Copyright © 2002, 2003 David Dawes <dawes@xfree86.org>, 2004 Sylvain Meyer, 2006 David Airlie

This driver consists of two parts. The first part (intelfbdrv.c) provides the basic fbdev interfaces, is derived in part from the radeonfb and vesafb drivers, and is covered by the GPL. The second part (intelfbhw.c) provides the code to program the hardware. Most of it is derived from the i810/i830 XFree86 driver. The HW-specific code is covered here under a dual license (GPL and MIT/XFree86 license).

I2C part copied from the i2c-voodoo3.c driver by: Frodo Looijaard <frodol@dds.nl>, Philip Edelbrock <phil@netroedge.com>, Ralph Metzler <rkjm@thp.uni-koeln.de>, and Mark D. Studebaker <mdsxyz123@yahoo.com>

Lots of the information here comes from the Daryll Strauss' Banshee patches to the XF86 server, and the rest comes from the 3dfx Banshee specification. I'm very much indebted to Daryll for his work on the X server. Voodoo3 support was contributed Harold Oga. Lots of additions (proper acceleration, 24 bpp, hardware cursor) and bug fixes by Attila Kesmarki. Thanks guys!

wr-4.0-std-kernel/kernel-4.0/fs/reiserfs/README

ReiserFS is hereby licensed under the GNU General Public License version 2.

Source code files that contain the phrase "licensing governed by reiserfs/README" are "governed files" throughout this file. Governed files are licensed under the GPL.

The portions of them owned by Hans Reiser, or authorized to be licensed by him, have been in the past, and likely will be in the future, licensed to other parties under other licenses. If you add your code to governed files, and don't want it to be owned by Hans Reiser, put your copyright label on that code so the poor blight and his customers can keep things straight. All portions of governed files not labeled otherwise are owned by Hans Reiser, and by adding your code to it, widely distributing it to others or sending us a patch, and leaving the sentence in stating that licensing is governed by the statement in this file, you accept this.

It will be a kindness if you identify whether Hans Reiser is allowed to license code labeled as owned by you on your behalf other than under the GPL, because he wants to know if it is okay to do so and put a check in the mail to you (for non-trivial improvements) when he makes his next sale. He makes no guarantees as to the amount if any, though he feels motivated to motivate contributors, and you can surely discuss this with him before or after contributing. You have the right to decline to allow him to license your code contribution other than under the GPL.

Further licensing options are available for commercial and/or other interests directly from Hans Reiser: hans@reiser.to. If you interpret the GPL as not allowing those additional licensing options, you read it wrongly, and Richard Stallman agrees with me, when carefully read you can see that those restrictions on additional terms do not apply to the owner of the copyright, and my interpretation of this shall Govern for this license. Finally, nothing in this license shall be interpreted to allow you to fail to fairly credit me, or to remove my credits, without my permission, unless you are an end user not redistributing to others. If you have doubts about how to properly do that, or about what is fair, ask. (Last I spoke with him Richard was contemplating how best to address the fair crediting issue in the next GPL version.)

Hans Reiser was the project initiator, primary architect, source of all funding for the first 5.5 years, and one of the programmers. **He owns the copyright.**

Vladimir Saveljev was one of the programmers, and he worked long hours writing the cleanest code. He always made the effort to be the best he could be, and to make his code the best that it could be. What resulted was quite remarkable. I don't think that money can ever motivate someone to work the way he did, he is one of the most selfless men I know.

Yura helps with benchmarking, coding hashes, and block pre-allocation code.

Anatoly Pinchuk is a former member of our team who worked closely with Vladimir throughout the project's development. He wrote a quite substantial portion of the total code. He realized that there was a space problem with packing tails of files for files larger than a node that start on a node aligned boundary (there are reasons to want to node align files), and he invented and implemented indirect items and unformatted nodes as the solution.

Konstantin Shvachko, with the help of the Russian version of a VC, tried to put me in a position where I was forced into giving control of the project

document version 2.60

to him. (fortunately, as the person paying the money for all salaries from my dayjob I owned all copyrights, and you can't really force takeovers of sole proprietorships.) This was something curious, because he never really understood the value of our project, why we should do what we do, or why innovation was possible in general, but he was sure that he ought to be controlling it. Every innovation had to be forced past him while he was with us. He added two years to the time required to complete reiserfs, and was a net loss for me. Mikhail Gilula was a brilliant innovator who also left in a destructive way that erased the value of his contributions, and that he was shown much generosity just makes it more painful.

Grigory Zaigralin was an extremely effective system administrator for our group.

Igor Krashenninnikov was wonderful at hardware procurement, repair, and network installation.

Jeremy Fitzhardinge wrote the teahash.c code, and he gives credit to a textbook he got the algorithm from in the code. Note that his analysis of how we could use the hashing code in making 32 bit NFS cookies work was probably more important than the actual algorithm. Colin Plumb also contributed to it.

Chris Mason dived right into our code, and in just a few months produced the journaling code that dramatically increased the value of ReiserFS. He is just an amazing programmer.

Igor Zagorovsky is writing much of the new item handler and extent code for our next major release.

Alexander Zarochentcev (sometimes known as zam, or sasha), wrote the resizer, and is hard at work on implementing allocate on flush. SGI implemented allocate on flush before us for XFS, and generously took the time to convince me we should do it also. They are great people, and a great company.

Yuri Shevchuk and Nikita Danilov are doing squid cache optimization.

Vitaly Fertman is doing fsck.

Jeff Mahoney, of SuSE, contributed a few cleanup fixes, most notably the endian safe patches which allow ReiserFS to run on any platform supported by the Linux kernel.

SuSE, IntegratedLinux.com, Ecila, MP3.com, bigstorage.com, and the Alpha PC Company made it possible for me to not have a day job anymore, and to dramatically increase our staffing. Ecila funded hypertext feature development, MP3.com funded journaling, SuSE funded core development, IntegratedLinux.com funded squid web cache appliances, bigstorage.com funded HSM, and the alpha PC company funded the alpha port. Many of these tasks were helped by sponsors other than the ones just named. SuSE has helped in much more than just funding....

The Open Software license v. 1.1
This Open Software License (the "License") applies to any original work of authorship (the "Original Work") whose owner (the "Licensor") has placed the following notice immediately following the copyright notice for the Original Work:

Licensed under the Open Software License version 1.1

1) Grant of Copyright License. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, non-sublicenseable license to do the following:

- a) to reproduce the Original Work in copies;
- b) to prepare derivative works ("Derivative Works") based upon the Original Work;
- c) to distribute copies of the Original Work and Derivative Works to the public, with the proviso that copies of Original Work or Derivative Works that You distribute shall be licensed under the Open Software License;
- d) to perform the Original Work publicly; AND e) to display the Original Work publicly.

2) Grant of Patent License. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, non-sublicenseable license, under patent claims owned or controlled by the Licensor that are embodied in the Original Work as furnished by the Licensor ("Licensed Claims") to make, use, sell and offer for sale the Original Work. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, non-sublicenseable license under the Licensed Claims to make, use, sell and offer for sale Derivative Works.

3) Grant of Source Code License. The term "Source Code" means the preferred form of the Original Work for making modifications to it and all available documentation describing how to modify the Original Work. Licensor hereby agrees to provide a machine-readable copy of the Source Code of the Original Work along with each copy of the Original Work that Licensor distributes. Licensor reserves the right to satisfy this obligation by placing a machine-readable copy of the Source Code in an information repository reasonably calculated to permit inexpensive and convenient access by You for as long as Licensor continues to distribute the Original Work, and by publishing the address of that information repository in a notice immediately following the copyright notice that applies to the Original Work.

4) Exclusions From License Grant. Nothing in this License shall be deemed to grant any rights to trademarks, copyrights, patents, trade secrets or any other intellectual property of Licensor except as expressly document version 2.60

stated herein. No patent license is granted to make, use, sell or offer to sell embodiments of any patent claims other than the Licensed Claims defined in Section 2. No right is granted to the trademarks of Licensor even if such marks are included in the Original Work. Nothing in this License shall be interpreted to prohibit Licensor from licensing under different terms from this License any Original Work that Licensor otherwise would have a right to license.

5) External Deployment. The term "External Deployment" means the use or distribution of the Original Work or Derivative Works in any way such that the Original Work or Derivative Works may be used by anyone other than You, whether the Original Work or Derivative Works are distributed to those persons or made available as an application intended for use over a computer network. As an express condition for the grants of license hereunder, You agree that any External Deployment by You of a Derivative Work shall be deemed a distribution and shall be licensed to all under the terms of this License, as prescribed in section 1(c) herein.

6) Attribution Rights. You must retain, in the Source Code of any Derivative Works that You create, all copyright, patent or trademark notices from the Source Code of the Original Work, as well as any notices of licensing and any descriptive text identified therein as an "Attribution Notice." You must cause the Source Code for any Derivative Works that You create to carry a prominent Attribution Notice reasonably calculated to inform recipients that You have modified the Original Work.

7) Warranty and Disclaimer of Warranty. Licensor warrants that the copyright in and to the Original Work is owned by the Licensor or that the Original Work is distributed by Licensor under a valid current license from the copyright owner. Except as expressly stated in the immediately preceding sentence, the Original Work is provided under this License on an "AS IS" BASIS and WITHOUT WARRANTY, either express or implied, including, without limitation, the warranties of NON-INFRINGEMENT, MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY OF THE ORIGINAL WORK IS WITH YOU. This DISCLAIMER OF WARRANTY constitutes an essential part of this License. No license to Original Work is granted hereunder except under this disclaimer.

8) Limitation of Liability. Under no circumstances and under no legal theory, whether in tort (including negligence), contract, or otherwise, shall the Licensor be liable to any person for any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or the use of the Original Work including, without limitation, damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses. This limitation of liability shall not apply to liability for death or personal injury resulting from Licensor's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

9) Acceptance and Termination. If You distribute copies of the Original Work or a Derivative Work, You must make a reasonable effort under the circumstances to obtain the express and volitional assent of recipients to the terms of this License. Nothing else but this License (or another written agreement between Licensor and You) grants You permission to create Derivative Works based upon the Original Work or to exercise any of the rights granted in Sections 1 herein, and any attempt to do so except under the terms of this License (or another written agreement between Licensor and You) is expressly prohibited by U.S. copyright law, the equivalent laws of other countries, and by international treaty. Therefore, by exercising any of the rights granted to You in Sections 1 herein, You indicate Your acceptance of this License and all of its terms AND

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

conditions. This License shall terminate immediately and you may no longer exercise any of the rights granted to You by this License upon Your failure to honor the proviso in Section 1(c) herein.

10) Mutual Termination for Patent Action. This License shall terminate automatically and You may no longer exercise any of the rights granted to You by this License if You file a lawsuit in any court alleging that any OSI Certified open source software that is licensed under any license containing this "Mutual Termination for Patent Action" clause infringes any patent claims that are essential to use that software.

11) Jurisdiction, Venue and Governing Law. Any action or suit relating to this License may be brought only in the courts of a jurisdiction wherein the Licensor resides or in which Licensor conducts its primary business, and under the laws of that jurisdiction excluding its conflict-of-law provisions. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any use of the Original Work outside the scope of this License or after its termination shall be subject to the requirements and penalties of the U.S. Copyright Act, 17 U.S.C. §§ 101 et seq., the equivalent laws of other countries, and international treaty. This section shall survive the termination of this License.

12) Attorneys Fees. In any action to enforce the terms of this License or seeking damages relating thereto, the prevailing party shall be entitled to recover its costs and expenses, including, without limitation, reasonable attorneys' fees and costs incurred in connection with such action, including any appeal of such action. This section shall survive the termination of this License.

13) Miscellaneous. This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

14) Definition of "You" in This License. "You" throughout this License, whether in upper or lower case, means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. for legal entities, "You" includes any entity that controls, is controlled by, or is under common control with you. for purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

15) Right to Use. You may use the Original Work in all ways not otherwise restricted or conditioned by this License or by law, and Licensor promises not to interfere with or be responsible for such uses by You.

This license is **Copyright (C) 2002 Lawrence E. Rosen. All rights reserved.**

Permission is hereby granted to copy and distribute this license without modification. This license may not be modified without the express written permission of its copyright owner.

document version 2.60

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

License

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CREATIVE COMMONS PUBLIC LICENSE ("CCPL" OR "LICENSE"). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED. BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HERE, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. THE LICENSOR GRANTS YOU THE RIGHTS CONTAINED HERE IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS.

1. Definitions

"Collective Work" means a work, such as a periodical issue, anthology or encyclopedia, in which the Work in its entirety in unmodified form, along with a number of other contributions, constituting separate and independent works in themselves, are assembled into a collective whole. A work that constitutes a Collective Work will not be considered a Derivative Work (as defined below) for the purposes of this License.

"Derivative Work" means a work based upon the Work or upon the Work and other pre-existing works, such as a translation, musical arrangement, dramatization, fictionalization, motion picture version, sound recording, art reproduction, abridgment, condensation, or any other form in which the Work may be recast, transformed, or adapted, except that a work that constitutes a Collective Work will not be considered a Derivative Work for the purpose of this License. for the avoidance of doubt, where the Work is a musical composition or sound recording, the synchronization of the Work in timed-relation with a moving image ("synching") will be considered a Derivative Work for the purpose of this License.

"Licensor" means the individual or entity that offers the Work under the terms of this License.

"Original Author" means the individual or entity who created the Work.

"Work" means the copyrightable work of authorship offered under the terms of this License.

"You" means an individual or entity exercising rights under this License who has not previously violated the terms of this License with respect to the Work, or who has received express permission from the Licensor to exercise rights under this License despite a previous violation.

"License Elements" means the following high-level license attributes as selected by Licensor and indicated in the title of this License: Attribution, ShareAlike.

2. Fair Use Rights. Nothing in this license is intended to reduce, limit, or restrict any rights arising from fair use, first sale or other limitations on the exclusive rights of the copyright owner under copyright law or other applicable laws.

3. License Grant. Subject to the terms and conditions of this License, Licensor hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:

to reproduce the Work, to incorporate the Work into one or more Collective Works, and to reproduce the Work as incorporated in the Collective Works;

to create and reproduce Derivative Works;

to distribute copies or phonorecords of, display publicly, perform publicly, and perform publicly by means of a digital audio transmission the Work including as incorporated in Collective Works;

to distribute copies or phonorecords of, display publicly, perform publicly, and perform publicly by means of a digital audio transmission Derivative Works.

For the avoidance of doubt, where the work is a musical composition:

Performance Royalties Under Blanket Licenses. Licensor waives the exclusive right to collect, whether individually or via a performance rights society (e.g. ASCAP, BMI, SESAC), royalties for the public performance or public digital performance (e.g. webcast) of the Work.

Mechanical Rights and Statutory Royalties. Licensor waives the exclusive right to collect, whether individually or via a music rights society or designated agent (e.g. Harry Fox Agency), royalties for any phonorecord You create from the Work ("cover version") and distribute, subject to the compulsory license created by 17 USC Section 115 of the US Copyright Act (or the equivalent in other jurisdictions).

Webcasting Rights and Statutory Royalties. for the avoidance of doubt, where the Work is a sound recording, Licensor waives the exclusive right to collect, whether individually or via a performance-rights society (e.g. SoundExchange), royalties for the public digital performance (e.g. webcast) of the Work, subject to the compulsory license created by 17 USC Section 114 of the US Copyright Act (or the equivalent in other jurisdictions).

The above rights may be exercised in all media and formats whether now known or hereafter devised. The above rights include the right to make such modifications as are technically necessary to exercise the rights in other media and formats. All rights not expressly granted by Licensor are hereby reserved.

4. Restrictions. The license granted in Section 3 above is expressly made subject to and limited by the following restrictions:

You may distribute, publicly display, publicly perform, or publicly digitally perform the Work only under the terms of this License, and You must include a copy of, or the Uniform Resource Identifier for, this License with every copy or phonorecord of the Work You distribute, publicly display, publicly perform, or publicly digitally perform. You may not offer or impose any terms on the Work that alter or restrict the terms of this License or the recipients' exercise of the rights granted hereunder. You may not sublicense the Work. You must keep intact all notices that refer to this License and to the disclaimer of warranties. You may not distribute, publicly display, publicly perform, or publicly digitally perform the Work with any technological measures that control access or use of the Work in a manner inconsistent with the terms of this License Agreement. The above applies to the Work as incorporated in a Collective Work, but this does not require the Collective Work apart from the Work itself to be made subject to the terms of this License. If You create a Collective Work, upon notice from any Licensor You must, to the extent practicable, remove from the Collective Work any reference to such Licensor or the Original Author, as requested. If You create a Derivative Work, upon notice from any Licensor You must, to the extent practicable, remove from the Derivative Work any reference to such Licensor or the Original Author, as requested.

