This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/13/Everything/source/SRPMS/openssh-5.4p1-1.fc13.src.rpm>

Group: User Space Apps / Applications/Internet

Description: An open source implementation of SSH protocol; The OpenSSH implementation of SSH protocol version; OpenSSH (OpenBSD Secure Shell) is a set of computer programs providing encrypted communication sessions over a computer network using the ssh protocol. It was created as an open source alternative to the proprietary Secure Shell software suite offered by SSH Communications Security. SSH (Secure SHell) is a program for logging into and executing commands on a remote machine. SSH is intended to replace rlogin and rsh, and to provide secure encrypted communications between two untrusted hosts over an insecure network. X11 connections and arbitrary TCP/IP ports can also be forwarded over the secure channel. OpenSSH is OpenBSD's version of the last free version of SSH, bringing it up to date in terms of security and features, as well as removing all patented algorithms to separate libraries.

Common Usage: Tool, Utility

Package Size: 9.9 MB

Folders / Files: 25 / 637

Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

NOTICES:

From:
openssh-5.4p1-1.fc13.src/openssh-5.4p1-noacss/openssh-5.4p1/license
openssh-5.4p1-1.fc13.src/pam_ssh_agent_auth-0.9.2/pam_ssh_agent_auth-0.9.2/OPENSSH_LICENSE
This file is part of the OpenSSH software. The licences which components of this software fall under are as follows. First, we will summarize and say that all components are under a BSD licence, or a licence more free than that. OpenSSH contains no GPL code.

1) Copyright (c) 1995 Tatu Ylonen <ylo@cs.hut.fi>, Espoo, Finland
All rights reserved

As far as I am concerned, the code I have written for this software can be used freely for any purpose. Any derived versions of this software must be clearly marked as such, and if the derived work is incompatible with the protocol description in the RFC file, it must be called by a name other than "ssh" or "Secure Shell".

[Tatu continues]
However, I am not implying to give any licenses to any patents or copyrights held by third parties, and the software includes parts that are not under my direct control. As far as I know, all included source code is used in accordance with the relevant license agreements and can be used freely for any purpose (the GNU license being the most restrictive); see below for details.

[However, none of that term is relevant at this point in time. All of these restrictively licenced software components which he talks about have been removed from OpenSSH, i.e.,

- RSA is no longer included, found in the OpenSSL library
- IDEA is no longer included, its use is deprecated
- DES is now external, in the OpenSSL library
- GMP is no longer used, and instead we call BN code from OpenSSL
- Zlib is now external, in a library
- The make-ssh-known-hosts script is no longer included
- TSS has been removed
- MD5 is now external, in the OpenSSL library
- RC4 support has been replaced with ARC4 support from OpenSSL
- Blowfish is now external, in the OpenSSL library

[The licence continues]

Note that any information and cryptographic algorithms used in this software are publicly available on the Internet and at any major bookstore, scientific library, and patent office worldwide. More information can be found e.g. at "<http://www.cs.hut.fi/crypto>".

The legal status of this program is some combination of all these permissions and restrictions. Use only at your own responsibility. You will be responsible for any legal consequences yourself; I am not making any claims whether possessing or using this is legal or not in your country, and I am not taking any responsibility on your behalf.

NO WARRANTY - BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

2) The 32-bit CRC compensation attack detector in deattack.c was contributed by CORE SDI S.A. under a BSD-style license. Cryptographic attack detector for ssh - source code

IMPORTANT NOTES

4) Three free AES implementations are supported by this implementation of UMAC. Paulo Barreto's version is in the public domain and can be found at <http://www.esat.kuleuven.ac.be/~rijmen/rijndael/> (search for "Barreto"). The only two files needed are rijndael-alg-fst.c and rijndael-alg-fst.h. Brian Gladman's version is distributed with the GNU Public licence at <http://fp.gladman.plus.com/AES/index.htm>. It includes a fast IA-32 assembly version. The OpenSSL crypto library is the third.

OpenSSH is based on the last free version of Tatu Ylonen's sample implementation with all patent-encumbered algorithms removed (to external libraries), all known security bugs fixed, new features reintroduced and many other clean-ups.

OpenSSH has been created by **Aaron Campbell, Bob Beck, Markus Friedl, Niels Provos, Theo de Raadt, and Dug Song.**

It has a homepage at <http://www.openssh.com/>

Description:	A general purpose cryptography library with TLS implementation; The OpenSSL toolkit. OpenSSL is an open source implementation of the SSL and TLS protocols. The core library (written in the C programming language) implements the basic cryptographic functions and provides various utility functions. Wrappers allowing the use of the OpenSSL library in a variety of computer languages are available. Versions are available for most Unix-like operating systems (including Solaris, Linux, Mac OS X and the four open source BSD operating systems), OpenVMS and Microsoft Windows. The OpenSSL Project is a collaborative effort to develop a robust, commercial-grade, full-featured, and Open Source toolkit implementing the Secure Sockets Layer (SSL v2/v3) and Transport Layer Security (TLS v1) protocols as well as a full-strength general purpose cryptography library. The project is managed by a worldwide community of volunteers that use the Internet to communicate, plan, and develop the OpenSSL toolkit and its related documentation. OpenSSL is based on the excellent SSLeay library developed by Eric A. Young and Tim J. Hudson.

This product includes cryptographic software written by Eric Young (ey@cryptsoft.com). This product includes software written by Tim Hudson (tjh@cryptsoft.com).

Original SSLeay License
Copyright (C) 1995-1998 Eric Young (ey@cryptsoft.com) All rights reserved.

This package is an SSL implementation written by Eric Young (ey@cryptsoft.com). The implementation was written so as to conform with Netscapes SSL.

This library is free for commercial and non-commercial use as long as the following conditions are aheared to. The following conditions apply to all code found in this distribution, be it the RC4, RSA, lhash, DES, etc., code; not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

document version 2.60

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed. If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used. This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package. Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgement: "This product includes cryptographic software written by Eric Young (eay@cryptsoft.com)" The word 'cryptographic' can be left out if the routines from the library being used are not cryptographic related :-).
4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement: "This product includes software written by Tim Hudson (tjh@cryptsoft.com)"

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG ``AS IS'' AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The licence and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution licence [including the GNU Public Licence.]

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

OpenSSL is based on the excellent SSLeay library developed from Eric A. Young and Tim J. Hudson. The OpenSSL toolkit is licensed under a dual-license (the OpenSSL license plus the SSLeay license) situation, which basically means that you are free to get and use it for commercial and non-commercial purposes as long as you fulfill the conditions of both licenses.

PATENTS - Various companies hold various patents for various algorithms in various locations around the world. _YOU_ are responsible for ensuring that your use of any algorithms is legal by checking if there are any patents in your country. The file contains some of the patents that we know about or are rumored to exist. This is not a definitive list.

RSA Security holds software patents on the RC5 algorithm. If you intend to use this cipher, you must contact RSA Security for licensing conditions. Their web page is <http://www.rsasecurity.com/>.

RC4 is a trademark of RSA Security, so use of this label should perhaps only be used with RSA Security's permission.

The IDEA algorithm is patented by Ascom in Austria, France, Germany, Italy, Japan, the Netherlands, Spain, Sweden, Switzerland, UK and the USA. They should be contacted if that algorithm is to be used; their web page is <http://www.ascom.ch/>.

NTT and Mitsubishi have patents and pending patents on the Camellia algorithm, but allow use at no charge without requiring an explicit licensing agreement: <http://info.isl.ntt.co.jp/crypt/eng/info/chiteki.html>

This package is an Blowfish implementation written by Eric Young (eay@cryptsoft.com). This library is free for commercial and non-commercial use as long as the following conditions are adhered to. The following conditions apply to all code found in this distribution.

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed. Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
3. All advertising materials mentioning features or use of this software must display the following acknowledgement: This product includes software developed by Eric Young (eay@cryptsoft.com)

THIS SOFTWARE IS PROVIDED BY ERIC YOUNG ``AS IS'' AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

document version 2.60

IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The license and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution license [including the GNU Public License.] The reason behind this being stated in this direct manner is past experience in code simply being copied and the attribution removed from it and then being distributed as part of other packages. This implementation was a non-trivial and unpaid effort.

From:

openssl-1.0.0-1.fc13.src/openssl-1.0.0-usa/openssl-1.0.0/FAQ

Do I need patent licenses to use OpenSSL?

The patents section of the README file lists patents that may apply to you if you want to use OpenSSL. For information on intellectual property rights, please consult a lawyer. The OpenSSL team does not offer legal advice. You can configure OpenSSL so as not to use IDEA, MDC2 and RC5 by using `./config no-idea no-mdc2 no-rc5`

Can I use OpenSSL with GPL software?

On many systems including the major Linux and BSD distributions, yes (the GPL does not place restrictions on using libraries that are part of the normal operating system distribution). On other systems, the situation is less clear. Some GPL software copyright holders claim that you infringe on their rights if you use OpenSSL with their software on operating systems that don't normally include OpenSSL. If you develop open source software that uses OpenSSL, you may find it useful to choose an other license than the GPL, or state explicitly that "This program is released under the GPL with the additional exemption that compiling, linking, and/or using OpenSSL is allowed." If you are using GPL software

From:

`openssl-1.0.0-1.fc13.src/openssl-1.0.0-usa/openssl-1.0.0/crypto/bn/asm/ia64.S`

Written by **Andy Polyakov** <appro@fy.chalmers.se> for the OpenSSL project.

Rights for redistribution and usage in source and binary forms are granted according to the OpenSSL license. Warranty of any kind is disclaimed. One can argue that this snippet is copyrighted to Intel Corporation, as it's essentially identical to one of those found in "Divide, Square Root and Remainder" section at <http://www.intel.com/software/products/opensource/libraries/num.htm>.

Yes, I admit that the referred code was used as template, but after I realized that there hardly is any other instruction sequence which would perform this operation. I mean I figure that any independent attempt to implement high-performance division will result in code virtually identical to the Intel code. It should be noted though that below division kernel is 1 cycle faster than Intel one (note commented splits:-), not to mention original prologue (rather lack of one) and epilogue.

NTT grants non-exclusively royalty-free licenses of the essential patents for Camellia, PSEC-KEM, ESIGN and EPOC in order to establish a leadership role toward achieving a low-cost secure advanced telecommunication society through the proliferation and promotion of encryption technologies that contribute to the construction of an environment in which various security products and services can be used widely. (The essential patents for Camellia are the common properties of NTT and Mitsubishi Electric Corporation, and Mitsubishi has agreed with NTT's this decision.)

<News Release for Announcement of Royalty-free Licenses for Essential Patents>

From April 13, 2006, NTT begins to publish NTT's open source codes of Camellia, which was already adopted as major international standardization specifications and recommended specifications of encryption algorithms, with free of charge by multiple open source software licenses. This is based on a policy of spreading further the use of Camellia as an international infrastructure technology to support securely advanced information society as the first Japanese encryption algorithm.

Up until now, NTT and Mitsubishi prepare the royalty-free licensing agreement for jointly owned Camellia essential patents mainly for industrial enterprises and corporations that develop products incorporating Camellia. Hereafter, however, in accordance with an agreement between NTT and Mitsubishi, Camellia essential patents can be used at no charge by any Camellia user without concluding such royalty-free licensing agreement hereafter.

Of course, if there is your request, patent execution consent from NTT and Mitsubishi based on the royalty-free licensing agreement for essential patents can be obtained in the same way as up to now. For details, please contact the NTT Intellectual Property Center.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

<News Release for Announcement of Camellia Open Source>

<<<Important Notice>>>

However, in regard to the manufactured products of each manufacturer that support the encryption technology developed by NTT (in regard to Camellia, Mitsubishi Electric Corporation is included), NTT does not guarantee implicitly or explicitly the performance, quality, marketability, applicability to a specific use, or the impossibility of successful attacks on the encryption algorithm.

In regard to applying the open source software, although these are programmed so that it performs correct encryption and decryption based on the Camellia's specifications and high-speed processing method for 32-bit CPUs, the modes of operation, a key management mechanism, and counter-measure technology for implementation attacks are not included, and the appropriate care should be taken. In addition, in the event that this open source software should yield any kind of damage, this software should be used with the understanding that NTT does not bear any responsibility whatsoever.

Any product equipped with one or more of the above-mentioned encryption algorithms (including the open sources) is a controlled product regulated under the Japanese Foreign Exchange and Foreign Trade Law, though the algorithms are public. When you plan to export or take this product out of Japan, or provide any juridical person having its main office in Japan, concerning property or business of such a juridical person which is located overseas, please obtain a permission, as required by the Law and related regulations, from the Japanese Government.

Camellia is a registered trademark of Nippon Telegraph and Telephone Corporation and Mitsubishi Electric Corporation.

<http://www.ntt.co.jp/news/news06e/0604/060413a.html> [as of 11/17/10]

April 13, 2006 (Press release note)

Nippon Telegraph and Telephone Corporation

128-Bit Block Cipher "Camellia" Announced as Open Source - Toward Wider and Easier Use of Internationally Standardized Next Generation Japanese Cipher -

On April 13, 2006, Nippon Telegraph and Telephone Corporation (NTT) begins to offer NTT's open source codes of the 128-bit block Cipher1 algorithm "Camellia", jointly developed with Mitsubishi Electric Corporation (Mitsubishi) in 2000, using the C and Java languages on the Camellia home page. This is based on the policy of expanding the international infrastructure technology to support a secure advanced information society as the first Japanese encryption algorithm.

The processing speed of the open source codes is approximately three times as fast as the reference code already published on the Camellia home page. NTT also schedules submission of the codes for contribution to various open source communities.

Camellia Home page: <http://info.isl.ntt.co.jp/crypt/eng/camellia/index.html>

Open source page: <http://info.isl.ntt.co.jp/crypt/eng/camellia/source.html>

BACKGROUND AND SIGNIFICANCE OF OPEN SOURCE ANNOUNCEMENT

Camellia has an international reputation for world's highest security level and processing capability. Indeed, Camellia was already adopted as

document version 2.60

international standardization specifications and recommended specifications of encryption algorithms, such as the ISO/IEC International standard Ciphers2, NESSIE3 (New European Schemes for Signatures, Integrity, and Encryption) and CRYPTREC4 (CRYPTography Research and Evaluation Committees). As the first Japanese encryption algorithm, Camellia was also accepted as a new standard encryption algorithm (IETF Standard Track RFC5) in major Internet secure protocols, SSL/TLS, IPsec, S/MIME, and XML.

On this occasion, NTT decides to offer an environment of free use of Camellia without concluding royalty-free licensing agreement for essential patents, based on a policy of spreading further the use of Camellia as an international infrastructure technology to support securely advanced information society as the first Japanese encryption algorithm.

Today (April 13, 2006), NTT begins to publish NTT's open source codes of Camellia with free of charge by multiple open source software licenses, and expects that the burden of user's operation is drastically reduced when incorporating Camellia into product development and test applications. This is expected to spread and promote further the use of Camellia.

FEATURES OF CAMELLIA

Camellia is a 128-bit block Cipher (allowing key sizes of 128, 192, and 256 bits), which was jointly developed in 2000 by NTT and Mitsubishi. Camellia possesses the world's highest security level and high-speed software implementation independent of the platform such as PC or smart cards. Also, the world's smallest level of hardware implementation is achieved which can provide the highest level of processing efficiency.

Furthermore, over several years, cryptographers around the world have conducted thorough evaluation of Camellia. This leads to an international reputation of Camellia, of which the security level is very high and the processing speed is four or five times faster than that of the currently mainstream 64-bit block Ciphers such as Triple DES. As a result, Camellia is the world's only 128-bit block Cipher that possesses the equivalent security level and processing efficiency as AES6, and is internationally recognized as the representative of Japanese Ciphers. From a security viewpoint, AES and Camellia were selected for many standardization/recommended specifications.

FUTURE PLANS

As an opportunity to publish the Camellia open source codes, NTT offers the codes to the open source communities such as OpenSSL and Linux, and works so that Camellia will become standard-equipped at an early date. In addition, NTT plans to establish a support system for industrial enterprises and corporations that develop products incorporating Camellia to enrich the Camellia-equipped product lines.

In order for Camellia to be more widely used, NTT advances actively the development of Camellia-equipped products and services, such as security products employing SSL/TLS. In addition, NTT continues to pursue research and development in order to contribute to achieving a securely advanced information society.

HANDLING OF ROYALTY-FREE LICENSING AGREEMENT FOR ESSENTIAL PATENTS

Up until now, NTT and Mitsubishi prepare the royalty-free licensing agreement for jointly owned Camellia essential patents mainly for industrial enterprises and corporations that develop products incorporating Camellia. Hereafter, however, in accordance with an agreement between NTT and Mitsubishi, Camellia essential patents can be used at no charge by any Camellia user without concluding such royalty-free licensing agreement hereafter.

Of course, if there is your request, patent execution consent from NTT and Mitsubishi based on the royalty-free licensing agreement for essential patents can be obtained in the same way as up to now.

HISTORY OF CAMELLIA

April 2006 Open source codes of Camellia are released (this release)
December 2005 Camellia is accepted as the IETF standard Cipher for IPsec [RFC4312]
July 2005 Camellia is accepted as the IETF standard Cipher for SSL/TLS Cipher suites [RFC4132]
May 2005 Camellia is adopted as the ISO/IEC standard Cipher [ISO/IEC18033-3]
April 2005 Camellia is accepted as the IETF standard Cipher for XML security URIs [RFC4051]
January 2004 Camellia is accepted as the IETF standard Cipher for S/MIME [RFC3657]
February 2003 Camellia is adopted as the DRM encryption by TV-Anytime Forum
February 2003 Camellia is selected as the European recommended Cipher by NESSIE
February 2003 Camellia is selected as the Japanese e-government recommended Cipher by CRYPTREC
April 2001 Camellia royalty-free licenses are prepared
March 2000 Camellia encryption algorithm is released by NTT and Mitsubishi

for the OpenSSL project. The module is, however, dual licensed under OpenSSL and CRYPTOGAMS licenses depending on where you obtain it. For further details see <http://www.openssl.org/~appro/cryptogams/>.

♦♦♦

From:

<http://www.openssl.org/~appro/cryptogams> [as of 11/17/10]

Q. What are cryptogams?

A. Cryptogams are lower plants, which reproduce by spores.

Q. Huh? What do plants have to do with you?

A. Nothing really, it's just a name I've chosen (though naturally not without simple covert meaning in mind ;-)) to denote a collection of low-level cryptographic primitives written in assembler by yours truly for the OpenSSL project. Being the original author of these modules I've chosen to exercise the freedom to license my work under multiple licenses. The licensing terms is the key and the only difference between given OpenSSL modules and the corresponding ones provided as part of CRYPTOGAMS. If obtained as a part of the OpenSSL Toolkit the modules are covered by the OpenSSL license, while if obtained as a part of the CRYPTOGAMS distribution - by the CRYPTOGAMS License.

Q. What is the license then?

A. The license is "new" BSD one [see below], but for the record I'm using it kind of under protest. The problem I have with the readily available licenses is that they address the complete chain up to the end-users. While CRYPTOGAMS by themselves are quite useless [they have to be wrapped in a higher level API and should never be called by end-user application directly], I originally wanted their license to address exclusively cryptographic toolkit developers, but grant the them right to re-license the incorporated code under any OSI approved [copyleft] license. But I was advised against it with argumentation that license text is not actually plain English words and I would definitely have trouble proliferating it. To a degree I have to agree at least with the former, because I've got headache reading license texts looking for suitable one. Yet, I don't quite understand why does it have to be the case [e.g. BSD license didn't actually contribute to the migraine], so if anybody feels like giving me a hand here, I would appreciate it very much...

Q. Why did you do it?

A. Because I was kindly asked to, with reference to the fact that the OpenSSL licensing terms were not an option for certain Open Source project in need of high-performance crypto [which my work was recognized for]. By doing so I also seek wider adoption of my work and consequently inspiration for implementing more algorithms and/or on more platforms.

