic.ac.uk).

It may be freely distributed as long as this copyright message remains intact, and any modifications are clearly marked as such. [In fact, if you modify it, I wouldn't mind the modifications back, especially if they add any nice features. A good one would be a precalc table for the 60 hand positions, so that the floating point stuff can be ditched. As I said, it was a 20 hackup minute job.]

COMING SOON: tfishtank. Be the envy of your mac-owning colleagues.

Net-LibIDN 0.12 aka perl-Net-LibIDN

Software:	perl-Net-LibIDN
Version:	0.12
File or Package:	perl-Net-LibIDN-0.12.tar.gz
OSI Licenses:	GPLv1+, Perl Artistic
Other Licenses:	Custom
URL:	
Group:	User Space Libraries
Description:	Provides perl bindings for GNU Libidn, a C library for handling Internationalized Domain Names according to IDNA (RFC 3490), in a way very much inspired by Turbo Fredriksson's PHP-IDN.
Common Usage:	API, Docs, Library, Module
Package Size:	88 KB (0.085 MB)
Folders / Files:	3 / 15
Source Path:	wrlinux-4.0/layers/wrll- userspace/networking/packages

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

NOTICES:

From:
Net-LibIDN-0.12/Net-LibIDN-0.12/artistic
The "Artistic License"

Preamble - The intent of this document is to state the conditions under which a Package may be copied, such that the Copyright Holder maintains some semblance of artistic control over the development of the package, while giving the users of the package the right to use and distribute the Package in a more-or-less customary fashion, plus the right to make reasonable modifications.

Definitions:
"Package" refers to the collection of files distributed by the Copyright Holder, and derivatives of that collection of files created through textual modification.

"Standard Version" refers to such a Package if it has not been modified, or has been modified in accordance with the wishes of the Copyright Holder as specified below.

"Copyright Holder" is whoever is named in the copyright or copyrights for the package.

"You" is you, if you're thinking about copying or distributing this Package.

"Reasonable copying fee" is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)

"Freely Available" means that no fee is charged for the item itself, though there may be fees involved in handling the item. It also means that recipients of the item may redistribute it under the same conditions they received it.

1. You may make and give away verbatim copies of the source form of the Standard Version of this Package without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.

2. You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Package modified in such a way shall still be considered the Standard Version.

3. You may otherwise modify your copy of this Package in any way, provided that you insert a prominent notice in each changed file stating how and when you changed that file, and provided that you do at least ONE of the following:

a) place your modifications in the Public Domain or otherwise make them Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or placing the modifications on a major archive site such as uunet.uu.net, or by allowing the Copyright Holder to include your modifications in the Standard Version of the Package.

b) use the modified Package only within your corporation or organization.

c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide a separate manual page for each non-

document version 2.60

standard executable that clearly documents how it differs from the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

4. You may distribute the programs of this Package in object code or executable form, provided that you do at least ONE of the following:

a) distribute a Standard Version of the executables and library files, together with instructions (in the manual page or equivalent) on where to get the Standard Version.

b) accompany the distribution with the machine-readable source of the Package with your modifications.

c) give non-standard executables non-standard names, and clearly document the differences in manual pages (or equivalent), together with instructions on where to get the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

5. You may charge a reasonable copying fee for any distribution of this Package. You may charge any fee you choose for support of this Package. You may not charge a fee for this Package itself. However, you may distribute this Package in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution provided that you do not advertise this Package as a product of your own. You may embed this Package's interpreter within an executable of yours (by linking); this shall be construed as a mere form of aggregation, provided that the complete Standard Version of the interpreter is so embedded.

6. The scripts and library files supplied as input to or produced as output from the programs of this Package do not automatically fall under the copyright of this Package, but belong to whoever generated them, and may be sold commercially, and may be aggregated with this Package. If such scripts or library files are aggregated with this Package via the so-called "undump" or "unexec" methods of producing a binary executable image, then distribution of such an image shall neither be construed as a distribution of this Package nor shall it fall under the restrictions of Paragraphs 3 and 4, provided that you do not represent such an executable image as a Standard Version of this Package.

7. C subroutines (or comparably compiled subroutines in other languages) supplied by you and linked into this Package in order to emulate subroutines and variables of the language defined by this Package shall not be considered part of this Package, but are the equivalent of input as in Paragraph 6, provided these subroutines do not change the language in any way that would cause it to fail the regression tests for the language.

8. Aggregation of this Package with a commercial distribution is always permitted provided that the use of this Package is embedded; that is, when no overt attempt is made to make this Package's interfaces visible to the end user of the commercial distribution. Such use shall not be construed as a distribution of this Package.

9. The name of the Copyright Holder may not be used to endorse or promote products derived from this software without specific prior written permission.

COPYRIGHT AND LICENCE

Copyright 2003-2009, Thomas Jacob, Internet24.de All rights reserved

This program is free software; you can redistribute it and/or modify it under the terms of either:

a) the GNU General Public License as published by the Free Software Foundation; either version 1, or (at your option) any later version, or

b) the "Artistic License" which comes with this Kit.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See either the GNU General Public License or the Artistic License for more details.

You should have received a copy of the Artistic License with this Kit, in the file named "Artistic". If not, I'll be glad to provide one. You should also have received a copy of the GNU General Public License along with this program in the file named "Copying". If not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307, or visit their web page on the internet at <http://www.gnu.org/copyleft/gpl.html>.

For those of you that choose to use the GNU General Public License, my interpretation of the GNU General Public License is that no Perl script falls under the terms of the GPL unless you explicitly put said script under the terms of the GPL yourself. Furthermore, any object code linked with perl does not automatically fall under the terms of the GPL, provided such object code only adds definitions of subroutines and variables, and does not otherwise impair the resulting interpreter from executing any standard Perl script.

document version 2.60

I consider linking in C subroutines in this manner to be the moral equivalent of defining subroutines in the Perl language itself. You may sell such an object file as proprietary provided that you provide or offer to provide the Perl source, as specified by the GNU General Public License. (This is merely an alternate way of specifying input to the program.) You may also sell a binary produced by the dumping of a running Perl script that belongs to you, provided that you provide or offer to provide the Perl source as specified by the GPL. (The fact that a Perl interpreter and your code are in the same binary file is, in this case, a form of mere aggregation.) This is my interpretation of the GPL. If you still have concerns or difficulties understanding my intent, feel free to contact me. Of course, the Artistic License spells all this out for your protection, so you may prefer to use that.

From:

Net-LibIDN-0.12/Net-LibIDN-0.12/debian/rules

This debian/rules file is provided as a template for normal perl packages. It was created by **Marc Brockschmidt** <marc@dch-faq.de> for the Debian Perl Group (<http://pkg-perl.alioth.debian.org/>) but may be used freely wherever it is useful.

net-snmp 5.6.1-2

Software:	net-snmp
Version:	5.6.1-2
File or Package:	net-snmp-5.6.1-2.fc15.src.rpm
OSI Licenses:	GPLv2+ w/exception, BSDv1 (UCB), BSDv2, MIT/X11, Apache (variant), Apple Public Source v1.1, Apple Public Source v2.0, Perl Artistic, Academic, Public Domain
Other Licenses:	Custom
URL:	http://kojipkgs.fedoraproject.org/packages/net-snmp/5.6.1/2.fc15/src/net-snmp-5.6.1-2.fc15.src.rpm
Group:	User Space Apps / System Environment/Daemons
Description:	"Simple Network Management Protocol (SNMP) is a widely used protocol for monitoring the health and welfare of network equipment (eg. routers), computer equipment and even devices like UPSs. Net-SNMP is a suite of applications used to implement SNMP v1, SNMP v2c and SNMP v3 using both IPv4 and IPv6. The suite includes Application/library support for SNMP for customers who require this functionality. Uprev was necessary as old package was from Fedora Core 7. Net-SNMP is a suite of software for using and deploying the SNMP protocol (v1, v2c and v3 and the AgentX subagent protocol). It supports IPv4, IPv6, IPX, AAL5, Unix domain sockets and other transports.