You may distribute, publicly display, publicly perform, or publicly digitally perform a Derivative Work only under the terms of this License, a later

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

version of this License with the same License Elements as this License, or a Creative Commons iCommons license that contains the same License Elements as this License (e.g. Attribution-ShareAlike 2.0 Japan). You must include a copy of, or the Uniform Resource Identifier for, this License or other license specified in the previous sentence with every copy or phonorecord of each Derivative Work You distribute, publicly display, publicly perform, or publicly digitally perform. You may not offer or impose any terms on the Derivative Works that alter or restrict the terms of this License or the recipients' exercise of the rights granted hereunder, and You must keep intact all notices that refer to this License and to the disclaimer of warranties. You may not distribute, publicly display, publicly perform, or publicly digitally perform the Derivative Work with any technological measures that control access or use of the Work in a manner inconsistent with the terms of this License Agreement. The above applies to the Derivative Work as incorporated in a Collective Work, but this does not require the Collective Work apart from the Derivative Work itself to be made subject to the terms of this License.

If you distribute, publicly display, publicly perform, or publicly digitally perform the Work or any Derivative Works or Collective Works, You must keep intact all copyright notices for the Work and give the Original Author credit reasonable to the medium or means You are utilizing by conveying the name (or pseudonym if applicable) of the Original Author if supplied; the title of the Work if supplied; to the extent reasonably practicable, the Uniform Resource Identifier, if any, that Licensor specifies to be associated with the Work, unless such URI does not refer to the copyright notice or licensing information for the Work; and in the case of a Derivative Work, a credit identifying the use of the Work in the Derivative Work (e.g., "French translation of the Work by Original Author," or "Screenplay based on original Work by Original Author"). Such credit may be implemented in any reasonable manner; provided, however, that in the case of a Derivative Work or Collective Work, at a minimum such credit will appear where any other comparable authorship credit appears and in a manner at least as prominent as such other comparable authorship credit.

5. Representations, Warranties and Disclaimer

UNLESS OTHERWISE AGREED TO BY THE PARTIES IN WRITING, LICENSOR OFFERS THE WORK AS-IS AND MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND CONCERNING THE MATERIALS, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF TITLE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NONINFRINGEMENT, OR THE ABSENCE OF LATENT OR OTHER DEFECTS, ACCURACY, OR THE PRESENCE OF ABSENCE OF ERRORS, WHETHER OR NOT DISCOVERABLE. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES, SO SUCH EXCLUSION MAY NOT APPLY TO YOU.

6. Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL LICENSOR BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THIS LICENSE OR THE USE OF THE WORK, EVEN IF LICENSOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. Termination

This License and the rights granted hereunder will terminate automatically upon any breach by You of the terms of this License. Individuals or entities who have received Derivative Works or Collective Works from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 5, 6, 7, and 8 will survive any

document version 2.60

termination of this License. Subject to the above terms and conditions, the license granted here is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, Licensor reserves the right to release the Work under different license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

8. Miscellaneous

Each time You distribute or publicly digitally perform the Work or a Collective Work, the Licensor offers to the recipient a license to the Work on the same terms and conditions as the license granted to You under this License. Each time You distribute or publicly digitally perform a Derivative Work, Licensor offers to the recipient a license to the original Work on the same terms and conditions as the license granted to You under this License. If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this agreement, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable. No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent. This License constitutes the entire agreement between the parties with respect to the Work licensed here. There are no understandings, agreements or representations with respect to the Work not specified here. Licensor shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Licensor and You.

Creative Commons is not a party to this License, and makes no warranty whatsoever in connection with the Work. Creative Commons will not be liable to You or any party on any legal theory for any damages whatsoever, including without limitation any general, special, incidental or consequential damages arising in connection to this license. Notwithstanding the foregoing two (2) sentences, if Creative Commons has expressly identified itself as the Licensor hereunder, it shall have all rights and obligations of Licensor. Except for the limited purpose of indicating to the public that the Work is licensed under the CCPL, neither party will use the trademark "Creative Commons" or any related trademark or logo of Creative Commons without the prior written consent of Creative Commons. Any permitted use will be in compliance with Creative Commons' then-current trademark usage guidelines, as may be published on its website or otherwise made available upon request from time to time.

Creative Commons may be contacted at <http://creativecommons.org/>.

I hear that RCU is patented? What is with that?

Yes, it is. There are several known patents related to RCU, search for the string "Patent" in RTFP.txt to find them. Of these, one was allowed to lapse by the assignee, and the others have been contributed to the Linux kernel under GPL.

4.0/Documentation/networking/README.ipw2100

Intel(R) PRO/Wireless 2100 Network Connection

Copyright (C) 2003-2006, Intel Corporation

0. IMPORTANT INFORMATION BEFORE USING THIS DRIVER

Important Notice for ALL USERS OR DISTRIBUTORS!!!!

Intel wireless LAN adapters are engineered, manufactured, tested, and quality checked to ensure that they meet all necessary local and governmental regulatory agency requirements for the regions that they are designated and/or marked to ship into. Since wireless LANs are generally unlicensed devices that share spectrum with radars, satellites, and other licensed and unlicensed devices, it is sometimes necessary to dynamically detect, avoid, and limit usage to avoid interference with these devices. In many instances Intel is required to provide test data to prove regional and local compliance to regional and governmental regulations before certification or approval to use the product is granted. Intel's wireless LAN's EEPROM, firmware, and software driver are designed to carefully control parameters that affect radio operation and to ensure electromagnetic compliance (EMC). These parameters include, without limitation, RF power, spectrum usage, channel scanning, and human exposure.

For these reasons Intel cannot permit any manipulation by third parties of the software provided in binary format with the wireless WLAN adapters (e.g., the EEPROM and firmware). Furthermore, if you use any patches, utilities, or code with the Intel wireless LAN adapters that have been manipulated by an unauthorized party (i.e., patches, utilities, or code (including open source code modifications) which have not been validated by Intel), (i) you will be solely responsible for ensuring the regulatory compliance of the products, (ii) Intel will bear no liability, under any theory of liability for any issues associated with the modified products, including without limitation, claims under the warranty and/or issues arising from regulatory non-compliance, and (iii) Intel will not provide or be required to assist in providing support to any third parties for such modified products.

document version 2.60

Note: Many regulatory agencies consider Wireless LAN adapters to be modules, and accordingly, condition system-level regulatory approval upon receipt and review of test data documenting that the antennas and system configuration do not cause the EMC and radio operation to be non-compliant. The drivers available for download from Sourceforge are provided as a part of a development project. Conformance to local regulatory requirements is the responsibility of the individual developer. As such, if you are interested in deploying or shipping a driver as part of solution intended to be used for purposes other than development, please obtain a tested driver from Intel Customer Support at: <http://support.intel.com/support/notebook/sb/CS-006408.htm>

6. Dynamic Firmware

As the firmware is licensed under a restricted use license, it can not be included within the kernel sources. To enable the IPW2100 you will need a firmware image to load into the wireless NIC's processors. You can obtain these images from <http://ipw2100.sf.net/firmware.php>. See INSTALL for instructions on installing the firmware.

THANKS TO:

Jukka Marin (65EC02 code).

The other NetBSD developers on whose A2232 driver I had a pretty close look. However, I didn't copy any code so it is okay to put my code under the GPL and include it into Linux.

♦♦♦

From:

wr-4.0-std-kernel/kernel-4.0/drivers/mtd/Kconfig

You may find that the algorithms used in this code are patented unless you live in the Free World where software patents aren't legal - in the USA you are only permitted to use this on DiskOnChip hardware, although under the terms of the GPL you're obviously permitted to copy, modify and distribute the code as you wish. Just not use it.

From:

wr-4.0-std-kernel/kernel-4.0/drivers/net/appletalk/cops_ffdrv.h

The firmware this driver downloads into the LocalTalk card is a separate program and is not GPL'd source code, even though the Linux side driver and the routine that loads this data into the card are. It is taken from the COPS SDK and is under the following license

This material is licensed to you strictly for use in conjunction with the use of COPS LocalTalk adapters. There is no charge for this SDK. And no warranty express or IMPLIED about its fitness for any purpose. However, we will cheerfully refund every penny you paid for this SDK... Regards, Thomas F. Divine, Chief Scientist

This driver consists of two parts. The first part (intelfbdrv.c) provides the basic fbdev interfaces, is derived in part from the radeonfb and vesafb drivers, and is covered by the GPL. The second part (intelfbhw.c) provides the code to program the hardware. Most of it is derived from the i810/i830 XFree86 driver. The HW-specific code is covered here under a dual license (GPL and MIT/XFree86 license).

Abstract

A control interface, which includes both master and slave devices, can provide buffering of input data packets, thereby allowing configurations of the integrated circuit to be modified quickly and efficiently. Additionally, the control interface can be sized and configured to receive digital signals from any number of nodes on an integrated circuit, thereby facilitating the testing, lab characterization, and debugging of those nodes. Finally, the control interface can advantageously control the monitoring of analog components on the integrated circuit, thereby significantly reducing the number of pins for such monitoring. The control interface has particular relevance to highly integrated circuits that utilize analog and/or mixed signals.

Inventors: Su; David Kuochieh (Mountain View, CA), Zargari; Masoud (Cupertino, CA), Thon; Lars E. (San Jose, CA), McFarland; William J. (Los Altos, CA)
Assignee: Atheros Communications, Inc. (Sunnyvale, CA)
Appl. No.: 10/113,806

From:
wr-4.0-std-kernel/kernel-4.0/drivers/scsi/aha1740.c
Based loosely on aha1542.c which is
Copyright (C) 1992 Tommy Thorn
and Modified by Eric Youngdale

This file is aha1740.c, written and
Copyright (C) 1992,1993 Brad McLean brad@saturn.gaylord.com or
brad@bradpc.gaylord.com.

Modifications to makecode and queuecommand for proper handling of multiple devices courteously provided by Michael Weller, March, 1993 for the avoidance of doubt the "preferred form" of this code is one which is in an open non patent encumbered format. Where cryptographic key signing forms part of the process of creating an executable the information including keys needed to generate an equivalently functional executable are deemed to be part of the source code.

Copyright (C) 2003 Manuel Estrada Sainz
Why: Today, the most extended way to use firmware in the Linux kernel is linking it statically in a header file. Which has political and technical issues:

- 1) Some firmware is not legal to redistribute.
- 2) The firmware occupies memory permanently, even though it often is just used once.
- 3) Some people, like the Debian crowd, don't consider some firmware free enough and remove entire drivers (e.g.: keyspan).

Intel documents this fairly well, and as far as I know there are no royalties or anything like that, but even so there are people who decided that they want to do the same thing in a completely different way.

kexec-tools 2.0.1

Software:	kexec-tools
Version:	2.0.1
File or Package:	kexec-tools-2.0.1.tar.bz2
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, MIT/X11
Other Licenses:	Custom
URL:	
Group:	User Space Apps/Applications/System/ Development/Tools
Description:	Interacts with the kernel to allow booting a new kernel from the currently running system. Fast-reboot circumventing firmware. Two main functionalities are provided: fast-reboot and rebooting into a kernel tailored to provide a crash dump of the original system. The kexec/kdump user space component. This tool is used to load a kernel in memory and reboot into the kernel loaded in memory using the kexec system call.
Common Usage:	Tool, Utility
Package Size:	2.2 MB
Folders / Files:	64 / 219
Source Path:	wrlinux-4.0/layers/wrll-linux-2.6.34/packages

klibc 1.5.18

Software:	klibc
Version:	1.5.18
File or Package:	klibc-1.5.18.tar.bz2
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, MIT/X11, BSDv1 (UCB), BSDv2, zlib/libpng, Public Domain
Other Licenses:	Custom
URL:	http://ftp.kernel.org/pub/linux/libs/klibc/1.5/klibc-1.5.18.tar.bz2
Group:	Productivity/Networking/Other/Development/Libraries
Description:	klibc is a stripped down C library, designed for use with initramfs in a Linux kernel. The package includes several applications that are linked against klibc. The klibc is a minimalistic libc subset

document version 2.60

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

(of the standard C library developed by H. Peter Anvin) intended to be used within an initramfs, as part of a multi-stage Linux boot process. It was developed mainly to be used during the Linux startup process, and it is part of the early user space, i.e. components used during kernel startup, but which do not run in kernel mode. These components do not have access to the standard library (usually glibc) used by normal userspace programs.

Common Usage: Library, Utility
Package Size: 5.1 MB
Folders / Files: 97 / 849
Source Path: wrlinux-4.0/layers/wrll-kernel/packages

Jean-loup Gailly Mark Adler
jloup@gzip.org madler@alumni.caltech.edu

If you use the zlib library in a product, we would appreciate not receiving lengthy legal documents to sign. The sources are provided for free but without warranty of any kind. The library has been entirely written by Jean-loup Gailly and Mark Adler; it does not include third-party code. If you redistribute modified sources, we would appreciate that you include in the file ChangeLog history information documenting your changes. Please read the FAQ for more information on the distribution of modified source versions.

This software is being provided to you, the LICENSEE, by the Massachusetts Institute of Technology (M.I.T.) under the following license. By obtaining, using and/or copying this software, you agree that you have read, understood, and will comply with these terms and conditions:

Export of this software from the United States of America may require a specific license from the United States Government. It is the responsibility of any person or organization contemplating export to obtain such a license before exporting.

WITHIN THAT CONSTRAINT, permission to use, copy, modify and distribute this software and its documentation for any purpose and without fee or royalty is hereby granted, provided that you agree to comply with the following copyright notice and statements, including the disclaimer, and that the same appear on ALL copies of the software and documentation, including modifications that you make for internal use or for distribution:

THIS SOFTWARE IS PROVIDED "AS IS", AND M.I.T. MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. By way of example, but not limitation, M.I.T. MAKES NO REPRESENTATIONS OR WARRANTIES OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE LICENSED SOFTWARE OR DOCUMENTATION WILL NOT INFRINGE ANY THIRD PARTY PATENTS, COPYRIGHTS, TRADEMARKS OR OTHER RIGHTS.

The name of the Massachusetts Institute of Technology or M.I.T. may NOT be used in advertising or publicity pertaining to distribution of the software. Title to copyright in this software and any associated documentation shall at all times remain with M.I.T., and USER agrees to preserve same. Furthermore if you modify this software you must label your software as modified software and not distribute it in such a fashion that it might be confused with the original M.I.T. software.

From:
krb5-1.6-3.src/krb5-1.6/krb5-1.6/doc/copyright.texinfo
Copyright 1985-2006 by the Massachusetts Institute of Technology.

Export of software employing encryption from the United States of America may require a specific license from the United States Government. It is the responsibility of any person or organization contemplating export to obtain such a license before exporting.

WITHIN THAT CONSTRAINT, permission to use, copy, modify, and distribute this software and its documentation for any purpose and without fee is hereby granted, provided that the above copyright notice appear in all copies and that both that copyright notice and this permission notice appear in supporting documentation, and that the name of M.I.T. not be used in advertising or publicity pertaining to distribution of the software without specific, written prior permission.

document version 2.60

Furthermore if you modify this software you must label your software as modified software and not distribute it in such a fashion that it might be confused with the original MIT software. M.I.T. makes no representations about the suitability of this software for any purpose. It is provided ``as is" without express or implied warranty.

Individual source code files are

copyright MIT, Cygnus Support, Novell, OpenVision Technologies, Oracle, Red Hat, Sun Microsystems, FundsXpress, and others.

Project Athena, Athena, Athena MUSE, Discuss, Hesiod, Kerberos, Moira, and Zephyr are trademarks of the Massachusetts Institute of Technology (MIT). No commercial use of these trademarks may be made without prior written permission of MIT. "Commercial use" means use of a name in a product or other for-profit manner. It does NOT prevent a commercial firm from referring to the MIT trademarks in order to convey information (although in doing so, recognition of their trademark status should be given).

The following copyright and permission notice applies to the OpenVision Kerberos Administration system located in @code{kadmin/create}, @code{kadmin/dbutil}, @code{kadmin/passwd}, @code{kadmin/server}, @code{lib/kadm5}, and portions of @code{lib/rpc}:

Copyright, OpenVision Technologies, Inc., 1996, All Rights Reserved

WARNING: Retrieving the OpenVision Kerberos Administration system source code, as described below, indicates your acceptance of the following terms. If you do not agree to the following terms, do not retrieve the OpenVision Kerberos administration system.

You may freely use and distribute the Source Code and Object Code compiled from it, with or without modification, but this Source Code is provided to you ``AS IS" EXCLUSIVE OF ANY WARRANTY, INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, OR ANY OTHER WARRANTY, WHETHER EXPRESS OR IMPLIED.

IN NO EVENT WILL OPENVISION HAVE ANY LIABILITY FOR ANY LOST PROFITS, LOSS OF DATA OR COSTS OF PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES, OR FOR ANY SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THIS AGREEMENT, INCLUDING, WITHOUT LIMITATION, THOSE RESULTING FROM THE USE OF THE SOURCE CODE, OR THE FAILURE OF THE SOURCE CODE TO PERFORM, OR FOR ANY OTHER REASON.

OpenVision retains all copyrights in the donated Source Code. OpenVision also retains copyright to derivative works of the Source Code, whether created by OpenVision or by a third party. The OpenVision copyright notice must be preserved if derivative works are made based on the donated Source Code.

OpenVision Technologies, Inc. has donated this Kerberos Administration system to MIT for inclusion in the standard Kerberos 5 distribution. This donation underscores our commitment to continuing Kerberos technology development and our gratitude for the valuable work which has been performed by MIT and the Kerberos community. Portions contributed by Matt Crawford @code{<crawdad@fnal.gov>} were work performed at Fermi National Accelerator Laboratory, which is operated by Universities Research Association, Inc., under contract DE-AC02-76CHO3000 with the U.S. Department of Energy.