Q. What do I get?

A. As of the moment of this writing CRYPTOGAMS version 0 contain raw SHA1 code for various platforms. There is no documentation, not even header file describing calling interface. The idea behind this pre-release

openssl-1.0.0-1.fc13.src/openssl-1.0.0-usa/openssl-1.0.0/openssl.spec

Summary: Secure Sockets Layer and cryptography libraries and tools

Name: openssl

Version: %{libmaj}.%{libmin}.%{librel}

document version 2.60

Version: %{libmaj}%.%{libmin}%.%{librel}%.%{librev}
Source0: ftp://ftp.openssl.org/source/%{name}-%{version}.tar.gz
Copyright: Freely distributable
Group: System Environment/Libraries
Provides: SSL
URL: http://www.openssl.org/
Packager: Damien Miller <djm@mindrot.org>
BuildRoot: /var/tmp/%{name}-%{version}-root

The OpenSSL Project is a collaborative effort to develop a robust, commercial-grade, fully featured, and Open Source toolkit implementing the Secure Sockets Layer (SSL v2/v3) and Transport Layer Security (TLS v1) protocols as well as a full-strength general purpose cryptography library. The project is managed by a worldwide community of volunteers that use the Internet to communicate, plan, and develop the OpenSSL toolkit and its related documentation.

OpenSSL is based on the excellent SSLeay library developed from Eric A. Young and Tim J. Hudson. The OpenSSL toolkit is licensed under an Apache-style licence, which basically means that you are free to get and use it for commercial and non-commercial purposes.

This is a little off topic but since SSLeay is a free implementation of the SSLv2 protocol, I feel it is worth responding on the topic of if it is actually legal for Americans to use free cryptographic software.

On Wed, 26 Jun 1996, Ken Toll wrote:

Is the U.S the only country that SSLeay cannot be used commercially (because of RSAREf) or is that going to be an issue with every country that a client/server application (non-web browser/server) is deployed and sold?

From what I understand, the software patents that apply to algorithms like RSA and DH only apply in the USA. The IDEA algorithm I believe is patented in europe (USA?), but considering how little it is used by other SSL implementations, it quite easily be left out of the SSLeay build (this can be done with a compile flag).

Actually if the RSA patent did apply outside the USA, it could be rather interesting since RSA is not allowed to let RSA toolkits outside of the USA [1], and since these are the only forms that they will allow the algorithm to be used in, it would mean that non-one outside of the USA could produce public key software which would be a very strong statement for international patent law to make :-). This logic is a little flawed but it still points out some of the more interesting permutations of USA patent law and ITAR restrictions.

Inside the USA there is also the unresolved issue of RC4/RC2 which were made public on sci.crypt in Sep 1994 (RC4) and Feb 1996 (RC2). I have copies of the original postings if people are interested. RSA I believe claim that they were 'trade-secrets' and that some-one broke an NDA in revealing them. Other claim they reverse engineered the algorithms from compiled binaries. If the algorithms were reverse engineered, I believe RSA had no legal leg to stand on. If an NDA was broken, I don't know. Regardless, RSA, I believe, is willing to go to court over the issue so licensing is probably the best idea, or at least talk to them.

If there are people who actually know more about this, please let me know, I don't want to vilify or spread miss-information if I can help it. If you

document version 2.60

are not producing a web browser, it is easy to build SSLeay with RC2/RC4 removed. Since RC4 is the defacto standard cipher in all web software (and it is damn fast) it is more or less required for www use. For non www use of SSL, especially for an application where interoperability with other vendors is not critical just leave it out.

Removing IDEA, RC2 and RC4 would only leave DES and Triple DES but they should be ok. Considering that Triple DES can encrypt at rates of 410k/sec on a pentium 100, and 940k/sec on a P6/200, this is quite reasonable performance. Single DES clocks in at 1160k/s and 2467k/s respectively is actually quite fast for those not so paranoid (56 bit key).[1]

Is it possible to get a certificate for commercial use outside of the U.S.? yes. Thawte Consulting issues certificates (they are the people who sell the Sioux httpd server and are based in South Africa) Verisign will issue certificates for Sioux (sold from South Africa), so this proves that they will issue certificate for OS use if they are happy with the quality of the software.

(The above mentioned companies just the ones that I know for sure are issuing certificates outside the USA).

There is always the point that if you are using SSL for an intra net, SSLeay provides programs that can be used so you can issue your own certificates. They need polishing but at least it is a good starting point.

I am not doing anything outside Australian law by implementing these algorithms (to the best of my knowledge). It is another example of how the world legal system does not cope with the internet very well.

I may start making shared libraries available (I have now got DLL's for Windows). This will mean that distributions into the usa could be shipped with a version with a reduced cipher set and the versions outside could use the DLL/shared library with all the ciphers (and without RSAREf).

This could be completely hidden from the application, so this would not even require a re-linking. This is the reverse of what people were talking about doing to get around USA export regulations :-) Eric

openssl-1.0.0-1.fc13.src/openssl-1.0.0-usa/openssl-1.0.0/engines/vendor_defns/hwcryptohook.h

The RSAImmed functions (and key managed RSA) only work with modules which have an RSA patent licence - currently that means KM units; the ModExp ones work with all modules, so you need a patent licence in the software in the US. They are otherwise identical.

those components for increased efforts at optimization. Software that is optimized in this way can potentially handle more transactions and handle each transaction faster.

OProfile is a system-wide profiler for Linux systems, capable of profiling all running code at low overhead. OProfile is released under the GNU GPL. It consists of a kernel driver and a daemon for collecting sample data, and several post-profiling tools for turning data into information. OProfile leverages the hardware performance counters of the CPU to enable profiling of a wide variety of interesting statistics, which can also be used for basic time-spent profiling. All code is profiled: hardware and software interrupt handlers, kernel modules, the kernel, shared libraries, and applications. OProfile is currently in alpha status; however it has proven stable over a large number of differing configurations; it is being used on machines ranging from laptops to 16-way NUMA-Q boxes. As always, there is no warranty.

ORBit2 2.14.12-3

Software: ORBit2
Version: 2.14.12-3
File or Package: ORBit2-2.14.12-3.fc9.src.rpm
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, MIT/X11
Other Licenses: Custom
URL: <http://mirrors.kernel.org/fedora/releases/9/Fedora/source/SRPMS/ORBit2-2.14.12-3.fc9.src.rpm>
Group: System Environment/Daemons
Description: A high-performance CORBA Object Request Broker; ORBit is a CORBA 2.4 compliant Object Request Broker (ORB). It features mature C, C++ and Python bindings, and less developed bindings for Perl, Lisp, Pascal, Ruby, and Tcl. It allows programs to send requests and receive replies from other programs, regardless of the locations of the two programs. CORBA is an architecture that enables communication between program objects, regardless of the programming language they're written in or the operating system they run on. Optional features including INS and threading are available. ORBit2 is engineered for the desktop workstation environment, with a focus on performance, low resource usage, and security. The core ORB is written in C, and runs under Linux, UNIX (BSD, Solaris, HP-UX, ...), and Windows. You will need to install this package and ORBit-devel if you want to write programs that use CORBA technology.
Common Usage: utility
Package Size: 7.5 MB
Folders / Files: 43 / 406
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

pacemaker 1.1.1-1

Software: pacemaker
Version: 1.1.1-1
File or Package: pacemaker-1.1.1-1.fc13.src.rpm

document version 2.60

OSI Licenses: GPLv2, GPLv2+, LGPLv2+, LGPLv2.1, LGPLv2.1+, MIT/X11, BSDv1 (UCB), Creative Commons Attribution Share Alike 3.0 Unported ("CC-BY-SA"), Academic, Public Domain

Other Licenses: Custom

URL: <http://mirrors.cat.pdx.edu/fedora/linux/development/13/source/SRPMS/pacemaker-1.1.1-1.fc13.src.rpm>

Group: User Space Apps / System Environment/Daemons

Description: Scalable High-Availability cluster resource manager - Libraries used by the Pacemaker cluster resource manager and its clients - Pacemaker is an advanced, scalable High-Availability cluster resource manager for Linux-HA (Heartbeat) and/or OpenAIS. It supports "n-node" clusters with significant capabilities for managing resources and dependencies. It will run scripts at initialization, when machines go up or down, when related resources fail and can be configured to periodically check resource health.

Common Usage: Daemon, Library

Package Size: 51.3 MB

Folders / Files: 44 / 2,764

Source Path: [wrlinux-4.0/layers/wrll-userspace/cgl/packages](#)

The text of and illustrations in this document are licensed under a Creative Commons Attribution Share Alike 3.0 Unported license ("CC-BY-SA"). An explanation of CC-BY-SA is available at <http://creativecommons.org/licenses/by-sa/3.0/>. In accordance with CC-BY-SA, if you distribute this document or an adaptation of it, you must provide the URL for the original version. In addition to the requirements of this license, the following activities are looked upon favorably:

If you are distributing Open Publication works on hardcopy or CD-ROM, you provide email notification to the authors of your intent to redistribute at least thirty days before your manuscript or media freeze, to give the authors time to provide updated documents.

This notification should describe modifications, if any, made to the document. All substantive modifications (including deletions) be either clearly marked up in the document or else described in an attachment to the document. Finally, while it is not mandatory under this license, it is considered good form to offer a free copy of any hardcopy or CD-ROM expression of the author(s) work.

From:
pacemaker-1.1.1-1.fc13.src/972b9a5f6860/Pacemaker-1-1-972b9a5f6860/replace/scandir.c
This code borrowed from 'libit', which can be found here:
<http://www.iro.umontreal.ca/~pinard/libit/dist/scandir/>

document version 2.60

The original author put this code in the public domain. It has been modified slightly to get rid of warnings, etc. Below is the email I received from pinard@iro.umontreal.ca (François Pinard) when I sent him an email asking him about the license, etc. of this code which I obtained from his site. I think the correct spelling of his name is Rich Salz. I think he's now rsalz@datapower.com...

Subject: Re: Scandir replacement function
Date: 18 May 2001 12:00:48 -0400
From: pinard@iro.umontreal.ca (François Pinard)
To: Alan Robertson <alanr@unix.sh>
References: 1 [Alan Robertson]

Hi, I'd like to use your scandir replacement function found here: <http://www.iro.umontreal.ca/~pinard/libit/dist/scandir/> But, it does not indicate authorship or licensing terms in it. Could you tell me who wrote this code, under what license you distribute it, and whether and under what terms I may further distribute it?

Hello, Alan. These are (somewhat) explained in UNSHAR.HDR found in the same directory. The routines have been written by Rick Saltz (I'm not completely sure of the spelling) a long while ago. I think that nowadays, Rick is better known as the main author of the nice INN package.

I spent a little time verifying this with Rick Salz. The results are below:

Date: Tue, 20 Sep 2005 21:52:09 -0400 (EDT)
From: Rich Salz <rsalz@datapower.com>
To: Alan Robertson <alanr@unix.sh>
Subject: Re: Verifying permissions/licenses/etc on some old code of yours - scandir.c
In-Reply-To: <433071CA.8000107@unix.sh>
Message-ID: <Pine.LNX.4.44L0.0509202151270.9198-100000@smtp.datapower.com>
Content-Type: TEXT/PLAIN; charset=US-ASCII

yes, it's most definitely in the public domain. I'm glad you find it useful. I'm surprised it hasn't been replaced by, e.g., something in GLibC. I'm impressed you tracked me down. /r\$

Subject: scandir, ftw REDUX
Date: 1 Jan 88 00:47:01 GMT
From: rsalz@pebbles.bbn.com
Newsgroups: comp.sources.misc

Forget my previous message - I just decided for completeness's sake to implement the SysV ftw(3) routine, too. To repeat, these are public-domain implementations of the SystemV ftw() routine, the BSD scandir() and alphasort() routines, and documentation for same. The FTW manpage could be more readable, but so it goes. Anyhow, feel free to

post these, and incorporate them into your existing packages. I have readdir() routines for MSDOS and the Amiga if anyone wants them, and should have them for VMS by the end of January; let me know if you want copies.

Yours in filesystems, /r\$
Anyhow, feel free to post

pacemaker-1.1.1-1.fc13.src/972b9a5f6860/Pacemaker-1-1-972b9a5f6860/shell/modules/singletonmixin.py
By **Gary Robinson**, grobinson@flyfi.com.

No rights reserved - placed in the public domain - which is only reasonable considering how much it owes to other people's code and ideas which are in the public domain. The idea of using a metaclass came from a comment on Gary's blog (see http://www.garyrobinson.net/2004/03/python_singleto.htmlcomments). Other improvements came from comments and email from other people who saw it online. (See the blog post and comments for further credits.) Not guaranteed to be fit for any particular purpose. Use at your own risk.

pam 1.1.1-4 aka linux-pam

Software:	pam
Version:	1.1.1-4
File or Package:	pam-1.1.1-4.fc13.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, BSDv2, MIT/X11, Beer-ware v.42, Academic, Public Domain
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/13/Everything/source/SRPMS/pam-1.1.1-4.fc13.src.rpm
Group:	User Space Libraries / System Environment/Base
Description:	PAM (Pluggable Authentication Modules) is a system security tool that allows system administrators to set authentication policy without having to recompile programs that handle authentication. Linux Pluggable Authentication Modules (PAM) provide dynamic authorization for applications and services in a Linux system. Linux PAM is evolved from the Unix Pluggable Authentication Modules architecture. The Linux PAM service is configured in the <code>/etc/pam.conf</code> file or by individual files in the <code>/etc/pam.d/</code> directory. There are four groups for independent management: account, authentication, password, session
Common Usage:	Utility, Library
Package Size:	12.4 MB
Folders / Files:	80 / 1,012
Source Path:	<code>wrlinux-4.0/layers/wrll-userspace/core/packages</code>

(Isn't it sick that the U.S. culture of lawsuit-happy lawyers requires this kind of disclaimer?)

♦♦♦

From:

`pam-1.1.1-4.fc13.src/Linux-PAM-1.1.1/Linux-PAM-1.1.1/modules/pam_namespace/md5.c`

This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by **Colin Plumb in 1993**, no copyright is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

URL: http://mirrors.cat.pdx.edu/fedora/linux/development/source/SRPMS/pam_passwdqc-1.0.5-6.fc13.src.rpm
Group: User Space Apps / System Environment/Base
Description: Pluggable password quality-control module. pam_passwdqc is a simple password strength checking module for PAM-aware password changing programs, such as passwd(1). In addition to checking regular passwords, it offers support for passphrases and can provide randomly generated ones. All features are optional and can be (re-)configured without rebuilding.
Common Usage: Library, Utility
Package Size: 232 KB (0.23 MB)
Folders / Files: 3 / 19
Source Path: wrlinux-4.0/layers/wrll-userspace/cgl/packages

NOTICES:

From:
pam_passwdqc-1.0.5-6.fc13.src/pam_passwdqc-1.0.5/pam_passwdqc-1.0.5/license
pam_passwdqc.8 is under the 3-clause BSD-style license as specified within the file itself. wordset_4k.c is in the public domain. The rest of the files in this package fall under the following terms:

You're allowed to do whatever you like with this software (including re-distribution in source and/or binary form, with or without modification), provided that credit is given where it is due and any modified versions are marked as such. There's absolutely no warranty.

Note that you don't have to re-distribute this software under these same relaxed terms. In particular, you're free to place modified versions under (L)GPL, thus disallowing further re-distribution in binary-only form.

pam_passwdqc-1.0.5-6.fc13.src/pam_passwdqc-1.0.5/pam_passwdqc-1.0.5/pam_macros.h
These macros are partially based on Linux-PAM's <security/_pam_macros.h>, which were organized by **Cristian Gafton** and I believe are in the public domain.

From:
pam_passwdqc-1.0.5-6.fc13.src/pam_passwdqc-1.0.5/pam_passwdqc-1.0.5/wordset_4k.c
This list comes from a passphrase generator mentioned on sci.crypt, and I believe is in the public domain.

pango 1.28.3

Software:	pango
Version:	1.28.3
File or Package:	pango-1.28.3.tar.bz2
OSI Licenses:	GPLv2+ w/exception, LGPLv2, LGPLv2+, LGPLv2.1+, MIT/X11, Academic
Other Licenses:	
URL:	
Group:	User Space Libraries / System Environment/Libraries
Description:	The goal of the Pango project is to provide an Open Source framework for the layout and rendering of internationalized text." Pango is a library for layout and rendering of text, with an emphasis on internationalization. Pango can be used anywhere that text layout is needed; however, most of the work on Pango so far has been done using the GTK+ widget toolkit as a test platform. Pango forms the core of text and font handling for GTK+-2.x.
Common Usage:	Library
Package Size:	6.59 MB

passwd 0.77-1

Software:	passwd
Version:	0.77-1
File or Package:	passwd-0.77-1.fc12.src.rpm
OSI Licenses:	GPLv2, GPLv2+ w/exception, BSDv2, MIT/X11
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/ linux/releases/12/Everything/source/SRPMS/ passwd-0.77-1.fc12.src.rpm
Group:	User Space Apps / System Environment/Base
Description:	The passwd utility for setting/changing passwords using PAM. The passwd package contains a system utility (passwd) which sets and/or changes passwords, using PAM (Pluggable Authentication Modules). passwd is a tool on most Unix and Unix-like operating systems used to change a user's password. The password entered by the user is run through a key derivation function to create a hashed version of the new password, which is saved. Only the hashed version is stored; the entered password is not saved for security reasons.
Common Usage:	Tool, Utility
Package Size:	2.4 MB
Folders / Files:	5 / 187
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

patch 2.5.9

Software:	patch
Version:	2.5.9
File or Package:	patch-2.5.9.tar.gz
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, MIT/X11
Other Licenses:	Custom
URL:	
Group:	
Description:	patch is a Unix program that updates text files according to instructions contained in a separate file, called a patch file. The patch file (also called a patch for short) is a text file that consists of a list of
	document version 2.60

differences and is produced by running the related diff program with the original and updated file as arguments. Updating files with patch is often referred to as applying the patch or simply patching the files.

Common Usage:
Package Size: 1.2 MB

pcr 7.8-3

Software:	pcr
Version:	7.8-3
File or Package:	pcr-7.8-3.fc12.src.rpm
OSI Licenses:	GPLv2+ w/exception, BSDv2, MIT/X11
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Fedora/source/SRPMS/pcr-7.8-3.fc12.src.rpm
Group:	User Space Libraries/System Environment/Libraries
Description:	Perl Compatible Regular Expressions (PCRE) is a regular expression handling C library inspired by Perl's external interface, written by Philip Hazel. PCRE's syntax is much more powerful and flexible than either of the POSIX regular expression flavors and many classic regular expression libraries. The name is misleading, because PCRE is Perl-compatible only if you consider a subset of PCRE's settings and a subset of Perl's regular expression facilities.
Common Usage:	Library, Utility

pcre-7.8-3.fc12.src/pcre-7.8/pcre-7.8/license

PCRE LICENCE

PCRE is a library of functions to support regular expressions whose syntax and semantics are as close as possible to those of the Perl 5 language. Release 7 of PCRE is distributed under the terms of the "BSD" licence, as specified below. The documentation for PCRE, supplied in the "doc" directory, is distributed under the same terms as the software itself.

The basic library functions are written in C and are freestanding. Also included in the distribution is a set of C++ wrapper functions.

♦♦♦

From:

pcre-7.8-3.fc12.src/pcre-7.8/pcpre-7.8/NON-UNIX-USE

If a library that is generated this way is distributed, cygwin1.dll has to be distributed as well. Since cygwin1.dll is under the GPL licence, this forces not only PCRE to be under the GPL, but also the entire application. A distributor who wants to keep their own code proprietary must purchase an appropriate Cygwin licence. MinGW has no such restrictions. The MinGW compiler generates a library or executable that can run standalone on Windows without any third party dll or licensing issues.

♦♦♦

From:

pcr-7.8-3.fc12.src/pcr-7.8/pcr-7.8/README

Note that libreadline is GPL-licensed, so if you distribute a binary of pcretest linked in this way, there may be licensing issues.

perl 5.10.0-47 aka microperl

Software:	perl
Version:	5.10.0-47
File or Package:	perl-5.10.0-47.fc10.src.rpm
OSI Licenses:	GPLv1, GPLv2, Perl Artistic, BSDv2, zlib/libpng
Other Licenses:	Unicode, Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/development/source/SRPMS/perl-5.10.0-47.fc10.src.rpm
Group:	Development/Languages
Description:	The Perl programming language. Perl is a general-purpose programming language originally developed for text manipulation and now used for a wide range of tasks including system administration, web development, network programming, GUI development, and more. The language is intended to be practical (easy to use, efficient, complete) rather than beautiful (tiny, elegant, minimal). Its major features are that it's easy to use, supports both procedural and object-oriented (OO) programming, has powerful built-in support for text processing, and has one of the world's most impressive collections of third-party modules. Perl is a high-level, general-purpose, interpreted, dynamic programming language. Perl was originally developed by Larry Wall, a linguist working as a systems administrator for NASA, in 1987, as a general purpose Unix scripting language to make report processing easier. Since then, it has undergone many changes and revisions and become widely popular among programmers. Larry Wall continues to oversee development of the core language, and its upcoming version, Perl 6.