It contains a generic client library, a suite of command line applications, a highly extensible SNMP agent, perl modules and python modules. This package was originally based on the CMU 2.1.2.1 snmp code. It has been greatly modified, restructured, enhanced and fixed. It hardly looks the same as anything that CMU has ever released. It was renamed from cmu-snmp to ucd-snmp in 1995 and later renamed from ucd-snmp to net-snmp in November 2000.

Common Usage: API, Client, Daemon, Library, Tool, Utility
Package Size: 29.66 MB
Folders / Files: 183 / 2,087
Source Path: [wrlinux-4.0/layers/wrll-userspace/networking/packages](#)

net-snmp-5.6.1-2.fc15.src/net-snmp-5.6.1/net-snmp-5.6.1/snmpplib/openssl/OPENSSL-LICENSE

LICENSE ISSUES

The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit. See below for the actual license texts. Actually both licenses are BSD-style Open Source licenses. In case of any license issues related to OpenSSL please contact openssl-core@openssl.org.

OpenSSL License

Copyright (c) 1998-2008 The OpenSSL Project. All rights reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgment: "This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit. (<http://www.openssl.org/>)"
4. The names "OpenSSL Toolkit" and "OpenSSL Project" must not be used to endorse or promote products derived from this software without prior written permission. For written permission, please contact openssl-core@openssl.org.

5. Products derived from this software may not be called "OpenSSL" nor may "OpenSSL" appear in their names without prior written permission of the OpenSSL Project.

6. Redistributions of any form whatsoever must retain the following acknowledgment: "This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (<http://www.openssl.org/>)"

THIS SOFTWARE IS PROVIDED BY THE OpenSSL PROJECT "AS IS" AND ANY EXPRESSED OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

IN NO EVENT SHALL THE OpenSSL PROJECT OR ITS CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

This product includes cryptographic software written by Eric Young (eyay@cryptsoft.com). This product includes software written by Tim Hudson (tjh@cryptsoft.com).

Original SSLeay License

Copyright (C) 1995-1998 Eric Young (eyay@cryptsoft.com) All rights reserved.

This package is an SSL implementation written by Eric Young (eyay@cryptsoft.com). The implementation was written so as to conform with Netscapes SSL. This library is free for commercial and non-commercial use as long as the following conditions are adhered to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, lhash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed. If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgement: "This product includes cryptographic software written by Eric Young (eyay@cryptsoft.com)" The

From:

net-snmp-5.6.1-2.fc15.src/net-snmp-5.5-apsl-copying.patch
Add APSL 2.0 license to the COPYING file. There is only one file covered by this license:
net-snmp-5.5/agent/mibgroup/host/data_access/swrun_darwin.c.

This file is not used on Linux at all, it's only present in source tarball and *net-snmp.src.rpm*. In addition, it's licensed under APSL 1.1, but it allows to relicense the code to 'any subsequent version of this License published by Apple'. According to <http://fedoraproject.org/wiki/Licensing>, APSL ver. 2.0 is better for us.

© 2009-2011 Wind River Systems, Inc.

document version 2.60

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Part 10: APPLE PUBLIC SOURCE LICENSE (APSL 2.0) Version 2.0 - August 6, 2003

Please read this License carefully before downloading this software. By downloading or using this software, you are agreeing to be bound by the terms of this License. If you do not or cannot agree to the terms of this License, please do not download or use the software.

Apple Note: In January 2007, Apple changed its corporate name from "Apple Computer, Inc." to "Apple Inc." This change has been reflected below and copyright years updated, but no other changes have been made to the APSL 2.0.

1. General; Definitions. This License applies to any program or other work which Apple Inc. ("Apple") makes publicly available and which contains a notice placed by Apple identifying such program or work as "Original Code" and stating that it is subject to the terms of this Apple Public Source License version 2.0 ("License"). As used in this License:

1.1 "Applicable Patent Rights" mean:

(a) in the case where Apple is the grantor of rights,

(i) claims of patents that are now or hereafter acquired, owned by or assigned to Apple and

(ii) that cover subject matter contained in the Original Code, but only to the extent necessary to use, reproduce and/or distribute the Original Code without infringement; and

(b) in the case where You are the grantor of rights,

(i) claims of patents that are now or hereafter acquired, owned by or assigned to You and

(ii) that cover subject matter in Your Modifications, taken alone or in combination with Original Code.

1.2 "Contributor" means any person or entity that creates or contributes to the creation of Modifications.

1.3 "Covered Code" means the Original Code, Modifications, the combination of Original Code and any Modifications, and/or any respective portions thereof.

1.4 "Externally Deploy" means:

(a) to sublicense, distribute or otherwise make Covered Code available, directly or indirectly, to anyone other than You; and/or

(b) to use Covered Code, alone or as part of a Larger Work, in any way to provide a service, including but not limited to delivery of content, through electronic communication with a client other than You.

1.5 "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.

1.6 "Modifications" mean any addition to, deletion from, and/or change to, the substance and/or structure of the Original Code, any previous Modifications, the combination of Original Code and any previous Modifications, and/or any respective portions thereof. When code is released as a series of files, a Modification is:

(a) any addition to or deletion from the contents of a file containing Covered Code; and/or

(b) any new file or other representation of computer program statements that contains any part of Covered Code.

1.7 "Original Code" means

(a) the Source Code of a program or other work as originally made available by Apple under this License, including the Source Code of any updates or upgrades to such programs or works made available by Apple under this License, and that has been expressly identified by Apple as such in the header file(s) of such work; and

(b) the object code compiled from such Source Code and originally made available by Apple under this License

1.8 "Source Code" means the human readable form of a program or other work that is suitable for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an executable (object code).

1.9 "You" or "Your" means an individual or a legal entity exercising rights under this License. For legal entities, "You" or "Your" includes any entity which controls, is controlled by, or is under common control with, You, where "control" means

(a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or

(b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.

2. Permitted Uses; Conditions & Restrictions.

Subject to the terms and conditions of this License, Apple hereby grants You, effective on the date You accept this License and download the Original Code, a world-wide, royalty-free, non-exclusive license, to the extent of Apple's Applicable Patent Rights and copyrights covering the Original Code, to do the following:

2.1 Unmodified Code. You may use, reproduce, display, perform, internally distribute within Your organization, and Externally Deploy verbatim, unmodified copies of the Original Code, for commercial or non-commercial purposes, provided that in each instance:

(a) You must retain and reproduce in all copies of Original Code the copyright and other proprietary notices and disclaimers of Apple as they appear in the Original Code, and keep intact all notices in the Original Code that refer to this License; and

(b) You must include a copy of this License with every copy of Source Code of Covered Code and documentation You distribute or Externally Deploy, and You may not offer or impose any terms on such Source Code that alter or restrict this License or the recipients' rights hereunder, except as permitted under Section 6.

2.2 Modified Code. You may modify Covered Code and use, reproduce, display, perform, internally distribute within Your organization, and Externally Deploy Your Modifications and Covered Code, for commercial

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

or non-commercial purposes, provided that in each instance You also meet all of these conditions:

(a) You must satisfy all the conditions of Section 2.1 with respect to the Source Code of the Covered Code;

(b) You must duplicate, to the extent it does not already exist, the notice in Exhibit A in each file of the Source Code of all Your Modifications, and cause the modified files to carry prominent notices stating that You changed the files and the date of any change; and

(c) If You Externally Deploy Your Modifications, You must make Source Code of all Your Externally Deployed Modifications either available to those to whom You have Externally Deployed Your Modifications, or publicly available. Source Code of Your Externally Deployed Modifications must be released under the terms set forth in this License, including the license grants set forth in Section 3 below, for as long as you Externally Deploy the Covered Code or twelve (12) months from the date of initial External Deployment, whichever is longer. You should preferably distribute the Source Code of Your Externally Deployed Modifications electronically (e.g. download from a web site).

2.3 Distribution of Executable Versions. In addition, if You Externally Deploy Covered Code (Original Code and/or Modifications) in object code, executable form only, You must include a prominent notice, in the code itself as well as in related documentation, stating that Source Code of the Covered Code is available under the terms of this License with information on how and where to obtain such Source Code.