Portions of @code{src/lib/crypto} have the following copyright:

NO WARRANTY - BECAUSE THIS PROGRAM IS LICENSED FREE OF CHARGE, WE PROVIDE ABSOLUTELY NO WARRANTY, TO THE EXTENT PERMITTED BY APPLICABLE STATE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING, FREE SOFTWARE FOUNDATION, INC, RICHARD M. STALLMAN AND/OR OTHER PARTIES PROVIDE THIS PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED

document version 2.60

TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW WILL RICHARD M. STALLMAN, THE FREE SOFTWARE FOUNDATION, INC., AND/OR ANY OTHER PARTY WHO MAY MODIFY AND REDISTRIBUTE THIS PROGRAM AS PERMITTED BELOW, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY LOST PROFITS, LOST MONIES, OR OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS) THIS PROGRAM, EVEN IF YOU HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, OR FOR ANY CLAIM BY ANY OTHER PARTY.

GENERAL PUBLIC LICENSE TO COPY

1. You may copy and distribute verbatim copies of this source file as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy a valid copyright notice "**Copyright (C) 1986 Richard M. Stallman**"; and include following the copyright notice a verbatim copy of the above disclaimer of warranty and of this License.

2. You may modify your copy or copies of this source file or any portion of it, and copy and distribute such modifications under the terms of Paragraph 1 above, provided that you also do the following:

a) cause the modified files to carry prominent notices stating that you changed the files and the date of any change; and

b) cause the whole of any work that you distribute or publish, that in whole or in part contains or is a derivative of this program or any part thereof, to be licensed at no charge to all third parties on terms identical to those contained in this License Agreement (except that you may choose to grant more extensive warranty protection to some or all third parties, at your option).

c) You may charge a distribution fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

Mere aggregation of another unrelated program with this program (or its derivative) on a volume of a storage or distribution medium does not bring the other program under the scope of these terms.

3. You may copy and distribute this program (or a portion or derivative of it, under Paragraph 2) in object code or executable form under the terms of Paragraphs 1 and 2 above provided that you also do one of the following:

a) accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Paragraphs 1 and 2 above; or,

b) accompany it with a written offer, valid for at least three years, to give any third party free (except for a nominal

shipping charge) a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Paragraphs 1 and 2 above; or,

c) accompany it with the information you received as to where the corresponding source code may be obtained. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form alone.)

For an executable file, complete source code means all the source code for all modules it contains; but, as a special exception, it need not include source code for modules which are standard libraries that accompany the operating system on which the executable file runs.

4. You may not copy, sublicense, distribute or transfer this program except as expressly provided under this License Agreement. Any attempt otherwise to copy, sublicense, distribute or transfer this program is void and your rights to use the program under this License agreement shall be automatically terminated. However, parties who have received computer software programs from you with this License Agreement will not have their licenses terminated so long as such parties remain in full compliance.

5. If you wish to incorporate parts of this program into other free programs whose distribution conditions are different, write to the Free Software Foundation at 675 Mass Ave, Cambridge, MA 02139. We have not yet worked out a simple rule that can be stated here, but we will often permit this. We will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software.

In other words, you are welcome to use, share and improve this program. You are forbidden to forbid anyone else to use, share and improve what you give them. Help stamp out software-hoarding!

(Isn't it sick that the U.S. culture of lawsuit-happy lawyers requires this kind of disclaimer?)

lame 3.97-6

Software:	lame
Version:	3.97-6
File or Package:	lame-3.97-6.lvn8.src.rpm
OSI Licenses:	GPLv2, GPLv2+ w/exception, LGPLv2+, LGPLv2.1+, MIT/X11, BSDv2, zlib/libpng
Other Licenses:	Custom
URL:	http://livna-dl.reloulmirs.net/fedora/9/SRPMS/lame-3.97-6.lvn8.src.rpm
Group:	System Environment/Libraries
Description:	LAME MP3 encoding library. LAME is an open source application used to encode audio into the MP3 file format. The name LAME is a recursive acronym for LAME Ain't an MP3 Encoder, reflecting LAME's early history when it was not actually an encoder, but merely a set of patches against the freely available ISO demonstration source code. The ISO code had a restrictive license but was available without charge. In May 2000, the LAME project reimplemented the last of the ISO source code, and thus LAME was then a totally new implementation — compiling recent versions of LAME no longer requires the ISO source code. As recent LAME releases are no longer a patch against ISO encoder code, LAME is now itself an MP3 encoder; the LAME acronym has become a misnomer.

document version 2.60

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

From:

lame-3.97-6.lvn8.src/lame-3.97/lame-3.97/license

Can I use LAME in my commercial program?

Yes, you can, under the restrictions of the LGPL. The easiest way to do this is to:

1. Link to LAME as separate library (libmp3lame.a on unix or lame_enc.dll on windows)
2. Fully acknowledge that you are using LAME, and give a link to our web site, www.mp3dev.org
3. If you make modifications to LAME, you must release these these modifications back to the LAME project, under the LGPL.

IMPORTANT NOTE - The decoding functions provided in LAME use the mpglib decoding engine which is under the GPL. They may not be used by any program not released under the GPL unless you obtain such permission from the MPG123 project (www.mpg123.de).

LAME 3.xx - LAME Ain't an MP3 Encoder
http://www.mp3dev.org March 2001

Originally developed by Mike Cheng (www.uq.net.au/~zzmcheng). Now maintained by Mark Taylor (www.mp3dev.org). This code is distributed under the GNU LESSER PUBLIC LICENSE (LGPL, see www.gnu.org) with the following modification:

1. If you determine that distribution of LAME requires a patent license, and you obtain a patent license, you may distribute LAME even though redistribution of LAME may also require a patent license.

2. You agree not to enforce any patent claims for any aspect of MPEG audio compression, or any other techniques contained in the LAME source code.

LAME uses the MPGLIB decoding engine, from the MPG123 package, written by: Michael Hipp (www.mpg123.de) MPGLIB is released under the GPL.

Copyrights (c) 1999,2000,2001 by Mark Taylor

Copyrights (c) 1998 by Michael Cheng

Copyrights (c) 1995,1996,1997 by Michael Hipp

As well as additional copyrights as documented in the source code.

fht(fz,n); Does a hartley transform of "n" points in the array "fz". NOTE: This routine uses at least 2 patented algorithms, and may be under the restrictions of a bunch of different organizations. Although I wrote it completely myself; it is kind of a derivative of a routine I once authored and released under the GPL, so it may fall under the free software foundation's restrictions; it was worked on as a Stanford Univ project, so they claim some rights to it; it was further optimized at work here, so I think this company claims parts of it. The patents are held by R. Bracewell (the FHT algorithm) and O. Buneman (the trig generator), both at Stanford Univ. If it were up to me, I'd say go do whatever you want with it; but it would be polite to give credit to the following people if you use this anywhere:

Euler - probable inventor of the fourier transform.
Gauss - probable inventor of the FFT.
Hartley - probable inventor of the hartley transform.
Buneman - for a really cool trig generator
Mayer(me) - for authoring this particular version and including all the optimizations in one package.
Thanks, Ron Mayer; mayer@acuson.com

OSI Licenses:	GPLv2
Other Licenses:	
URL:	http://www.latencytop.org/download/latencytop-0.5.tar.gz
Group:	User Space Apps
Description:	Skipping audio, slower servers, everyone knows the symptoms of latency. But to know what's going on in the system, what's causing the latency, how to fix it... that's a hard question without good answers right now. LatencyTOP is a Linux tool for software developers (both kernel and userspace), aimed at identifying where in the system latency is happening, and what kind of operation/action is causing the latency to happen so that the code can be changed to avoid the worst latency hiccups.
Common Usage:	Tool, Utility
Package Size:	116 KB (0.11 MB)

less 406-12

Software: less
Version: 406-12
File or Package: less-406-12.fc8.src.rpm
OSI Licenses: GPLv2, GPLv2+, FreeBSD, MIT/X11, zlib/libpng (variant)
Other Licenses: Custom
URL: <http://archives.fedoraproject.org/pub/archive/fedora/linux/releases/8/Fedora/source/SRPMS/less-406-12.fc8.src.rpm>
Group: User Space Apps / Applications/Text
Description: A text file browser similar to more, but better. The less utility is a text file browser that resembles more, but has more capabilities. Less allows you to move backwards in the file as well as forwards. Since less doesn't have to read the entire input file before it starts, less starts up more quickly than text editors (for example, vi). You should install less because it is a basic utility for viewing text files, and you'll use it frequently.
Common Usage: Utility
Package Size: 1.9 MB
Folders / Files: 3 / 88
Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

♦♦♦

From:
less-406-12.fc8.src/less-406/less-406/regexp.c
Copyright (c) 1986 by University of Toronto.
Written by Henry Spencer. Not derived from licensed software. Permission is granted to anyone to use this software for any purpose on any computer system, and to redistribute it freely, subject to the following restrictions:

1. The author is not responsible for the consequences of use of this software, no matter how awful, even if they arise from defects in it.
2. The origin of this software must not be misrepresented, either by explicit claim or by omission.
3. Altered versions must be plainly marked as such, and must not be misrepresented as being the original software.

Beware that some of this code is subtly aware of the way operator precedence is structured in regular expressions. Serious changes in regular-expression syntax might require a total rethink.

NOTE: this code has been altered slightly for use in Tcl. Slightly modified by David MacKenzie to undo most of the changes for TCL. Added regex2 with notbol parameter. -- 4/19/99 Mark Nudelman

Group:
Description: Libaio is an event-driven programming environment intended for modern CMPs. The interface to the library, although similar to some existing event-driven libraries, is new, relatively untried, and still a work in progress. Unlike the SMP version of libasync, libaio makes concurrency explicit through barriers and locks and sports a variety of more sophisticated schedulers. Libaio depends upon the 9unix libraries, which provide a consistent, portable, Unix-like programming interface inspired by Plan 9 and upon config for configuration and build management.

document version 2.60

libart_lgpl 2.3.21

Software:	libart-lgpl
Version:	2.3.21
File or Package:	libart_lgpl-2.3.21.tar.bz2
OSI Licenses:	GPLv2+ w/exception, LGPLv2, LGPLv2+, MIT/X11, Academic
Other Licenses:	Custom
URL:	http://ftp.gnome.org/pub/GNOME/sources/libart_lgpl/2.3/libart_lgpl-2.3.21.tar.bz2
Group:	System Environment/Libraries
Description:	Library of graphics routines used by libgnomecanvas. The libart_lgpl package contains the libart libraries. These are useful for high-performance 2D graphics. This package is known to build and work properly using an LFS-6.5 platform. Libart is a 2D drawing library: its goal is to be a high-quality vector-based 2D library with antialiasing and alpha composition. Libart is a high-performance rendering library that provides a rich imaging model. Libart's imaging model is a superset of PostScript, and it adds support for antialiasing and alpha compositing (transparency). Libart is used as the core rendering engine for both the GNOME canvas and the GNOME printing system. It uses sophisticated techniques such as microtile arrays and sorted vector paths to maximize performance. Libart provides a wealth of vector path-manipulation operations, affine transformations, antialiased and alpha-composited vector path rendering, and functions for manipulating Bézier paths.
Common Usage:	Library
Package Size:	1.41 MB

This is the LGPL'd component of libart. All functions needed for running the Gnome canvas, and for printing support, will be going in here. The GPL'd component will be getting various enhanced functions for specific applications.

Libart is free software. It is also for sale. For information about licensing libart, please contact Raph Levien <raph@acm.org>. Contributions to the codebase are also very welcome, but the copyright must be assigned in writing to preserve the licensing flexibility.

libatomic_ops-1.2/libatomic_ops-1.2/doc/license.txt
Our intent is to make it easy to use libatomic_ops, in both free and proprietary software. Hence most code that we expect to be linked into a client application is covered by an MIT-style license. A few library routines are covered by the GNU General Public License. These are put into a separate library, libatomic_ops_gpl.a. The low-level part of the library is mostly covered by the following

license: **Copyright (c) ...**

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions: The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT.

IN NO EVENT SHALL THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

A few files in the sysdeps directory were inherited in part from the Boehm-Demers-Weiser conservative garbage collector, and are covered by its license, which is similar in spirit:

Copyright (c)

THIS MATERIAL IS PROVIDED AS IS, WITH ABSOLUTELY NO WARRANTY EXPRESSED OR IMPLIED. ANY USE IS AT YOUR OWN RISK.

document version 2.60

Permission is hereby granted to use or copy this program for any purpose, provided the above notices are retained on all copies.

Permission to modify the code and to distribute modified code is granted, provided the above notices are retained, and a notice that the code was modified is included with the above copyright notice.

A few files are covered by the GNU General Public License. (See file "COPYING".) This applies only to test code, sample applications, and the libatomic_ops_gpl portion of the library. Thus libatomic_ops_gpl should generally not be linked into proprietary code. (This distinction was motivated by patent considerations.)

It is possible that the license of the GPL pieces may be changed for future versions to make them more consistent with the rest of the package. If you submit patches, and have strong preferences about licensing, please express them.

From:
libbonobo-2.32.1-1.fc15.src/libbonobo-2.32.1/libbonobo-2.32.1/readme
libbonobo is the non-GUI part of the bonobo component infrastructure, it is most useful for creating aggregate interfaces & doing IPC easily. It also contains a rather badly designed & implemented per-system activation system. This needs re-writing & simplifying to be per-display. This is the distribution of Bonobo, the GNOME component and compound document system for the GNU system.

document version 2.60

What is Bonobo

Bonobo is a set of language and system independent CORBA interfaces for creating reusable components, controls and creating compound documents. The Bonobo distribution includes a Gtk+ based implementation of the Bonobo interfaces, enabling developers to create reusable components and applications that can be used to form more complex documents. If you want to look into a Java implementation of Bonobo, look in the GNOME CVS for the 'monkeybeans' module (Erdi Gergo is the author), you can browse it at: <http://cvs.gnome.org/bonsai>

Licensing

Bonobo libraries are released under the terms of the GNU Lesser General Public License (GNU LGPL). While components and programs included with this release are licensed under the terms of the GNU General Public License (GNU GPL). You can find copies of the licenses in the files COPYING.LIB and COPYING for the libraries and the code respectively.

libbonoboui 2.24.5-1

Software:	libbonoboui
Version:	2.24.5-1
File or Package:	libbonoboui-2.24.5-1.fc15.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1, MIT/X11, Academic, Public Domain
Other Licenses:	Custom
URL:	
Group:	User Space Libraries / System Environment/Libraries / System/Libraries
Description:	Bonobo user interface components; Bonobo is a library that provides the necessary framework for GNOME applications to deal with compound documents, i.e. those with a spreadsheet and graphic embedded in a word-processing document. This package contains various needed modules and files for bonobo 2 to operate. Bonobo is a component system based on CORBA, used by the GNOME desktop. libbonoboui contains the user interface related components that come with Bonobo.
Common Usage:	Library
Package Size:	5.30 MB
Folders / Files:	22 / 384
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

NOTICES:

From:
libbonoboui-2.24.5-1.fc15.src/libbonoboui.spec
Summary: Bonobo user interface components
Name: libbonoboui
Version: 2.24.5
Release: 1%{?dist}
URL: <http://www.gnome.org>
VCS: <git://git.gnome.org/libbonoboui>
Source0: <http://download.gnome.org/sources/libbonoboui/2.24/%{name}-%{version}.tar.bz2>
License: LGPLv2+
Group: System Environment/Libraries

Description - Bonobo is a component system based on CORBA, used by the GNOME desktop. libbonoboui contains the user interface related components that come with Bonobo.

libcanberra 0.28

Software: libcanberra
Version: 0.28
File or Package: libcanberra-0.28.tar.gz
OSI Licenses: GPLv2+ w/exception, LGPLv2.1, LGPLv2.1+, MIT/X11, Academic
Other Licenses: Custom
URL: <http://Opointer.de/lennart/projects/libcanberra/>
Group: User Space Libraries
Description: Event Sound API; libcanberra is an implementation of the XDG Sound Theme and Name Specifications, for generating event sounds on free desktops, such as GNOME. It comes with several backends (ALSA, PulseAudio, OSS, GStreamer, null) and is designed to be portable.
Common Usage: Library
Package Size: 1.75 MB
Folders / Files: 8 / 109
Source Path: wrlinux-4.0/layers/wrll-userspace/media/packages

As a special exception, the copyright owners of the macro gives unlimited permission to copy, distribute and modify the configure scripts that are the output of Autoconf when processing the Macro. You need not follow the terms of the GNU General Public License when using or distributing such scripts, even though portions of the text of the Macro appear in them. The GNU General Public License (GPL) does govern all other use of the material that constitutes the Autoconf Macro. This special exception to the GPL applies to versions of the Autoconf Macro released by this project. When you make and distribute a modified version of the Autoconf Macro, you may extend this special exception to the GPL to apply to your modified version as well.

document version 2.60

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

1. Redistributions of source code must retain any existing copyright notice, and this entire permission notice in its entirety, including the disclaimer of warranties.