For the general privacy policy governing access to this site, see the Unicode Privacy Policy. For trademark usage, see the Unicode Consortium® Trademarks and Logo Policy.

Notice to End User: Terms of Use

Carefully read the following legal agreement ("Agreement"). Use or copying of the software and/or codes provided with this agreement (The "Software") constitutes your acceptance of these terms Unicode Copyright.

Copyright © 1991-2009 Unicode, Inc. All rights reserved.

Certain documents and files on this website contain a legend indicating that "Modification is permitted." Any person is hereby authorized, without fee, to modify such documents and files to create derivative works conforming to the Unicode® Standard, subject to Terms and Conditions herein. Any person is hereby authorized, without fee, to view, use, reproduce, and distribute all documents and files solely for informational purposes in the creation of products supporting the Unicode Standard, subject to the Terms and Conditions herein.

Further specifications of rights and restrictions pertaining to the use of the particular set of data files known as the "Unicode Character Database" can be found in Exhibit 1. Each version of the Unicode Standard has further specifications of rights and restrictions of use. For the book editions, these are found on the back of the title page. For the online edition, certain files (such as the PDF files for book chapters and code charts) carry specific restrictions. All other files are covered under these general Terms of Use. To request a permission to reproduce any part of the Unicode Standard, please contact the Unicode Consortium. No license is granted to "mirror" the Unicode website where a fee is charged for access to the "mirror" site. Modification is not permitted with respect to this document. All copies of this document must be verbatim.

Restricted Rights Legend. Any technical data or software which is licensed to the United States of America, its agencies and/or instrumentalities under this Agreement is commercial technical data or commercial computer software developed exclusively at private expense as defined in FAR 2.101, or DFARS 252.227-7014 (June 1995), as applicable. For technical data, use, duplication, or disclosure by the Government is subject to restrictions as set forth in DFARS 202.227-7015 Technical Data, Commercial and Items (Nov 1995) and this Agreement. For Software, in accordance with FAR 12-212 or DFARS 227-7202, as applicable, use, duplication or disclosure by the Government is subject to the restrictions set forth in this Agreement.

Warranties and Disclaimers. This publication and/or website may include technical or typographical errors or other inaccuracies. Changes are periodically added to the information herein; these changes will be incorporated in new editions of the publication and/or website. Unicode may make improvements and/or changes in the product(s) and/or program(s) described in this publication and/or website at any time. If this file has been purchased on magnetic or optical media from Unicode, Inc. the sole and exclusive remedy for any claim will be exchange of the defective media within ninety (90) days of original purchase.

EXCEPT AS PROVIDED IN SECTION C.2, THIS PUBLICATION AND/OR SOFTWARE IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND EITHER EXPRESS, IMPLIED, OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT. UNICODE AND ITS LICENSORS ASSUME NO RESPONSIBILITY FOR ERRORS OR OMISSIONS IN THIS PUBLICATION AND/OR SOFTWARE OR OTHER DOCUMENTS

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

WHICH ARE REFERENCED BY OR LINKED TO THIS PUBLICATION OR THE UNICODE WEBSITE.

Waiver of Damages. In no event shall Unicode or its licensors be liable for any special, incidental, indirect or consequential damages of any kind, or any damages whatsoever, whether or not Unicode was advised of the possibility of the damage, including, without limitation, those resulting from the following: loss of use, data or profits, in connection with the use, modification or distribution of this information or its derivatives.

Trademarks. Unicode and the Unicode logo are registered trademarks of Unicode, Inc. This site contains product names and corporate names of other companies. All product names and company names and logos mentioned herein are the trademarks or registered trademarks of their respective owners. Other products and corporate names mentioned herein which are trademarks of a third party are used only for explanation and for the owners' benefit and with no intent to infringe. Use of third party products or information referred to herein is at the user's risk.

Miscellaneous.

Jurisdiction and Venue. This server is operated from a location in the State of California, United States of America. Unicode makes no representation that the materials are appropriate for use in other locations. If you access this server from other locations, you are responsible for compliance with local laws. This Agreement, all use of this site and any claims and damages resulting from use of this site are governed solely by the laws of the State of California without regard to any principles which would apply the laws of a different jurisdiction. The user agrees that any disputes regarding this site shall be resolved solely in the courts located in Santa Clara County, California. The user agrees said courts have personal jurisdiction and agree to waive any right to transfer the dispute to any other forum. Modification by Unicode Unicode shall have the right to modify this Agreement at any time by posting it to this site. The user may not assign any part of this Agreement without Unicode's prior written consent.

Taxes. The user agrees to pay any taxes arising from access to this website or use of the information herein, except for those based on Unicode's net income.

Severability. If any provision of this Agreement is declared invalid or unenforceable, the remaining provisions of this Agreement shall remain in effect.

Entire Agreement. This Agreement constitutes the entire agreement between the parties.

perl-IO-Socket-SSL 1.33-2

Software: perl-IO-Socket-SSL
Version: 1.33-2
File or Package: perl-IO-Socket-SSL-1.33-2.fc14.src.rpm
OSI Licenses: Perl Artistic
Other Licenses:
URL: <http://search.cpan.org/dist/IO-Socket-SSL/perl-IO-Socket-SSL-1.33-2.fc14.src.rpm>
Group: User Space Libraries / Development/Libraries
Description: This module is a true drop-in replacement for IO::Socket::INET that uses SSL to encrypt data before it is transferred to a remote server or client. IO::Socket::SSL supports all the extra features that one needs to write a full-featured SSL client or server application: multiple SSL contexts, cipher selection, certificate verification, and SSL version selection. As an extra bonus, it works perfectly with mod_perl.
Common Usage: API, Docs, Library, Module
Package Size: 464 KB (0.45 MB)
Folders / Files: 9 / 48
Source Path: wrlinux-4.0/layers/wrll-userspace/networking/packages

perl-Net-SSLeay 1.36-2

Software: perl-Net-SSLeay
Version: 1.36-2
File or Package: perl-Net-SSLeay-1.36-2.fc14.src.rpm
OSI Licenses: BSDv1 variant (non-UCB), Perl Artistic, Academic
Other Licenses: Custom
URL: <ftp://ftp.wrs.com/pub/gmoffatt/ip/perl-Net-SSLeay-1.36-2.fc14.src.rpm>
Group: User Space Libraries
Description: This module offers some high level convenience functions for accessing web pages on SSL servers (for symmetry, same API is offered for accessing http servers, too), a `sslcats()` function for writing your own clients, and finally access to the SSL api of SSLeay/OpenSSL package so you can write servers or clients for more complicated applications.
Common Usage: Docs, Library, Module
Package Size: 1.0 MB
Folders / Files: 19 / 79
Source Path: `wrlinux-4.0/layers/wrll-userspace/networking/packages`

perl-net-telnet 3.03-9 aka net-telnet

Software:	perl-Net-Telnet
Version:	3.03-9
File or Package:	perl-Net-Telnet-3.03-9.fc12.src.rpm
OSI Licenses:	Perl Artistic
Other Licenses:	
URL:	http://search.cpan.org/dist/Net-Telnet/
Group:	Applications/Text / Development/Libraries
Description:	Net-Telnet Perl module; Net::Telnet allows you to make client connections to a TCP port and do network I/O, especially to a port using the TELNET protocol. Simple I/O methods such as print, get, and getline are provided. More sophisticated interactive features are provided because connecting to a TELNET port ultimately means communicating with a program designed for human interaction. These interactive features include the ability to specify a time-out and to wait for patterns to appear in the input stream, such as the prompt from a shell.
Common Usage:	Plug-in
Package Size:	240 KB (0.23 MB)

perl-Text-Iconv 1.7-8

Software: perl-Text-Iconv
Version: 1.7-8
File or Package: perl-Text-Iconv-1.7-8.fc14.src.rpm
OSI Licenses: Perl Artistic
Other Licenses:
URL: ftp.wrs.com/pub/gmoffatt/ip/
perl-Text-Iconv-1.7-8.fc14.src.rpm
Group: User Space Libraries / Development/Libraries
Description: The Text::Iconv module provides a Perl interface to the iconv() function as defined by the Single UNIX Specification. The convert() method converts the encoding of characters in the input string from the fromcode codeset to the tocode codeset, and returns the result. Settings of fromcode and tocode and their permitted combinations are implementation-dependent. Valid values are specified in the system documentation.
Common Usage: Docs, Library, Module

From:
perl-URI-1.54-2.fc14.src/URI-1.54/URI-1.54/URI/_idna.pm
This module implements the RFCs 3490 (IDNA) and 3491 (Nameprep)
based on Python-2.6.4/Lib/encodings/idna.py

perl-XML-Filter-BufferText 1.01-9

Software: perl-XML-Filter-BufferText
Version: 1.01-9
File or Package: perl-XML-Filter-BufferText-1.01-9.fc14.src.rpm
OSI Licenses: Perl Artistic
Other Licenses:
URL: ftp.wrs.com/pub/gmoffatt/ip/
perl-XML-Filter-BufferText-1.01-9.fc14.src.rpm
Group: User Space Libraries / Development/Libraries
Description: This is a very simple filter. One common cause of
grief (and programmer error) is that XML parsers
aren't required to provide character events in one
chunk. They can, but are not forced to, and most
don't. This filter does the trivial but oft-repeated
task of putting all characters into a single event.
Common Usage: Docs, Library, Module
Package Size: 40 KB (0.04 MB)
Folders / Files: 4 / 9
Source Path: wrlinux-4.0/layers/wrll-
userspace/networking/packages

NOTICES:

perl-XML-LibXML 1.70-6

Software: perl-XML-LibXML
Version: 1.70-6
File or Package: perl-XML-LibXML-1.70-6.fc15.src.rpm
OSI Licenses: Perl Artistic, GPL
Other Licenses:
URL: ftp://ftp.wrs.com/pub/gmoffatt/ip/
perl-XML-LibXML-1.70-6.fc15.src.rpm
Group: User Space Libraries / Development/Libraries
Description: This module implements a Perl interface to the
GNOME libxml2 library which provides interfaces
for parsing and manipulating XML files. This
module allows Perl programmers to make use of
the highly capable validating XML parser and the
high performance DOM implementation.
Common Usage: Docs, Library, Module
Package Size: 2.6 MB
Folders / Files: 19 / 167

perl-XML-Parser 2.36-3

Software: perl-XML-Parser
Version: 2.36-3
File or Package: perl-XML-Parser-2.36-3.fc9.src.rpm
OSI Licenses: Perl Artistic
Other Licenses:
URL: http://download.fedora.redhat.com/pub/fedora/linux/releases/9/Fedora/source/SRPMS/perl-XML-Parser-2.36-3.fc9.src.rpm
Group: Development/Libraries
Description: A low level Perl module for parsing XML either via trees or streaming. This module provides ways to parse XML documents. It is built on top of XML::Parser::Expat, which is a lower level interface to James Clark's expat library. Each call to one of the parsing methods creates a new instance of XML::Parser::Expat which is then used to parse the document. Expat options may be provided when the XML::Parser object is created. These options are then passed on to the Expat object on each parse call. They can also be given as extra arguments to the parse methods, in which case they override options given at XML::Parser creation time.
Common Usage: Plug-in
Package Size: 1.2 MB
Folders / Files: 9 / 63
Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

Other Licenses:
URL: ftp://ftp.wrs.com/pub/gmoffatt/ip/
perl-XML-SAX-0.96-10.fc14.src.rpm
Group: User Space Libraries / Development/Libraries
Description: XML::SAX consists of several framework classes for using and building Perl SAX2 XML parsers, filters, and drivers. It is designed around the need to be able to "plug in" different SAX parsers to an application without requiring programmer intervention. Those of you familiar with the DBI will be right at home. Some of the designs come from the Java JAXP specification (SAX part), only without the javaness.
Common Usage: Docs, Library, Module
Package Size: 656 KB (0.64 MB)
Folders / Files: 13 / 85

php 5.3.1-3

Software: php
Version: 5.3.1-3
File or Package: php-5.3.1-3.fc13.src.rpm
OSI Licenses: GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, LGPLv2.1, LGPLv2.1+, PHP v3.00 (BSDv1/Apache variant), PHP v3.01 (BSDv1/Apache variant), Zend Engine v2.00 (BSDv1/Apache variant), FreeBSD, BSDv1 (UCB & non-UCB), BSDv2, MIT/X11, Beerware v42, zlib/libpng , zlib/libpng (variant), Academic, Public Domain
Other Licenses: Custom, Proprietary
URL: http://download.fedora.redhat.com/pub/fedora/linux/releases/13/Fedora/source/SRPMS/php-5.3.1-3.fc13.src.rpm
Group: User Space Apps
Description: PHP is an HTML-embedded scripting language. PHP attempts to make it easy for developers to write dynamically generated webpages. PHP also offers built-in database integration for several commercial and non-commercial database management systems, so writing a database-enabled webpage with PHP is fairly simple. The most common use of PHP coding is probably as a replacement for CGI scripts. The php package contains the module which adds support for the PHP language to Apache HTTP Server.

PHP is a general-purpose scripting language that is especially suited for web development. PHP generally runs on a web server, taking PHP code as its input and creating web pages as output. It can also be used for command-line scripting and client-

document version 2.60

side GUI applications. PHP can be deployed on most web servers, many operating systems and platforms, and can be used with many relational database management systems. It is available free of charge, and the PHP Group provides the complete source code for users to build, customize and extend for their own use.[5]

PHP primarily acts as a filter,[32] taking input from a file or stream containing text and/or PHP instructions and outputs another stream of data; most commonly the output will be HTML. It can automatically detect the language of the user.[33][34] From PHP 4, the PHP parser compiles input to produce bytecode for processing by the Zend Engine, giving improved performance over its interpreter predecessor.[35]

Originally designed to create dynamic web pages, PHP's principal focus is server-side scripting,[36] and it is similar to other server-side scripting languages that provide dynamic content from a web server to a client, such as Microsoft's ASP.NET system, Sun Microsystems' JavaServer Pages,[37] and mod_perl. PHP has also attracted the development of many frameworks that provide building blocks and a design structure to promote rapid application development (RAD). Some of these include CakePHP, PRADO, Symfony and Zend Framework, offering features similar to other web application frameworks.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

PCRE LICENCE

PCRE is a library of functions to support regular expressions whose syntax and semantics are as close as possible to those of the Perl 5 language. Release 7 of PCRE is distributed under the terms of the "BSD" licence, as specified below. The documentation for PCRE, supplied in the "doc" directory, is distributed under the same terms as the software itself. The basic library functions are written in C and are freestanding. Also included in the distribution is a set of C++ wrapper functions.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

IN NO EVENT SHALL THE AUTHOR OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

6. ext/standard/crypt's blowfish implementation

This code comes from John the Ripper password cracker, with reentrant and crypt(3) interfaces added, but optimizations specific to password cracking removed.

Written by **Solar Designer** <solar at openwall.com> in **1998-2002** and placed in the public domain. There's absolutely no warranty.

It is my intent that you should be able to use this on your system, as a part of a software package, or anywhere else to improve security, ensure compatibility, or for any other purpose. I would appreciate it if you give credit where it is due and keep your modifications in the public domain as well, but I don't require that in order to let you place this code and any modifications you make under a license of your choice.

This implementation is compatible with OpenBSD bcrypt.c (version 2a) by Niels Provos <provos at citi.umich.edu>, and uses some of his ideas. The password hashing algorithm was designed by David Mazieres <dm at lcs.mit.edu>. There's a paper on the algorithm that explains its design decisions: <http://www.usenix.org/events/usenix99/provos.html> Some of the tricks in BF_ROUND might be inspired by Eric Young's Blowfish library (I can't be sure if I would think of something if I hadn't seen his code).

7. Sqlite/Sqlite3 ext/sqlite3 ext/sqlite

The author disclaims copyright to this source code. In place of a legal notice, here is a blessing:

May you do good and not evil.
May you find forgiveness for yourself and forgive others.
May you share freely, never taking more than you give.

9. ext/standard/rand

The following `php_mt_...()` functions are based on a C++ class `MTRand` by Richard J. Wagner. For more information see the web page at <http://www-personal.engin.umich.edu/~wagnerr/MersenneTwister.html>

Mersenne Twister random number generator - a C++ class `MTRand`
Based on code by Makoto Matsumoto, Takuji Nishimura, and Shawn Cokus
Richard J. Wagner v1.0 15 May 2003 rjwagner@writeme.com

The Mersenne Twister is an algorithm for generating random numbers. It was designed with consideration of the flaws in various other generators. The period, $2^{19937}-1$, and the order of equidistribution, 623 dimensions, are far greater. The generator is also fast; it avoids multiplication and division, and it benefits from caches and pipelines. For more information see the inventors' web page at <http://www.math.keio.ac.jp/~matumoto/emt.html>

Reference

M. Matsumoto and T. Nishimura, "Mersenne Twister: A 623-Dimensionally Equidistributed Uniform Pseudo-Random Number Generator", ACM Transactions on Modeling and Computer Simulation, Vol. 8, No. 1, January 1998, pp 3-30.

As a special exception, you may create a larger work that contains part or all of the Bison parser skeleton and distribute that work under terms of your choice, so long as that work isn't itself a parser generator using the skeleton or a modified version thereof as a parser skeleton. Alternatively, if you modify or redistribute the parser skeleton itself, you may (at your option) remove this special exception, which will cause the skeleton and the resulting Bison output files to be licensed under the GNU General Public License without this special exception. This special exception was added by the Free Software Foundation in version 2.2 of Bison.

From:
php-5.3.1-3.fc13.src/php-5.3.1/php-5.3.1/ext/mbstring/README_PHP3-i18n-ja
o What is this package?
This package allows you to handle multiple Japanese encodings (SJIS, EUC, UTF-8, JIS) in PHP. If you find any bugs in this package, please report them to the appropriate mailing list. For now, the PHP-jp mailing list is the best place for this.

PHP-jp ML <mailto:PHP-jp@sidecar.ics.es.osaka-u.ac.jp>
<http://sidecar.ics.es.osaka-u.ac.jp/php-jp/> (discussions are in Japanese)

o Who should use this
Due to lack of documentation, it's not intended for beginners. If something goes wrong, be prepared to fix it on your own.

o Warranty and Copyright
There is no warranty with this package. Use it at your own risk. Please refer to the source code for the copyrights. In general, each program's copyright is owned by the programmer. Unless you obey THE copyright holders restrictions, you are not allowed to use it in any form.

o Redistribution
As described in the source code, this package and the components are allowed to be redistributed with certain restrictions. Due to this package being still in beta, please try to redistribute it as an entire package. Please try not to distribute it as a form of patch. Because we would prefer to have this package distributed as one single package (not patch of patch of patch), avoid releasing any patch to this package.

o Who made this
A team of volunteers, PHP3 Internationalization, has been contributing their free time producing it. Although we are not related to the core PHP programmers, we are hoping to have our modifications merged into THE core distribution in the near future. Thus, we did not call this a "Japanese Patch" (or distribution). Our final goal is to have true i18nized PHP!

For anyone interested in this project, please drop us a line.

The author of this file:

The source code included in this files was separated from mbfilter.c by Moriyoshi Koizumi <moriyoshi@php.net> on 20 Dec 2002. The file mbfilter.c is included in this package.

♦♦♦

From:

php-5.3.1-3.fc13.src/php-5.3.1/php-5.3.1/ext/standard/crypt_blowfish.c

This code comes from John the Ripper password cracker, with reentrant and crypt(3) interfaces added, but optimizations specific to password cracking removed.

Written by **Solar Designer** <solar at openwall.com> in **1998-2002**

and placed in the public domain. There's absolutely no warranty. It is my intent that you should be able to use this on your system, as a part of a software package, or anywhere else to improve security, ensure compatibility, or for any other purpose. I would appreciate it if you give credit where it is due and keep your modifications in the public domain as well, but I don't require that in order to let you place this code and any modifications you make under a license of your choice.

This implementation is compatible with OpenBSD bcrypt.c (version 2a) by Niels Provos <provos at citi.umich.edu>, and uses some of his ideas. The password hashing algorithm was designed by David Mazieres <dm at lcs.mit.edu>. There's a paper on the algorithm that explains its design decisions: <http://www.usenix.org/events/usenix99/provos.html> Some of the tricks in BF_ROUND might be inspired by Eric Young's Blowfish library (I can't be sure if I would think of something if I hadn't seen his code).