2.4 Third Party Rights.

You expressly acknowledge and agree that although Apple and each Contributor grants the licenses to their respective portions of the Covered Code set forth herein, no assurances are provided by Apple or any Contributor that the Covered Code does not infringe the patent or other intellectual property rights of any other entity. Apple and each Contributor disclaim any liability to You for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, You hereby assume sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow You to distribute the Covered Code, it is Your responsibility to acquire that license before distributing the Covered Code.

3. Your Grants.

In consideration of, and as a condition to, the licenses granted to You under this License, You hereby grant to any person or entity receiving or distributing Covered Code under this License a non-exclusive, royalty-free, perpetual, irrevocable license, under Your Applicable Patent Rights and other intellectual property rights (other than patent) owned or controlled by You, to use, reproduce, display, perform, modify, sublicense, distribute and Externally Deploy Your Modifications of the same scope and extent as Apple's licenses under Sections 2.1 and 2.2 above.

4. Larger Works.

You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In each such instance, You must make sure the requirements of this License are fulfilled for the Covered Code or any portion thereof.

document version 2.60

5. Limitations on Patent License.

Except as expressly stated in Section 2, no other patent rights, express or implied, are granted by Apple herein. Modifications and/or Larger Works may require additional patent licenses from Apple which Apple may grant in its sole discretion.

6. Additional Terms.

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations and/or other rights consistent with the scope of the license granted herein ("Additional Terms") to one or more recipients of Covered Code. However, You may do so only on Your own behalf and as Your sole responsibility, and not on behalf of Apple or any Contributor. You must obtain the recipient's agreement that any such Additional Terms are offered by You alone, and You hereby agree to indemnify, defend and hold Apple and every Contributor harmless for any liability incurred by or claims asserted against Apple or such Contributor by reason of any such Additional Terms.

7. Versions of the License.

Apple may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Once Original Code has been published under a particular version of this License, You may continue to use it under the terms of that version. You may also choose to use such Original Code under the terms of any subsequent version of this License published by Apple. No one other than Apple has the right to modify the terms applicable to Covered Code created under this License.

8. NO WARRANTY OR SUPPORT.

The Covered Code may contain in whole or in part pre-release, untested, or not fully tested works. The Covered Code may contain errors that could cause failures or loss of data, and may be incomplete or contain inaccuracies. You expressly acknowledge and agree that use of the Covered Code, or any portion thereof, is at Your sole and entire risk.

THE COVERED CODE IS PROVIDED "AS IS" AND WITHOUT WARRANTY, UPGRADES OR SUPPORT OF ANY KIND AND APPLE AND APPLE'S LICENSOR(S) (COLLECTIVELY REFERRED TO AS "APPLE" FOR THE PURPOSES OF SECTIONS 8 AND 9) AND ALL CONTRIBUTORS EXPRESSLY DISCLAIM ALL WARRANTIES AND/OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES AND/OR CONDITIONS OF MERCHANTABILITY, OF SATISFACTORY QUALITY, OF FITNESS FOR A PARTICULAR PURPOSE, OF ACCURACY, OF QUIET ENJOYMENT, AND NONINFRINGEMENT OF THIRD PARTY RIGHTS.

APPLE AND EACH CONTRIBUTOR DOES NOT WARRANT AGAINST INTERFERENCE WITH YOUR ENJOYMENT OF THE COVERED CODE, THAT THE FUNCTIONS CONTAINED IN THE COVERED CODE WILL MEET YOUR REQUIREMENTS, THAT THE OPERATION OF THE COVERED CODE WILL BE UNINTERRUPTED OR ERROR-FREE, OR THAT DEFECTS IN THE COVERED CODE WILL BE CORRECTED. NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY APPLE, AN APPLE AUTHORIZED REPRESENTATIVE OR ANY CONTRIBUTOR SHALL CREATE A WARRANTY.

You acknowledge that the Covered Code is not intended for use in the operation of nuclear facilities, aircraft navigation, communication systems, or air traffic control machines in which case the failure of the Covered Code could lead to death, personal injury, or severe physical or environmental damage.

9. LIMITATION OF LIABILITY.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

TO THE EXTENT NOT PROHIBITED BY LAW, IN NO EVENT SHALL APPLE OR ANY CONTRIBUTOR BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF OR RELATING TO THIS LICENSE OR YOUR USE OR INABILITY TO USE THE COVERED CODE, OR ANY PORTION THEREOF, WHETHER UNDER A THEORY OF CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), PRODUCTS LIABILITY OR OTHERWISE, EVEN IF APPLE OR SUCH CONTRIBUTOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES AND NOTWITHSTANDING THE FAILURE OF ESSENTIAL PURPOSE OF ANY REMEDY. SOME JURISDICTIONS DO NOT ALLOW THE LIMITATION OF LIABILITY OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS LIMITATION MAY NOT APPLY TO YOU.

In no event shall Apple's total liability to You for all damages (other than as may be required by applicable law) under this License exceed the amount of fifty dollars (\$50.00).

10. Trademarks.

This License does not grant any rights to use the trademarks or trade names "Apple", "Mac", "Mac OS", "QuickTime", "QuickTime Streaming Server" or any other trademarks, service marks, logos or trade names belonging to Apple (collectively "Apple Marks") or to any trademark, service mark, logo or trade name belonging to any Contributor. You agree not to use any Apple Marks in or as part of the name of products derived from the Original Code or to endorse or promote products derived from the Original Code other than as expressly permitted by and in strict compliance at all times with Apple's third party trademark usage guidelines which are posted at <http://www.apple.com/legal/guidelinesfor3rdparties.html>.

11. Ownership.

Subject to the licenses granted under this License, each Contributor retains all rights, title and interest in and to any Modifications made by such Contributor. Apple retains all rights, title and interest in and to the Original Code and any Modifications made by or on behalf of Apple ("Apple Modifications"), and such Apple Modifications will not be automatically subject to this License. Apple may, at its sole discretion, choose to license such Apple Modifications under this License, or on different terms from those contained in this License or may choose not to license them at all.

12. Termination.

12.1 Termination.

This License and the rights granted hereunder will terminate:

(a) automatically without notice from Apple if You fail to comply with any term(s) of this License and fail to cure such breach within 30 days of becoming aware of such breach;

(b) immediately in the event of the circumstances described in Section 13.5(b); or

(c) automatically without notice from Apple if You, at any time during the term of this License, commence an action for patent infringement against Apple; provided that Apple did not first commence an action for patent infringement against You in that instance.

12.2 Effect of Termination.

Upon termination, You agree to immediately stop any further use, reproduction, modification, sublicensing and distribution of the Covered Code. All sublicenses to the Covered Code which have been properly granted prior to termination shall survive any termination of this License.

document version 2.60

Provisions which, by their nature, should remain in effect beyond the termination of this License shall survive, including but not limited to Sections 3, 5, 8, 9, 10, 11, 12.2 and 13. No party will be liable to any other for compensation, indemnity or damages of any sort solely as a result of terminating this License in accordance with its terms, and termination of this License will be without prejudice to any other right or remedy of any party.

13. Miscellaneous.

13.1 Government End Users.

The Covered Code is a "commercial item" as defined in FAR 2.101. Government software and technical data rights in the Covered Code include only those rights customarily provided to the public as defined in this License. This customary commercial license in technical data and software is provided in accordance with FAR 12.211 (Technical Data) and 12.212 (Computer Software) and, for Department of Defense purchases, DFAR 252.227-7015 (Technical Data - Commercial Items) and 227.7202-3 (Rights in Commercial Computer Software or Computer Software Documentation). Accordingly, all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

13.2 Relationship of Parties.

This License will not be construed as creating an agency, partnership, joint venture or any other form of legal association between or among You, Apple or any Contributor, and You will not represent to the contrary, whether expressly, by implication, appearance or otherwise.

13.3 Independent Development.

Nothing in this License will impair Apple's right to acquire, license, develop, have others develop for it, market and/or distribute technology or products that perform the same or similar functions as, or otherwise compete with, Modifications, Larger Works, technology or products that You may develop, produce, market or distribute.

13.4 Waiver; Construction.

Failure by Apple or any Contributor to enforce any provision of this License will not be deemed a waiver of future enforcement of that or any other provision. Any law or regulation which provides that the language of a contract shall be construed against the drafter will not apply to this License.