2. Redistributions in binary form must reproduce all prior and current copyright notices, this list of conditions, and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. The name of any author may not be used to endorse or promote products derived from this software without their specific prior written permission.

ALTERNATIVELY, this product may be distributed under the terms of the GNU General Public License, in which case the provisions of the GNU GPL are required INSTEAD OF the above restrictions. (This clause is necessary due to a potential conflict between the GNU GPL and the restrictions contained in a BSD-style copyright.)

THIS SOFTWARE IS PROVIDED "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

IN NO EVENT SHALL THE AUTHOR(S) BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

libcdio 0.78.2-5

Software: libcdio
Version: 0.78.2-5
File or Package: libcdio-0.78.2-5.fc8.src.rpm
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, FDLv1.1, MIT/X11, FreeBSD
Other Licenses: Custom
URL: ftp://fr.rpmfind.net/linux/fedora/updates/8/SRPMS/libcdio-0.78.2-5.fc8.src.rpm
Group: Applications/Multimedia
Description: CD-ROM input and control library; The libcdio package contains a library for CD-ROM and CD image access. Applications wishing to be oblivious of the OS- and device-dependent properties of a CD-ROM or of the specific details of various CD-image formats may benefit from using this library. A library for working with ISO-9660 filesystems libiso9660 is included. A generic interface for issuing MMC (multimedia commands) is also part of the libcdio library.
Common Usage: Library
Package Size: 15.8 MB
Folders / Files: 45 / 426
Source Path: wrlinux-4.0/layers/wrll-userspace/media/packages

libdmx 1.1.1

Software:	libdmx
Version:	1.1.1
File or Package:	libdmx-1.1.1.tar.bz2
OSI Licenses:	GPLv2+ w/exception, MIT/X11, Academic
Other Licenses:	
URL:	http://xorg.freedesktop.org/releases/individual/lib/libdmx-1.1.1.tar.bz2
Group:	User Space Libraries
Description:	X11 Distributed Multihead extension library; libdmx is an interface to the DMX extension for X, which allows a single server to be set up as a proxy spanning multiple servers -- not unlike Xinerama across discrete physical machines. It can be reconfigured on the fly to change the layout, and it is presented as a single logical display to clients.
Common Usage:	Library
Package Size:	1.01 MB

libdrm 2.4.23-2

Software:	libdrm
Version:	2.4.23-2
File or Package:	libdrm-2.4.23-2.fc15.src.rpm
OSI Licenses:	GPLv2+ w/exception, MIT/X11, Academic
Other Licenses:	
URL:	http://koji.fedoraproject.org/koji/buildinfo?buildID=209068
Group:	User Space Libraries
Description:	Userspace library for accessing the DRM (direct rendering manager); Direct Rendering Manager runtime library; libdrm provides core library routines for the X Window System to directly interface with video hardware using the Linux kernel's Direct Rendering Modules. This is libdrm, a userspace library for accessing the DRM, direct rendering manager, on Linux, BSD and other operating systems that support the ioctl interface. The library provides wrapper functions for the ioctls to avoid exposing the kernel interface directly, and for chipsets with drm memory manager, support for tracking relocations and buffers. libdrm is a low-level library, typically used by graphics drivers such as the Mesa DRI drivers, the X drivers, libva and similar projects. New functionality in the kernel DRM drivers typically requires a new libdrm, but a new libdrm will always work with an older kernel.
Common Usage:	Library
Package Size:	2.13 MB
Folders / Files:	14 / 137
Source Path:	wrlinux-4.0/layers/wrll-linux-2.6.34/packages

libelf 0.8.12

Software:	libelf
Version:	0.8.12
File or Package:	libelf-0.8.12.tar.bz2
OSI Licenses:	GPLv2+ w/exception, LGPLv2, LGPLv2+, Public Domain
Other Licenses:	Custom

document version 2.60

URL:
Group: System Environment/Base
Description: An ELF utility library; This library is a clean-room rewrite of the System V Release 4 library and is supposed to be source code compatible with it. It was meant primarily for porting SVR4 applications to other operating systems but can also be used as the basis for new applications (and as a light-weight alternative to libbfd).
Common Usage: Library
Package Size: 956 KB (0.93 MB)
Folders / Files: 4 / 97
Source Path: wrlinux-4.0/layers/wrll-toolchain-4.4a-336/common/packages
Notes: The following software is intended to be used as a host utility to facilitate development of a target runtime image. If you choose to include it on a target runtime image, you may be subject to additional open source license compliance considerations. It is recommend you consult with your legal counsel for guidance and advice on your particular situation.

document version 2.60

From:
liberation-fonts-1.04/liberation-fonts-1.04/license.txt
LICENSE AGREEMENT AND LIMITED PRODUCT WARRANTY
LIBERATION FONT SOFTWARE

This agreement governs the use of the Software and any updates to the Software, regardless of the delivery mechanism. Subject to the following terms, Red Hat, Inc. ("Red Hat") grants to the user ("Client") a license to this work pursuant to the GNU General Public License v.2 with the exceptions set forth below and such other terms as are set forth in this End User License Agreement.

1. The Software and License Exception. LIBERATION font software (the "Software") consists of TrueType-OpenType formatted font software for rendering LIBERATION typefaces in sans-serif, serif, and monospaced character styles. You are licensed to use, modify, copy, and distribute the Software pursuant to the GNU General Public License v.2 with the following exceptions:

(a) As a special exception, if you create a document which uses this font, and embed this font or unaltered portions of this font into the document, this font does not by itself cause the resulting document to be covered by the GNU General Public License. This exception does not however invalidate any other reasons why the document might be covered by the GNU General Public License. If you modify this font, you may extend this exception to your version of the font, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

(b) As a further exception, any distribution of the object code of the Software in a physical product must provide you the right to access and modify the source code for the Software and to reinstall that modified version of the Software in object code form on the same physical product on which you received it.

2. Intellectual Property Rights. The Software and each of its components, including the source code, documentation, appearance, structure and organization are owned by Red Hat and others and are protected under copyright and other laws. Title to the Software and any component, or to any copy, modification, or merged portion shall remain with the aforementioned, subject to the applicable license. The "LIBERATION" trademark is a trademark of Red Hat, Inc. in the U.S. and other countries. This agreement does not permit Client to distribute modified versions of the Software using Red Hat's trademarks. If Client makes a redistribution of a modified version of the Software, then Client must modify the files names to remove any reference to the Red Hat trademarks and must not use the Red Hat trademarks in any way to reference or promote the modified Software.

3. Limited Warranty. To the maximum extent permitted under applicable law, the Software is provided and licensed "as is" without warranty of any kind, expressed or implied, including the implied warranties of merchantability, non-infringement or fitness for a particular purpose. Red Hat does not warrant that the functions contained in the Software will meet Client's requirements or that the operation of the Software will be entirely error free or appear precisely as described in the accompanying documentation.

4. Limitation of Remedies and Liability. To the maximum extent permitted by applicable law, Red Hat or any Red Hat authorized dealer will not be liable to Client for any incidental or consequential damages, including lost profits or lost savings arising out of the use or inability to use the

Software, even if Red Hat or such dealer has been advised of the possibility of such damages.

5. General. If any provision of this agreement is held to be unenforceable, that shall not affect the enforceability of the remaining provisions. This agreement shall be governed by the laws of the State of North Carolina and of the United States, without regard to any conflict of laws provisions, except that the United Nations Convention on the International Sale of Goods shall not apply.

Copyright © 2007 Red Hat, Inc. All rights reserved.

1. What's this?

The Liberation Fonts are intended to be open font replacements for the three most commonly used fonts on Microsoft systems: Times New Roman, Arial, and Courier New.

5. License
Read the GPL v2 file 'COPYING' and the Liberation Fonts EULA file 'License.txt' for more information.

libevent 1.4.13-1

Software:	libevent
Version:	1.4.13-1
File or Package:	libevent-1.4.13-1.fc13.src.rpm
OSI Licenses:	GPLv2+ w/exception, BSDv2, Public Domain
Other Licenses:	Custom
URL:	ftp://download.fedora.redhat.com/pub/fedora/linux/releases/13/Fedora/source/SRPMS/libevent-1.4.13-1.fc13.src.rpm
Group:	User Space Apps / Development/Libraries
Description:	The libevent API provides a mechanism to execute a callback function when a specific event occurs on a file descriptor or after a timeout has been reached. libevent is meant to replace the asynchronous event loop found in event driven network servers. An application just needs to call event_dispatch() and can then add or remove events dynamically without having to change the event loop. An asynchronous event notification library. The libevent API provides a mechanism to execute a callback function when a specific event occurs on a file descriptor or after a timeout has been reached.
Common Usage:	Library

libexif 0.6.16-1

Software: libexif
Version: 0.6.16-1
File or Package: libexif-0.6.16-1.fc9.src.rpm
OSI Licenses: GPLv2+ w/ exception, LGPLv2+, LGPLv2.1, LGPLv2.1+, MIT/X11, Academic
Other Licenses:
URL:
Group: System Environment/Libraries
Description: Library for extracting extra information from image files; libexif is a library for parsing, editing, and saving EXIF data. It is intended to replace lots of redundant implementations in command-line utilities and programs with GUIs. Most digital cameras produce EXIF files, which are JPEG files with extra tags that contain information about the image. The EXIF library allows you to parse an EXIF file and read the data from those tags.
Common Usage: Library
Package Size: 4.60 MB
Folders / Files: 20 / 283
Source Path: wrlinux-4.0/layers/wrll-userspace/media/packages

In diesem Standard enthält dieses Feld sowohl Copyright des Fotografen als auch des Editors in getrennten Statements. Wenn die Fotografen und Editor Copyrights unterschiedlich sind, sollten sie in der Reihenfolge: Photograph, Editor, separiert durch NULL, aufgelistet werden. Terminiert wird die Liste durch einen weiteren NULL Code. Wenn nur ein Editor Copyright vorhanden ist, ist das Photographencopyright ein einzelnes Leerzeichen gefolgt durch die trennende NULL, dann folgt das Editor Copyright. Wenn das Feld leer ist, wird es als unbekannte gewertet.

The following function was extracted from RFC 1952 by Simon Josefsson, for the Shishi project, and modified to be compatible with the modified CRC-32 used by RFC 1510, and subsequently modified for GNU Libgcrpt to allow it to be used for calculating both unmodified CRC-32 and modified CRC-32 values.

Original copyright and notice from the document follows:

From:
libgcrypt-1.4.0/libgcrypt-1.4.0/cipher/rndw32.c
Copyright (C) 1999, 2000, 2002, 2003, 2007 Free Software Foundation, Inc.
Copyright Peter Gutmann, Matt Thomlinson and Blake Coverett 1996-2006

This file is part of Libgcrypt. The code here is based on code from Cryptlib 3.0 beta by Peter Gutmann. Source file misc/rndwin32.c "Win32 Randomness-Gathering Code" with this copyright notice:

This module is part of the cryptlib continuously seeded pseudorandom number generator. For usage conditions, see lib_rand.c [Here is the notice from lib_rand.c, which is now called dev_sys.c] This module and the misc/rnd.c modules represent the cryptlib continuously seeded pseudorandom number generator (CSPRNG) as described in my 1998 Usenix Security Symposium paper "The generation of random numbers for cryptographic purposes".

The CSPRNG code is
copyright Peter Gutmann (and various others) 1996, 1997, 1998, 1999, all rights reserved.

Redistribution of the CSPRNG modules and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice and this permission notice in its entirety.
2. Redistributions in binary form must reproduce the copyright notice in the documentation and/or other materials provided with the distribution.
3. A copy of any bugfixes or enhancements made must be provided to the author, <pgut001@cs.auckland.ac.nz> to allow them to be added to the baseline version of the code.

ALTERNATIVELY, the code may be distributed under the terms of the GNU Lesser General Public License, version 2.1 or any later version published by the Free Software Foundation, in which case the provisions of the GNU LGPL are required INSTEAD OF the above restrictions.

Although not required under the terms of the LGPL, it would still be nice if you could make any changes available to the author to allow a consistent code base to be maintained.

The above alternative was changed from GPL to LGPL on 2007-08-22 with permission from Peter Gutmann:

From:
pgut001 <pgut001@cs.auckland.ac.nz>
Subject: Re: LGPL for the windows entropy gatherer
To: wk@gnupg.org
Date: Wed, 22 Aug 2007 03:05:42 +1200

Hi,
As of now libgcrypt is GPL under Windows due to that module and some people would really like to see it under LGPL too. Can you do such a license change to LGPL version 2? Note that LGPL give the user the option to relicense it under GPL, so the change would be pretty easy and backward compatible.

document version 2.60

Sure. I assumed that since GPG was GPLd, you'd prefer the GPL for the entropy code as well, but I am asked for LGPL as an option so as of the next release I'll have LGPL in there. You can consider it to be retroactive, so your current version will be LGPLd as well.
Peter.

From:

libgcrypt-1.4.0/libgcrypt-1.4.0/authors

The ATH implementation (src/ath) has been taken from GPGME and relicensed to the LGPL by the copyright holder of GPGME (g10 Code GmbH); it is now considered to be a part of Libgcrypt. Most of the stuff in mpi has been taken from an old GMP library version by Torbjorn Granlund <tege@noisy.tmg.se>. The files cipher/rndunix.c and cipher/rndw32.c are based on those files from Cryptlib.

Copyright Peter Gutmann, Paul Kendall, and Chris Wedgwood 1996-1999.

The ECC code cipher/ecc.c was based on code by Sergi Blanch i Torne, sergi at calcurco dot org. The implementation of the Camellia cipher has been taken from the original NTT provided GPL source.

libgcrypt - The GNU crypto library Version 1.4.0

Copyright 2000, 2002, 2003, 2004, 2007 Free Software Foundation, Inc.

This file is free software; as a special exception the author gives unlimited permission to copy and/or distribute it, with or without modifications, as long as this notice is preserved.

This file is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY, to the extent permitted by law; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.

Overview - Libgcrypt is a general purpose crypto library based on the code used in GnuPG. Libgcrypt depends on the library 'libgpg-error', which must be installed correctly before Libgcrypt is to be built. Libgcrypt is distributed under the LGPL, see the section "License" below for details.

License - The library is distributed under the terms of the GNU Lesser General Public License (LGPL); see the file COPYING.LIB for the actual terms. The helper programs (gcrpytrnd and getrandom) as well as the documentation are distributed under the terms of the GNU General Public License (GPL); see the file COPYING for the actual terms.

This library used to be available under the GPL - this was changed with version 1.1.7 with the rationale that there are now many free crypto libraries available and many of them come with capabilities similar to Libcrypt. We decided that to foster the use of cryptography in Free Software an LGPLed library would make more sense because it avoids

document version 2.60

problems due to license incompatibilities between some Free Software licenses and the GPL.

Please note that in many cases it is better for a library to be licensed under the GPL, so that it provides an advantage for free software projects. The Lesser GPL is so named because it does less to protect the freedom of the users of the code that it covers. See <http://www.gnu.org/philosophy/why-not-lgpl.html> for more explanation.

This file is Free Software; as a special exception the authors gives unlimited permission to copy and/or distribute it, with or without modifications, as long as this notice is preserved.

For conditions of the whole package, please see the file COPYING. This file is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY, to the extent permitted by law; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.

libglade 2.6.4

Software:	libglade
Version:	2.6.4
File or Package:	libglade-2.6.4.tar.bz2
OSI Licenses:	GPLv2+ w/exception, LGPLv2, LGPLv2+, FDLv1.1+, MIT/X11, Academic, Public Domain
Other Licenses:	
URL:	http://ftp.gnome.org/pub/GNOME/sources/libglade/2.6/libglade-2.6.4.tar.bz2
Group:	User Space Libraries / System Environment/Libraries
Description:	The libglade library allows you to load glade interface files in a program at runtime. It doesn't require GLADE to be used, but GLADE is by far the easiest way to create the interface files. Libglade uses the XML file format used by the GLADE user interface builder GLADE, so libglade acts as an alternative to GLADE's code generation approach. Libglade also provides a simple interface for connecting handlers to the various signals in the interface (on platforms where the gmodule library works correctly, it is possible to connect all the handlers with a single function call).
	Once the interface has been instantiated, libglade gives no overhead, so other than the short initial interface loading time, there is no performance tradeoff. Glade Interface Designer is a graphical user interface builder for GTK+, with additional components for GNOME. In its third version, Glade is programming language-independent, and does not produce code for events, but rather an XML file that is then used with an appropriate binding (such as gtkada for use with the Ada programming language). Glade comes in three versions, one for GTK+ 1 and two for GTK+ 2.
Common Usage:	API, Library
Package Size:	1.47 MB

From:

libgnome-2.32.1-2.fc15.src/libgnome-2.32.1/libgnome-2.32.1/ChangeLog
Added this; copied from gtk+.

This implements a 'GnomeProgram' GObject; most of the code is copied from gnomelib-init2.c.

Note: I borrowed heavily from glibc/sysdeps/posix/flock.c.

From:

libgnome-2.32.1-2.fc15.src/libgnome-2.32.1/libgnome-2.32.1/ChangeLog.pre-git
Lifted from HEAD GLib.

This implements a 'GnomeProgram' GObject; most of the code is copied from gnomelib-init2.c, but removed all the GnomeAttribute stuff and use GParam's.