Inverse ncdf approximation by Peter J. Acklam, implementation adapted to PHP by Michael Nickerson, using Dr. Thomas Ziegler's C implementation as a guide.
<http://home.online.no/~pjacklam/notes/invnorm/index.html>. I have not checked the accuracy of this implementation. Be aware that PHP will truncate the coefficients to 14 digits.

You have permission to use and distribute this function freely for whatever purpose you want, but please show common courtesy and give credit where credit is due.

Module written/porting by Xavier Noguer <xnoguer@rezebra.com>

The majority of this is NOT my code. I simply ported it from the PERL Spreadsheet::WriteExcel module. The author of the Spreadsheet::WriteExcel module is John McNamara <jmcnamara@cpan.org> I DO maintain this code, and John McNamara has nothing to do with the porting of this code to PHP. Any questions directly related to this class library should be directed to me.

From:

<http://doc.trolltech.com/3.0/license.html>

Qt Free Edition License Agreement - The Qt Free Edition is distributed under the Q Public License (QPL). It allows free use of Qt Free Edition for running software developed by others, and free use of Qt Free Edition for development of free/Open Source software. There is more information about the QPL at the Trolltech web site. Note that the Qt/Embedded Free Edition is not distributed under the QPL, but under the GNU General Public License (GPL). For development non-free/proprietary software, the Qt Professional Edition is available. It has a normal commercial library license, with none of the special restrictions of the QPL or the GPL.

THE Q PUBLIC LICENSE version 1.0

Copyright (C) 1999-2000 Trolltech AS, Norway.

Everyone is permitted to copy and distribute this license document. The intent of this license is to establish freedom to share and change the software regulated by this license under the open source model. This license applies to any software containing a notice placed by the copyright holder saying that it may be distributed under the terms of the Q Public License version 1.0. Such software is herein referred to as the Software. This license covers modification and distribution of the Software, use of third-party application programs based on the Software, and development of free software which uses the Software.

Granted Rights:

1. You are granted the non-exclusive rights set forth in this license provided you agree to and comply with any and all conditions in this license. Whole or partial distribution of the Software, or software items that link with the Software, in any form signifies acceptance of this license.

2. You may copy and distribute the Software in unmodified form provided that the entire package, including - but not restricted to - copyright, trademark notices and disclaimers, as released by the initial developer of the Software, is distributed.

3. You may make modifications to the Software and distribute your modifications, in a form that is separate from the Software, such as patches. The following restrictions apply to modifications:

a. Modifications must not alter or remove any copyright notices in the Software.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

b. When modifications to the Software are released under this license, a non-exclusive royalty-free right is granted to the initial developer of the Software to distribute your modification in future versions of the Software provided such versions remain available under these terms in addition to any other license(s) of the initial developer.

4. You may distribute machine-executable forms of the Software or machine-executable forms of modified versions of the Software, provided that you meet these restrictions:

a. You must include this license document in the distribution.

b. You must ensure that all recipients of the machine-executable forms are also able to receive the complete machine-readable source code to the distributed Software, including all modifications, without any charge beyond the costs of data transfer, and place prominent notices in the distribution explaining this.

c. You must ensure that all modifications included in the machine-executable forms are available under the terms of this license.

5. You may use the original or modified versions of the Software to compile, link and run application programs legally developed by you or by others.

6. You may develop application programs, reusable components and other software items that link with the original or modified versions of the Software. These items, when distributed, are subject to the following requirements:

a. You must ensure that all recipients of machine-executable forms of these items are also able to receive and use the complete machine-readable source code to the items without any charge beyond the costs of data transfer.

b. You must explicitly license all recipients of your items to use and re-distribute original and modified versions of the items in both machine-executable and source code forms. The recipients must be able to do so without any charges whatsoever, and they must be able to re-distribute to anyone they choose.

c. If the items are not available to the general public, and the initial developer of the Software requests a copy of the items, then you must supply one.

Limitations of Liability - In no event shall the initial developers or copyright holders be liable for any damages whatsoever, including - but not restricted to - lost revenue or profits or other direct, indirect, special, incidental or consequential damages, even if they have been advised of the possibility of such damages, except to the extent invariable law, if any, provides otherwise.

No Warranty - The Software and this license document are provided AS IS with NO WARRANTY OF ANY KIND, INCLUDING THE WARRANTY OF DESIGN, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Choice of Law - This license is governed by the Laws of Norway. Disputes shall be settled by Oslo City Court.

pkgconfig 0.23-9

Software:	pkgconfig
Version:	0.23-9
File or Package:	pkgconfig-0.23-9.fc12.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, LGPLv2.1, MIT/X11
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Fedora/source/SRPMS/pkgconfig-0.23-9.fc12.src.rpm
Group:	User Space Apps
Description:	The pkgconfig tool determines compilation options. For each required library, it reads the configuration file and outputs the necessary compiler and linker flags. pkg-config is computer software that provides a unified interface for querying installed libraries for the purpose of compiling software from its source code.
Common Usage:	Library
Package Size:	6.6 MB
Folders / Files:	9 / 171
Source Path:	wrlinux-4.0/layers/ldat-tools/packages

NOTICES:

policycoreutils 2.0.82

Software: policycoreutils
Version: 2.0.82
File or Package: policycoreutils-2.0.82.tar.gz
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, Academic
Other Licenses:
URL: <http://userspace.selinuxproject.org/trac/wiki/Releases/policycoreutils-2.0.82.tar.gz>
Group: User Space Libraries / User Space Apps / System Environment/Base
Description: SELinux policy core utilities. Policycoreutils contains the policy core utilities that are required for basic operation of a SELinux system. These utilities include load_policy to load policies, setfiles to label filesystems, newrole to switch roles, and run_init to run /etc/init.d scripts in the proper context. Security-enhanced Linux is a patch of the Linux® kernel and a number of utilities with enhanced security functionality designed to add mandatory access controls to Linux. This package contains the core policy utilities that are required for basic operation of an SELinux system.
Common Usage: Library, Utility

popt 1.15

Software:	popt
Version:	1.15
File or Package:	popt-1.15.tar.gz
OSI Licenses:	GPLv2, GPLv2+ w/exception, MIT/X11, Public document version 2.60

Other Licenses: Domain
Custom
URL: <http://directory.fsf.org/project/popt/>
Group: System Environment/Libraries
Description: Popt is a C library for parsing command line parameters. It was heavily influenced by the `getopt_long()` and `getopt()` functions, but it improves on them by allowing more powerful argument expansion. Popt can parse arbitrary `argv[]` style arrays and automatically set variables based on command line arguments. Popt allows command line arguments to be aliased via configuration files and includes utility functions for parsing arbitrary strings into `argv[]` arrays using shell-like rules. The popt library exists essentially for parsing command line options. Some specific advantages of popt are no global variables (allowing multiple passes in parsing `argv`), parsing an arbitrary array of `argv`-style elements (allowing parsing of command-line-strings from any source), a standard method of option aliasing, ability to exec external option filters, and automatic generation of help and usage messages.

postgresql 8.3.1-1

Software:	postgresql
Version:	8.3.1-1
File or Package:	postgresql-8.3.1-1.fc9.src.rpm
OSI Licenses:	GPLv2+ w/exception, MIT/X11, FreeBSD, BSDv1, BSDv2, Perl Artistic
Other Licenses:	Beer-Ware v.42 Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/9/Fedora/source/SRPMS/postgresql-8.3.1-1.fc9.src.rpm
Group:	Applications/Databases
Description:	PostgreSQL client programs and libraries; PostgreSQL is an object-relational database management system (ORDBMS) based on POSTGRES, Version 4.2, developed at the University of California at Berkeley Computer Science Department. POSTGRES pioneered many concepts that only became available in some commercial database systems much later.
Common Usage:	Library
Package Size:	113 MB
Folders / Files:	324 / 3,470
Source Path:	wrlinux-4.0/layers/wrl-userspace/cgl/packages

♦♦♦

From:
postgresql-8.3.1-1.fc9.src/postgresql-8.3.1/postgresql-8.3.1/src/backend/regex/COPYRIGHT
This regular expression package was originally developed by Henry Spencer. It bears the following copyright notice:

Copyright (c) 1998, 1999 Henry Spencer. All rights reserved.

document version 2.60

Development of this software was funded, in part, by Cray Research Inc., UUNET Communications Services Inc., Sun Microsystems Inc., and Scriptics Corporation, none of whom are responsible for the results. The author thanks all of them.

Redistribution and use in source and binary forms -- with or without modification -- are permitted for any purpose, provided that redistributions in source form retain this entire copyright notice and indicate the origin and nature of any modifications. I'd appreciate being given credit for this package in the documentation of software which uses it, but that is not a requirement.

THIS SOFTWARE IS PROVIDED "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

IN NO EVENT SHALL HENRY SPENCER BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

PostgreSQL adopted the code out of Tcl 8.4.1. Portions of regc_locale.c and re_syntax.n were developed by Tcl developers other than Henry; these files bear the Tcl copyright and license notice:

This software is
copyrighted by the Regents of the University of California, Sun Microsystems, Inc., Scriptics Corporation, ActiveState Corporation and other parties.

The following terms apply to all files associated with the software unless explicitly disclaimed in individual files.

The authors hereby grant permission to use, copy, modify, distribute, and license this software and its documentation for any purpose, provided that existing copyright notices are retained in all copies and that this notice is included verbatim in any distributions. No written agreement, license, or royalty fee is required for any of the authorized uses.

Modifications to this software may be copyrighted by their authors and need not follow the licensing terms described here, provided that the new terms are clearly indicated on the first page of each file where they apply.

IN NO EVENT SHALL THE AUTHORS OR DISTRIBUTORS BE LIABLE TO ANY PARTY FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF THIS SOFTWARE, ITS DOCUMENTATION, OR ANY DERIVATIVES THEREOF, EVEN IF THE AUTHORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

THE AUTHORS AND DISTRIBUTORS SPECIFICALLY DISCLAIM ANY WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT. THIS SOFTWARE IS PROVIDED ON AN "AS IS" BASIS, AND THE AUTHORS AND DISTRIBUTORS HAVE NO OBLIGATION TO PROVIDE

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. powertop 1.10

Software:	powertop
Version:	1.10
File or Package:	powertop-1.10.tar.gz
OSI Licenses:	GPLv2
Other Licenses:	
URL:	http://www.lesswatts.org/projects/powertop/download/powertop-1.10.tar.gz
Group:	User Space Apps
Description:	Computer programs can make your computer use more power. PowerTOP is a Linux tool that helps you find those programs that are misbehaving while your computer is idle. The application that misbehaved the most was the Linux kernel. However, as of version 2.6.21, the Linux kernel went tickless, and no longer has a fixed 1000Hz document version 2.60

timer tick. The result (in theory) is huge power savings because the CPU stays in low power mode for longer periods during system idle. However... there are many things that can ruin the party, both inside the kernel and in userspace. PowerTOP combines various sources of information from the kernel into one convenient screen so that you can see how well your system is doing at saving power, and which components are the biggest problems.

PowerTOP has these four basic goals: Show how well your system is using the various hardware power-saving features; Show you the culprit software components that are preventing optimal usage of your hardware power savings; Help Linux developers test their application and achieve optimal behavior; Provide you with tuning suggestions to achieve low power consumption. Getting your computer to use the least amount of power can be problematic. As a first step, Intel is releasing PowerTOP, a tool that helps you find what software is using the most power. By fixing (or closing) these applications or processes, you can immediately see the power savings in the tool. You'll also see the estimated time left for battery power if you are running a laptop. The Tips&Tricks page has fixes for a lot of the issues that are already found. Join our mailing list to participate in this effort to get Linux to use less power.

Common Usage: Tool, Utility
Package Size: 452 KB (0.44 MB)

Description:	The Parma Polyhedra Library (PPL) provides numerical abstractions especially targeted at applications in the field of analysis and verification of complex systems. These abstractions include convex polyhedra, defined as the intersection of a finite number of (open or closed) halfspaces, each described by a linear inequality (strict or non-strict) with rational coefficients; some special classes of polyhedra shapes that offer interesting complexity/precision tradeoffs; and grids which represent regularly spaced points that satisfy a set of linear congruence relations. The library also supports finite powersets and products of (any kind of) polyhedra and grids, a mixed integer linear

document version 2.60

programming problem solver using an exact-arithmetic version of the simplex algorithm, a parametric integer programming solver, and primitives for the termination analysis via the automatic synthesis of linear ranking functions. (More details are available on the PPL's internal mechanisms.)

Common Usage: Library
Package Size: 68.7 MB
Folders / Files: 66 / 2,749
Source Path: wrlinux-4.0/layers/wrll-toolchain-4.4a-336/common/packages

Notes: The following software is intended to be used as a host utility to facilitate development of a target runtime image. If you choose to include it on a target runtime image, you may be subject to additional open source license compliance considerations. It is recommended you consult with your legal counsel for guidance and advice on your particular situation.

Modifications by Lauri Pesonen / lpesonen@clinet.fi, april 1997. The hash text (StdText) was taken from Win95 RASAPI32.DLL. Modifications by Frank Cusack, frank@google.com, March 2002. Implemented MS-CHAPv2 functionality, heavily based on sample implementation in RFC 2759. Implemented MPPE functionality, heavily based on sample implementation in RFC 3079.

We have received a packet that the decompressor failed to decompress. Here we would expect to issue a reset-request, but Motorola has a patent on resetting the compressor as a result of detecting an error in the decompressed data after decompression. (See US patent 5,130,993; international patent publication number WO 91/10289; Australian patent 73296/91.) So we ask the kernel whether the error was detected after decompression; if it was, we take CCP down, thus disabling compression:-(, otherwise we issue the reset-request.

ccp_fatal_error - returns 1 if decompression was disabled as a result of an error detected after decompression of a packet, 0 otherwise. This is necessary because of patent nonsense.

We need to make these distinctions so that we can disable certain useful functionality, namely sending a CCP reset-request as a result of an error detected after decompression. This is to avoid infringing a patent held by Motorola. Don't you just love software patents.

ppp-2.4.5-9.fc13.src/ppp-2.4.5/pppd/sys-linux.c
Christoph Lameter: Copied from poeigl-1.36 Jan 3, 1996

From:
ppp-2.4.5-9.fc13.src/ppp-2.4.5/pppd/sys-solaris.c
borrowed from main.c

From:
ppp-2.4.5-9.fc13.src/ppp-2.4.5/pppd/tdb.c
This is based on the hash algorithm from gdbm

From:
ppp-2.4.5-9.fc13.src/ppp-2.4.5/README.MPPE
There is an option to compress the data before encrypting (MPPE), however the algorithm is patented and requires execution of a license with Hifn. MPPE as an RFC is a complete farce. I have no further details on MPPE.

From:
ppp-2.4.5-9.fc13.src/ppp-2.4.5/modules/bsd-comp.c
Because of patent problems, we return DECOMP_ERROR for errors found by inspecting the input data and for system problems, but DECOMP_FATALERROR for any errors which could possibly be said to be being detected "after" decompression. For DECOMP_ERROR, we can issue a CCP reset-request; for DECOMP_FATALERROR, we may be infringing a patent of Motorola's if we do, so we take CCP down instead.

From:
ppp-2.4.5-9.fc13.src/ppp-2.4.5/pppd/Makefile.linux

Description:	ELF prelinking utility to speed up dynamic linking. prelink is a free program written by Jakub Jelinek of Red Hat for POSIX-compliant operating systems, principally Linux (because it modifies ELF executables). It is intended to speed up a system by reducing the time a program needs to begin. Actual results have been mixed, but it seems to aid systems with a large number of libraries, such as KDE. The equivalent process on Mac OS X is called "prebinding".

♦♦♦

From:
psmisc-22.6-13.fc12.src/psmisc-22.6/psmisc-22.6/readme
src/loop.h was stolen from util-linux package which in turn stole it from the Linux kernel.

Icons - The pstree icons were drawn by Tatlin at Coresis who has given permission for them to be used for psmisc.

Copyright Change - The license has changed to GPL for version 20 onwards with permission of the original authors. People who want to use these programs under the previous license will have to look at psmisc 19 or below.

document version 2.60

Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

For some people, it is not clear, what is the real intention of the author by using the GNU Lesser General Public License (LGPL) as the distribution license for GNU Pth. This is, because the LGPL and the GPL can be (and are often) interpreted very differently and some interpretations seem to be not compatible with others. So an explicit clarification for the use of the LGPL for GNU Pth from the authors point of view might be useful.

The author places this library under the LGPL to make sure that it can be used both commercially and non-commercially provided that modifications to the code base are always donated back to the official code base under the same license conditions. Please keep in mind that especially using this library in code not staying under the GPL or the LGPL `_is_` allowed and that any taint or license creep into code that uses the library is not the authors intention. It is just the case that `_including_` this library into the source tree of other applications is a little bit more inconvenient because of the LGPL. But it has to be this way for good reasons. And keep in mind that inconvenient doesn't mean not allowed or even impossible.

Even if you want to use this library in some BSD-style licensed packages, this `_is_` possible as long as you are a little bit carefully. Usually this means you have to make sure that the code is still clearly separated into the source tree and that modifications to this source area are done under the conditions of the LGPL. Read below for more details on the conditions. Contact the author if you have more questions.

addendum of this document.]

From:
pulseaudio-0.9.11.svn20080529/pulseaudio-0.9.11/license
All PulseAudio source files are licensed under the GNU Lesser General
Public License. (see file LGPL for details). However, the server side links
to the GPL-only library 'libsamplerate' which practically downgrades the
license of the server part to GPL (see file GPL for details), exercising
section 3 of the LGPL.

Hence you should treat the client library ('libpulse') of PulseAudio as
being LGPL licensed and the server part ('libpulsecore') as being GPL
licensed. Since the PulseAudio daemon and the modules link to
'libpulsecore' they are of course also GPL licensed. Lennart Poettering,

The design goals of this code are: Very fast algorithm, SIMD-friendly algorithm, Low memory requirement, Good perceptual quality (and not best SNR)

Warning: This resampler is relatively new. Although I think I got rid of all the major bugs and I don't expect the API to change anymore, there may be something I've missed. So use with caution. This algorithm is based on this original resampling algorithm: Smith, Julius O. Digital Audio Resampling Home Page Center for Computer Research in Music and Acoustics (CCRMA), Stanford University, 2007. Web published at <http://www-ccrma.stanford.edu/~jos/resample/>.

There is one main difference, though. This resampler uses cubic interpolation instead of linear interpolation in the above paper. This makes the table much smaller and makes it possible to compute that table on a per-stream basis. In turn, being able to tweak the table for each stream makes it possible to both reduce complexity on simple ratios (e.g. 2/3), and get rid of the rounding operations in the inner loop. The latter both reduces CPU time and makes the algorithm more SIMD-friendly.

pygtk 2.12.1

Software: pygtk
Version: 2.12.1
File or Package: pygtk-2.12.1.tar.bz2
OSI Licenses: GPLv2+ w/exception, LGPLv2.1, LGPLv2.1+, MIT/X11
Other Licenses: Custom
URL: <http://ftp.gnome.org/pub/gnome/sources/pygtk/2.12/pygtk-2.12.1.tar.bz2>
Group: System/Libraries
Description: Python bindings for the GTK+ widget set. PyGTK is a set of Python wrappers for the GTK+ GUI library. PyGTK is free software and licensed under the LGPL. Its original author is the prominent GNOME developer James Henstridge. Today there are six people in the core development team, with various other people who have submitted patches and bug reports. PyGTK has been selected as the environment of choice for applications running on the One Laptop Per Child systems. Developers and interested parties can usually be found on the IRC channel pygtk on irc.gnome.org.
Common Usage: plug-in
Package Size: 27.0 MB
Folders / Files: 38 / 1,317
Source Path: [wrlinux-4.0/layers/wrll-userspace/graphics/packages](#)

python 2.6.2-2

Software:	python
Version:	2.6.2-2
File or Package:	python-2.6.2-2.fc12.src.rpm
OSI Licenses:	GPLv2, GPLv2+ w/exception, Python v2 (and variants), MIT/X11, FreeBSD, BSDv2, zlib/libpng, Apache v2, Academic, Public Domain
Other Licenses:	Proprietary / Non-commercial, Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Everything/source/SRPMS/python-2.6.2-2.fc12.src.rpm
Group:	User Space Apps / Development/Languages
Description:	Python is an interpreted, interactive, object-oriented programming language often compared to Tcl, Perl, Scheme or Java. This package supports applications which require python. Python is an interpreted, interactive object-oriented programming language suitable (amongst other uses) for distributed application development, scripting, numeric computing and system testing. Python is often compared to Tcl, Perl, Java, JavaScript, Visual Basic or Scheme.