13.5 Severability.

(a) If for any reason a court of competent jurisdiction finds any provision of this License, or portion thereof, to be unenforceable, that provision of the License will be enforced to the maximum extent permissible so as to effect the economic benefits and intent of the parties, and the remainder of this License will continue in full force and effect.

(b) Notwithstanding the foregoing, if applicable law prohibits or restricts You from fully and/or specifically complying with Sections 2 and/or 3 or prevents the enforceability of either of those Sections, this License will immediately terminate and You must immediately discontinue any use of the Covered Code and destroy all copies of it that are in your possession or control.

13.6 Dispute Resolution.

Any litigation or other dispute resolution between You and Apple relating to this License shall take place in the Northern District of California, and You and Apple hereby consent to the personal jurisdiction of, and venue in, the state and federal courts within that District with respect to this

License. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded.

13.7 Entire Agreement; Governing Law.

This License constitutes the entire agreement between the parties with respect to the subject matter hereof. This License shall be governed by the laws of the United States and the State of California, except that body of California law concerning conflicts of law.

Where You are located in the province of Quebec, Canada, the following clause applies: The parties hereby confirm that they have requested that this License and all related documents be drafted in English. Les parties ont exigé que le présent contrat et tous les documents connexes soient rédigés en anglais.

From:
net-snmp-5.6.1-2.fc15.src/net-snmp-5.6.1/net-snmp-5.6.1/agent/mibgroup/disman/traceroute/traceRouteCtlTable.h
I stole the idea for this program from Steve Deering. Since the first release, I've learned that had I attended the right IETF working group meetings, I also could have stolen it from Guy Almes or Matt Mathis. I don't know (or care) who came up with the idea first. I envy the originators' perspicacity and I'm glad they didn't keep the idea a secret.

net-tools 1.60-95

Software:	net-tools
Version:	1.60-95
File or Package:	net-tools-1.60-95.fc12.src.rpm
OSI Licenses:	GPLv2, GPLv2+
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/ releases/12/Everything/source/SRPMS/ net-tools-1.60-95.fc12.src.rpm
Group:	User Space Apps / System Environment/Base
Description:	Basic networking tools. A collection of programs that form the base set of the NET-3 networking distribution for the Linux operating system. The net-tools package contains a collection of programs that form the base set of the NET-3 networking distribution for the Linux operating system. It contains the important tools for controlling the network subsystem of the Linux kernel including arp, hostname, ifconfig, netstat, rarp and route. Additionally, this package contains utilities relating to particular network hardware types (plipconfig, slattach) and advanced aspects of IP configuration (iptunnel, ipmaddr).
Common Usage:	Utilities
Package Size:	2.4 MB
Folders / Files:	25 / 256
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

Other Licenses: Custom
URL: http://ftp.debian.org/debian/pool/main/n/newt/newt_0.52.2.orig.tar.gz
Group: System Environment/Libraries
Description: Newt (programming library) is a programming library for color text mode, widget-based user interfaces. Newt can be used to add stacked windows, entry widgets, checkboxes, radio buttons, labels, plain text fields, scrollbars, etc., to text mode user interfaces. This package also contains the shared library needed by programs built with newt, as well as an application whiptail, which provides the most commonly-used features of dialog. Newt is based on the slang library. It abbreviates from Not Erik's Windowing Toolkit.
Common Usage: Library

nfs-server 2.2beta51-246

Software:	nfs-server
Version:	2.2beta51-246
File or Package:	nfs-server-2.2beta51-246.src.rpm
OSI Licenses:	GPLv2, GPLv2+, Academic, Public Domain
Other Licenses:	Custom
URL:	
Group:	Networking/Daemons/Productivity/Networking/NFS
Description:	The NFS and mount daemons are used to create an NFS server which can export filesystems to other machines. This package contains all necessary programs to make your Linux machine act as an NFS server, being an NFS daemon (rpc.nfsd), a mount daemon (rpc.mountd), optionally, the uid mapping daemon (rpc.ugidd), and the showmount utility. This package is not needed to mount NFS filesystems -- that functionality is already in the Linux kernel. This package contains all necessary programs to make your Linux machine act as an NFS server, being an NFS daemon (rpc.nfsd), a mount daemon (rpc.mountd), optionally, the uid mapping daemon (rpc.ugidd), and the showmount utility.
Common Usage:	Daemon
Package Size:	1.4 MB
Folders / Files:	3 / 120
Source Path:	wrlinux-4.0/layers/wrll-simulator/packages

1. Overview

This package contains all necessary programs to make your Linux machine act as an NFS server, being an NFS daemon (rpc.nfsd), a mount daemon (rpc.mountd), optionally, the uid mapping daemon (rpc.ugidd), and the showmount utility. It was originally developed by Mark Shand, and further enhanced by Donald Becker, Rick Sladkey, Orest Zborowski, Fred van Kempen, and Olaf Kirch.

7. Copyright

Much of the code in this package was originally written by **Mark Shand**, and is placed under the following **copyright**:

This software may be used for any purpose provided the above copyright notice is retained. It is supplied as is, with no warranties expressed or implied. Other code, especially that written by Rick Sladkey and some replacement routines included from the GNU libc, are covered by the GNU General Public License, version 2, or (at your option) any later version.

nfs-utils 1.2.3-10

Software:	nfs-utils
Version:	1.2.3-10
File or Package:	nfs-utils-1.2.3-10.fc15.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception (autoconf, libtool), LGPLv2.1+, MIT/X11, FreeBSD, BSDv2, Attribution, Permissive
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/15/Fedora/source/SRPMS/nfs-utils-1.2.3-10.fc15.src.rpm
Group:	User Space Apps / System Environment/Daemons
Description:	NFS utilities and supporting clients and daemons for the kernel NFS server. The nfs-utils package provides a daemon for the kernel NFS server and related tools, which provides a much higher level of performance than the traditional Linux NFS server used by most users. This package also contains the showmount program. Showmount queries the mount daemon on a remote host for information about the NFS (Network File System) server on the remote host. For example, showmount can display the clients which are mounted on that host. This package also contains the mount.nfs and umount.nfs program.
Common Usage:	Utility, Tool, Daemon
Package Size:	5.73 MB
Folders / Files:	34 / 321
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

NOTICES:

From:
nfs-utils-1.2.3-10.fc15.src/nfs-utils.spec
Summary: NFS utilities and supporting clients and daemons for the kernel NFS server
Name: nfs-utils

From:
nfs-utils-1.2.3-10.fc15.src/nfs-utils-1.2.3/nfs-utils-1.2.3/support/nfs/exports.c
Derived from the unfsd implementation.
Authors: **Donald J. Becker**, <becker@super.org>,
Rick Sladkey, <jrs@world.std.com>,
Fred N. van Kempen, <waltje@uWalt.NL.Mugnet.ORG>,
Olaf Kirch, <okir@monad.swb.de>,
Alexander O. Yuriev, <alex@bach.cis.temple.edu>

This software maybe be used for any purpose provided the above copyright notice is retained. It is supplied as is, with no warranty expressed or implied.

♦♦♦

From:
nfs-utils-1.2.3-10.fc15.src/nfs-utils-1.2.3/nfs-utils-1.2.3/support/nfs/rpcmisc.c
This code is partially snarfed from rpcgen -s tcp -s udp, partly written by **Mark Shand, Donald Becker, and Rick Sladkey**.
It was tweaked slightly by Olaf Kirch to be usable by both unfsd and mound.