From:

libgnome-2.32.1-2.fc15.src/libgnome-2.32.1/libgnome-2.32.1/libgnome/gnome-macros.h

Ideas taken from Nautilus and GOB.

From:

libgnome-2.32.1-2.fc15.src/libgnome-2.32.1/libgnome-2.32.1/libgnome/gnome-program.c

Stolen from pango.

libgnome-keyring 2.32.0

Software: libgnome-keyring

libgnomecanvas 2.30.3-2

Software:	libgnomecanvas
Version:	2.30.3-2
File or Package:	libgnomecanvas-2.30.3-2.fc15.src.rpm
OSI Licenses:	GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, MIT/X11, Academic, Public Domain
Other Licenses:	Custom
URL:	
Group:	User Space Libraries / System Environment/Libraries
Description:	GnomeCanvas widget; The canvas widget allows you to create custom displays using stock items such as circles, lines, text, and so on. It was originally a port of the Tk canvas widget but has evolved quite a bit over time. The GNOME canvas is an engine for structured graphics that offers a rich imaging model, high performance rendering, and a powerful, high-level API. It offers a choice of two rendering back-ends, one based on Xlib for extremely fast display, and another based on Libart, a sophisticated, antialiased, alpha-compositing engine. Applications have a choice between the Xlib imaging model or a superset of the PostScript imaging model, depending on the level of graphic sophistication required. libgnomecanvas' is the library for the GNOME canvas, an engine for structured graphics that offers a rich imaging model, high performance rendering, and a powerful, high-level API. It is based on the Tk toolkit's canvas widget, and is one of the essential Gnome libraries.

Window System. The lib gnomeui package includes GUI-related libraries that are needed to run GNOME. (The libgnome package includes the library features that do not use the X Window System.) libgnomeui is the one of the new core libraries for GNOME 2. It is dependent on GTK 2 and the new GNOME Object Activation Framework (Bonobo).

libgpg-error 1.6-2

Software: libgpg-error
Version: 1.6-2
File or Package: libgpg-error-1.6-2.src.rpm
OSI Licenses: GPLv3+ w/exception, GPLv2, LGPLv2+, LGPLv2.1, LGPLv2.1+, MIT/X11
Other Licenses: Custom
URL: ftp://rpmfind.net/linux/fedora/development/source/SRPMS/libgpg-error-1.6-2.src.rpm
Group: System Environment/Libraries
Description: Libgpg-error is helper library used by a couple of other projects to provide a common set of error codes and descriptions. This is a library that defines common error values for all GnuPG components. Among these are GPG, GPGSM, GPGME, GPG-Agent, libgcrypt, Libksba, DirMngr, Pinentry, SmartCard Daemon and more.
Common Usage: Library
Package Size: 3.4 MB
Folders / Files: 9 / 144
Source Path: wrllinux-4.0/layers/wrll-userspace/security/packages

libgpg-error-1.6-2.src/libgpg-error-1.6/libgpg-error-1.6/lang/cl/mkerrcodes.awk

Copyright (C) 2004, 2005, 2006 g10 Code GmbH

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307.

As a special exception, g10 Code GmbH gives unlimited permission to copy, distribute and modify the lisp source files that are the output of mkerrcodes.awk. You need not follow the terms of the GNU General Public License when using or distributing such scripts, even though portions of the text of mkerrcodes.awk appear in them. The GNU General Public License (GPL) does govern all other use of the material that constitutes the mkerrcodes.awk program.

Certain portions of the mkerrcodes.awk source text are designed to be copied (in certain cases, depending on the input) into the output of mkerrcodes.awk. We call these the "data" portions. The rest of the mkerrcodes.awk source text consists of comments plus executable code that decides which of the data portions to output in any given case. We call these comments and executable code the "non-data" portions. mkerrcodes.awk never copies any of the non-data portions into its output.

This special exception to the GPL applies to versions of mkerrcodes.awk released by g10 Code GmbH. When you make and distribute a modified version of mkerrcodes.awk, you may extend this special exception to the GPL to apply to your modified version as well, unless your modified

From:
libgphoto2-2.4.0/libgphoto2-2.4.0/camlibs/casio/cam2jpgtab.h
This file is taken from qvplay version 0.95, written by:
Ken-ichi HAYASHI <yg2k-hys@asahi-net.or.jp>,
Jun-ichiro "itojun" Itoh <itojun@itojun.org>

Notes from qvplay: You can use the entire source code of this archive in your software, but I assume no responsibility for the results of the usage of the source code. Use at your own risk. If you want to need some kind of 'license', you can choose 'BSD style license' or 'LGPL'. It is great pressure you describe at README file of your software, "This software has QVplay's source code."

Original copyright notice of this file:
Casio QV-10 cam file converter.
Jun-ichiro "itojun" Itoh.

Group: System Environment/Libraries
Description: Library for parsing IDL (Interface Definition Language); libIDL is a library for creating trees of CORBA Interface Definition Language (IDL) files, which is a specification for defining portable interfaces. libIDL was initially written for ORBit (the ORB from the GNOME project, and the primary means of libIDL distribution). However, the functionality was designed to be as reusable and portable as possible.

From:

libidn-0.6.5-1.1.src/libidn-0.6.5/libidn-0.6.5/doc/specifications/COPYING.UCD

License below is copied from <<http://www.unicode.org/copyright.html>>, last updated 7 July 2004, and claims to apply to all Unicode versions.

According to a post on emacs-devel, <<http://lists.gnu.org/archive/html/emacs-devel/2004-04/msg00036.html>>, RMS believe it is a free license: This is a free license, and even compatible with the GPL (if that ever matters). Yes, we can use it now.

EXHIBIT 1

UNICODE, INC. LICENSE AGREEMENT - DATA FILES AND SOFTWARE

Unicode Data Files include all data files under the directories <http://www.unicode.org/Public/> and <http://www.unicode.org/reports/>. Unicode Software includes any source code under the directories <http://www.unicode.org/Public/> and <http://www.unicode.org/reports/>.

NOTICE TO USER: Carefully read the following legal agreement. BY DOWNLOADING, INSTALLING, COPYING OR OTHERWISE USING UNICODE INC.'S DATA FILES ("DATA FILES"), AND/OR SOFTWARE ("SOFTWARE"), YOU UNEQUIVOCALLY ACCEPT, AND AGREE TO BE BOUND BY, ALL OF THE TERMS AND CONDITIONS OF THIS AGREEMENT. IF YOU DO NOT AGREE, DO NOT DOWNLOAD, INSTALL, COPY, DISTRIBUTE OR USE THE DATA FILES OR SOFTWARE.

COPYRIGHT AND PERMISSION NOTICE

♦♦♦

From:
libjpeg-6b-46.fc12.src/pegsrvc.v6b/jpeg-6b/README
This distribution contains the sixth public release of the Independent JPEG Group's free JPEG software. You are welcome to redistribute this software and to use it for any purpose, subject to the conditions under LEGAL ISSUES, below.

OVERVIEW

This package contains C software to implement JPEG image compression and decompression. JPEG (pronounced "jay-peg") is a standardized compression method for full-color and gray-scale images. JPEG is intended for compressing "real-world" scenes; line drawings, cartoons and other non-realistic images are not its strong suit. JPEG is lossy, meaning that the output image is not exactly identical to the input image. Hence you must not use JPEG if you have to have identical output bits. However, on typical photographic images, very good compression levels can be obtained with no visible change, and remarkably high compression levels are possible if you can tolerate a low-quality image. For more details, see the references, or just experiment with various compression settings.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

This software implements JPEG baseline, extended-sequential, and progressive compression processes. Provision is made for supporting all variants of these processes, although some uncommon parameter settings aren't implemented yet. For legal reasons, we are not distributing code for the arithmetic-coding variants of JPEG; see LEGAL ISSUES. We have made no provision for supporting the hierarchical or lossless processes defined in the standard.

The emphasis in designing this software has been on achieving portability and flexibility, while also making it fast enough to be useful. In particular, the software is not intended to be read as a tutorial on JPEG. (See the REFERENCES section for introductory material.) Rather, it is intended to be reliable, portable, industrial-strength code. We do not claim to have achieved that goal in every aspect of the software, but we strive for it.

We welcome the use of this software as a component of commercial products. No royalty is required, but we do ask for an acknowledgement in product documentation, as described under LEGAL ISSUES.

LEGAL ISSUES

In plain English:

1. We don't promise that this software works. (But if you find any bugs, please let us know!)

2. You can use this software for whatever you want. You don't have to pay us.

3. You may not pretend that you wrote this software. If you use it in a program, you must acknowledge somewhere in your documentation that you've used the IJG code.

In legalese:

The authors make NO WARRANTY or representation, either express or implied, with respect to this software, its quality, accuracy, merchantability, or fitness for a particular purpose. This software is provided "AS IS", and you, its user, assume the entire risk as to its quality and accuracy.

This software is **copyright (C) 1991-1998, Thomas G. Lane. All Rights Reserved** except as specified below.

Permission is hereby granted to use, copy, modify, and distribute this software (or portions thereof) for any purpose, without fee, subject to these conditions:

(1) If any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered; and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.

(2) If only executable code is distributed, then the accompanying documentation must state that "this software is based in part on the work of the Independent JPEG Group".

(3) Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the IJG code, not just to the unmodified library. If you use our work, you ought to acknowledge us.

document version 2.60

Permission is NOT granted for the use of any IJG author's name or company name in advertising or publicity relating to this software or products derived from it. This software may be referred to only as "the Independent JPEG Group's software".

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

ansi2knr.c is included in this distribution by permission of L. Peter Deutsch, sole proprietor of its **copyright holder, Aladdin Enterprises of Menlo Park, CA**. ansi2knr.c is NOT covered by the above copyright and conditions, but instead by the usual distribution terms of the Free Software Foundation; principally, that you must include source code if you redistribute it. (See the file ansi2knr.c for full details.) However, since ansi2knr.c is not needed as part of any program generated from the IJG code, this does not limit you more than the foregoing paragraphs do.

The Unix configuration script "configure" was produced with GNU Autoconf. It is **copyright by the Free Software Foundation** but is freely distributable. The same holds for its supporting scripts (config.guess, config.sub, ltconfig, ltmain.sh). Another support script, install-sh, is **copyright by M.I.T.** but is also freely distributable.

It appears that the arithmetic coding option of the JPEG spec is covered by patents owned by IBM, AT&T, and Mitsubishi. Hence arithmetic coding cannot legally be used without obtaining one or more licenses. For this reason, support for arithmetic coding has been removed from the free JPEG software. (Since arithmetic coding provides only a marginal gain over the unpatented Huffman mode, it is unlikely that very many implementations will support it.) So far as we are aware, there are no patent restrictions on the remaining code.

The IJG distribution formerly included code to read and write GIF files. To avoid entanglement with the Unisys LZW patent, GIF reading support has been removed altogether, and the GIF writer has been simplified to produce "uncompressed GIFs". This technique does not use the LZW algorithm; the resulting GIF files are larger than usual, but are readable by all standard GIF decoders.

We are required to state that "The Graphics Interchange Format(c) is the **Copyright property of CompuServe Incorporated**. GIF(sm) is a Service Mark property of CompuServe Incorporated."

From:

libjpeg-6b-46.fc12.src/jpegsrvc.v6b/jpeg-6b/ansi2knr.c

ansi2knr is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY. No author or distributor accepts responsibility to anyone for the consequences of using it or for whether it serves any particular purpose or works at all, unless he says so in writing. Refer to the GNU General Public License (the "GPL") for full details.

Everyone is granted permission to copy, modify and redistribute ansi2knr, but only under the conditions described in the GPL. A copy of this license is supposed to have been given to you along with ansi2knr so you can know your rights and responsibilities. It should be in a file named COPYLEFT. [In the IJG distribution, the GPL appears below, not in a separate file.] Among other things, the copyright notice and this notice must be preserved on all copies.

We explicitly state here what we believe is already implied by the GPL: if the ansi2knr program is distributed as a separate set of sources and a

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

separate executable file which are aggregated on a storage medium together with another program, this in itself does not bring the other program under the GPL, nor does the mere fact that such a program or the procedures for constructing it invoke the ansi2knr executable bring any other part of the program under the GPL.

These terms do NOT apply to the JPEG software itself; see README

GHOSTSCRIPT GENERAL PUBLIC LICENSE
(Clarified 11 Feb 1988)

Copyright (C) 1988 Richard M. Stallman

Everyone is permitted to copy and distribute verbatim copies of this license, but changing it is not allowed. You can also use this wording to make the terms for other programs.

The license agreements of most software companies keep you at the mercy of those companies. By contrast, our general public license is intended to give everyone the right to share Ghostscript. To make sure that everyone has such rights, we have to forbid you to deprive anyone else of these rights. For example, if you distribute copies of Ghostscript, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must tell them their rights. Also, for our own protection, we must make certain that everyone finds out that there is no warranty for Ghostscript. If Ghostscript is modified by someone else and passed on, we want its recipients to know that what they have is not what we distributed, so that any problems introduced by others will not reflect on our reputation.

Specifically, we want to make sure that you have the right to give away copies of Ghostscript, that you receive source code or else can get it if you want it, that you can change Ghostscript or use pieces of it in new free programs, and that you know you can do these things. To make sure that everyone has such rights, we have to forbid you to deprive anyone else of these rights. For example, if you distribute copies of Ghostscript, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must tell them their rights. Also, for our own protection, we must make certain that everyone finds out that there is no warranty for Ghostscript. If Ghostscript is modified by someone else and passed on, we want its recipients to know that what they have is not what we distributed, so that any problems introduced by others will not reflect on our reputation.

Therefore we (Richard M. Stallman and the Free Software Foundation, Inc.) make the following terms which say what you must do to be allowed to distribute or change Ghostscript.

COPYING POLICIES

1. You may copy and distribute verbatim copies of Ghostscript source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy a valid copyright and license notice "Copyright (C) 1989 Aladdin Enterprises. All rights reserved. Distributed by Free Software Foundation, Inc." (or with whatever year is appropriate); keep intact the notices on all files that refer to this License Agreement and to the absence of any warranty; and give any other recipients of the Ghostscript program a copy of this License Agreement along with the program. You may charge a distribution fee for the physical act of transferring a copy.

2. You may modify your copy or copies of Ghostscript or any portion of it, and copy and distribute such modifications under the terms of Paragraph 1 above, provided that you also do the following:

- a) cause the modified files to carry prominent notices stating that you changed the files and the date of any change; and
- b) cause the whole of any work that you distribute or publish, that in whole or in part contains or is a derivative of Ghostscript or any part thereof, to be licensed at no charge to all third

document version 2.60

parties on terms identical to those contained in this License Agreement (except that you may choose to grant more extensive warranty protection to some or all third parties, at your option).

c) You may charge a distribution fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

Mere aggregation of another unrelated program with this program (or its derivative) on a volume of a storage or distribution medium does not bring the other program under the scope of these terms.

3. You may copy and distribute Ghostscript (or a portion or derivative of it, under Paragraph 2) in object code or executable form under the terms of Paragraphs 1 and 2 above provided that you also do one of the following:

a) accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Paragraphs 1 and 2 above; or,

b) accompany it with a written offer, valid for at least three years, to give any third party free (except for a nominal shipping charge) a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Paragraphs 1 and 2 above; or,

c) accompany it with the information you received as to where the corresponding source code may be obtained. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form alone.)

For an executable file, complete source code means all the source code for all modules it contains; but, as a special exception, it need not include source code for modules which are standard libraries that accompany the operating system on which the executable file runs.

4. You may not copy, sublicense, distribute or transfer Ghostscript except as expressly provided under this License Agreement. Any attempt otherwise to copy, sublicense, distribute or transfer Ghostscript is void and your rights to use the program under this License agreement shall be automatically terminated. However, parties who have received computer software programs from you with this License Agreement will not have their licenses terminated so long as such parties remain in full compliance.

5. If you wish to incorporate parts of Ghostscript into other free programs whose distribution conditions are different, write to the Free Software Foundation at 675 Mass Ave, Cambridge, MA 02139. We have not yet worked out a simple rule that can be stated here, but we will often permit this. We will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software.

Your comments and suggestions about our licensing policies and our software are welcome! Please contact the Free Software Foundation, Inc., 675 Mass Ave, Cambridge, MA 02139, or call (617) 876-3296.