Python is a general-purpose high-level programming language. Its design philosophy emphasizes code readability. Python claims to "[combine] remarkable power with very clear syntax", and its standard library is large and comprehensive. Its use of indentation as block delimiters is unusual among popular programming languages. Python supports multiple programming paradigms (primarily object oriented, imperative, and functional) and features a fully dynamic type system and automatic memory management, similar to Perl, Ruby, Scheme, and Tcl. Like other dynamic languages, Python is often used as a scripting

language. The language has an open, community-based development model managed by the non-profit Python Software Foundation, which maintains the de facto standard definition of the language in CPython, the reference implementation.

Common Usage:	API, Interpreter, Utility

NOTICES:

From:
python-2.6.2-2.fc12.src/Python-2.6.2/Python-2.6.2/license
A. HISTORY OF THE SOFTWARE
Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see <http://www.cwi.nl>) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others. In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see <http://www.cnri.reston.va.us>) in Reston, Virginia where he released several versions of the Software. In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see <http://www.zope.com>). In 2001, the Python Software Foundation (PSF, see <http://www.python.org/psf/>) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see <http://www.opensource.org> for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Release Derived Year Owner GPL- from compatible? (1)

0.9.0	thru 1.2	1991-1995	CWI	yes
1.3	thru 1.5.2	1.2 1995-1999	CNRI	yes
1.6	1.5.2	2000	CNRI	no
2.0	1.6	2000	BeOpen.com	no
1.6.1	1.6	2001	CNRI	yes (2)
2.1	2.0+1.6.1	2001	PSF	no

2.5.1 2.5 2007 PSF yes
2.5.2 2.5.1 2008 PSF yes
2.5.3 2.5.2 2008 PSF yes
2.6 2.5 2008 PSF yes
2.6.1 2.6 2008 PSF yes

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL. thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON

PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using this software ("Python") in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "**Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009 Python Software Foundation; All Rights Reserved**" are retained in Python alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF

BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0

BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.

3. BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at <http://www.pythonlabs.com/logos.html> may be used according to the permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license

document version 2.60

to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "**Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved**" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: <http://hdl.handle.net/1895.22/1013>".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

From:
python-2.6.2-2.fc12.src/Python-2.6.2/Python-2.6.2/Doc/license.rst
History of the software - Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see <http://www.cwi.nl/>) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others. In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see <http://www.cnri.reston.va.us/>) in Reston, Virginia where he released several versions of the software. In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation; see <http://www.zope.com/>). In 2001, the Python Software Foundation (PSF, see <http://www.python.org/psf/>) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see <http://www.opensource.org/> for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Release	Derived from	Year	Owner	GPL compatible?
0.9.0 thru 1.2	n/a	1991-1995	CWI	yes
1.3 thru 1.5.2	1.2	1995-1999	CNRI	yes
1.6	1.5.2	2000	CNRI	no
2.0	1.6	2000	BeOpen.com	no
1.6.1	1.6	2001	CNRI	no
2.1	2.0+1.6.1	2001	PSF	no
2.0.1	2.0+1.6.1	2001	PSF	yes
2.1.1	2.1+2.0.1	2001	PSF	yes
2.2	2.1.1	2001	PSF	yes
2.1.2	2.1.1	2002	PSF	yes

2.6	2.5	2008	PSF	yes
2.6.1	2.6	2008	PSF	yes

note:

GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't. Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

Terms and conditions for accessing or otherwise using Python PSF LICENSE AGREEMENT FOR PYTHON release.
This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using Python release software in source or binary form and its associated documentation.

Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python release alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "Copyright © 2001-2009 Python Software Foundation; All Rights Reserved" are retained in Python release alone or in any derivative version prepared by Licensee.

In the event Licensee prepares a derivative work that is based on or incorporates Python release or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python release.

PSF is making Python release available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON release WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON release FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF

document version 2.60

MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON release, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

This License Agreement will automatically terminate upon a material breach of its terms and conditions.

Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

By copying, installing or otherwise using Python release, Licensee agrees to be bound by the terms and conditions of this License Agreement.

BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0 BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").

Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.

BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

This License Agreement will automatically terminate upon a material breach of its terms and conditions.

This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at <http://www.pythonlabs.com/logos.html> may be used according to the permissions granted on that web page. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

Permission to use, copy, modify, and distribute this software for any purpose without fee is hereby granted, provided that this entire notice is included in all copies of any software which is or includes a copy or modification of this software and in all copies of the supporting documentation for such software. This work was produced at the University of California, Lawrence Livermore National Laboratory under contract no. W-7405-ENG-48 between the U.S. Department of Energy

document version 2.60

and The Regents of the University of California for the operation of UC LLNL.

DISCLAIMER

This software was prepared as an account of work sponsored by an agency of the United States Government. Neither the United States Government nor the University of California nor any of their employees, makes any warranty, express or implied, or assumes any liability or responsibility for the accuracy, completeness, or usefulness of any information, apparatus, product, or process disclosed, or represents that its use would not infringe privately-owned rights. Reference herein to any specific commercial products, process, or service by trade name, trademark, manufacturer, or otherwise, does not necessarily constitute or imply its endorsement, recommendation, or favoring by the United States Government or the University of California. The views and opinions of authors expressed herein do not necessarily state or reflect those of the United States Government or the University of California, and shall not be used for advertising or product endorsement purposes.

MD5 message digest algorithm

The source code for the `:mod:`md5`` module contains the following notice::

Copyright (C) 1999, 2002 Aladdin Enterprises. All rights reserved.

This software is provided 'as-is', without any express or implied warranty. In no event will the authors be held liable for any damages arising from the use of this software. Permission is granted to anyone to use this software for any purpose, including commercial applications, and to alter it and redistribute it freely, subject to the following restrictions:

1. The origin of this software must not be misrepresented; you must not claim that you wrote the original software. If you use this software in a product, an acknowledgment in the product documentation would be appreciated but is not required.
2. Altered source versions must be plainly marked as such, and must not be misrepresented as being the original software.
3. This notice may not be removed or altered from any source distribution.

L. Peter Deutsch ghost@aladdin.com

Independent implementation of MD5 (RFC 1321).

This code implements the MD5 Algorithm defined in RFC 1321, whose text is available at <http://www.ietf.org/rfc/rfc1321.txt>. The code is derived from the text of the RFC, including the test suite (section A.5) but excluding the rest of Appendix A. It does not include any code or documentation that is identified in the RFC as being copyrighted. The original and principal author of `md5.h` is L. Peter Deutsch ghost@aladdin.com.

Asynchronous socket services

The `:mod:`asynchat`` and `:mod:`asyncore`` modules contain the following notice::

From:
python-2.6.2-2.fc12.src/Python-2.6.2/Python-2.6.2/PC/os2emx/README.os2emx
Licenses and info about Python and EMX
Please read the file `README.Python-2.6` included in this package for
information about Python 2.6. This file is the `README` file from the
Python 2.6 source distribution available via <http://www.python.org/> and its
mirrors. The file `LICENCE.Python-2.6` is the text of the Licence from the
Python 2.6 source distribution.

Note that the EMX package that this package depends on is released
under the GNU General Public Licence. Please refer to the
documentation accompanying the EMX Runtime libraries for more
information about the implications of this. A copy of version 2 of the GPL
is included as the file `COPYING.gpl2`.

Readline and GDBM are covered by the GNU General Public Licence. I
think Eberhard Mattes' porting changes to BSD DB v1.85 are also GPL'ed
(BSD DB itself is BSD Licenced). ncurses and expat appear to be
covered by MIT style licences - please refer to the source distributions for
more detail.

zlib is distributable under a very free license.

GNU UFC is under the GNU LGPL (see file `COPYING.lib`).

My patches to the Python-2.x source distributions, and any other
packages used in this port, are placed in the public domain. This software
is provided 'as-is', without any express or implied warranty. In no event
will the author be held liable for any damages arising from the use of the
software. I do hope however that it proves useful to someone.

Additional Conditions for this Windows binary build
This program is linked with and uses Microsoft Distributable Code,
copyrighted by Microsoft Corporation. The Microsoft Distributable
Code includes the following files: msvcr90.dll, msvcp90.dll, msvcm90.dll

If you further distribute programs that include the Microsoft Distributable Code, you must comply with the restrictions on distribution specified by Microsoft. In particular, you must require distributors and external end users to agree to terms that protect the Microsoft Distributable Code at least as much as Microsoft's own requirements for the Distributable Code. See Microsoft's documentation (included in its developer tools and on its website at microsoft.com) for specific details.

Redistribution of the Windows binary build of the Python interpreter complies with this agreement, provided that you do not:

alter any copyright, trademark or patent notice in Microsoft's Distributable Code;

use Microsoft's trademarks in your programs' names or in a way that suggests your programs come from or are endorsed by Microsoft;

distribute Microsoft's Distributable Code to run on a platform other than Microsoft operating systems, run-time technologies or application platforms; or

include Microsoft Distributable Code in malicious, deceptive or unlawful programs.

These restrictions apply only to the Microsoft Distributable Code as defined above, not to Python itself or any programs running on the

python-ldap 2.3.10

Software: python-ldap
Version: 2.3.10
File or Package: python-ldap-2.3.10.tar.gz
OSI Licenses: Python, Academic
Other Licenses: Custom
URL:
Group: System Environment/Libraries / User Space Libraries
Description: python-ldap provides an object-oriented API to access LDAP directory servers from Python programs. Mainly it wraps the OpenLDAP client libs for that purpose. Additionally the package contains modules for other LDAP-related stuff (e.g. processing LDIF, LDAPURLs, LDAPv3 sub-schema, etc.).
Common Usage: API, Docs, Library, Module, Plug-in
Package Size: 872 KB (0.85 MB)
Folders / Files: 22 / 122
Source Path: wrlinux-4.0/layers/wrll-userspace/networking/packages

NOTICES:

From:
python-ldap-2.3.10/python-ldap-2.3.10/license
The python-ldap package is distributed under Python-style license.

Name: Paste
Version: 1.4.2
Summary: Tools for using a Web Server Gateway Interface stack
Home-page: <http://pythonpaste.org>
Author: **Ian Bicking**
Author-email: ianb@colorstudy.com
License: MIT
Description: These provide several pieces of "middleware" (or filters) that can be nested to build web applications. Each piece of middleware uses the WSGI ('PEP 333') interface, and should be compatible with other middleware based on those interfaces.

Python 2.4 license - This is the official license for the Python 2.4 release:

A. HISTORY OF THE SOFTWARE

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see <http://www.cwi.nl>) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see <http://www.cnri.reston.va.us>) in Reston, Virginia where he released several versions of the software. In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see <http://www.zope.com>). In 2001, the Python Software Foundation (PSF, see <http://www.python.org/psf/>) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of the PSF.

All Python releases are Open Source (see <http://www.opensource.org> for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Release Derived Year Owner GPL-from compatible? (1)

0.9.0 thru 1.2	1991-1995	CWI	yes
1.3 thru 1.5.2	1.2 1995-1999	CNRI	yes
1.6	1.5.2 2000	CNRI	no
2.0	1.6 2000	BeOpen.com	no
1.6.1	1.6 2001	CNRI	yes (2)
2.1	2.0+1.6.1 2001	PSF	no
2.0.1	2.0+1.6.1 2001	PSF	yes
2.1.1	2.1+2.0.1 2001	PSF	yes
2.2	2.1.1 2001	PSF	yes
2.1.2	2.1.1 2002	PSF	yes
2.1.3	2.1.2 2002	PSF	yes
2.2.1	2.2 2002	PSF	yes
2.2.2	2.2.1 2002	PSF	yes
2.2.3	2.2.2 2003	PSF	yes
2.3	2.2.2 2002-2003	PSF	yes
2.3.1	2.3 2002-2003	PSF	yes
2.3.2	2.3.1 2002-2003	PSF	yes
2.3.3	2.3.2 2002-2003	PSF	yes
2.3.4	2.3.3 2004	PSF	yes

document version 2.60

2.4.2.3 2004 PSF yes

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL. Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON

PSF LICENSE AGREEMENT FOR PYTHON 2.4

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 2.4 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 2.4 alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "**Copyright (c) 2001, 2002, 2003, 2004 Python Software Foundation; All Rights Reserved**" are retained in Python 2.4 alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 2.4 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 2.4.

4. PSF is making Python 2.4 available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 2.4 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 2.4 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 2.4, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

8. By copying, installing or otherwise using Python 2.4, Licensee agrees to be bound by the terms and conditions of this License Agreement.

BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0

BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.

3. BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at <http://www.pythonlabs.com/logos.html> may be used according to the permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in

document version 2.60

any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "**Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved**" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: <http://hdl.handle.net/1895.22/1013>".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

A. HISTORY OF THE SOFTWARE

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI) in the Netherlands as a successor of a language called ABC. Guido is Python's principal author, although it includes many contributions from others. The last version released from CWI was Python 1.2. In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI) in Reston, Virginia where he released several versions of the software. Python 1.6 was the last of the versions released by CNRI. In 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. Python 2.0 was the first and only release from BeOpen.com.

Following the release of Python 1.6, and after Guido van Rossum left CNRI to work with commercial software developers, it became clear that the ability to use Python with software available under the GNU Public License (GPL) was very desirable. CNRI and the Free Software Foundation (FSF) interacted to develop enabling wording changes to the Python license. Python 1.6.1 is essentially the same as Python 1.6, with a few minor bug fixes, and with a different license that enables later

versions to be GPL-compatible. Python 2.1 is a derivative work of Python 1.6.1, as well as of Python 2.0.

After Python 2.0 was released by BeOpen.com, Guido van Rossum and the other PythonLabs developers joined Digital Creations. All intellectual property added from this point on, starting with Python 2.1 and its alpha and beta releases, is owned by the Python Software Foundation (PSF), a non-profit modeled after the Apache Software Foundation. See <http://www.python.org/psf/> for more information about the PSF.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON PSF LICENSE AGREEMENT

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 2.1.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 2.1.1 alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "**Copyright (c) 2001 Python Software Foundation; All Rights Reserved**" are retained in Python 2.1.1 alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 2.1.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 2.1.1.

4. PSF is making Python 2.1.1 available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 2.1.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 2.1.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 2.1.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python 2.1.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

BEOPEN.COM TERMS AND CONDITIONS FOR PYTHON 2.0
BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT
VERSION1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.

3. BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at <http://www.pythonlabs.com/logos.html> may be used according to the permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

CNRI OPEN SOURCE GPL-COMPATIBLE LICENSE AGREEMENT

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "**Copyright (c) 1995-**

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

2001 Corporation for National Research Initiatives; All Rights Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: <http://hdl.handle.net/1895.22/1013>".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

qemu 122208

Software:	qemu
Version:	122208
File or Package:	qemu-122208.tar.bz2
OSI Licenses:	GPLv1+, GPLv2, GPLv2+, LGPLv2+, LGPLv2.1, LGPLv2.1+, BSDv1, BSDv2, MIT/X11
Other Licenses:	CYGWIN, Custom
URL:	
Group:	
Description:	QEMU is a processor emulator that relies on dynamic binary translation to achieve a reasonable speed while being easy to port on new host CPU architectures. In conjunction with CPU emulation, it also provides a set of device models, allowing it to run a variety of unmodified guest operating systems; it can thus be viewed as a hosted virtual machine monitor. It also provides an accelerated mode for supporting a mixture of binary translation (for kernel code) and native execution (for user code), in the same fashion as VMware Workstation and Microsoft Virtual PC.
Common Usage:	
Package Size:	20.9 MB
Folders / Files:	61 / 949
Source Path:	wrlinux-4.0/layers/wrll-simulator/packages

NOTICES:

From:
qemu-122208/qemu-122208/license
The following points clarify the QEMU license:

document version 2.60

1) QEMU as a whole is released under the GNU General Public License

2) Parts of QEMU have specific licenses which are compatible with the GNU General Public License. Hence each source file contains its own licensing information. In particular, the QEMU virtual CPU core library (libqemu.a) is released under the GNU Lesser General Public License.

Many hardware device emulation sources are released under the BSD license.

3) The Tiny Code Generator (TCG) is released under the BSD license (see license headers in files).

4) QEMU is a trademark of Fabrice Bellard.

qemu-122208/qemu-122208/slrp/copyright

Slirp was written by Danny Gasparovski.

Copyright (c), 1995,1996 All Rights Reserved.

Slirp is maintained by Kelly Price <tygris+slirp@erols.com>

Slirp is free software; "free" as in you don't have to pay for it, and you are free to do whatever you want with it. I do not accept any donations, monetary or otherwise, for Slirp. Instead, I would ask you to pass this potential donation to your favorite charity. In fact, I encourage everyone who finds Slirp useful to make a small donation to their favorite charity (for example, GreenPeace). This is not a requirement, but a suggestion from someone who highly values the service they provide. The copyright terms and conditions:

Copyright (c) 1995,1996 Danny Gasparovski. All rights reserved.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

POSSIBILITY OF SUCH DAMAGE.

This basically means you can do anything you want with the software, except 1) call it your own, and 2) claim warranty on it. There is no warranty for this software. None. Nada. If you lose a million dollars while using Slirp, that's your loss not mine. So, USE AT YOUR OWN RISK!. If these conditions cannot be met due to legal restrictions (E.g. where it is against the law to give out Software without warranty), you must cease using the software and delete all copies you have.

Slirp uses code that is copyrighted by the following people/organizations: Juha Pirkola. Gregory M. Christy. The Regents of the University of California. Carnegie Mellon University. The Australian National University. RSA Data Security, Inc. Please read the top of each source file for the details on the various copyrights.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

OSI Licenses: GPLv1+, GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, LGPLv2+, LGPLv2.1, LGPLv2.1+, MIT/X11, FreeBSD, BSDv1 (non-UCB), BSDv2, Academic, Public Domain

Other Licenses: Custom

URL: http://www.linux-kvm.org/page/Main_Page

Group: User Space Apps / System Environment/Kernel

Description: KVM (for Kernel-based Virtual Machine) is a full virtualization solution for Linux on x86 hardware containing virtualization extensions (Intel VT or AMD-V). It consists of a loadable kernel module, kvm.ko, that provides the core virtualization infrastructure and a processor specific module, kvm-intel.ko or kvm-amd.ko. KVM also requires a modified QEMU although work is underway to get the required changes upstream. Using KVM, one can run multiple virtual machines running unmodified Linux or Windows images. Each virtual machine has private virtualized hardware: a network card, disk, graphics adapter, etc. The kernel component of KVM is included in mainline Linux, as of 2.6.20. KVM is open source software.

Common Usage: Module, Standalone

Package Size: 18.70 MB

Folders / Files: 93 / 1,571

Source Path: wrlinux-4.0/layers/wrll-linux-2.6.34/packages

NOTICES:

From:
qemu-kvm-0.14.1/qemu-kvm-0.14.1/kvm/kvm.spec
Summary: Kernel Virtual Machine virtualization environment
Group: System Environment/Kernel
License: GPL
URL: <http://www.qumranet.com>
BuildRoot: %[_tmppath]/%{name}-%{version}-%{release}
Description - The Kernel Virtual Machine provides a virtualization environment for processors with hardware support for virtualization: Intel's VT-x&VT-i and AMD's AMD-V.

document version 2.60

The following points clarify the QEMU license:

- 1) QEMU as a whole is released under the GNU General Public License
- 2) Parts of QEMU have specific licenses which are compatible with the GNU General Public License. Hence each source file contains its own licensing information. In particular, the QEMU virtual CPU core library (libqemu.a) is released under the GNU Lesser General Public License. Many hardware device emulation sources are released under the BSD license.
- 3) The Tiny Code Generator (TCG) is released under the BSD license (see license headers in files).
- 4) QEMU is a trademark of Fabrice Bellard.

From:

qemu-kvm-0.14.1/qemu-kvm-0.14.1/slirp/copyright

Slirp was written by

Danny Gasparovski. Copyright (c), 1995,1996 All Rights Reserved.

Slirp is maintained by Kelly Price <tygris+slirp@erols.com> Slirp is free software; "free" as in you don't have to pay for it, and you are free to do whatever you want with it. I do not accept any donations, monetary or otherwise, for Slirp. Instead, I would ask you to pass this potential donation to your favorite charity. In fact, I encourage everyone who finds Slirp useful to make a small donation to their favorite charity (for example, GreenPeace). This is not a requirement, but a suggestion from someone who highly values the service they provide.