This software may be used for any purpose provided the above copyright notice is retained. It is supplied as is, with no warranty expressed or implied.

nspr 4.8.2-1

Software: nspr
Version: 4.8.2-1
File or Package: nspr-4.8.2-1.fc12.src.rpm
OSI Licenses: GPLv2+, GPLv2+ w/exception, LGPLv2.1+, Mozilla (MPL) v1.1, MIT/X11, Beer-Ware v.42
Other Licenses: Custom
URL: <http://mirror.cpsc.ucalgary.ca/mirror/fedora/linux/releases/12/Fedora/source/SRPMS/nspr-4.8.2-1.fc12.src.rpm>
Group: User Space Libraries / Development/Libraries
Description: Netscape Portable Runtime (NSPR) provides a platform-neutral API for system level and libc like functions. The API is used in the Mozilla clients and many of Red Hat's, Sun's, and other software offerings. Development libraries for the Netscape Portable Runtime; In computing, the Netscape Portable Runtime, or NSPR, a platform abstraction library, makes all operating systems it supports appear the same to (for example) Mozilla-style web-browsers. NSPR provides platform independence for non-GUI operating system facilities.
Common Usage: API, Docs, Library, SDK
Package Size: 9.3 MB
Folders / Files: 53 / 690
Source Path: [wrlinux-4.0/layers/wrl-userspace/security/packages](#)

Group:	User Space Libraries / System Environment/Base
Description:	Network Security Services (NSS) is a set of libraries designed to support cross-platform development of

document version 2.60

security-enabled client and server applications. Applications built with NSS can support SSL v2 and v3, TLS, PKCS 5, PKCS 7, PKCS 11, PKCS 12, S/MIME, X.509 v3 certificates, and other security standards. For detailed information on standards supported, see Overview of NSS. NSS is used throughout WR-Linux for cryptographic and security services. Tools for the Network Security Services; Network Security Services (NSS) comprises a set of libraries designed to support cross-platform development of security-enabled client and server applications. NSS provides a complete open-source implementation of crypto libraries supporting SSL and S/MIME.

Common Usage: API, Library, Plugin, SDK, Utility

This software is provided 'as-is', without any express or implied warranty. In no event will the authors be held liable for any damages arising from the use of this software. Permission is granted to anyone to use this software for any purpose, including commercial applications, and to alter it and redistribute it freely, subject to the following restrictions:

1. The origin of this software must not be misrepresented; you must not claim that you wrote the original software. If you use this software in a product, an acknowledgment in the product documentation would be appreciated but is not required.
2. Altered source versions must be plainly marked as such, and must not be misrepresented as being the original software.
3. This notice may not be removed or altered from any source distribution.

Jean-loup Gailly Mark Adler

jloup@gzip.org madler@alumni.caltech.edu

If you use the zlib library in a product, we would appreciate not receiving lengthy legal documents to sign. The sources are provided for free but without warranty of any kind. The library has been entirely written by Jean-loup Gailly and Mark Adler; it does not include third-party code. If you redistribute modified sources, we would appreciate that you include in the file ChangeLog history information documenting your changes. Please read the FAQ for more information on the distribution of modified source versions.

ntop 3.2-0

Software: ntop
Version: 3.2-0
File or Package: ntop-3.2-0.src.rpm
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, MIT/X11, FreeBSD, BSDv1 (UCB), Apple Public Source v1.1
Other Licenses: Custom
URL: <http://cdnetworks-kr-2.dl.sourceforge.net/project/ntop/ntop/3.2/ntop-3.2-0.src.rpm>
Group: User Space Apps / Networking/Utilities
Description: Web-based network traffic monitor. ntop is a network and traffic analyzer that provides a wealth of information on various networking hosts and protocols. ntop is primarily accessed via a built-in web interface. Optionally, data may be stored into a database for analysis or extracted from the web server in formats suitable for manipulation in perl or php. ntop shows the network usage. ntop is a network traffic probe that shows the network usage, similar to what the popular top Unix command does. ntop is based on libpcap and it has been written in a portable way in order to virtually run on every Unix platform and on Win32 as well. ntop is a web-based traffic monitor that shows the network usage. It can be used in both interactive or web mode using the embedded web server.
Common Usage: Utility
Package Size: 23.9 MB

♦♦♦

From:

ntop-3.2-0.src/ntop-3.2/ntop-3.2/packages/debian.official/copyright
This package was debianized by Rocco Carbone <rocco@ntop.org> on Fri, 5 Mar 2004 09:37:13 +0100 from sources at SourceForge mirror: <http://switch.dl.sourceforge.net/sourceforge/ntop/ntop-3.0pre2.tgz>

This is an unofficial distribution mainly because I have no time to become a Debian maintainer.

Upstream Author: **Luca Deri** <deri@ntop.org>

document version 2.60

Description: Synchronizes system time using the Network Time Protocol (NTP). The Network Time Protocol (NTP) is a protocol for synchronizing the clocks of computer systems over packet-switched, variable-latency data networks. It is designed particularly to resist the effects of variable latency by using a jitter buffer. NTP is one of the oldest Internet protocols still in use (since before 1985). NTP was originally designed by David L. Mills of the University of Delaware, who still maintains it with a team of volunteers.

Common Usage: Daemon
Package Size: 26.4 MB
Folders / Files: 111 / 1,200
Source Path: wrlinux-4.0/layers/wrll-
userspace/networking/packages

document version 2.60

Permission to use, copy, modify, and distribute this software and its documentation for any purpose with or without fee is hereby granted, provided that the above copyright notice appears in all copies and that both the copyright notice and this permission notice appear in supporting documentation, and that the name University of Delaware not be used in advertising or publicity pertaining to distribution of the software without specific, written prior permission. The University of Delaware makes no representations about the suitability this software for any purpose. It is provided "as is" without express or implied warranty.

The following individuals contributed in part to the Network Time Protocol Distribution Version 4 and are acknowledged as authors of this work.

1. [1]Mark Andrews <mark_andrews@isc.org> Leitch atomic clock controller
2. [2]Bernd Altmeier <altmeier@atlsoft.de> hopf Elektronik serial line and PCI-bus devices
3. [3]Viraj Bais <vbais@mailman1.intel.com> and [4]Clayton Kirkwood <kirkwood@striderfm.intel.com> port to WindowsNT 3.5
4. [5]Michael Barone <michael.barone@lmco.com> GPSVME fixes
5. [6]Jean-Francois Boudreault <Jean-Francois.Boudreault@viagenie.qc.ca> IPv6 support
6. [7]Karl Berry <karl@owl.HQ.ileaf.com> syslog to file option
7. [8]Greg Brackley <greg.brackley@bigfoot.com> Major rework of WINNT port. Clean up recvbuf and iosignal code into separate modules.
8. [9]Marc Brett <Marc.Brett@westgeo.com> Magnavox GPS clock driver
9. [10]Piete Brooks <Piete.Brooks@cl.cam.ac.uk> MSF clock driver, Trimble PARSE support
10. [11]Reg Clemens <reg@dwf.com> Oncore driver (Current maintainer)
11. [12]Steve Clift <clift@ml.csiro.au> OMEGA clock driver
12. [13]Casey Crellin <casey@csc.co.za> vxWorks (Tornado) port and help with target configuration
13. [14]Sven Dietrich <sven_dietrich@trimble.com> Palisade reference clock driver, NT adj. residuals, integrated Greg's Winnt port.
14. [15]John A. Dundas III <dundas@salt.jpl.nasa.gov> Apple A/UX port
15. [16]Torsten Duwe <duwe@immd4.informatik.uni-erlangen.de> Linux port
16. [17]Dennis Ferguson <dennis@mrbill.canet.ca> foundation code for NTP Version 2 as specified in RFC-1119
17. [18]John Hay <jhay@icomtek.csir.co.za> IPv6 support and testing
18. [19]Dave Hart <davehart@davehart.com> General maintenance, Windows port interpolation rewrite.
19. [20]Claas Hilbrecht <neoclock4x@linum.com> NeoClock4X clock driver
20. [21]Glenn Hollinger <glenn@herald.usask.ca> GOES clock driver
21. [22]Mike Iglesias <iglesias@uci.edu> DEC Alpha port
22. [23]Jim Jagielski <jim@jagubox.gsfc.nasa.gov> A/UX port
23. [24]Jeff Johnson <jbj@chatham.usdesign.com> massive prototyping overhaul
24. [25]Hans Lambermont <Hans.Lambermont@nl.origin-it.com> or [26]<H.Lambermont@chello.nl> ntpswep
25. [27]Poul-Henning Kamp <phk@FreeBSD.ORG> Oncore driver (Original author)
26. [28]Frank Kardel [29]<kardel(at)ntp(dot)org> PARSE <GENERIC> driver (>14 reference clocks), STREAMS modules for PARSE, support scripts, syslog cleanup, dynamic interface handling
27. [30]William L. Jones <jones@hermes.chpc.utexas.edu> RS/6000 AIX modifications, HP/UX modifications
28. [31]Dave Katz <dkatz@cisco.com> RS/6000 AIX port
29. [32]Craig Leres <leres@ee.lbl.gov> 4.4BSD port, ppsclock, Magnavox GPS clock driver
30. [33]George Lindholm <lindholm@ucs.ubc.ca> SunOS 5.1 port
31. [34]Louis A. Mamakos <louie@ni.umd.edu> MD5-based authentication

© 2009-2011 Wind River Systems, Inc.