NO WARRANTY
BECAUSE GHOSTSCRIPT IS LICENSED FREE OF CHARGE, WE PROVIDE ABSOLUTELY NO WARRANTY, TO THE EXTENT PERMITTED BY APPLICABLE STATE LAW. EXCEPT WHEN

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

OTHERWISE STATED IN WRITING, FREE SOFTWARE FOUNDATION, INC., RICHARD M. STALLMAN, ALADDIN ENTERPRISES, L. PETER DEUTSCH, AND/OR OTHER PARTIES PROVIDE GHOSTSCRIPT "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF GHOSTSCRIPT IS WITH YOU. SHOULD GHOSTSCRIPT PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW WILL RICHARD M. STALLMAN, THE FREE SOFTWARE FOUNDATION, INC., L. PETER DEUTSCH, ALADDIN ENTERPRISES, AND/OR ANY OTHER PARTY WHO MAY MODIFY AND REDISTRIBUTE GHOSTSCRIPT AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY LOST PROFITS, LOST MONIES, OR OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS) GHOSTSCRIPT, EVEN IF YOU HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, OR FOR ANY CLAIM BY ANY OTHER PARTY.

libmms 0.4-1

Software:	libmms
Version:	0.4-1
File or Package:	libmms-0.4-1.fc9.src.rpm
OSI Licenses:	GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1, MIT/X11
Other Licenses:	Custom
URL:	ftp://rpmfind.net/linux/freshrpms/fedora/linux/9/libmms/libmms-0.4-1.fc9.src.rpm
Group:	System Environment/Libraries
Description:	MMS stream protocol library; LibMMS is common library for parsing mms:// and mmsh:// type network streams. These are commonly used to stream Windows Media Video content over the web. LibMMS itself is only for receiving MMS stream, it doesn't handle sending at all. If you need streaming functionality, look for other protocol, such as RT(S)P. MMS is legacy thing, being closed with no specs and abandoned even by its creator, the Microsoft Corp.
Common Usage:	Library
Package Size:	2.8 MB
Folders / Files:	5 / 43
Source Path:	wrlinux-4.0/layers/wrll-userspace/media/packages

libnl 3.1

Software: libnl
Version: 3.1
File or Package: libnl-3.1.tar.gz
OSI Licenses: GPLv2+, GPLv2+ w/exception (autoconf, libtool),
LGPLv2.1, GPLv3, GPLv3+ w/exception (autoconf),
MIT/X11, Academic, W3C (attribution)
Other Licenses: Custom
URL: <http://www.infradead.org/~tgr/libnl/libnl-3.1.tar.gz>
Group: User Space Libraries / System Environment/Libraries
/ Development/Libraries
Description: The libnl suite is a collection of libraries providing
APIs to netlink protocol based Linux kernel
interfaces. Netlink is a IPC mechanism primarily
between the kernel and user space processes. It
was designed to be a more flexible successor to ioctl
to provide mainly networking related kernel
configuration and monitoring interfaces. Library for
access to netlink sockets in user space. This
package contains a convenience library to simplify
using the Linux kernel's netlink sockets interface for
network manipulation. libnl is a library for
applications dealing with netlink sockets. The library
provides an interface for raw netlink messaging and
various netlink family specific interfaces.
Common Usage: Library
Package Size: 5.38 MB
Folders / Files: 43 / 389
Source Path: wrlinux-4.0/layers/wrll-
userspace/networking/packages

W3C Document License
Public documents on the W3C site are provided by the copyright holders under the following license.

License

By using and/or copying this document, or the W3C document from which this statement is linked, you (the licensee) agree that you have read, understood, and will comply with the following terms and conditions:

Permission to copy, and distribute the contents of this document, or the W3C document from which this statement is linked, in any medium for any purpose and without fee or royalty is hereby granted, provided that you include the following on ALL copies of the document, or portions thereof, that you use:

A link or URL to the original W3C document.

The pre-existing copyright notice of the original author, or if it doesn't exist, a notice (hypertext is preferred, but a textual representation is permitted) of the form: "Copyright © [Date-of-document] World Wide Web Consortium, (Massachusetts Institute of Technology, European Research Consortium for Informatics and Mathematics, Keio University). All Rights Reserved. <http://www.w3.org/Consortium/Legal/2002/copyright-documents-20021231>"

If it exists, the STATUS of the W3C document.

When space permits, inclusion of the full text of this NOTICE should be provided. We request that authorship attribution be provided in any software, documents, or other items or products that you create pursuant to the implementation of the contents of this document, or any portion thereof.

No right to create modifications or derivatives of W3C documents is granted pursuant to this license. However, if additional requirements (documented in the Copyright FAQ) are satisfied, the right to create

Notes - This version:

<http://www.w3.org/Consortium/Legal/2002/copyright-documents-20021231>

This formulation of W3C's notice and license became active on December 31 2002. This version removes the copyright ownership notice such that this license can be used with materials other than those owned by the W3C, moves information on style sheets, DTDs, and schemas to the Copyright FAQ, reflects that ERCIM is now a host of the W3C, includes references to this specific dated version of the license, and removes the ambiguous grant of "use". See the older formulation for the policy prior to this date. Please see our Copyright FAQ for common questions about using materials from our site, such as the translating or annotating specifications.

5. Intellectual Property Statement - The IETF takes no position regarding the validity or scope of any intellectual property or other rights that might be claimed to pertain to the implementation or use of the technology described in this document or the extent to which any license under such rights might or might not be available; neither does it represent that it has made any effort to identify any such rights. Information on the IETF's procedures with respect to rights in standards-track and standards-related documentation can be found in BCP-11.

Copies of claims of rights made available for publication and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementors or users of this specification can be obtained from the IETF Secretariat. The IETF invites any interested party to bring to its attention any copyrights, patents or patent applications, or other proprietary rights which may cover technology that may be required to practice this standard. Please address the information to the IETF Executive Director.

function: code raw [Vorbis] packets into framed OggSquish stream and decode Ogg streams back into raw packets. note: The CRC code is directly derived from public domain code by Ross Williams (ross@guest.adelaide.edu.au). See docs/framing.html for details.

liboil 0.3.14-1

Software: liboil
Version: 0.3.14-1
File or Package: liboil-0.3.14-1.fc9.src.rpm
OSI Licenses: GPLv2+ w/exception, MIT/X11, FreeBSD, BSDv2
Other Licenses: Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/9/Fedora/source/SRPMs/liboil-0.3.14-1.fc9.src.rpm>
Group: System Environment/Libraries
Description: Liboil is a library of simple functions that are optimized for various CPUs. These functions are generally loops implementing simple algorithms, such as converting an array of N integers to floating-point numbers or multiplying and summing an array of N numbers. Clearly such functions are candidates for significant optimization using various techniques, especially by using extended instructions provided by modern CPUs (AltiVec, MMX, SSE, etc.).
Common Usage: Library
Package Size: 8.3 MB
Folders / Files: 44 / 474
Source Path: wrlinux-4.0/layers/wrll-userspace/media/packages

libpcap 0.9.8-2

Software:	libpcap
Version:	0.9.8-2
File or Package:	libpcap-0.9.8-2.fc9.src.rpm
OSI Licenses:	GPLv2+ w/exception, BSDv1, BSDv2, MIT/X11
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/9/Fedora/source/SRPMS/libpcap-0.9.8-2.fc9.src.rpm
Group:	Development/Libraries
Description:	A system-independent interface for user-level packet capture; libpcap and WinPcap provide the packet-capture and filtering engines of many open source and commercial network tools, including protocol analyzers (packet sniffers), network monitors, network intrusion detection systems, traffic-generators and network-testers. Libpcap provides a portable framework for low-level network monitoring. Libpcap can provide network statistics collection, security monitoring and network debugging. Since almost every system vendor provides a different interface for packet capture, the libpcap authors created this system-independent API to ease in porting and to alleviate the need for several system-dependent packet capture modules in each application.
Common Usage:	Library

libpng 1.2.24-1

Software:	libpng
Version:	1.2.24-1
File or Package:	libpng-1.2.24-1.fc9.src.rpm
OSI Licenses:	MIT/X11, BSDv1, zlib/libpng, GPLv2+, GPLv2+ w/exception
Other Licenses:	Custom
URL:	
Group:	User Space Apps / System Environment/Libraries
Description:	libpng is the official Portable Network Graphics (PNG) reference library (originally called pnglib). It is a platform-independent library that contains C functions for handling PNG images. libpng is dependent on zlib. PNG was created to replace the GIF format, since GIF uses a patented data compression algorithm. Libpng should be installed if you need to manipulate PNG format image files.
Common Usage:	Library
Package Size:	5.1 MB
Folders / Files:	17 / 209
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

Maintained 1998-2007 Glenn Randers-Pehrson
Maintained 1996, 1997 Andreas Dilger)
Written 1995, 1996 Guy Eric Schalnat, Group 42, Inc.)

This is an example of how to use libpng to read and write PNG files. The file libpng.txt is much more verbose then this. If you have not read it, do so first. This was designed to be a starting point of an implementation. This is not officially part of libpng, is hereby placed in the public domain, and therefore does not require a copyright notice.

libpng 1.2.44

Software:	libpng
Version:	1.2.44
File or Package:	libpng-1.2.44.tar.bz2
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, BSDv1 (non-UCB), MIT/X11, zlib/libpng, Academic, Public Domain
Other Licenses:	Custom
URL:	
Group:	User Space Apps / System Environment/Libraries
Description:	libpng is the official Portable Network Graphics (PNG) reference library (originally called pnglib). It is a platform-independent library that contains C functions for handling PNG images. libpng is dependent on zlib. PNG was created to replace the GIF format, since GIF uses a patented data compression algorithm. Libpng should be installed if you need to manipulate PNG format image files.
Common Usage:	Library
Package Size:	2.13 MB

document version 2.60

Folders / Files: 19 / 215
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

AMENDMENTS

The Netscape Public License Version 1.1 ("NPL") consists of the Mozilla Public License Version 1.1 with the following Amendments, including Exhibit A-Netscape Public License. Files identified with "Exhibit A-Netscape Public License" are governed by the Netscape Public License Version 1.1. Additional Terms applicable to the Netscape Public License.

I. Effect.

These additional terms described in this Netscape Public License -- Amendments shall apply to the Mozilla Communicator client code and to all Covered Code under this License.

II. "Netscape's Branded Code" means Covered Code that Netscape distributes and/or permits others to distribute under one or more trademark(s) which are controlled by Netscape but which are not licensed for use under this License.

III. Netscape and logo.

This License does not grant any rights to use the trademarks "Netscape", the "Netscape N and horizon" logo or the "Netscape lighthouse" logo, "Netcenter", "Gecko", "Java" or "JavaScript", "Smart Browsing" even if such marks are included in the Original Code or Modifications.

IV. Inability to Comply Due to Contractual Obligation.

Prior to licensing the Original Code under this License, Netscape has licensed third party code for use in Netscape's Branded Code. To the extent that Netscape is limited contractually from making such third party code available under this License, Netscape may choose to reintegrate such code into Covered Code without being required to distribute such code in Source Code form, even if such code would otherwise be considered "Modifications" under this License.

V. Use of Modifications and Covered Code by Initial Developer.

V.1. In General.

document version 2.60

The obligations of Section 3 apply to Netscape, except to the extent specified in this Amendment, Section V.2 and V.3.

V.2. Other Products.

Netscape may include Covered Code in products other than the Netscape's Branded Code which are released by Netscape during the two (2) years following the release date of the Original Code, without such additional products becoming subject to the terms of this License, and may license such additional products on different terms from those contained in this License.

V.3. Alternative Licensing.

Netscape may license the Source Code of Netscape's Branded Code, including Modifications incorporated therein, without such Netscape Branded Code becoming subject to the terms of this License, and may license such Netscape Branded Code on different terms from those contained in this License.

VI. Litigation.

Notwithstanding the limitations of Section 11 above, the provisions regarding litigation in Section 11(a), (b) and (c) of the License shall apply to all disputes relating to this License.

EXHIBIT A-Netscape Public License.

"The contents of this file are subject to the Netscape Public License Version 1.1 (the "License"); you may not use this file except in compliance with the License. You may obtain a copy of the License at <http://www.mozilla.org/NPL/>. Software distributed under the License is distributed on an "AS IS" basis, WITHOUT WARRANTY OF ANY KIND, either express or implied. See the License for the specific language governing rights and limitations under the License.

The Original Code is Mozilla Communicator client code, released March 31, 1998. The Initial Developer of the Original Code is Netscape Communications Corporation. Portions created by Netscape are

Copyright (C) 1998-1999 Netscape Communications Corporation. All Rights Reserved.

Contributor(s): _____.

Alternatively, the contents of this file may be used under the terms of the _____ license (the _____ License), in which case the provisions of _____ License are applicable instead of those above. If you wish to allow use of your version of this file only under the terms of the _____ License and not to allow others to use your version of this file under the NPL, indicate your decision by deleting the provisions above and replace them with the notice and other provisions required by the _____ License. If you do not delete the provisions above, a recipient may use your version of this file under either the NPL or the _____ License."

Relicense from LGPLv3+ to LGPLv2.1+

libpthread-stubs 0.3

Software: libpthread-stubs

Version: 0.3

File or Package: libpthread-stubs-0.3.tar.bz2

OSI Licenses: GPLv2+ w/exception, MIT/X11, Academic

Other Licenses:

URL: [http://xcb.freedesktop.org/dist/](http://xcb.freedesktop.org/dist/libpthread-stubs-0.3.tar.bz2)

[libpthread-stubs-0.3.tar.bz2](http://xcb.freedesktop.org/dist/libpthread-stubs-0.3.tar.bz2)

Group: User Space Libraries

Description: This library provides weak aliases for pthread functions not provided in libc or otherwise available by default. Libraries like libxcb rely on pthread stubs to use pthreads optionally, becoming thread-safe when linked to libpthread, while avoiding any performance hit when running single-threaded. libpthread-stubs supports this behavior even on platforms which do not supply all the necessary pthread stubs. On platforms which already supply all the necessary pthread stubs, this package ships only the pkg-config file pthread-stubs.pc, to allow libraries to unconditionally express a dependency on pthread-stubs and still obtain correct behavior.

Common Usage: Library

Package Size: 783 KB (0.76 MB)

Folders / Files: 2 / 17

librsvg 2.32.1

Software:	librsvg
Version:	2.32.1
File or Package:	librsvg-2.32.0.tar.bz2
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, LGPLv2.1+, GPLv3+, MIT/X11, Academic, Public Domain
Other Licenses:	
URL:	http://ftp.gnome.org/pub/GNOME/sources/librsvg/2.32/librsvg-2.32.1.tar.bz2
Group:	User Space Libraries / System Environment/Libraries
Description:	An SVG (Scalable Vector Graphics) library based on cairo; a high performance SVG rendering library associated with the Gnome Project. libRSVG is a very fast SVG rendering engine written in C. It currently support most of the SVG 1.2 specification, except the animation part. libRSVG is used in many projects for SVG rendering, most notably GNOME.
Common Usage:	API, Library
Package Size:	2.24 MB
Folders / Files:	16 / 185
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

From:
libsamplerate-0.1.2-8.fc9.src/libsamplerate-0.1.2/libsamplerate-0.1.2/doc/license.html
 Secret Rabbit Code is released under a dual licensing scheme. Users can choose which of these two licenses they wish to operate under:

The standard GNU General Public License (GPL) as written and published by the Free Software Foundation. The very generous libsamplerate Commercial Use License that can be purchased for a one off payment of \$1000 (one thousand) Australian dollars. Any person or organisation wishing to distribute (either privately or publicly) software which uses Secret Rabbit Code must either abide by the GPL or purchase a commercial use license.

The commercial use license allows licensees to use libsamplerate as a statically linked library in proprietary, shareware or other closed source applications. The licensee may use libsamplerate in as many separate products as they choose and sell as many copies of each as they can without paying any further licensing fees for libsamplerate. For more information, please see the commercial use licensing procedure.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

number of utilities with enhanced security functionality designed to add mandatory access controls to Linux. The Security-enhanced Linux kernel contains new architectural components originally developed to improve the security of the Flask operating system. These architectural components provide general support for the enforcement of many kinds of mandatory access control policies, including those based on the concepts of Type Enforcement, Role-based Access Control, and Multi-level Security. libselinux provides an API for SELinux applications to get and set process and file security contexts and to obtain security policy decisions. Required for any applications that use the SELinux API.

NOTICES:

From:
libselinux-2.0.94/libselinux-2.0.94/license
 This library (libselinux) is public domain software, i.e. not copyrighted.

Warranty Exclusion
 You agree that this software is a non-commercially developed program that may contain "bugs" (as that term is used in the industry) and that it may not function as intended. The software is licensed "as is". NSA makes no, and hereby expressly disclaims all, warranties, express, implied, statutory, or otherwise with respect to the software, including noninfringement and the implied warranties of merchantability and fitness for a particular purpose.

Limitation of Liability
 In no event will NSA be liable for any damages, including loss of data, lost profits, cost of cover, or other special, incidental, consequential, direct or indirect damages arising from the software or the use thereof, however caused and on any theory of liability. This limitation will apply even if NSA has been advised of the possibility of such damage. You acknowledge that this is a reasonable allocation of risk.

<http://www.swig.org/legal.html> [as of 02/16/11]

IMPORTANT: The following represents the intent of the SWIG developers regarding how SWIG is licensed to the public. This is not legal advice; if you have specific questions about how SWIG's license applies to your use, please seek legal counsel.

The intention of the SWIG license is to ensure the SWIG source code (the code that is compiled into the SWIG executable) remains as free software by using the GPL license on the SWIG source code. SWIG also generates code and the intention of the SWIG license is also to enable distribution of the generated code under license terms of the user's choice/requirements. Users are responsible for ensuring that they meet any license requirements for all code fed into SWIG that is subsequently used in the generated output. Note that portions of the SWIG library are used in the generated code and this library code distributed with SWIG is licensed under a very permissive license that allows further distribution without any obligations.