The copyright terms and conditions:

BEGIN

Copyright (c) 1995,1996 Danny Gasparovski. All rights reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

THIS SOFTWARE IS PROVIDED "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

IN NO EVENT SHALL DANNY GASPAROVSKI OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.
END

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

This basically means you can do anything you want with the software, except 1) call it your own, and 2) claim warranty on it. There is no warranty for this software. None. Nada. If you lose a million dollars while using Slirp, that's your loss not mine. So, USE AT YOUR OWN RISK!.

If these conditions cannot be met due to legal restrictions (E.g. where it is against the law to give out Software without warranty), you must cease using the software and delete all copies you have.

Slirp uses code that is

From:

qemu-kvm-0.14.1/qemu-kvm-0.14.1/ui/d3des.c

This is D3DES (V5.09) by Richard Outerbridge with the double and triple-length support removed for use in VNC. Also the bytebit[] array has been reversed so that the most significant bit in each byte of the key is ignored, not the least significant.

These changes are:

qemu-kvm-0.14.1/qemu-kvm-0.14.1/fpu/softfloat-macros.h
This C source fragment is part of the SoftFloat IEC/IEEE Floating-point Arithmetic Package, Release 2b.
Written by **John R. Hauser**.

This work was made possible in part by the International Computer Science Institute, located at Suite 600, 1947 Center Street, Berkeley, California 94704. Funding was partially provided by the National Science Foundation under grant MIP-9311980.

The original version of this code was written as part of a project to build a fixed-point vector processor in collaboration with the University of California at Berkeley, overseen by Profs. Nelson Morgan and John Wawrzynek. More information is available through the Web page <http://www.cs.berkeley.edu/~jhauser/arithmetic/SoftFloat.html>.

THIS SOFTWARE IS DISTRIBUTED AS IS, FOR FREE. Although reasonable effort has been made to avoid it, THIS SOFTWARE MAY CONTAIN FAULTS THAT WILL AT TIMES RESULT IN INCORRECT BEHAVIOR. USE OF THIS SOFTWARE IS RESTRICTED TO PERSONS AND ORGANIZATIONS WHO CAN AND WILL TAKE FULL RESPONSIBILITY FOR ALL LOSSES, COSTS, OR OTHER PROBLEMS THEY INCUR DUE TO THE SOFTWARE, AND WHO FURTHERMORE EFFECTIVELY INDEMNIFY JOHN HAUSER AND THE INTERNATIONAL COMPUTER SCIENCE INSTITUTE (possibly via similar legal notice) AGAINST ALL LOSSES, COSTS, OR OTHER PROBLEMS INCURRED BY THEIR CUSTOMERS AND CLIENTS DUE TO THE SOFTWARE.

Derivative works are acceptable, even for commercial purposes, so long as (1) the source code for the derivative work includes prominent notice that the work is derivative, and (2) the source code includes prominent notice with these four paragraphs for those parts of this code that are retained.

qt-everywhere-opensource-src 4.7.1

Software:	qt-everywhere-opensource-src
Version:	4.7.1
File or Package:	qt-everywhere-opensource-src-4.7.1.tar.gz
OSI Licenses:	GPLv2, GPLv2+ w/exception, LGPLv2, LGPLv2+, LGPLv2.1, LGPLv2.1+, LGPLv2.1 w/exception, GPLv3, GPLv3+ w/exception, LGPLv3, FDLv1.3, Apache v2.0, FreeBSD, BSDv1 (UCB & non-UCB), BSDv2, MIT/X11, Mozilla Public v1.1 (MPLv1.1), W3C, zlib/libpng, Academic, Public Domain
Other Licenses:	Custom, Proprietary, Nokia EULA (various)
URL:	http://get.qt.nokia.com/qt/source/qt-everywhere-opensource-src-4.7.1.tar.gz
Group:	User Space Libraries/System Environment/Libraries
Description:	Qt is a software toolkit for developing applications. This package contains base tools, like string, xml, and network handling. Qt is a GUI software toolkit for developing applications, which simplifies the task of writing and maintaining GUI (Graphical User Interface) applications for the X Window System. This package contains base tools, like string, xml, and network handling. Qt is written in C++ and is fully object-oriented. This package contains the shared library needed to run Qt 3 applications, as well as the README files for Qt 3.
Common Usage:	Library, Utility
Package Size:	585.8 MB
Folders / Files:	2,053 / 34,339
Source Path:	wrlinux-4.0/layers/wrll-userspace/graphics/packages

Nokia Qt LGPL Exception version 1.1

As an additional permission to the GNU Lesser General Public License version 2.1, the object code form of a "work that uses the Library" may incorporate material from a header file that is part of the Library. You may distribute such object code under terms of your choice, provided that:

- (i) the header files of the Library have not been modified; and
- (ii) the incorporated material is limited to numerical parameters, data structure layouts, accessors, macros, inline functions and templates; and
- (iii) you comply with the terms of Section 6 of the GNU Lesser General Public License version 2.1.

Moreover, you may apply this exception to a modified version of the Library, provided that such modification does not involve copying material from the Library into the modified Library's header files unless such material is limited to (i) numerical parameters; (ii) data structure layouts; (iii) accessors; and (iv) small macros, templates and inline functions of five lines or less in length. Furthermore, you are not required to apply this additional permission to a modified version of the Library.

document version 2.60

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

The CLucene Core Library uses a dual license strategy for the source code. These licenses are the GNU Lesser General Public License (LGPL) and the Apache License (Version 2.0). Users can choose the license they wish to distribute their software under. This means that you do not need to abide by both licenses, but rather than you can choose the license which most suits your needs.

To rephrase this and to make it perfectly clear:

CLucene is distributed under the GNU Lesser General Public License (LGPL) or the Apache License, Version 2.0

However, we are an open source project, and we encourage users to use the LGPL license and participate fully in the free software community. Dual licensing of the CLucene source code provides open and free access to the technology both for the GPL community and for other developers or companies that cannot use the GPL.

You can freely modify, extend, and improve the CLucene source code. The only question is whether or not you must provide the source code and contribute modifications to the community. The GNU and Apache licenses allow different ranges of flexibility in this regard, but in the end, regardless of the license used, we highly recommend that you submit any bugs, incompatibilities or added features. Note that this same license does not apply to the CLucene Contributions package. You should read the COPYING file in that directory or package for more information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

Except as contained in this notice, the names of Gnome, the Gnome Foundation, and Bitstream Inc., shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Font Software without prior written authorization from the Gnome Foundation or Bitstream Inc., respectively. For further information, contact: fonts at gnome dot org.

Copyright FAQ

1. I don't understand the resale restriction... What gives?

Bitstream is giving away these fonts, but wishes to ensure its competitors can't just drop the fonts as is into a font sale system and sell them as is. It seems fair that if Bitstream can't make money from the Bitstream Vera fonts, their competitors should not be able to do so either. You can sell the fonts as part of any software package, however.

2. I want to package these fonts separately for distribution and sale as part of a larger software package or system. Can I do so?

Yes. A RPM or Debian package is a "larger software package" to begin with, and you aren't selling them independently by themselves. See 1. above.

3. Are derivative works allowed?

Yes!

4. Can I change or add to the font(s)?

Yes, but you must change the name(s) of the font(s).

5. Under what terms are derivative works allowed?

You must change the name(s) of the fonts. This is to ensure the quality of the fonts, both to protect Bitstream and Gnome. We want to ensure that if an application has opened a font specifically of these names, it gets what it expects (though of course, using fontconfig, substitutions could still could have occurred during font opening). You must include the Bitstream copyright. Additional copyrights can be added, as per copyright law. Happy Font Hacking!

6. If I have improvements for Bitstream Vera, is it possible they might get adopted in future versions?

Yes. The contract between the Gnome Foundation and Bitstream has provisions for working with Bitstream to ensure quality additions to the Bitstream Vera font family. Please contact us if you have such additions. Note, that in general, we will want such additions for the entire family, not just a single font, and that you'll have to keep both Gnome and Jim Lyles, Vera's designer, happy! To make sense to add glyphs to the font, they must be stylistically in keeping with Vera's design. Vera cannot become a "ransom note" font. Jim Lyles will be providing a document describing the design elements used in Vera, as a guide and aid for people interested in contributing to Vera.

7. I want to sell a software package that uses these fonts: Can I do so?

Sure. Bundle the fonts with your software and sell your software with the fonts. That is the intent of the copyright.

8. If applications have built the names "Bitstream Vera" into them, can I override this somehow to use fonts of my choosing?

This depends on exact details of the software. Most open source systems and software (e.g., Gnome, KDE, etc.) are now converting to use fontconfig (see www.fontconfig.org) to handle font configuration, selection and substitution; it has provisions for overriding font names and

document version 2.60

substituting alternatives. An example is provided by the supplied local.conf file, which chooses the family Bitstream Vera for "sans", "serif" and "monospace". Other software (e.g., the XFree86 core server) has other mechanisms for font substitution.

The Catharon Open Source LICENSE 2000-Jul-04

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Copyright (C) 2000 by Catharon Productions, Inc.

Introduction - This license applies to source files distributed by Catharon Productions, Inc. in several archive packages. This license applies to all files found in such packages which do not fall under their own explicit license. This license was inspired by the BSD, Artistic, and IJG (Independent JPEG Group) licenses, which all encourage inclusion and use of free software in commercial and freeware products alike. As a consequence, its main points are that:

We don't promise that this software works. However, we are interested in any kind of bug reports. ('as is' distribution)

You can use this software for whatever you want, in parts or full form, without having to pay us. ('royalty-free' usage)

You may not pretend that you wrote this software. If you use it, or only parts of it, in a program, you must acknowledge somewhere in your documentation that you have used the Catharon Code. ('credits')

We specifically permit and encourage the inclusion of this software, with or without modifications, in commercial products. We disclaim all warranties covering the packages distributed by Catharon Productions, Inc. and assume no liability related to their use.

Legal Terms

0. Definitions

Throughout this license, the terms 'Catharon Package', 'package', and 'Catharon Code' refer to the set of files originally distributed by Catharon Productions, Inc.

'You' refers to the licensee, or person using the project, where 'using' is a generic term including compiling the project's source code as well as linking it to form a 'program' or 'executable'.

This program is referred to as 'a program using one of the Catharon Packages'. This license applies to all files distributed in the original Catharon Package(s), including all source code, binaries and documentation, unless otherwise stated in the file in its original, unmodified form as distributed in the original archive. If you are unsure whether or not a particular file is covered by this license, you must contact us to verify this.

The Catharon Packages are

copyright (C) 2000 by Catharon Productions, Inc. All rights reserved except as specified below.

1. No Warranty

THE CATHARON PACKAGES ARE PROVIDED 'AS IS' WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

IN NO EVENT WILL ANY OF THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY DAMAGES CAUSED BY THE USE OF OR THE INABILITY TO USE THE CATHARON PACKAGE.

2. Redistribution

This license grants a worldwide, royalty-free, perpetual and irrevocable right and license to use, execute, perform, compile, display, copy, create derivative works of, distribute and sublicense the Catharon Packages (in both source and object code forms) and derivative works thereof for any purpose; and to authorize others to exercise some or all of the rights granted herein, subject to the following conditions: Redistribution of

document version 2.60

source code must retain this license file ('license.txt') unaltered; any additions, deletions or changes to the original files must be clearly indicated in accompanying documentation. The copyright notices of the unaltered, original files must be preserved in all copies of source files.

Redistribution in binary form must provide a disclaimer that states that the software is based in part on the work of Catharon Productions, Inc. in the distribution documentation. These conditions apply to any software derived from or based on the Catharon Packages, not just the unmodified files. If you use our work, you must acknowledge us. However, no fee need be paid to us.

3. Advertising

Neither Catharon Productions, Inc. and contributors nor you shall use the name of the other for commercial, advertising, or promotional purposes without specific prior written permission.

We suggest, but do not require, that you use the following phrase to refer to this software in your documentation: 'this software is based in part on the Catharon Typography Project'.

As you have not signed this license, you are not required to accept it. However, as the Catharon Packages are copyrighted material, only this license, or another one contracted with the authors, grants you the right to use, distribute, and modify it. Therefore, by using, distributing, or modifying the Catharon Packages, you indicate that you understand and accept all the terms of this license.

Other Licenses Used in Qt

Qt contains some code that is not provided under the GNU General Public License (GPL), GNU Lesser General Public License (LGPL) or the Qt Commercial License Agreement, but rather under specific licenses from the original authors. Some pieces of code were developed by Nokia and others originated from third parties. This page lists the licenses used, names the authors, and links to the places where it is used. Nokia gratefully acknowledges these and other contributions to Qt. We recommend that programs that use Qt also acknowledge these contributions, and quote these license statements in an appendix to the documentation. See also: Licenses for Fonts Used in Qt for Embedded Linux

Parts of WebKit used by the QtWebKit module
Copyright (c) 1998 by Bjorn Reese breese@imada.ou.dk

Permission to use, copy, modify, and distribute this software for any purpose with or without fee is hereby granted, provided that the above copyright notice and this permission notice appear in all copies.

THIS SOFTWARE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE AUTHORS AND CONTRIBUTORS ACCEPT NO RESPONSIBILITY IN ANY CONCEIVABLE MANNER.

Parts of the QCrashHandler class
Parts of the FreeType projects have been modified and put into Qt for use in the painting subsystem. These files are fraster.h, fraster.c, ftgrays.h and ftgrays.c. The following modifications has been made to these files:

Renamed FT_ and ft_ symbols to QT_FT_ and qt_ft_ to avoid name conflicts in qrasterdefs_p.h.
Removed parts of code not relevant when compiled with _STANDALONE_ defined.
Changed behavior in fraster.c to follow X polygon filling rules.
Implemented support in fraster.c for winding / odd even polygon fill rules.
Replaced bitmap generation with span generation in fraster.c.
Renamed fraster.h as qlblackraster_p.h.
Renamed fraster.c as qlblackraster.c.
Renamed ftgrays.h as qgrayraster_p.h.
Renamed ftgrays.c as qgrayraster.c.
See src/3rdparty/freetype/docs/FTL.txt and src/3rdparty/freetype/docs/GPL.txt for license details.

Bitstream Charter and Courier
(c) Copyright 1989-1992, Bitstream Inc., Cambridge, MA.

You are hereby granted permission under all Bitstream propriety rights to use, copy, modify, sublicense, sell, and redistribute the 4 Bitstream Charter (r) Type 1 outline fonts and the 4 Courier Type 1 outline fonts for any purpose and without restriction; provided, that this notice is left intact on all copies of such fonts and that Bitstream's trademark is acknowledged as shown below on all unmodified copies of the 4 Charter Type 1 fonts.

BITSTREAM CHARTER is a registered trademark of Bitstream Inc.

Bitstream Vera
Copyright (c) 2003 by Bitstream, Inc. All Rights Reserved.
Bitstream Vera is a trademark of Bitstream, Inc.

Permission is hereby granted, free of charge, to any person obtaining a copy of the fonts accompanying this license ("Fonts") and associated documentation files (the "Font Software"), to reproduce and distribute the Font Software, including without limitation the rights to use, copy, merge, publish, distribute, and/or sell copies of the Font Software, and to permit persons to whom the Font Software is furnished to do so, subject to the following conditions: The above copyright and trademark notices and this permission notice shall be included in all copies of one or more of the Font Software typefaces.

The Font Software may be modified, altered, or added to, and in particular the designs of glyphs or characters in the Fonts may be modified and additional glyphs or characters may be added to the Fonts, only if the fonts are renamed to names not containing either the words "Bitstream" or the word "Vera". This License becomes null and void to the extent applicable to Fonts or Font Software that has been modified and is distributed under the "Bitstream Vera" names. The Font Software may be sold as part of a larger software package but no copy of one or more of the Font Software typefaces may be sold by itself.

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT.

IN NO EVENT SHALL BITSTREAM OR THE GNOME FOUNDATION BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE

USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

Except as contained in this notice, the names of Gnome, the Gnome Foundation, and Bitstream Inc., shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Font Software without prior written authorization from the Gnome Foundation or Bitstream Inc., respectively. For further information, contact: fonts at gnome dot org. See also: Vera Open Source Fonts

Cursor
The Cursor font is distributed with the following declaration:
Copyright (c) 2000 XFree86, Inc.

DejaVu Fonts
DejaVu fonts come with the following copyright statement:
Fonts are **(c) Bitstream** (see below).
DejaVu changes are in public domain. Glyphs imported from Arev fonts are
(c) Tavmjung Bah (see below)

Bitstream Vera Fonts Copyright
Copyright (c) 2003 by Bitstream, Inc. All Rights Reserved
Bitstream Vera is a trademark of Bitstream, Inc.

Permission is hereby granted, free of charge, to any person obtaining a copy of the fonts accompanying this license ("Fonts") and associated documentation files (the "Font Software"), to reproduce and distribute the Font Software, including without limitation the rights to use, copy, merge, publish, distribute, and/or sell copies of the Font Software, and to permit persons to whom the Font Software is furnished to do so, subject to the following conditions: The above copyright and trademark notices and this permission notice shall be included in all copies of one or more of the Font Software typefaces.

The Font Software may be modified, altered, or added to, and in particular the designs of glyphs or characters in the Fonts may be modified and additional glyphs or characters may be added to the Fonts, only if the fonts are renamed to names not containing either the words "Bitstream" or the word "Vera". This License becomes null and void to the extent applicable to Fonts or Font Software that has been modified and is distributed under the "Bitstream Vera" names. The Font Software may be sold as part of a larger software package but no copy of one or more of the Font Software typefaces may be sold by itself.

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT.

IN NO EVENT SHALL BITSTREAM OR THE GNOME FOUNDATION BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

Except as contained in this notice, the names of Gnome, the Gnome Foundation, and Bitstream Inc., shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Font Software without prior written authorization from the Gnome Foundation or

Bitstream Inc., respectively. For further information, contact: fonts at gnome dot org.

Arev Fonts Copyright

Copyright (c) 2006 by Tavmjong Bah. All Rights Reserved.

Permission is hereby granted, free of charge, to any person obtaining a copy of the fonts accompanying this license ("Fonts") and associated documentation files (the "Font Software"), to reproduce and distribute the modifications to the Bitstream Vera Font Software, including without limitation the rights to use, copy, merge, publish, distribute, and/or sell copies of the Font Software, and to permit persons to whom the Font Software is furnished to do so, subject to the following conditions: The above copyright and trademark notices and this permission notice shall be included in all copies of one or more of the Font Software typefaces.

The Font Software may be modified, altered, or added to, and in particular the designs of glyphs or characters in the Fonts may be modified and additional glyphs or characters may be added to the Fonts, only if the fonts are renamed to names not containing either the words "Tavmjong Bah" or the word "Arev". This License becomes null and void to the extent applicable to Fonts or Font Software that has been modified and is distributed under the "Tavmjong Bah Arev" names. The Font Software may be sold as part of a larger software package but no copy of one or more of the Font Software typefaces may be sold by itself.

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT.

IN NO EVENT SHALL TAVMJONG BAH BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

Except as contained in this notice, the name of Tavmjong Bah shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Font Software without prior written authorization from Tavmjong Bah. For further information, contact: tavmjong @ free . fr.

Fixed Fonts

The 5x7 and 6x13 fonts each contain the following copyright notice:
Public domain font. Share and enjoy.

IBM Courier

IBM Courier - **Copyright (c) IBM Corporation 1990, 1991**

You are hereby granted permission under the terms of the IBM/MIT X Consortium Courier Typefont agreement to execute, reproduce, distribute, display, market, sell and otherwise transfer copies of the IBM Courier font to third parties.

The font is provided "AS IS" without charge. NO WARRANTIES OR INDEMNIFICATION ARE GIVEN, WHETHER EXPRESS OR IMPLIED INCLUDING, BUT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Micro

The Micro font contains the following copyright notice:
Public domain font. Share and enjoy.

qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/doc/html/3rdparty.html
Third-Party Licenses Used in Qt

Qt includes a number of third-party libraries that are used to provide certain features. Unlike the code described in the code used in Qt document, these libraries are supplied alongside the Qt modules.

Third Party Software may impose additional restrictions and it is the user's responsibility to ensure that they have met the licensing requirements of the GPL, LGPL, or Qt Commercial license and the relevant license of the Third Party Software they are using.