32. [35]Lars H. Mathiesen <thorinn@diku.dk> adaptation of foundation code for Version 3 as specified in RFC-1305
33. [36]Danny Mayer <mayer@ntp.org> Network I/O, Windows Port, Code Maintenance
34. [37]David L. Mills <mills@udel.edu> Version 4 foundation: clock discipline, authentication, precision kernel; clock drivers: Spectracom, Austron, Arbiter, Heath, ATOM, ACTS, KSI/Odetics; audio clock drivers: CHU, WWV/H, IRIG
35. [38]Wolfgang Moeller <moeller@gwdgv1.dnet.gwdg.de> VMS port
36. [39]Jeffrey Mogul <mogul@pa.dec.com> ntptrace utility
37. [40]Tom Moore <tmoore@fielvel.daytonoh.ncr.com> i386 svr4 port
38. [41]Kamal A Mostafa <kamal@whence.com> SCO OpenServer port
39. [42]Derek Mulcahy <derek@toybox.demon.co.uk> and [43]Damon Hart-Davis <d@hd.org> ARCRON MSF clock driver
40. [44]Rob Neal <neal@ntp.org> Bancomm refclock and config/parse code maintenance
41. [45]Rainer Pruy <Rainer.Pruy@informatik.uni-erlangen.de> monitoring/trap scripts, statistics file handling
42. [46]Dirce Richards <dirce@zk3.dec.com> Digital UNIX V4.0 port
43. [47]Wilfredo Sánchez <wsanchez@apple.com> added support for NetInfo
44. [48]Nick Sayer <mrapple@quack.kfu.com> SunOS streams modules
45. [49]Jack Sasportas <jack@innovativeinternet.com> Saved a Lot of space on the stuff in the html/pic/ subdirectory
46. [50]Ray Schnitzler <schnitz@unipress.com> Unixware1 port
47. [51]Michael Shields <shields@tembel.org> USNO clock driver
48. [52]Jeff Steinman <jss@pebbles.jpl.nasa.gov> Datum PTS clock driver
49. [53]Harlan Stenn <harlan@pfcs.com> GNU automake/autoconfigure makeover, various other bits (see the ChangeLog)
50. [54]Kenneth Stone <ken@sdd.hp.com> HP-UX port
51. [55]Ajit Thyagarajan <ajit@ee.udel.edu> IP multicast/anycast support
52. [56]Tomoaki TSURUOKA <tsuruoka@nc.fukuoka-u.ac.jp> TRAK clock driver
53. [57]Paul A Vixie <vixie@vix.com> TrueTime GPS driver, generic TrueTime clock driver
54. [58]Ulrich Windl <Ulrich.Windl@rz.uni-regensburg.de> corrected and validated HTML documents according to the HTML DTD

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

AutoGen is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <<http://www.gnu.org/licenses/>>.

As a special exception, Bruce Korb gives permission for additional uses of the text contained in the release of compat.h. The exception is that, if you link the compat.h library with other files to produce an executable, this does not by itself cause the resulting executable to be covered by the GNU General Public License. Your use of that executable is in no way restricted on account of linking the compat.h library code into it.

This exception does not however invalidate any other reasons why the executable file might be covered by the GNU General Public License. This exception applies only to the code released by Bruce Korb under the name compat.h. If you copy code from other sources under the General Public License into a copy of compat.h, as the General Public License permits, the exception does not apply to the code that you add in this way. To avoid misleading anyone as to the status of such modified files, you must delete this exception notice from them. If you write modifications of your own for compat.h, it is your choice whether to permit this exception to apply to your modifications. If you do not wish that, delete this exception notice.

As a special exception, you may create a larger work that contains part or all of the Bison parser skeleton and distribute that work under terms of your choice, so long as that work isn't itself a parser generator using the skeleton or a modified version thereof as a parser skeleton. Alternatively, if you modify or redistribute the parser skeleton itself, you may (at your option) remove this special exception, which will cause the skeleton and the resulting Bison output files to be licensed under the GNU General Public License without this special exception. This special exception was added by the Free Software Foundation in version 2.2 of Bison.

From:
ntp-4.2.6p1-2.fc13.src/ntp-4.2.6p1/ntp-4.2.6p1/readme.y2kfixes
This is the "readme" file for the freeware application which has been certified by AT&T Labs as part of the "Freeware Y2K Certification Project".

DISCLAIMER

For its own internal business purposes AT&T Labs has assessed various programs obtained from the Internet for Year-2000 (Y2K) readiness that were not sufficiently certified for AT&T's needs. As a service to the computing community AT&T Labs is freely releasing this information to the public as a series of "Y2K Application Updates", one update for what AT&T Labs considers an "application".

For use outside of AT&T, AT&T Labs is not certifying this information is correct, that any software, including repairs and tests, will help others in any way, survive the year 2000, nor work with current applications. Nor is AT&T taking any responsibility for repairing any Y2K problems that were overlooked nor repairing any bugs in any "Y2K Application Update". All risk of using this Y2K Application Update remains with the user who is expected to test that this update meets their needs.

LICENSE TO USE

AT&T's intent is to ensure these Y2K patches are freely available to the public but will not maintain a public web site for their distribution. Any copyright claims only apply to the specific changes made by Y2K to the code. Any original copyright holders retain rights to unchanged code. Wherever possible patches will be returned to the current owner(s) of the code.

Owners and publishers are free to incorporate appropriate patches, upgrades, and tests within legal future distributions as long as they include the credit:

Various Y2K updates and tests provided by AT&T Labs.
Copyright 1999 AT&T.

and any AT&T "comments" on the changed code remain intact. Any distributions of the updates must keep the entire update intact, without any change, including copyright and disclaimer information. If integrated with the original application items not needed for an integrated release may be omitted. When distributed on the same media as the original application there must be no charge for this "Y2k Application Update".

CONTACTS

document version 2.60

If you find any overlooked Y2K problems, or have other strictly Y2K repairs for the software, please E-mail:
y2k@y2k.labs.att.com

This address is strictly reserved for the topic at hand.

AT&T makes no commitments to answer any E-mail to this address. AT&T is free to use any submissions, including publishing in future Y2K related release notes, without payment or advance notice to the submitting person or persons... appropriate credit will be given in any future publications to the first person submitting something that AT&T uses.

Group:	User Space Apps / System Environment/Base
Description:	Library for tuning for Non Uniform Memory Access machines. Simple NUMA policy support. It consists of a numactl program to run other programs with a specific NUMA policy and a libnuma to do allocations with NUMA policy in applications.
Common Usage:	Library, Utility
Package Size:	620 KB (0.6 MB)
Folders / Files:	4 / 74
Source Path:	wrlinux-4.0/layers/wrll-userspace/cgl/packages

NOTICES:

document version 2.60

From:
numactl-2.0.3-8.fc13.src/numactl-2.0.3/numactl-2.0.3/readme
Simple NUMA policy support. It consists of a numactl program to run other programs with a specific NUMA policy and a libnuma shared library ("NUMA API") to set NUMA policy in applications. See the manpages numactl.8 and numa.3 for details.

Copyright: numactl and the demo programs are under the GNU General Public License, v2 libnuma is under the GNU Lesser General Public License, v2.1. The manpages are under the same license as the Linux manpages (see the files)

numademo links with a library derived from the C version of STREAM by John D. McCalpin and Joe R. Zagar for one sub benchmark. See stream_lib.c for the license. In particular when you publish numademo output you might need to pay attention there or filter out the STREAM results. It also uses a public domain Mersenne Twister implementation from Michael Brundage.