As SWIG is a code generator, the license separation of the SWIG source and the generated code is important and should be clearly noted. The full license is available in the following files:

LICENSE
LICENSE-GPL
LICENSE-UNIVERSITIES
COPYRIGHT

♦♦♦

From:

<http://www.swig.org/Release/LICENSE> [as of 02/16/11]

SWIG is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version. See the LICENSE-GPL file for the full terms of the GNU General Public license version 3.

Portions of SWIG are also licensed under the terms of the licenses in the file LICENSE-UNIVERSITIES. You must observe the terms of these licenses, as well as the terms of the GNU General Public License, when you distribute SWIG.

The SWIG library and examples, under the Lib and Examples top level directories, are distributed under the following terms:

You may copy, modify, distribute, and make derivative works based on this software, in source code or object code form, without restriction. If you distribute the software to others, you may do so according to the terms of your choice. This software is offered as is, without warranty of any kind.

From:

<http://www.swig.org/legal.html> [as of 02/16/11]

IMPORTANT: The following represents the intent of the SWIG developers regarding how SWIG is licensed to the public. This is not legal advice; if you have specific questions about how SWIG's license applies to your use, please seek legal counsel.

The intention of the SWIG license is to ensure the SWIG source code (the code that is compiled into the SWIG executable) remains as free software by using the GPL license on the SWIG source code. SWIG also generates code and the intention of the SWIG license is also to enable distribution of the generated code under license terms of the user's choice/requirements. Users are responsible for ensuring that they meet any license requirements for all code fed into SWIG that is subsequently used in the generated output. Note that portions of the SWIG library are used in the generated code and this library code distributed with SWIG is licensed under a very permissive license that allows further distribution without any obligations.

As SWIG is a code generator, the license separation of the SWIG source and the generated code is important and should be clearly noted. The full license is available in the following files:

LICENSE
LICENSE-GPL
LICENSE-UNIVERSITIES
COPYRIGHT

♦♦♦

From:

<http://www.swig.org/Release/LICENSE> [as of 02/16/11]

SWIG is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version. See the LICENSE-GPL file for the full terms of the GNU General Public license version 3.

Portions of SWIG are also licensed under the terms of the licenses in the file LICENSE-UNIVERSITIES. You must observe the terms of these

document version 2.60

licenses, as well as the terms of the GNU General Public License, when you distribute SWIG.

The SWIG library and examples, under the Lib and Examples top level directories, are distributed under the following terms:

You may copy, modify, distribute, and make derivative works based on this software, in source code or object code form, without restriction. If you distribute the software to others, you may do so according to the terms of your choice. This software is offered as is, without warranty of any kind.

See the COPYRIGHT file for a list of contributors to SWIG and their copyright notices.

libsepol 2.0.41

Software:	libsepol
Version:	2.0.41
File or Package:	libsepol-2.0.41.tar.gz
OSI Licenses:	GPLv2+, LGPLv2.1, LGPLv2.1+
Other Licenses:	
URL:	http://userspace.selinuxproject.org/trac/wiki/Releases/libsepol-2.0.41.tar.gz
Group:	User Space Libraries / System Environment/Libraries
Description:	SELinux library and simple utilities; libsepol provides an API for the manipulation of SELinux binary policies. It is used by libsepol (the policy compiler) and similar tools, as well as by programs like load_policy that need to perform specific transformations on binary policies such as customizing policy boolean settings.
Common Usage:	Library
Package Size:	1.6 MB
Folders / Files:	18 / 176
Source Path:	wrlinux-4.0/layers/wrll-userspace/security/packages

Source:

document version 2.60

<http://download.gnome.org/sources/libsoup/2.32/libsoup-%{version}.tar.bz2>

Description - Libsoup is an HTTP library implementation in C. It was originally part of a SOAP (Simple Object Access Protocol) implementation called Soup, but the SOAP and non-SOAP parts have now been split into separate packages. libsoup uses the Glib main loop and is designed to work well with GTK applications. This enables GNOME applications to access HTTP servers on the network in a completely asynchronous fashion, very similar to the Gtk+ programming model (a synchronous operation mode is also supported for those who want it).

SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007

PREAMBLE

The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

DEFINITIONS

document version 2.60

"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting — in part or in whole — any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who contributed to the Font Software.

PERMISSION & CONDITIONS

Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

- 1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.
- 2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.
- 3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding Copyright Holder. This restriction only applies to the primary font name as presented to the users.
- 4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.
- 5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

TERMINATION

This license becomes null and void if any of the above conditions are not met.

DISCLAIMER

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT.

IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. As a special exception, you may create a larger work that contains part or all of the Bison parser skeleton and distribute that work under terms of your choice, so long as that work isn't itself a parser generator using the skeleton or a modified version thereof as a parser skeleton. Alternatively, if you modify or redistribute the parser skeleton itself, you may (at your option) remove this special exception, which will cause the skeleton and the resulting Bison output files to be licensed under the GNU General Public License without this special exception. This special exception was added by the Free Software Foundation in version 2.2 of Bison.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/9/Fedora/source/SRPMS/libtheora-1.0beta2-4.fc9.src.rpm
Group:	System Environment/Libraries
Description:	Theora is Xiph.Org's first publicly released video codec, intended for use within the Ogg's project's Ogg multimedia streaming system. Theora is derived directly from On2's VP3 codec; Currently the two are nearly identical, varying only in encapsulating decoder tables in the bitstream headers, but Theora will make use of this extra freedom in the future to improve over what is possible with VP3.
Common Usage:	Library
Package Size:	9.4 MB
Folders / Files:	35 / 223

Please see the file COPYING for the copyright license for this software. In addition to and irrespective of the copyright license associated with this

document version 2.60

software, On2 Technologies, Inc. makes the following statement regarding technology used in this software:

On2 represents and warrants that it shall not assert any rights relating to infringement of On2's registered patents, nor initiate any litigation asserting such rights, against any person who, or entity which utilizes the On2 VP3 Codec Software, including any use, distribution, and sale of said Software; which make changes, modifications, and improvements in said Software; and to use, distribute, and sell said changes as well as applications for other fields of use.

This reference implementation is originally derived from the On2 VP3 Codec Software, and the Theora video format is essentially compatible with the VP3 video format, consisting of a backward-compatible superset.

libtheora-1.0beta2/libtheora-1.0beta2/doc/draft-ietf-avt-rtp-theora-00.txt
AVT Working Group L. Barbato, Internet-Draft Xiph.Org
Expires: January 22, 2007 July 21, 2006
draft-ietf-avt-rtp-theora-00 - RTP Payload Format for Theora Encoded Video

Status of this Memo - By submitting this Internet-Draft, each author represents that any applicable patent or other IPR claims of which he or she is aware have been or will be disclosed, and any of which he or she becomes aware will be disclosed, in accordance with Section 6 of BCP 79.

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF), its areas, and its working groups. Note that other groups may also distribute working documents as Internet-Drafts.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

The list of current Internet-Drafts can be accessed at <http://www.ietf.org/ietf/1id-abstracts.txt>. The list of Internet-Draft Shadow Directories can be accessed at <http://www.ietf.org/shadow.html>. This Internet-Draft will expire on January 22, 2007.

Copyright Notice - Copyright (C) The Internet Society (2006).

Intellectual Property Statement - The IETF takes no position regarding the validity or scope of any Intellectual Property Rights or other rights that might be claimed to pertain to the implementation or use of the technology described in this document or the extent to which any license under such rights might or might not be available; nor does it represent that it has made any independent effort to identify any such rights. Information on the procedures with respect to rights in RFC documents can be found in BCP 78 and BCP 79.

Copies of IPR disclosures made to the IETF Secretariat and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such

libtirpc 0.2.1-4

Software: libtirpc
Version: 0.2.1-4
File or Package: libtirpc-0.2.1-4.fc14.src.rpm
OSI Licenses: GPLv2+ w/exception, MIT/X11, FreeBSD, BSDv1 (UCB & non-UCB), BSDv2, Sun Industry Standards Source v1.0, Academic
Other Licenses: Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/14/Fedora/source/SRPMS/libtirpc-0.2.1-4.fc14.src.rpm>
Group: User Space Libraries
Description: This package contains SunLib's implementation of transport-independent RPC (TI-RPC) documentation. This library forms a piece of the base of Open Network Computing (ONC), and is derived directly from the Solaris 2.3 source. TI-RPC is an enhanced version of TS-RPC that requires the UNIX System V Transport Layer Interface (TLI) or an equivalent X/Open Transport Interface (XTI). TI-RPC is on-the-wire compatible with the TS-RPC, which is supported by almost 70 vendors on all major operating systems. TS-RPC source code (RPCSRC 4.0) remains available from several internet sites. Applications linked with this release's librpc must link with the United States domestic version of libcrypt in order to resolve the cbc_crypt() and ecb_crypt() functions. These routines are used with Secure RPC however all RPC programs that link with this release's librpc will need to link with the domestic libcrypt.
Common Usage: Library
Package Size: 2.27 MB
Folders / Files: 10 / 172
Source Path: wrlinux-4.0/layers/wrll-userspace/cgl/packages

Sun Industry Standards Source License 1.0

DEFINITIONS

1.1. "Commercial Use" means distribution or otherwise making the Original Code available to a third party.

1.2. "Contributor Version" means the combination of the Original Code, and the Modifications made by that particular Contributor.

1.3. "Electronic Distribution Mechanism" means a mechanism generally accepted in the software development community for the electronic transfer of data.

1.4. "Executable" means Original Code in any form other than Source Code.

1.5. "Initial Developer" means the individual or entity identified as the Initial Developer in the Source Code notice required by 2 (Exhibit A)

1.6. "Larger Work" means a work which combines Original Code or portions thereof with code not governed by the terms of this License.

1.7. "License" means this document.

1.8. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. "Modifications" means any addition to or deletion from the substance or structure of either the Original Code or any previous Modifications. A Modification is:

A. Any addition to or deletion from the contents of a file containing Original Code or previous Modifications.

B. Any new file that contains any part of the Original Code or previous Modifications.

1.10. "Original Code" means Source Code of computer software code which is described in the Source Code notice required by Exhibit A as Original Code.

1.11. "Patent Claims" means any patent claims, now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. "Source Code" means the preferred form of the Original Code for making modifications to it, including all modules it contains, plus any associated interface definition files, or scripts used to control compilation and installation of an Executable.

1.13. "Standards" means the standard identified in Exhibit B or a subsequent version of such standard.

1.14. "You" or "Your" means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License or a future version of this License issued under Section 6.1. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2.0 SOURCE CODE LICENSE

2.1 The Initial Developer Grant: The Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license, subject to third party intellectual property claims:

a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer to use, reproduce, modify, display, perform, sub license and distribute the Original

Code (or portions thereof) with or without Modifications, and/or as part of a Larger Work; and

b) under Patents Claims infringed by the making, using or selling of Original Code, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Code (or portions thereof).

c) the licenses granted in this Section 2.1(a) and (b) are effective on the date Initial Developer first distributes Original Code under the terms of this License.

d) Notwithstanding Section 2.1(b) above, no patent license is granted:

- 1) for code that You delete from the Original Code;
- 2) separate from the Original Code; or
- 3) for infringements caused by:
 - i) the modification of the Original Code or
 - ii) the combination of the Original Code with other software or devices, including but not limited to Modifications.

3.0 DISTRIBUTION OBLIGATIONS

3.1 Application of License.

The Source Code version of Original Code may be distributed only under the terms of this License or a future version of this License released under Section 6.1, and You must include a copy of this License with every copy of the Source Code You distribute. You may not offer or impose any terms on any Source Code version that alters or restricts the applicable version of this License or the recipient's rights hereunder. Your license for shipment of the Contributor Version is conditioned upon your full compliance with this Section.

The Modifications which you create must comply with all requirements set out by the Standards body in effect 120 days before You ship the Contributor Version. In the event that the Modifications do not meet such requirements, You agree to publish (i) any deviation from the Standards protocol resulting from implementation of your Modifications and (ii) a reference implementation of Your Modifications, and to make any such deviation and reference implementation available to all third parties under the same terms as the license on a royalty free basis within thirty (30) days of Your first customer shipment of Your Modifications.

3.2 Required Notices.

You must duplicate the notice in Exhibit A in each file of the Source Code. If it is not possible to put such notice in a particular Source Code file due to its structure, then You must include such notice in a location (such as a relevant directory) where a user would be likely to look for such a notice. If You created one or more Modifications, You may add your name as a Contributor to the notice described in Exhibit A. You must also duplicate this License in any documentation for the Source Code where You describe recipients' rights or ownership rights relating to Initial Code. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Your version of the Code. However, You may do so only on Your own behalf, and not on behalf of the Initial Developer. You must make it absolutely clear than any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer for any liability incurred by the Initial Developer as a result of warranty, support, indemnity or liability terms You offer.

3.3 Distribution of Executable Versions.

You may distribute Original Code in Executable and Source form only if the requirements of Section 3.1 and 3.2 have been met for that Original

Code, and if You include a notice stating that the Source Code version of the Original Code is available under the terms of this License. The notice must be conspicuously included in any notice in an Executable or Source versions, related documentation or collateral in which You describe recipients' rights relating to the Original Code. You may distribute the Executable and Source versions of Your version of the Code or ownership rights under a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License. If You distribute the Executable and Source versions under a different license You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer. You hereby agree to indemnify the Initial Developer for any liability incurred by the Initial Developer as a result of any such terms You offer.

3.4 Larger Works.

You may create a Larger Work by combining Original Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Original Code.

4.0 INABILITY TO COMPLY DUE TO STATUTE OR REGULATION

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Original Code due to statute, judicial order, or regulation then You must:

a) comply with the terms of this License to the maximum extent possible; and

b) describe the limitations and the code they affect. Such description must be included in the LEGAL file described in Section 3.2 and must be included with all distributions of the Source Code. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

5.0 APPLICATION OF THIS LICENSE

This License applies to code to which the Initial Developer has attached the notice in Exhibit A and to related Modifications as set out in Section 3.1.

6.0 VERSIONS OF THE LICENSE

6.1 New Versions.

Sun Microsystems, Inc. Sun may publish revised and/or new versions of the License from time to time. Each version will be given a distinguishing version number.

6.2 Effect of New Versions.

Once Original Code has been published under a particular version of the License, You may always continue to use it under the terms of that version. You may also choose to use such Original Code under the terms of any subsequent version of the License published by Sun. No one other than Sun has the right to modify the terms applicable to Original Code.

7. DISCLAIMER OF WARRANTY.

ORIGINAL CODE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE ORIGINAL CODE IS FREE OF DEFECTS, MERCHANTABILITY, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE ORIGINAL CODE IS WITH YOU. SHOULD ANY ORIGINAL CODE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER) ASSUME THE COST OF ANY

document version 2.60

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY ORIGINAL CODE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

8.0 TERMINATION

8.1 This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. All sublicenses to the Original Code which are properly granted shall survive any termination of this License. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

8.2. In the event of termination under Section 8.1 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or any distributor hereunder prior to termination shall survive termination.

9.0 LIMIT OF LIABILITY

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF ORIGINAL CODE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOOD WILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

10.0 U.S. GOVERNMENT END USERS

U.S. Government: If this Software is being acquired by or on behalf of the U.S. Government or by a U.S. Government prime contractor or subcontractor (at any tier), then the Government's rights in the Software and accompanying documentation shall be only as set forth in this license; this is in accordance with 48 C.F.R. 227.7201 through 227.7202-4 (for Department of Defense (DoD) acquisitions) and with 48 C.F.R.2.101 and 12.212 (for non-DoD acquisitions).

11.0 MISCELLANEOUS

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by California law provisions (except to the extent applicable law, if any, provides otherwise), excluding its conflict-of-law provisions. With respect to disputes in which at least one party is a citizen of, or an entity chartered or registered to do business in the United States of America, any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California, with venue lying in Santa Clara County, California, with the losing party responsible for costs, including without limitation, court costs and reasonable attorneys fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License.

libtool 2.2.6-18

Software:	libtool
Version:	2.2.6-18
File or Package:	libtool-2.2.6-18.fc12.src.rpm
OSI Licenses:	GPLv3+ w/exception, GPLv2, GPLv2+, GPLv2+

document version 2.60

w/exception, LGPLv2+ w/exception, LGPLv2.1, LGPLv2.1+ w/exception, FDLv1.2, FDLv1.2+, MIT/X11

Other Licenses: Custom

URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Fedora/source/SRPMs/libtool-2.2.6-18.fc12.src.rpm>

Group: User Space Apps / Development/Tools

Description: GNU Libtool ships with GNU libltdl, which hides the complexity of loading dynamic shared runtime libraries (modules) behind a consistent, portable interface. GNU Libtool simplifies the developer's job by encapsulating both the platform-specific dependencies, and the user interface, in a single script. GNU Libtool is designed so that the complete functionality of each host type is available via a generic interface, but nasty quirks are hidden from the programmer. The libtool package contains the GNU libtool, a set of shell scripts which automatically configure UNIX and UNIX-like architectures to generically build shared libraries.