Run configure -help to see any options that may be available for controlling the use of these libraries.

DES (des.cpp)
Implementation of DES encryption for NTLM
Copyright 1997-2005 Simon Tatham.

This software is released under the MIT license.
See src/3rdparty/des/des.cpp for more information about the terms and conditions under which the code is supplied.

FreeType 2 (freetype) version 2.3.6
The FreeType project is a team of volunteers who develop free, portable and high-quality software solutions for digital typography. We specifically target embedded systems and focus on bringing small, efficient and ubiquitous products. - quoted from 3rdparty/freetype/docs/freetype2.html.
See src/3rdparty/freetype/docs/FTL.txt and src/3rdparty/freetype/docs/GPL.txt for license details.
See also the files in src/3rdparty/harfbuzz, which are used by FreeType.

Parts of the FreeType projects have been modified and put into Qt for use in the painting subsystem. These files are fraster.h, fraster.c, ftgrays.h and ftgrays.c. The following modifications has been made to these files:

Renamed FT_ and ft_ symbols to QT_FT_ and qt_ft_ to avoid name conflicts.
Removed parts of code not relevant when compiled with _STANDALONE_ defined.
Changed behavior in fraster.c to follow X polygon filling rules.
Implemented support in fraster.c for winding / odd even polygon fill rules.
Replaced bitmap generation with span generation in fraster.c
Renamed: fraster.h to qblackraster_p.h
Renamed: fraster.c to qblackraster.c
Renamed: ftgrays.h to qgrayraster_p.h
Renamed: ftgrays.c to qgrayraster.c

HarfBuzz (harfbuzz)
This is HarfBuzz, an OpenType Layout engine. It was derived originally from the OpenType code in FreeType-1.x, ported to FreeType2. (This code has been abandoned for FreeType2, but until something better comes along, should serve our purposes.) In addition to porting to FreeType-2, it has been modified in various other ways. - quoted from src/3rdparty/harfbuzz/README.

Copyright (C) 2004,2007 Red Hat, Inc.
Copyright (C) 1998-2004 David Turner and Werner Lemberg
Copyright (C) 2006 Behdad Esfahbod
Copyright (C) 2008 Nokia Corporation and/or its subsidiary(-ies)

This is part of HarfBuzz, an OpenType Layout engine library. Permission is hereby granted, without written agreement and without license or royalty fees, to use, copy, modify, and distribute this software and its documentation for any purpose, provided that the above copyright notice and the following two paragraphs appear in all copies of this software.

IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE TO ANY PARTY FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF THIS SOFTWARE AND ITS DOCUMENTATION, EVEN IF THE COPYRIGHT HOLDER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

THE COPYRIGHT HOLDER SPECIFICALLY DISCLAIMS ANY WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE SOFTWARE PROVIDED HEREUNDER

document version 2.60

IS ON AN "AS IS" BASIS, AND THE COPYRIGHT HOLDER HAS NO OBLIGATION TO PROVIDE MAINTENANCE, SUPPORT, UPDATES, ENHANCEMENTS, OR MODIFICATIONS.

See src/3rdparty/harfbuzz/COPYING.FTL and src/3rdparty/harfbuzz/COPYING.GPL for license details.
The Independent JPEG Group's JPEG Software (libjpeg) version 8

This package contains C software to implement JPEG image compression and decompression. JPEG (pronounced "jay-peg") is a standardized compression method for full-color and gray-scale images. JPEG is intended for compressing "real-world" scenes; line drawings, cartoons and other non-realistic images are not its strong suit. JPEG is lossy, meaning that the output image is not exactly identical to the input image. - quoted from src/3rdparty/libjpeg/README. This software is based in part on the work of the Independent JPEG Group. See src/3rdparty/libjpeg/README for license details.

MD4 (md4.cpp and md4.h)
MD4 (RFC-1320) message digest.
Modified from MD5 code by Andrey Panin <pazke@donpac.ru>
Written by **Solar Designer** <solar@openwall.com> in 2001, and placed in the public domain. There's absolutely no warranty.

See src/3rdparty/md4/md4.cpp and src/3rdparty/md4/md4.h for more information about the terms and conditions under which the code is supplied.

MD5 (md5.cpp and md5.h)
This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by **Colin Plumb in 1993**, no copyright is claimed. This code is in the public domain; do with it what you wish. - quoted from src/3rdparty/md5/md5.h. See src/3rdparty/md5/md5.cpp and src/3rdparty/md5/md5.h for more information about the terms and conditions under which the code is supplied.

MNG Library (libmng) version 1.0.10
The libmng library supports decoding, displaying, encoding, and various other manipulations of the Multiple-image Network Graphics (MNG) format image files. It uses the zlib compression library, and optionally the JPEG library by the Independent JPEG Group (IJG) and/or lcms (little cms), a color-management library by Marti Maria Saguer. - quoted from src/3rdparty/libmng/doc/libmng.txt See src/3rdparty/libmng/LICENSE for license details.

PNG Reference Library (libpng) version 1.4.0
Libpng was written as a companion to the PNG specification, as a way of reducing the amount of time and effort it takes to support the PNG file format in application programs. - quoted from src/3rdparty/libpng/libpng.txt.

copyright (C) 1999 by Willem van Schaik willem@schaik.com
version 1.0 - 1999.10.15 - First version.

COPYRIGHT NOTICE:

Copyright (c) 2000-2007 Gerard Juyn (gerard@libmng.com)

[You may insert additional notices after this sentence if you modify this source]

For the purposes of this copyright and license, "Contributing Authors" is defined as the following set of individuals: Gerard Juyn, Glenn Randers-Pehrson

The MNG Library is supplied "AS IS". The Contributing Authors disclaim all warranties, expressed or implied, including, without limitation, the warranties of merchantability and of fitness for any purpose. The Contributing Authors assume no liability for direct, indirect, incidental, special, exemplary, or consequential damages, which may result from the use of the MNG Library, even if advised of the possibility of such damage.

Permission is hereby granted to use, copy, modify, and distribute this source code, or portions hereof, for any purpose, without fee, subject to the following restrictions:

1. The origin of this source code must not be misrepresented; you must not claim that you wrote the original software.

2. Altered versions must be plainly marked as such and must not be misrepresented as being the original source.

3. This Copyright notice may not be removed or altered from any source or altered source distribution.

The Contributing Authors specifically permit, without fee, and encourage the use of this source code as a component to supporting the MNG and JNG file format in commercial products. If you use this source code in a product, acknowledgment would be highly appreciated.

Parts of this software have been adapted from the libpng package. Although this library supports all features from the PNG specification (as MNG descends from it) it does not require the libpng package. It does require the zlib library and optionally the IJG jpeg library, and/or the "little-cms" library by Marti Maria (depending on the inclusion of support for JNG and Full-Color-Management respectively).

qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/doc/src/snippets/legal/CatharonLicense.txt
The Catharon Open Source LICENSE 2000-Jul-04
Copyright (C) 2000 by Catharon Productions, Inc.

Introduction - This license applies to source files distributed by Catharon Productions, Inc. in several archive packages. This license applies to all files found in such packages which do not fall under their own explicit license. This license was inspired by the BSD, Artistic, and IJG

document version 2.60

(Independent JPEG Group) licenses, which all encourage inclusion and use of free software in commercial and freeware products alike. As a consequence, its main points are that:

We don't promise that this software works. However, we are interested in any kind of bug reports. ('as is' distribution)

You can use this software for whatever you want, in parts or full form, without having to pay us. ('royalty-free' usage)

You may not pretend that you wrote this software. If you use it, or only parts of it, in a program, you must acknowledge somewhere in your documentation that you have used the Catharon Code. ('credits')

We specifically permit and encourage the inclusion of this software, with or without modifications, in commercial products. We disclaim all warranties covering the packages distributed by Catharon Productions, Inc. and assume no liability related to their use.

Legal Terms

0. Definitions

Throughout this license, the terms 'Catharon Package', 'package', and 'Catharon Code' refer to the set of files originally distributed by Catharon Productions, Inc.

'You' refers to the licensee, or person using the project, where 'using' is a generic term including compiling the project's source code as well as linking it to form a 'program' or 'executable'.

This program is referred to as 'a program using one of the Catharon Packages'. This license applies to all files distributed in the original Catharon Package(s), including all source code, binaries and documentation, unless otherwise stated in the file in its original, unmodified form as distributed in the original archive. If you are unsure whether or not a particular file is covered by this license, you must contact us to verify this.

The Catharon Packages are
copyright (C) 2000 by Catharon Productions, Inc. All rights reserved except as specified below.

1. No Warranty

THE CATHARON PACKAGES ARE PROVIDED 'AS IS' WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

IN NO EVENT WILL ANY OF THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY DAMAGES CAUSED BY THE USE OF OR THE INABILITY TO USE THE CATHARON PACKAGE.

2. Redistribution

This license grants a worldwide, royalty-free, perpetual and irrevocable right and license to use, execute, perform, compile, display, copy, create derivative works of, distribute and sublicense the Catharon Packages (in both source and object code forms) and derivative works thereof for any purpose; and to authorize others to exercise some or all of the rights granted herein, subject to the following conditions: Redistribution of source code must retain this license file ('license.txt') unaltered; any additions, deletions or changes to the original files must be clearly indicated in accompanying documentation. The copyright notices of the unaltered, original files must be preserved in all copies of source files. Redistribution in binary form must provide a disclaimer that states that the software is based in part on the work of Catharon Productions, Inc. in the

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

distribution documentation. These conditions apply to any software derived from or based on the Catharon Packages, not just the unmodified files. If you use our work, you must acknowledge us. However, no fee need be paid to us.

3. Advertising

Neither Catharon Productions, Inc. and contributors nor you shall use the name of the other for commercial, advertising, or promotional purposes without specific prior written permission. We suggest, but do not require, that you use the following phrase to refer to this software in your documentation: 'this software is based in part on the Catharon Typography Project'.

As you have not signed this license, you are not required to accept it. However, as the Catharon Packages are copyrighted material, only this license, or another one contracted with the authors, grants you the right to use, distribute, and modify it. Therefore, by using, distributing, or modifying the Catharon Packages, you indicate that you understand and accept all the terms of this license.

qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/src/3rdparty/freetype/docs/license.txt

The FreeType 2 font engine is copyrighted work and cannot be used legally without a software license. In order to make this project usable to a vast majority of developers, we distribute it under two mutually exclusive open-source licenses. This means that you must choose one of the two licenses described below, then obey all its terms and conditions when using FreeType 2 in any of your projects or products.

- The FreeType License, found in the file 'FTL.TXT', which is similar to the original BSD license with an advertising clause that forces you to explicitly cite the FreeType project in your product's documentation. All details are in the license file. This license is suited to products which don't use the GNU General Public License.

- The GNU General Public License version 2, found in 'GPL.TXT' (any later version can be used also), for programs which already use the GPL. Note that the FTL is incompatible with the GPL due to its advertisement clause.

The contributed PCF driver comes with a license similar to that of the X Window System. It is compatible to the above two licenses (see file src/pct/readme).

qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/src/3rdparty/freetype/docs/ftl.txt

The FreeType Project LICENSE 2006-Jan-27

Copyright 1996-2002, 2006 by David Turner, Robert Wilhelm, and Werner Lemberg

Introduction - The FreeType Project is distributed in several archive packages; some of them may contain, in addition to the FreeType font engine, various tools and contributions which rely on, or relate to, the FreeType Project. This license applies to all files found in such packages, and which do not fall under their own explicit license. The license affects thus the FreeType font engine, the test programs, documentation and makefiles, at the very least. This license was inspired by the BSD, Artistic, and IJG (Independent JPEG Group) licenses, which all

document version 2.60

encourage inclusion and use of free software in commercial and freeware products alike. As a consequence, its main points are that:

We don't promise that this software works. However, we will be interested in any kind of bug reports. ('as is' distribution)

You can use this software for whatever you want, in parts or full form, without having to pay us. ('royalty-free' usage)

You may not pretend that you wrote this software. If you use it, or only parts of it, in a program, you must acknowledge somewhere in your documentation that you have used the FreeType code. ('credits')

We specifically permit and encourage the inclusion of this software, with or without modifications, in commercial products. We disclaim all warranties covering The FreeType Project and assume no liability related to The FreeType Project. Finally, many people asked us for a preferred form for a credit/disclaimer to use in compliance with this license. We thus encourage you to use the following text:

Portions of this software are copyright © <year> The FreeType Project (www.freetype.org). All rights reserved.

Please replace <year> with the value from the FreeType version you actually use.

Legal Terms

0. Definitions

Throughout this license, the terms 'package', 'FreeType Project', and 'FreeType archive' refer to the set of files originally distributed by the authors (David Turner, Robert Wilhelm, and Werner Lemberg) as the 'FreeType Project', be they named as alpha, beta or final release.

'You' refers to the licensee, or person using the project, where 'using' is a generic term including compiling the project's source code as well as linking it to form a 'program' or 'executable'. This program is referred to as 'a program using the FreeType engine'. This license applies to all files distributed in the original FreeType Project, including all source code, binaries and documentation, unless otherwise stated in the file in its original, unmodified form as distributed in the original archive. If you are unsure whether or not a particular file is covered by this license, you must contact us to verify this.

The FreeType Project is
copyright (C) 1996-2000 by David Turner, Robert Wilhelm, and Werner Lemberg. All rights reserved except as specified below.

1. No Warranty

THE FREETYPE PROJECT IS PROVIDED 'AS IS' WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

IN NO EVENT WILL ANY OF THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY DAMAGES CAUSED BY THE USE OR THE INABILITY TO USE, OF THE FREETYPE PROJECT.

2. Redistribution

This license grants a worldwide, royalty-free, perpetual and irrevocable right and license to use, execute, perform, compile, display, copy, create derivative works of, distribute and sublicense the FreeType Project (in both source and object code forms) and derivative works thereof for any purpose; and to authorize others to exercise some or all of the rights granted herein, subject to the following conditions: Redistribution of

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

source code must retain this license file ('FTL.TXT') unaltered; any additions, deletions or changes to the original files must be clearly indicated in accompanying documentation. The copyright notices of the unaltered, original files must be preserved in all copies of source files.

Redistribution in binary form must provide a disclaimer that states that the software is based in part of the work of the FreeType Team, in the distribution documentation. We also encourage you to put an URL to the FreeType web page in your documentation, though this isn't mandatory. These conditions apply to any software derived from or based on the FreeType Project, not just the unmodified files. If you use our work, you must acknowledge us. However, no fee need be paid to us.

3. Advertising

Neither the FreeType authors and contributors nor you shall use the name of the other for commercial, advertising, or promotional purposes without specific prior written permission.

We suggest, but do not require, that you use one or more of the following phrases to refer to this software in your documentation or advertising materials: 'FreeType Project', 'FreeType Engine', 'FreeType library', or 'FreeType Distribution'.

As you have not signed this license, you are not required to accept it. However, as the FreeType Project is copyrighted material, only this license, or another one contracted with the authors, grants you the right to use, distribute, and modify it.

Therefore, by using, distributing, or modifying the FreeType Project, you indicate that you understand and accept all the terms of this license.

4. Contacts

There are two mailing lists related to FreeType:

o freetype@nongnu.org

Discusses general use and applications of FreeType, as well as future and wanted additions to the library and distribution. If you are looking for support, start in this list if you haven't found anything to help you in the documentation.

o freetype-devel@nongnu.org

Discusses bugs, as well as engine internals, design issues, specific licenses, porting, etc.

Our home page can be found at <http://www.freetype.org>

From:

qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/src/3rdparty/freetype/docs/truetype

How to enable the TrueType native hinter if you need it

The TrueType bytecode interpreter is disabled in all public releases of the FreeType packages for patents reasons; see <http://www.freetype.org/patents.html> for more details.

However, many Linux distributions do enable the interpreter in the FreeType packages (DEB/RPM/etc.) they produce for their platforms. If you are using TrueType fonts on your system, you most probably want to enable it manually by doing the following:

- open the file 'include/freetype/config/tftoption.h'
- locate a line that says:

document version 2.60

define TT_CONFIG_OPTION_BYTECODE_INTERPRETER

- change it to:

define TT_CONFIG_OPTION_BYTECODE_INTERPRETER

These steps must be done *_before_* compiling the library.

Copyright 2003, 2005, 2006 by David Turner, Robert Wilhelm, and Werner Lemberg.

This file is part of the FreeType project, and may only be used, modified, and distributed under the terms of the FreeType project license, LICENSE.TXT. By continuing to use, modify, or distribute this file you indicate that you have read the license and understand and accept it fully.

♦♦♦

From:

<http://www.freetype.org/patents.html> [as of 03/30/11]

FREETYPE & PATENTS

The TrueType bytecode patents have expired! Since May 2010, all patents related to bytecode hinting have expired worldwide. It is thus no longer necessary to disable the bytecode interpreter, and starting with FreeType version 2.4, it is enabled by default. The affected patents are

Patent 1: US5155805: Method and apparatus for moving control points in displaying digital typeface on raster output devices

Patent 2: US5159668: Method and apparatus for manipulating outlines in improving digital typeface on raster output devices

Patent 3: US5325479: Method and apparatus for moving control points in displaying digital typeface on raster output devices

Other patent issues

The colour filtering algorithm of Microsoft's ClearType technology for subpixel rendering is covered by patents. Note that subpixel rendering per se is prior art; using a different colour filter thus circumvents Microsoft's patent claims.

FreeType Patents Disclaimer August 1999

WE HAVE DISCOVERED THAT APPLE OWNS SEVERAL PATENTS RELATED TO THE RENDERING OF TRUETYPE FONTS. THIS COULD MEAN THAT THE FREE USE OF FREETYPE MIGHT BE ILLEGAL IN THE USA, JAPAN, AND POSSIBLY OTHER COUNTRIES, BE IT IN PROPRIETARY OR FREE SOFTWARE PRODUCTS.

FOR MORE DETAILS, WE STRONGLY ADVISE YOU TO GO TO THE FREETYPE PATENTS PAGE AT THE FOLLOWING WEB ADDRESS: <http://www.freetype.org/patents.html>

WE WILL NOT PLACE INFORMATION IN THIS FILE AS THE SITUATION IS STILL UNDETERMINED FOR NOW. AT THE TIME THESE LINES ARE WRITTEN, WE HAVE CONTACTED APPLE'S LEGAL DEPARTMENT AND ARE STILL WAITING FOR THEIR ANSWER ON THE SUBJECT.

Alternatively, this file may be used under the terms of the GNU Free Documentation License version 1.3 as published by the Free Software Foundation and appearing in the file included in the packaging of this file. If you have questions regarding the use of this file, please contact Nokia at qt-info@nokia.com.

Licensing Information

Information about licenses and licensing issues.

These documents include information about Qt's licenses and the licenses of third party components used in Qt.

[licenses.html](#)

Other Licenses Used in Qt

Information about other licenses used for Qt components and third-party code.

Qt contains some code that is not provided under the {GNU General Public License (GPL)}, {GNU Lesser General Public License (LGPL)} or the {Qt Commercial Edition}{Qt Commercial License Agreement}, but rather under specific licenses from the original authors. Some pieces of code were developed by Nokia and others originated from third parties.

This page lists the licenses used, names the authors, and links to the places where it is used. Nokia gratefully acknowledges these and other contributions to Qt. We recommend that programs that use Qt also acknowledge these contributions, and quote these license statements in an appendix to the documentation. See also: {Licenses for Fonts Used in Qt for Embedded Linux}

Parts of the QCrashHandler class
Parts of the FreeType projects have been modified and put into Qt for use in the painting subsystem. These files are ftraster.h, ftraster.c, ftrasters.h and ftrasters.c. The following modifications have been made to these files:

Renamed FT_ and ft_ symbols to QT_FT_ and qt_ft_ to avoid name conflicts in {qrasterdefs.p.h}.
Removed parts of code not relevant when compiled with _STANDALONE defined.
Changed behavior in {ftraster.c} to follow X polygon filling rules.
Implemented support in {ftraster.c} for winding / odd even polygon fill rules.
Replaced bitmap generation with span generation in {ftraster.c}.
Renamed {ftraster.h} as {qblackraster.p.h}.
Renamed {ftraster.c} as {qblackraster.c}.
Renamed {ftrasters.h} as {qgrayraster.p.h}.
Renamed {ftrasters.c} as {qgrayraster.c}.
See src/3rdparty/freetype/docs/FTL.txt and src/3rdparty/freetype/docs/GPL.txt for license details.