Group:	User Space Libraries/Applications/System/ System Environment/Kernel/ System Environment/Base
Description:	OCFS2 Tools is a collection of utility programs to create, manage, debug and repair the OCFS2 filesystem. It includes utilities like mkfs.ocfs2(8), fsck.ocfs2(8), tuneefs.ocfs2(8), mount.ocfs2(8) and debugfs.ocfs2(8). Oracle Cluster Filesystem version 2 Tools; OCFS stands for Oracle Cluster File System. It is a

document version 2.60

shared disk file system developed by Oracle Corporation and released under the GNU General Public License. Programs to manage the Ocfs2 cluster file system, including mkfs.ocfs2, tune2fs.ocfs2 and fsck.ocfs2. Ocfs2 is a general purpose extent based shared disk cluster file system. It supports 64 bit inode numbers, and has automatically extending metadata groups which may also make it attractive for non-clustered use. Ocfs2 leverages some well tested kernel technologies, such as JBD - the same journaling subsystem in use by ext3.

Common Usage: Docs, Tool, Utility
Package Size: 5.4 MB
Folders / Files: 46 / 424

Description: OPENAIS Project - The openais Standards-Based Cluster Framework executive and APIs. This package contains the openais executive, openais service handlers, default configuration files and init script. OpenAIS is an open source implementation of the SA Forum (www.saforum.org) Application Interface Specification. The project currently implements APIs to improve availability by reducing MTTR. APIs available are cluster membership, application failover, checkpointing, eventing, distributed locking, messaging, closed process groups, and extended virtual synchrony passthrough. It is possible to write redundant applications that tolerate hardware, operating system, and application faults. Cluster software developers can write plugins to use the infrastructure provided by OpenAIS.

Common Usage: API, Daemon, Library, Utility
Package Size: 4.4 MB
Folders / Files: 13 / 142
Source Path: wrlinux-4.0/layers/wrll-userspace/cgl/packages

Group:	User Space libraries / Applications/System / System/Monitoring
Description:	openhpi Hardware Platform Interface (HPI) library and tools. OpenHPI is an open source project created with the intent of providing an implementation of the SA Forum's Hardware Platform Interface (HPI). HPI provides an abstracted interface to managing computer hardware, typically for chassis and rack based servers. HPI includes resource modeling; access to and control over sensor, control, watchdog, and inventory data associated with resources; abstracted System Event Log interfaces; hardware events and alerts; and a managed hotswap interface. OpenHPI provides a modular mechanism for adding new hardware and device support easily. Many plugins exist in the OpenHPI source tree to provide access to various types of hardware. This includes, but is not limited to, IPMI based servers, Blade Center, and machines which export data via sysfs.

Open Publication License v1.0, 8 June 1999

I. REQUIREMENTS ON BOTH UNMODIFIED AND MODIFIED VERSIONS

The Open Publication works may be reproduced and distributed in whole or in part, in any medium physical or electronic, provided that the terms of this license are adhered to, and that this license or an incorporation of it by reference (with any options elected by the author(s) and/or publisher) is displayed in the reproduction.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Proper form for an incorporation by reference is as follows:

Copyright (c) <year> by <author's name or designee>. This material may be distributed only subject to the terms and conditions set forth in the Open Publication License, vX.Y or later (the latest version is presently available at <http://www.opencontent.org/openpub/>).

The reference must be immediately followed with any options elected by the author(s) and/or publisher of the document (see section VI).

Commercial redistribution of Open Publication-licensed material is permitted.

Any publication in standard (paper) book form shall require the citation of the original publisher and author. The publisher and author's names shall appear on all outer surfaces of the book. On all outer surfaces of the book the original publisher's name shall be as large as the title of the work and cited as possessive with respect to the title.

II. COPYRIGHT

The copyright to each Open Publication is owned by its author(s) or designee.

III. SCOPE OF LICENSE

The following license terms apply to all Open Publication works, unless otherwise explicitly stated in the document.

Mere aggregation of Open Publication works or a portion of an Open Publication work with other works or programs on the same media shall not cause this license to apply to those other works. The aggregate work shall contain a notice specifying the inclusion of the Open Publication material and appropriate copyright notice.

SEVERABILITY. If any part of this license is found to be unenforceable in any jurisdiction, the remaining portions of the license remain in force.

NO WARRANTY. Open Publication works are licensed and provided "as is" without warranty of any kind, express or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose or a warranty of non-infringement.

IV. REQUIREMENTS ON MODIFIED WORKS

All modified versions of documents covered by this license, including translations, anthologies, compilations and partial documents, must meet the following requirements:

1. The modified version must be labeled as such.
2. The person making the modifications must be identified and the modifications dated.
3. Acknowledgement of the original author and publisher if applicable must be retained according to normal academic citation practices.
4. The location of the original unmodified document must be identified.
5. The original author's (or authors') name(s) may not be used to assert or imply endorsement of the resulting document without the original author's (or authors') permission.

V. GOOD-PRACTICE RECOMMENDATIONS

document version 2.60

In addition to the requirements of this license, it is requested from and strongly recommended of redistributors that:

1. If you are distributing Open Publication works on hardcopy or CD-ROM, you provide email notification to the authors of your intent to redistribute at least thirty days before your manuscript or media freeze, to give the authors time to provide updated documents. This notification should describe modifications, if any, made to the document.
2. All substantive modifications (including deletions) be either clearly marked up in the document or else described in an attachment to the document.
3. Finally, while it is not mandatory under this license, it is considered good form to offer a free copy of any hardcopy and CD-ROM expression of an Open Publication-licensed work to its author(s).

VI. LICENSE OPTIONS

The author(s) and/or publisher of an Open Publication-licensed document may elect certain options by appending language to the reference to or copy of the license. These options are considered part of the license instance and must be included with the license (or its incorporation by reference) in derived works.

A. To prohibit distribution of substantively modified versions without the explicit permission of the author(s). "Substantive modification" is defined as a change to the semantic content of the document, and excludes mere changes in format or typographical corrections. To accomplish this, add the phrase 'Distribution of substantively modified versions of this document is prohibited without the explicit permission of the copyright holder.' to the license reference or copy.

B. To prohibit any publication of this work or derivative works in whole or in part in standard (paper) book form for commercial purposes unless prior permission is obtained from the copyright holder. To accomplish this, add the phrase 'Distribution of the work or derivative of the work in any standard (paper) book form is prohibited unless prior permission is obtained from the copyright holder.' to the license reference or copy.

openIPMI 2.0.16-8

Software:	OpenIPMI
Version:	2.0.16-8
File or Package:	OpenIPMI-2.0.16-8.fc13.src.rpm
OSI Licenses:	GPLv2, GPLv2+ w/exception, LGPLv2+, LGPLv2.1, BSDv1 (non-UCB), BSDv2, MIT/X11, Public Domain
Other Licenses:	Custom
URL:	ftp://download.fedora.redhat.com/pub/fedora/linux/development/x86_64/os/Packages/OpenIPMI-2.0.16-5.fc13.src.rpm
Group:	User Space Libraries / System Environment/Base
Description:	OpenIPMI (Intelligent Platform Management Interface) library and tools; The Open IPMI project aims to develop an open code base to allow access to platform information using Intelligent Platform Management Interface (IPMI). This package contains the tools of the OpenIPMI project. OpenIPMI is an effort to create a full-function IPMI system to allow full access to all IPMI information on a server and to abstract it to a level that will make it easy to use. See the SourceForge page for the source code. A nice overview of IPMI can be found here, if you are interested. OpenIPMI consists of two main parts: A device driver that goes into the Linux kernel, and a user-level library that provides a higher-level abstraction of IPMI and generic services that can be used on any operation system.
Common Usage:	Library, Utility
Package Size:	15.8 MB
Folders / Files:	25 / 357
Source Path:	wrlinux-4.0/layers/wrll-userspace/cgl/packages

openl2tp 1.7-1

Software:	openl2tp
Version:	1.7-1
File or Package:	openl2tp-1.7-1.fc9.src.rpm
OSI Licenses:	GPLv2, GPLv2+, LGPLv2.1, LGPLv2.1+
Other Licenses:	L2TP Commercial, Custom
URL:	ftp://ftp.openl2tp.org/releases/openl2tp-1.7/openl2tp-1.7-1.fc9.src.rpm
Group:	User Space Apps/ System Environment/daemons
Description:	An L2TP client/server, designed for VPN use. OpenL2TP is a complete implementation of RFC2661 - Layer Two Tunneling Protocol Version 2, able to operate as both a server and a client. It is ideal for use as an enterprise L2TP VPN server, supporting more than 100 simultaneous connected users. It may also be used as a client on a home PC or roadwarrior laptop. OpenL2TP has been designed and implemented specifically for Linux. It consists of - a daemon, openl2tpd, handling the L2TP control protocol exchanges for all tunnels and sessions - a plugin for pppd to allow its PPP connections to run over L2TP sessions - a Linux kernel driver for efficient datapath (integrated into the standard kernel from 2.6.23). - a command line application, l2tpconfig, for management.