Common Usage: Library

Package Size: 21.5 MB

Folders / Files: 23 / 331

Source Path: wrlinux-4.0/layers/ldat-tools/packages

This is GNU Libtool, a generic library support script. Libtool hides the complexity of using shared libraries behind a consistent, portable interface. To use Libtool, add the new generic library building commands to your Makefile, Makefile.in, or Makefile.am. See the documentation for details. Libtool's home page is:

<http://www.gnu.org/software/libtool/libtool.html>

libunique 1.1.6

Software: libunique
Version: 1.1.6
File or Package: libunique-1.1.6.tar.bz2
OSI Licenses: GPLv2+ w/exception, LGPLv2+, LGPLv2.1, LGPLv2.1+, FDLv1.1+, MIT/X11, Academic, Public Domain
Other Licenses:
URL: <http://ftp.gnome.org/pub/GNOME/sources/libunique/1.1/libunique-1.1.6.tar.bz2>
Group: User Space Libraries
Description: LibUnique is a library for writing single instance applications, that is applications that are run once and every further call to the same binary either exits immediately or sends a command to the running instance. If you launch a single instance application twice, the second instance will either just quit or will send a message to the running instance. Unique makes it easy to write this kind of applications, by providing a base class, taking care of all the IPC machinery needed to send messages to a running instance, and also handling the startup notification side. Unique aims to replace the BaconMessageConnection code that has been copied by many projects and the code using Bonobo and D-Bus.
Common Usage: Library
Package Size: 1.58 MB
Folders / Files: 14 / 124
Source Path: [wrlinux-4.0/layers/wrll-userspace/graphics/packages](#)

libunique-1.1.6/libunique-1.1.6/ChangeLog
The test-unique.c test/example is under the GPL, while the rest of the codebase is under the LGPL. It is better to have the whole codebase under a single license. Thanks to Vincent Untz.

libusb 0.1.12-22

Software:	libusb
Version:	0.1.12-22
File or Package:	libusb-0.1.12-22.fc12.src.rpm
OSI Licenses:	GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1, MIT/X11, BSDv2
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Everything/source/SRPMS/libusb-0.1.12-22.fc12.src.rpm
Group:	User Space Libraries / System Environment/Libraries
Description:	A library which allows userspace access to USB devices. libusb is a suite of user-mode routines for controlling data transfer to and from USB devices on Unix-like systems without the need for kernel-mode drivers.
Common Usage:	Library
Package Size:	2.6 MB
Folders / Files:	6 / 71
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

As a special exception, you may create a larger work that contains part or all of the Bison parser skeleton and distribute that work under terms of your choice, so long as that work isn't itself a parser generator using the skeleton or a modified version thereof as a parser skeleton. Alternatively, if you modify or redistribute the parser skeleton itself, you may (at your option) remove this special exception, which will cause the skeleton and the resulting Bison output files to be licensed under the GNU General Public License without this special exception.

Originally written by **Steven M. Bellovin** <smb@research.att.com> while at the University of North Carolina at Chapel Hill. Later tweaked by a couple of people on Usenet. Completely overhauled by Rich Salz <rsalz@bbn.com> and Jim Berets <jberets@bbn.com> in August, 1990; This grammar has 13 shift/reduce conflicts.

This code is in the public domain and has no copyright.

libutempter 1.1.5-4

Software:	libutempter
Version:	1.1.5-4
File or Package:	libutempter-1.1.5-4.fc12.src.rpm
OSI Licenses:	LGPLv2.1, LGPLv2.1+
Other Licenses:	
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Fedora/source/SRPMS/libutempter-1.1.5-4.fc12.src.rpm
Group:	System Environment/Libraries
Description:	The libutempter library provides interface for terminal emulators such as screen and xterm to record user sessions to utmp and wtmp files. The utempter is a privileged helper used by libutempter library to manipulate utmp and wtmp files.
Common Usage:	API, Library
Package Size:	128 KB (0.12 MB)
Folders / Files:	3 / 13
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

libvirt 0.8.1

Software: libvirt
Version: 0.8.1
File or Package: libvirt-0.8.1.tar.gz
OSI Licenses: GPLv2+, GPLv2+ w/exception, LGPLv2.1, LGPLv2.1+, GPLv3+, GPLv3+ w/exception, MIT/X11, BSDv2, Academic, Public Domain
Other Licenses: Custom
URL: <http://libvirt.org/sources/libvirt-%{version}.tar.gz>
Group: Development/Libraries
Description: Libvirt is a C toolkit to interact with the virtualization capabilities of recent versions of Linux (and other OSes). Virtualization of the Linux Operating System means the ability to run multiple instances of Operating Systems concurrently on a single hardware system where the basic resources are driven by a Linux instance. The library aim at providing long term stable C API initially for the Xen paravirtualization but should be able to integrate other virtualization mechanisms if needed.
Common Usage: Library
Package Size: 75.8 MB
Folders / Files: 80 / 1,957
Source Path: wrlinux-4.0/layers/wrll-linux-2.6.34/packages

♦♦♦

From:
libvirt-0.8.1/libvirt-0.8.1/src/storage/parthelper.c
This helper exists because parted is GPLv3+, while libvirt is LGPLv2+. Thus we can't link to parted in libvirt.so without the combined work being GPLv3+. Thus we separate via an external command. NB, this source code is still LGPLv2+, but the binary helper is effectively GPLv3+

Libvirt is a C toolkit to interact with the virtualization capabilities of recent versions of Linux (and other OSes). It is free software available under the GNU Lesser General Public License. Virtualization of the Linux Operating System means the ability to run multiple instances of Operating Systems

document version 2.60

concurrently on a single hardware system where the basic resources are driven by a Linux instance. The library aim at providing long term stable C API initially for the Xen paravirtualization but should be able to integrate other virtualization mechanisms if needed. Daniel Veillard

AVT Working Group L. Barbato, Internet-Draft Xiph.Org

Expires: December 27, 2007 Jun 25, 2007

draft-ietf-avt-rtp-vorbis-06 - RTP Payload Format for Vorbis Encoded Audio

Status of this Memo - By submitting this Internet-Draft, each author represents that any applicable patent or other IPR claims of which he or document version 2.60

she is aware have been or will be disclosed, and any of which he or she becomes aware will be disclosed, in accordance with Section 6 of BCP 79.

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF), its areas, and its working groups. Note that other groups may also distribute working documents as Internet-Drafts.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

The list of current Internet-Drafts can be accessed at <http://www.ietf.org/ietf/1id-abstracts.txt>. The list of Internet-Draft Shadow Directories can be accessed at <http://www.ietf.org/shadow.html>. This Internet-Draft will expire on December 27, 2007.

Copyright Notice - Copyright (C) The IETF Trust (2007).

Abstract - This document describes an RTP payload format for transporting Vorbis encoded audio. It details the RTP encapsulation mechanism for raw Vorbis data and details the delivery mechanisms for the decoder probability model, referred to as a codebook and other setup information. Also included within this memo are media type registrations, and the details necessary for the use of Vorbis with the Session Description Protocol (SDP).

libwnck 2.30.4-1

Software:	libwnck
Version:	2.30.4-1
File or Package:	libwnck-2.30.4-1.fc14.src.rpm
OSI Licenses:	GPLv2+ w/exception, LGPLv2, LGPLv2+, MIT/X11, Academic, Public Domain
Other Licenses:	Custom
URL:	http://download.gnome.org/sources/libwnck/2.30/ libwnck-2.30.4-1.fc14.src.rpm
Group:	User Space Libraries / System Environment/Libraries
Description:	libwnck is Window Navigator Construction Kit, i.e. a library to use for writing pagers and tasklists and

document version 2.60

stuff. It allows applications to monitor information about open windows, workspaces, their names/icons, and so forth.

Common Usage: Library
Package Size: 4.19 MB
Folders / Files: 9 / 231
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

NOTICES:

From:

libwnck-2.30.4-1.fc14.src/libwnck.spec

Summary: Window Navigator Construction Kit

Name: libwnck

Version: 2.30.4

Release: 1%{?dist}

URL: <http://download.gnome.org/sources/libwnck/>

VCS: [git:git://git.gnome.org/libwnck](http://git.gnome.org/libwnck)

Source0: <http://download.gnome.org/sources/libwnck/2.30/%{name}-%{version}.tar.bz2>

License: LGPLv2+

Group: System Environment/Libraries

Description - libwnck (pronounced "libwink") is used to implement pagers, tasklists, and other such things. It allows applications to monitor information about open windows, workspaces, their names/icons, and so forth. You should install the libwnck-devel package if you would like to compile applications that use libwnck. You don't need libwnck-devel just to use precompiled applications.

this part is mostly stolen from xutils.c
end of stolen code

libX11 1.4.0

Software:	libX11
Version:	1.4.0
File or Package:	libX11-1.4.0.tar.bz2
OSI Licenses:	GPLv2+ w/exception, MIT/X11, FreeBSD, Academic
Other Licenses:	Proprietary
URL:	
Group:	User Space Libraries
Description:	This is the libX11 from XFree86. LibX11 is the main X11 library containing all the client-side code to access the X11 windowing system. libX11 is the main library used by X Window System applications to communicate with the X server. The goal of this project are (1) to get libX11 out of the huge XFree86 hunk of code, (2) to make it buildable with autotools, and (3) keep the ability to easily merge bug fixes from libX11 in XFree86 into this code, (4) make it possible for people to work with Xlib without having to deal with the entire XFree86 distribution, so that bugs can get detected and fixed, (5) provide a place to move the X library forward.
Common Usage:	Library
Package Size:	12.56 MB
Folders / Files:	91 / 1,625

NOTICES:

From:

libX11-1.4.0/libX11-1.4.0/copying

The following is the 'standard copyright' agreed upon by most contributors, and is currently the canonical license preferred by the X.Org Foundation. This is a slight variant of the common MIT license form published by the Open Source Initiative at <http://www.opensource.org/licenses/mit-license.php>

Copyright holders of new code should use this license statement where possible, and insert their name to this list. Please sort by surname for people, and by the full name for other entities (e.g. Juliusz Chroboczek sorts before Intel Corporation sorts before Daniel Stone). See each individual source file or directory for the license that applies to that file.

3) SVR4 stream pipe code. This code is proprietary and the actual code is not included in the XC distribution.

From:
libX11-1.4.0/libX11-1.4.0/authors
Once upon a midnight hour, long ago, in a galaxy, far, far, away, Xlib was originally developed by Jim Gettys, of Digital Equipment Corporation (now part of HP). Warren Turkal did the autotooling in October, 2003. Josh Triplett, Jamey Sharp, and the XCB team (xcb@lists.freedesktop.org) maintain the XCB support.

Individual developers include (in no particular order): Sebastien Marineau, Holger Veit, Bruno Haible, Keith Packard, Bob Scheifler, Takashi Fujiwara, Kazunori Nishihara, Hideki Hiura, Hiroyuki Miyamoto, Katsuhisi Yano, Shigeru Yamada, Stephen Gildea, Li Yuhong, Seiji Kuwari.

This work was supported by many organizations (in no particular order), including the X Consortium, Digital Equipment Corporation, Tektronix, The Open Group, OMRON, Wyse Technology, FUJITSU LIMITED, Sun Microsystems, Fuji Xerox, Sony Corporation, Toshiba Corporation, Massachusetts Institute of Technology, Silicon Graphics, the XFree86 Project, among others. Patches/fixes came from all over. No doubt we've missed credits. Please let us know who should be credited.

libXau 1.0.6

Software:	libXau
Version:	1.0.6
File or Package:	libXau-1.0.6.tar.bz2
OSI Licenses:	GPLv2+ w/exception, MIT/X11, Academic
Other Licenses:	
URL:	http://xorg.freedesktop.org/releases/individual/lib/libXau-1.0.6.tar.bz2
Group:	User Space Libraries
Description:	A Sample Authorization Protocol for X; X.Org X11 libXau runtime library. The libXau package contains a library implementing the X11 Authorization Protocol. This is useful for restricting client access to the display. This package provides the main interface to the X11 authorisation handling, which controls authorisation for X connections, both client-side and server-side.
Common Usage:	Library
Package Size:	959 KB (0.94 MB)
Folders / Files:	4 / 30
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

libxcb 1.7

Software: libxcb

Version: 1.7

File or Package: libxcb-1.7.tar.bz2

OSI Licenses: GPLv2+ w/exception, MIT/X11, Academic

Other Licenses:

URL: <http://xcb.freedesktop.org/dist/libxcb-1.7.tar.bz2>

Group: User Space Libraries

Description: XCB: an X protocol C binding; The X protocol C-language Binding (XCB) is a replacement for Xlib featuring a small footprint, latency hiding, direct access to the protocol, improved threading support, and extensibility. The libxcb package provides an interface to the X Window System protocol, which replaces the current Xlib interface. Xlib can also use XCB as a transport layer, allowing software to make requests and receive responses with both.

Common Usage: Library

Package Size: 1.32 MB

Export Requirements.

You may not export or re-export this software or any copy or adaptation in violation of any applicable laws or regulations. Without limiting the generality of the foregoing, hardware, software, technology or services provided under this license agreement may not be exported, reexported, transferred or downloaded to or within (or to a national resident of) countries under U.S. economic embargo including the following countries:

Cuba, Iran, Libya, North Korea, Sudan and Syria. This list is subject to change.

Hardware, software, technology or services may not be exported, reexported, transferred or downloaded to persons or entities listed on the U.S. Department of Commerce Denied Persons List, Entity List of proliferation concern or on any U.S. Treasury Department Designated Nationals exclusion list, or to parties directly or indirectly involved in the development or production of nuclear, chemical, biological weapons or in missile technology programs as specified in the U.S. Export Administration Regulations (15 CFR 744).

By accepting this license agreement you confirm that you are not located in (or a national resident of) any country under U.S. economic embargo, not identified on any U.S. Department of Commerce Denied Persons List, Entity List or Treasury Department Designated Nationals exclusion list, and not directly or indirectly involved in the development or production of nuclear, chemical, biological weapons or in missile technology programs as specified in the U.S. Export Administration Regulations.

Software available on this web site contains cryptography and is therefore subject to US government export control under the U.S. Export Administration Regulations ("EAR"). EAR Part 740.13(e) allows the export and reexport of publicly available encryption source code that is not subject to payment of license fee or royalty payment. Object code resulting from the compiling of such source code may also be exported and reexported under this provision if publicly available and not subject to a fee or payment other than reasonable and customary fees for reproduction and distribution. This kind of encryption source code and the corresponding object code may be exported or reexported without prior

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

U.S. government export license authorization provided that the U.S. government is notified about the Internet location of the software.

The open source software available on this web site is publicly available without license fee or royalty payment, and all binary software is compiled from the source code. The U.S. government has been notified about this site and the location site for the source code. Therefore, the source code and compiled object code may be downloaded and exported under U.S. export license exception (without a U.S. export license) in accordance with the further restrictions outlined above regarding embargoed countries, restricted persons and restricted end uses.

Local Country Import Requirements. The software you are about to download contains cryptography technology. Some countries regulate the import, use and/or export of certain products with cryptography. The X.org Foundation makes no claims as to the applicability of local country import, use and/or export regulations in relation to the download of this product. If you are located outside the U.S. and Canada you are advised to consult your local country regulations to insure compliance.

libXfont 1.4.3

Software: libXfont
Version: 1.4.3
File or Package: libXfont-1.4.3.tar.bz2
OSI Licenses: GPLv2+ w/exception, MIT/X11, FreeBSD, BSDv1 (UCB), Academic
Other Licenses:
URL: <http://xorg.freedesktop.org/releases/individual/lib/libXfont-1.4.3.tar.bz2>
Group: User Space Libraries
Description: X11 font rasterisation library; X.Org X11 libXfont runtime library; The libXfont package contains the X.Org X11 libXfont runtime library. A heap based buffer overflow flaw was found in the way the X.Org server handled malformed font files. A malicious local user could exploit this issue to potentially execute arbitrary code with the privileges of the X.Org server. Fixed packages are available from updates.redhat.com. libXfont provides various services for X servers, most notably font selection and rasterisation (through external libraries).

libXfont provides the core of the legacy X11 font system, handling the index files (fonts.dir, fonts.alias, fonts.scale), the various font file formats, and rasterizing them. It is used by the X servers, the X Font Server (xfs), and some font utilities (bdf2pcr for instance), but should not be used by normal X11 clients. X11 clients access fonts via either the new API's in libXft, or the legacy API's in libX11.

Common Usage: Library
Package Size: 1.84 MB
Folders / Files: 14 / 128
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

libXft 2.2.0

Software:	libXft
Version:	2.2.0
File or Package:	libXft-2.2.0.tar.bz2
OSI Licenses:	GPLv2+ w/exception, MIT/X11, Academic
Other Licenses:	
URL:	http://xorg.freedesktop.org/releases/individual/lib/libXft-2.2.0.tar.bz2
Group:	User Space Libraries
Description:	FreeType-based font drawing library for X; X.Org X11 libXft runtime library; The current version of Xft provides a client-side font API for X applications. It uses Fontconfig to select fonts and the X protocol for rendering them. When available, Xft uses the Render extension to accelerate text drawing. When Render is not available, Xft uses the core protocol to draw client-side glyphs. This provides completely compatible support of client-side fonts for all X servers. Xft version 2.1 is the first stand alone release of Xft, a library that connects X applications with the FreeType font rasterization library. Xft uses fontconfig to locate fonts so it has no configuration files.
Common Usage:	Library
Package Size:	1.13 MB