Bitstream Charter and Courier

(c) Copyright 1989-1992, Bitstream Inc., Cambridge, MA.

You are hereby granted permission under all Bitstream propriety rights to use, copy, modify, sublicense, sell, and redistribute the 4 Bitstream Charter (r) Type 1 outline fonts and the 4 Courier Type 1 outline fonts for any purpose and without restriction; provided, that this notice is left intact on all copies of such fonts and that Bitstream's trademark is acknowledged as shown below on all unmodified copies of the 4 Charter Type 1 fonts.

BITSTREAM CHARTER is a registered trademark of Bitstream Inc.

Bitstream Vera

Copyright (c) 2003 by Bitstream, Inc. All Rights Reserved.

Bitstream Vera is a trademark of Bitstream, Inc.

Permission is hereby granted, free of charge, to any person obtaining a copy of the fonts accompanying this license ("Fonts") and associated documentation files (the "Font Software"), to reproduce and distribute the Font Software, including without limitation the rights to use, copy, merge, publish, distribute, and/or sell copies of the Font Software, and to permit persons to whom the Font Software is furnished to do so, subject to the following conditions: The above copyright and trademark notices and this permission notice shall be included in all copies of one or more of the Font Software typefaces.

The Font Software may be modified, altered, or added to, and in particular the designs of glyphs or characters in the Fonts may be modified and additional glyphs or characters may be added to the Fonts, only if the fonts are renamed to names not containing either the words "Bitstream" or the word "Vera". This License becomes null and void to the extent applicable to Fonts or Font Software that has been modified and is distributed under the "Bitstream Vera" names. The Font Software may be sold as part of a larger software package but no copy of one or more of the Font Software typefaces may be sold by itself.

THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT, TRADEMARK, OR OTHER RIGHT.

IN NO EVENT SHALL BITSTREAM OR THE GNOME FOUNDATION BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

Except as contained in this notice, the names of Gnome, the Gnome Foundation, and Bitstream Inc., shall not be used in advertising or otherwise to promote the sale, use or other dealings in this Font Software without prior written authorization from the Gnome Foundation or Bitstream Inc., respectively. For further information, contact: fonts at gnome dot org. http://www.gnome.org/fonts/Final_Bitstream_Vera_Fonts

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Cursor

The Cursor font is distributed with the following declaration:

{Copyright (c) 2000 XFree86, Inc.}

DejaVu Fonts

DejaVu fonts come with the following copyright statement:

Fonts are **(c) Bitstream** (see below).

DejaVu changes are in public domain. Glyphs imported from Arev fonts are

(c) Tavmjung Bah (see below)

doc/src/snippets/code/doc_src_licenses.qdoc

Fixed Fonts

The 5x7 and 6x13 fonts each contain the following copyright notice:

{Public domain font. Share and enjoy.}

IBM Courier

IBM Courier - **Copyright (c) IBM Corporation 1990, 1991**

You are hereby granted permission under the terms of the IBM/MIT X Consortium Courier Typefont agreement to execute, reproduce, distribute, display, market, sell and otherwise transfer copies of the IBM Courier font to third parties.

The font is provided "AS IS" without charge. NO WARRANTIES OR INDEMNIFICATION ARE GIVEN, WHETHER EXPRESS OR IMPLIED INCLUDING, BUT LIMITED TO THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Micro

The Micro font contains the following copyright notice:

{Public domain font. Share and enjoy.}

Unifont

The Unifont font was originally obtained from {<http://www.czyborra.com/>}

{Roman Czyborra} under the following license:

{All of my works you find here are freeware. You may freely copy, use, quote, modify or redistribute them as long as you properly attribute my contribution and have given a quick thought about whether Roman might perhaps be interested to read what you did with his stuff. Horizontal rules don't apply.}

catharon-license.html

CatharonLicense.txt

The Catharon License used in parts of FreeType. See the {Other Licenses Used in Qt} document for information on the context in which this license is applied to code in the FreeType library.

As a special exception, you may create a larger work that contains part or all of the Bison parser skeleton and distribute that work under terms of your choice, so long as that work isn't itself a parser generator using the skeleton or a modified version thereof as a parser skeleton. Alternatively, if you modify or redistribute the parser skeleton itself, you may (at your option) remove this special exception, which will cause the skeleton and the resulting Bison output files to be licensed under the GNU General Public License without this special exception. This special exception was added by the Free Software Foundation in version 2.2 of Bison.

From:
qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/src/3rdparty/libjpeg/README
This distribution contains the eighth public release of the Independent JPEG Group's free JPEG software. You are welcome to redistribute this software and to use it for any purpose, subject to the conditions under LEGAL ISSUES, below. This software is the work of Tom Lane, Guido Vollbeding, Philip Gladstone, Bill Allombert, Jim Boucher, Lee Crocker, Bob Friesenhahn, Ben Jackson, Julian Minguillon, Luis Ortiz, George Phillips, Davide Rossi, Ge' Weijers, and other members of the Independent JPEG Group. IJG is not affiliated with the official ISO JPEG standards committee.

document version 2.60

The emphasis in designing this software has been on achieving portability and flexibility, while also making it fast enough to be useful. In particular, the software is not intended to be read as a tutorial on JPEG. (See the REFERENCES section for introductory material.) Rather, it is intended to be reliable, portable, industrial-strength code. We do not claim to have achieved that goal in every aspect of the software, but we strive for it. We welcome the use of this software as a component of commercial products. No royalty is required, but we do ask for an acknowledgement in product documentation, as described under LEGAL ISSUES.

LEGAL ISSUES

In plain English:

1. We don't promise that this software works. (But if you find any bugs, please let us know!)
2. You can use this software for whatever you want. You don't have to pay us.
3. You may not pretend that you wrote this software. If you use it in a program, you must acknowledge somewhere in your documentation that you've used the IJG code.

In legalese:

The authors make NO WARRANTY or representation, either express or implied, with respect to this software, its quality, accuracy, merchantability, or fitness for a particular purpose. This software is provided "AS IS", and you, its user, assume the entire risk as to its quality and accuracy.

This software is **copyright (C) 1991-2010, Thomas G. Lane, Guido Vollbeding. All Rights Reserved except as specified below.**

Permission is hereby granted to use, copy, modify, and distribute this software (or portions thereof) for any purpose, without fee, subject to these conditions:

(1) If any part of the source code for this software is distributed, then this README file must be included, with this copyright and no-warranty notice unaltered; and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.

(2) If only executable code is distributed, then the accompanying documentation must state that "this software is based in part on the work of the Independent JPEG Group".

(3) Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the IJG code, not just to the unmodified library. If you use our work, you ought to acknowledge us.

Permission is NOT granted for the use of any IJG author's name or company name in advertising or publicity relating to this software or products derived from it. This software may be referred to only as "the Independent JPEG Group's software".

We specifically permit and encourage the use of this software as the basis of commercial products, provided that all warranty or liability claims are assumed by the product vendor.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

ansi2knr.c is included in this distribution by permission of **L. Peter Deutsch, sole proprietor of its copyright holder, Aladdin Enterprises of Menlo Park, CA.** ansi2knr.c is NOT covered by the above copyright and conditions, but instead by the usual distribution terms of the Free Software Foundation; principally, that you must include source code if you redistribute it. (See the file ansi2knr.c for full details.) However, since ansi2knr.c is not needed as part of any program generated from the IJG code, this does not limit you more than the foregoing paragraphs do.

The Unix configuration script "configure" was produced with GNU Autoconf. It is **copyright by the Free Software Foundation** but is freely distributable. The same holds for its supporting scripts (config.guess, config.sub, ltmain.sh). Another support script, install-sh, is **copyright by X Consortium** but is also freely distributable.

The IJG distribution formerly included code to read and write GIF files. To avoid entanglement with the Unisys LZW patent, GIF reading support has been removed altogether, and the GIF writer has been simplified to produce "uncompressed GIFs". This technique does not use the LZW algorithm; the resulting GIF files are larger than usual, but are readable by all standard GIF decoders.

We are required to state that "The Graphics Interchange Format(c) is the **Copyright property of CompuServe Incorporated.** GIF(sm) is a Service Mark property of CompuServe Incorporated."

Unicode Terms of Use
For the general privacy policy governing access to this site, see the Unicode Privacy Policy. For trademark usage, see the Unicode® Consortium Name and Trademark Usage Policy.

Notice to End User: Terms of Use
Carefully read the following legal agreement ("Agreement"). Use or copying of the software and/or codes provided with this agreement (The "Software") constitutes your acceptance of these terms. If you have any questions about these terms of use, please contact the Unicode Consortium.

Unicode Copyright.
Copyright © 1991-2011 Unicode, Inc. All rights reserved.

Certain documents and files on this website contain a legend indicating that "Modification is permitted." Any person is hereby authorized, without fee, to modify such documents and files to create derivative works conforming to the Unicode® Standard, subject to Terms and Conditions herein.

Any person is hereby authorized, without fee, to view, use, reproduce, and distribute all documents and files solely for informational purposes in the creation of products supporting the Unicode Standard, subject to the Terms and Conditions herein.

Further specifications of rights and restrictions pertaining to the use of the particular set of data files known as the "Unicode Character Database" can be found in Exhibit 1.

Each version of the Unicode Standard has further specifications of rights and restrictions of use. For the book editions (Unicode 5.0 and earlier), these are found on the back of the title page. The online code charts carry specific restrictions. All other files, including online documentation of the core specification for Unicode 6.0 and later, are covered under these general Terms of Use.

document version 2.60

No license is granted to "mirror" the Unicode website where a fee is charged for access to the "mirror" site. Modification is not permitted with respect to this document. All copies of this document must be verbatim.

Restricted Rights Legend.

Any technical data or software which is licensed to the United States of America, its agencies and/or instrumentalities under this Agreement is commercial technical data or commercial computer software developed exclusively at private expense as defined in FAR 2.101, or DFARS 252.227-7014 (June 1995), as applicable. For technical data, use, duplication, or disclosure by the Government is subject to restrictions as set forth in DFARS 202.227-7015 Technical Data, Commercial and Items (Nov 1995) and this Agreement. For Software, in accordance with FAR 12-212 or DFARS 227-7202, as applicable, use, duplication or disclosure by the Government is subject to the restrictions set forth in this Agreement.

Warranties and Disclaimers.

This publication and/or website may include technical or typographical errors or other inaccuracies. Changes are periodically added to the information herein; these changes will be incorporated in new editions of the publication and/or website. Unicode may make improvements and/or changes in the product(s) and/or program(s) described in this publication and/or website at any time. If this file has been purchased on magnetic or optical media from Unicode, Inc. the sole and exclusive remedy for any claim will be exchange of the defective media within ninety (90) days of original purchase.

EXCEPT AS PROVIDED IN SECTION C.2, THIS PUBLICATION AND/OR SOFTWARE IS PROVIDED "AS IS" WITHOUT WARRANTY OF ANY KIND EITHER EXPRESS, IMPLIED, OR STATUTORY, INCLUDING, BUT NOT LIMITED TO, ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NON-INFRINGEMENT. UNICODE AND ITS LICENSORS ASSUME NO RESPONSIBILITY FOR ERRORS OR OMISSIONS IN THIS PUBLICATION AND/OR SOFTWARE OR OTHER DOCUMENTS WHICH ARE REFERENCED BY OR LINKED TO THIS PUBLICATION OR THE UNICODE WEBSITE.

Waiver of Damages.

In no event shall Unicode or its licensors be liable for any special, incidental, indirect or consequential damages of any kind, or any damages whatsoever, whether or not Unicode was advised of the possibility of the damage, including, without limitation, those resulting from the following: loss of use, data or profits, in connection with the use, modification or distribution of this information or its derivatives.

Trademarks & Logos.

The Unicode Word Mark and the Unicode Logo are trademarks of Unicode, Inc. "The Unicode Consortium" and "Unicode, Inc." are trade names of Unicode, Inc. Use of the information and materials found on this website indicates your acknowledgement of Unicode, Inc.'s exclusive worldwide rights in the Unicode Word Mark, the Unicode Logo, and the Unicode trade names.

The Unicode Consortium Name and Trademark Usage Policy ("Trademark Policy") are incorporated herein by reference and you agree to abide by the provisions of the Trademark Policy, which may be changed from time to time in the sole discretion of Unicode, Inc. All third party trademarks referenced herein are the property of their respective owners.

Miscellaneous.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Jurisdiction and Venue. This server is operated from a location in the State of California, United States of America. Unicode makes no representation that the materials are appropriate for use in other locations. If you access this server from other locations, you are responsible for compliance with local laws. This Agreement, all use of this site and any claims and damages resulting from use of this site are governed solely by the laws of the State of California without regard to any principles which would apply the laws of a different jurisdiction. The user agrees that any disputes regarding this site shall be resolved solely in the courts located in Santa Clara County, California. The user agrees said courts have personal jurisdiction and agree to waive any right to transfer the dispute to any other forum.

Modification by Unicode

Unicode shall have the right to modify this Agreement at any time by posting it to this site. The user may not assign any part of this Agreement without Unicode's prior written consent.

Taxes.

The user agrees to pay any taxes arising from access to this website or use of the information herein, except for those based on Unicode's net income.

Severability.

If any provision of this Agreement is declared invalid or unenforceable, the remaining provisions of this Agreement shall remain in effect.

Entire Agreement.

This Agreement constitutes the entire agreement between the parties.

EXHIBIT 1

UNICODE, INC. LICENSE AGREEMENT - DATA FILES AND SOFTWARE

Unicode Data Files include all data files under the directories <http://www.unicode.org/Public/>, <http://www.unicode.org/reports/>, and <http://www.unicode.org/cldr/data/>. Unicode Data Files do not include PDF online code charts under the directory <http://www.unicode.org/Public/>. Software includes any source code published in the Unicode Standard or under the directories <http://www.unicode.org/Public/>, <http://www.unicode.org/reports/>, and <http://www.unicode.org/cldr/data/>.

NOTICE TO USER: Carefully read the following legal agreement. BY DOWNLOADING, INSTALLING, COPYING OR OTHERWISE USING UNICODE INC.'S DATA FILES ("DATA FILES"), AND/OR SOFTWARE ("SOFTWARE"), YOU UNEQUIVOCALLY ACCEPT, AND AGREE TO BE BOUND BY, ALL OF THE TERMS AND CONDITIONS OF THIS AGREEMENT. IF YOU DO NOT AGREE, DO NOT DOWNLOAD, INSTALL, COPY, DISTRIBUTE OR USE THE DATA FILES OR SOFTWARE.

COPYRIGHT AND PERMISSION NOTICE

Copyright © 1991-2011 Unicode, Inc. All rights reserved.

Distributed under the Terms of Use in <http://www.unicode.org/copyright.html>.

Permission is hereby granted, free of charge, to any person obtaining a copy of the Unicode data files and any associated documentation (the "Data Files") or Unicode software and any associated documentation (the "Software") to deal in the Data Files or Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, and/or sell copies of the Data Files or Software, and to permit persons to whom the Data Files or Software are furnished to do so, provided that

document version 2.60

(a) the above copyright notice(s) and this permission notice appear with all copies of the Data Files or Software,

(b) both the above copyright notice(s) and this permission notice appear in associated documentation, and

(c) there is clear notice in each modified Data File or in the Software as well as in the documentation associated with the Data File(s) or Software that the data or software has been modified.

THE DATA FILES AND SOFTWARE ARE PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF THIRD PARTY RIGHTS.

IN NO EVENT SHALL THE COPYRIGHT HOLDER OR HOLDERS INCLUDED IN THIS NOTICE BE LIABLE FOR ANY CLAIM, OR ANY SPECIAL INDIRECT OR CONSEQUENTIAL DAMAGES, OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE DATA FILES OR SOFTWARE.

Except as contained in this notice, the name of a copyright holder shall not be used in advertising or otherwise to promote the sale, use or other dealings in these Data Files or Software without prior written authorization of the copyright holder.

Unicode and the Unicode logo are trademarks of Unicode, Inc. in the United States and other countries. All third party trademarks referenced herein are the property of their respective owners.

Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

Changed so as no longer to depend on Colin Plumb's 'usual.h' header definitions; now uses stuff from pkg's config.h.

Ian Jackson <ian@chiark.greenend.org.uk>.

Still in the public domain.

Use and Copyright

Silicon Graphics has seen fit to allow us to give this work away. It is free. There is no support or guarantee of any sort as to its operations, correctness, or whatever. If you do anything useful with all or parts of it you need to honor the copyright notices. I would also be interested in knowing about it and, hopefully, be acknowledged.

The legal way of saying that is:

Copyright (c) 1988-1997 Sam Leffler

Copyright (c) 1991-1997 Silicon Graphics, Inc.

Permission to use, copy, modify, distribute, and sell this software and its documentation for any purpose is hereby granted without fee, provided that (i) the above copyright notices and this permission notice appear in all copies of the software and related documentation, and (ii) the names of Sam Leffler and Silicon Graphics may not be used in any advertising or publicity relating to the software without the specific, prior written permission of Sam Leffler and Silicon Graphics.

THE SOFTWARE IS PROVIDED "AS-IS" AND WITHOUT WARRANTY OF ANY KIND, EXPRESS, IMPLIED OR OTHERWISE, INCLUDING WITHOUT LIMITATION, ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.

IN NO EVENT SHALL SAM LEFFLER OR SILICON GRAPHICS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT OR CONSEQUENTIAL DAMAGES OF ANY KIND, OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER OR NOT ADVISED OF THE POSSIBILITY OF DAMAGE, AND ON ANY THEORY OF LIABILITY, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

From:
qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/readme
Qt is a trademark of Nokia Corporation and/or its subsidiary(-ies).

♦♦♦

From:
qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/doc/html/trademarks.html
Trademarks
Nokia, the Nokia logo, Qt, and the Qt logo are trademarks of Nokia Corporation and/or its subsidiaries in Finland and other countries.

Intel, Intel Inside (logos), MMX and Pentium are ® trademarks of Intel Corporation in the United States, other countries, or both.

document version 2.60

Java and all Java-based trademarks are trademarks of Sun Microsystems, Inc. in the United States, other countries, or both.

Linux is a ® trademark of Linus Torvalds in the United States, other countries or both.

Mac, Mac OS and Macintosh are ® trademarks of Apple Computer, Inc., registered in the U.S. and other countries.

Microsoft, Windows, Windows NT, XP, Visual Studio and the Windows logo are ® trademarks of Microsoft Corporation in the United States, other countries, or both.

Motif is a registered trademark of The Open Group in the United States, other countries, or both.

OpenGL is a ® trademark of Silicon Graphics, Inc. in the United States and other countries.

UNIX is a registered trademark of The Open Group in the United States and other countries.

All other company, product, or service names may be trademarks or service marks of others and are the property of their respective owners. The use of the word partner does not imply a partnership relationship between Nokia and any other company.

qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/src/3rdparty/freetype/docs/CHANGES
doesn't support PFR hinting - note that BitStream has at least two patents on this format!

♦♦♦

From:
qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/src/3rdparty/freetype/docs/CHANGES
LCD-optimized rendering is now disabled in all default builds of the library, mainly due to patent issues. For more information see: <http://s.gnu.org/archive/html/freetype/2006-09/msg00064.html>

♦♦♦

From:
qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/src/3rdparty/freetype/docs/reference/ft2-gasp_table.html
Microsoft's implementation of LCD rendering, partly protected by patents.

♦♦♦

From:
qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/src/3rdparty/freetype/src/truetype/ttinterp.c
Throw away projection and freedom vector information because the patents don't allow them to be stored. The relevant US Patents are 5155805 and 5325479.

From:
qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/src/3rdparty/libjpeg/change.log
To avoid the Unisys LZW patent, jpeg's GIF output capability has been changed to produce "uncompressed GIFs", and cjpeg's GIF input capability has been removed altogether. We're not happy about it either, but there seems to be no good alternative.

♦♦♦

From:
qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/src/3rdparty/libtiff/html/v3.5.3.html
Unisys has the patent on LZW compression and have been very active in their enforcement of late, demanding payments of \$5000 or more from websites using unlicensed software to create GIF's. They could well do the same do persons using libtiff to create LZW compressed TIFF images.

♦♦♦

From:
qt-everywhere-opensource-src-4.7.1/qt-everywhere-opensource-src-4.7.1/doc/html/activeqt-opengl-glbbox-cpp.html
The OpenGL code is mostly borrowed from Brian Pauls spin example in the Mesa distribution

♦♦♦