OpenL2TP is an open source L2TP client / server, written specifically for Linux. It has been designed for use as an enterprise L2TP VPN server or in commercial, Linux-based, embedded networking products and is able to support hundreds of sessions, each with different configuration. It is used by several ISPs

document version 2.60

to provide L2TP services and by corporations to implement L2TP VPNs.

Common Usage: Utility
Package Size: 4.3 MB

openl2tp-1.7-1.fc9.src/openl2tp-1.7/openl2tp-1.7/license
The Katalix Systems OpenL2TP software is Dual Licensed. Users can choose to use the OpenL2TP software as an Open Source/Free Software product under the terms of the GNU General Public License (<http://www.fsf.org/licenses/>) or can purchase a commercial license from Katalix Systems Ltd.

The OpenL2TP software is released under the GNU General Public License (GPL). This means that the OpenL2TP software can be used free of charge under the GPL. If you do not want to be bound by the GPL terms (such as the requirement that your application must also be GPL), you may purchase a commercial license for the same product from Katalix Systems Ltd. Since Katalix Systems Ltd owns the copyright to the OpenL2TP source code, we are able to employ Dual Licensing, which means that the same product is available under GPL and under a commercial license. This does not in any way affect the Open Source commitment of Katalix Systems Ltd.

Users cannot change the vendor string which is published in the L2TP control message protocol without purchasing a commercial license. For all GPL installations, the vendor string shall be "Katalix Systems Ltd. Linux".

The OpenL2TP software is released under the GNU General Public License (GPL). The formal terms of the GPL license can be found at <http://www.fsf.org/licenses/>. See also <http://www.fsf.org/licenses/gpl-faq.html>.

The GPL license is contagious in the sense that when a program is linked to a GPL program, all the source code for all the parts of the resulting product must also be released under the GPL. If you do not follow this GPL requirement, you break the license terms and forfeit your right to use the GPL program altogether. You also risk damages. You need a commercial license under these conditions:

When you link a program with any GPL code from the OpenL2TP software and don't want the resulting product to be licensed under GPL, perhaps because you want to build a commercial product or keep the added non-GPL code closed source for other reasons. When purchasing commercial licenses, you are not using the OpenL2TP software under GPL even though it's the same code.

When you distribute a non-GPL application that works only with the OpenL2TP software and ship it with the OpenL2TP software. This type of solution is considered to be linking even if it's done over a network.

When you distribute copies of the OpenL2TP software without providing the source code as required under the GPL license.

When you change the advertised L2TP vendor string.

A special exception is made for OpenL2TP plugins. Such plugins may be closed source and not come under GPL provided that they use OpenL2TP's standard plugin interface. It is not permitted to make open source changes to OpenL2TP in order to add new interfaces to OpenL2TP and then write a closed source plugin that uses the new interface. If you require a commercial license, you will need one license for each installation of the OpenL2TP server software. One license is required for each CPU / memory subsystem that runs OpenL2TP binaries. Multiple CPU "Symmetric Multi-Processor" (SMP) systems require only one license per SMP CPU group.

OpenL2TP uses an implementation of MD5 Message Digest Algorithm by RSA Data Security, Inc.

From:
openl2tp-1.7-1.fc9.src/openl2tp-1.7/openl2tp-1.7/readme
OpenL2TP Software
OpenL2TP is a complete implementation of RFC2661 - Layer Two Tunneling Protocol Version 2, able to operate as both a server and a client. OpenL2TP has been written specifically for Linux. It consists of

- a daemon, openl2tpd, handling the L2TP control protocol exchanges for all tunnels and sessions
- a plugin for pppd to allow its PPP connections to run over L2TP sessions
- a Linux kernel driver for efficient datapath (packaged separately).
- a command line application for management.

All data packets are handled by the Linux kernel in order that the datapath be as efficient as possible. The Linux PPP-over-L2TP kernel driver (pppol2tp.o) must be loaded either dynamically as a kernel module or linked in statically.

OpenL2TP was written from scratch although it borrows some concepts (in particular, the use of profiles) from an earlier L2TP project, <http://www.sourceforge.net/projects/l2tp>. The original PPP-over-L2TP kernel driver was written by Martijn van Oosterhout <kleptog@svana.org>. Until now it has never been integrated into an L2TP implementation. Katalix Systems Ltd have made significant feature enhancements and are actively working on this driver, seeking to have it incorporated in the Linux kernel source tree.

OpenL2TP is dual licensed. See LICENSE file for details. The Linux kernel driver is distributed under the same license terms as the Linux kernel itself, **Copyright Martijn van Oosterhout**.

Description: OpenLDAP is an open source suite of LDAP (Lightweight Directory Access Protocol) applications and development tools. LDAP is a set of protocols for accessing directory services (usually phone book style information, but other information is possible) over the Internet, similar to the way DNS (Domain Name System) information is propagated over the Internet.

The openldap package contains configuration files, libraries, and documentation for OpenLDAP. The configuration files, libraries, and documentation for OpenLDAP. OpenLDAP Software is a free, open source implementation of the Lightweight Directory Access Protocol (LDAP) developed by the OpenLDAP Project. LDAP is a platform-independent protocol. Several common Linux distributions include OpenLDAP Software for LDAP support. The software also runs on BSD-variants, as well as AIX, HP-UX, Mac OS X, Solaris, Microsoft Windows (NT and derivatives, e.g. 2000, XP, Vista, etc.), and z/OS.
Common Usage: Library, API, Daemon, Docs

openldap-2.4.23/openldap-2.4.23/libraries/libunicode/UCD-Terms

UCD Terms of Use (<http://www.unicode.org/Public/UNIDATA/UCD.html>)

Disclaimer - The Unicode Character Database is provided as is by Unicode, Inc. No claims are made as to fitness for any particular purpose. No warranties of any kind are expressed or implied. The recipient agrees to determine applicability of information provided. If this file has been purchased on magnetic or optical media from Unicode, Inc., the sole remedy for any claim will be exchange of defective media within 90 days of receipt. This disclaimer is applicable for all other data files accompanying the Unicode Character Database, some of which have

document version 2.60

been compiled by the Unicode Consortium, and some of which have been supplied by other sources.

Limitations on Rights to Redistribute This Data - Recipient is granted the right to make copies in any form for internal distribution and to freely use the information supplied in the creation of products supporting the Unicode (TM) Standard. The files in the Unicode Character Database can be redistributed to third parties or other organizations (whether for profit or not) as long as this notice and the disclaimer notice are retained. Information can be extracted from these files and used in documentation or programs, as long as there is an accompanying notice indicating the source.

This work was adapted for inclusion in OpenLDAP Software by Kurt D. Zeilenga based upon code developed by Colin Plumb and subsequently modified by Jim Kingdon.

This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by **Colin Plumb in 1993, no copyright is claimed**. This code is in the public domain; do with it what you wish.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

This code was modified in **1997 by Jim Kingdon of Cyclic Software** to not require an integer type which is exactly 32 bits. This work draws on the changes for the same purpose by Tatu Ylonen <ylo@cs.hut.fi> as part of SSH, but since I didn't actually use that code, there is no copyright issue. I hereby disclaim copyright in any changes I have made; this code remains in the public domain.
