Open Source Software Notices

71316-Fotowall 0.9

Software: 71316-Fotowall
Version: 0.9
File or Package: 71316-Fotowall-0.9.tar.bz2
OSI Licenses: GPLv2, GPLv2+, LGPLv2+, LGPLv2.1, LGPLv2.1+ w/exception, GPLv3, GPLv3+, FreeBSD, Academic
Other Licenses:
URL: <http://www.enricoros.com/opensource/fotowall/71316-Fotowall-0.9.tar.bz2>
Group: User Space Apps
wDescription: Tool for laying out photos or pictures; Fotowall is a fun tool for creating graphics by mixing some of your favorite pictures in a nice and smooth high resolution composition. Fotowall is an opensource creative tool that lets you play with your pixels as you've ever wanted! Make the perfect arrangement with your photos, add text, live video from your webcam and the best internet pictures.
Common Usage: Utility
Package Size: 2.83 MB
Folders / Files: 19 / 365
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

Software:	ACE+TAO-src
Version:	6.0.0
File or Package:	ACE+TAO-src-6.0.0.tar.bz2
OSI Licenses:	GPLv1, GPLv2, GPLv2+, GPLv2+ w/exception, GPLv3+, MIT/X11, FreeBSD, BSDv1 (UCB & non-UCB), BSDv2, zlib/libpng (and variant), Academic, Public Domain
Other Licenses:	Custom, Proprietary
URL:	http://www.cs.wustl.edu/~schmidt/ ACE-overview.html
Group:	User Space Libraries / User Space Apps / System Environment/Libraries
Description:	An object-oriented C++ framework; the ADAPTIVE Communication Environment (ACE) is an object-oriented (OO) toolkit that implements fundamental design patterns for communication software. ACE provides a rich set of reusable C++ wrappers and frameworks that perform common communication software tasks across a range of OS platforms, including Win32/Win64, most versions of UNIX (e.g., SunOS, HP-UX, AIX, Linux, NetBSD, and FreeBSD), real-time operating systems (e.g., VxWorks, Chorus, LynxOS, and QNX), OpenVMS, and MVS OpenEdition. A single source tree is used for all these platforms and porting ACE to other platforms is relatively easy.
Common Usage:	Library

Permission is granted to make and distribute verbatim copies of this manual provided the copyright notice and this permission notice are preserved on all copies.

Permission is granted to copy and distribute modified versions of this manual under the conditions for verbatim copying, provided also that the section entitled "GNU General Public License" is included exactly as in the original, and provided that the entire resulting derived work is distributed under the terms of a permission notice identical to this one.

Permission is granted to copy and distribute translations of this manual into another language, under the above conditions for modified versions, except that the section entitled "GNU `gperf' General Public License" and this permission notice may be included in translations approved by the Free Software Foundation instead of in the original English.

From:
ACE+TAO-src-6.0.0/ACE_wrappers/copying
Copyright and Licensing Information for ACE(TM), TAO(TM), CIAO(TM), DAnCE(TM), and CoSMIC(TM) [1]ACE(TM), [2]TAO(TM), [3]CIAO(TM), DAnCE(TM), and [4]CoSMIC(TM) (henceforth referred to as "DOC software") are copyrighted by [5]Douglas C. Schmidt and his [6]research group at [7]Washington University, [8]University of California, Irvine, and [9]Vanderbilt University, Copyright (c) 1993-2009, all rights reserved.

Since DOC software is open-source, freely available software, you are free to use, modify, copy, and distribute--perpetually and irrevocably--the DOC software source code and object code produced from the source, as well as copy and distribute modified versions of this software. You must, however, include this copyright statement along with any code built using DOC software that you release. No copyright statement needs to be provided if you just ship binary executables of your software products.

You can use DOC software in commercial and/or binary software releases and are under no obligation to redistribute any of your source code that is built using DOC software. Note, however, that you may not

document version 2.60

misappropriate the DOC software code, such as copyrighting it yourself or claiming authorship of the DOC software code, in a way that will prevent DOC software from being distributed freely using an open-source development model. You needn't inform anyone that you're using DOC software in your software, though we encourage you to let [10]us know so we can promote your project in the [11]DOC software success stories.

The [12]ACE, [13]TAO, [14]CIAO, [15]DAnCE, and [16]CoSMIC web sites are maintained by the [17]DOC Group at the [18]Institute for Software Integrated Systems (ISIS) and the [19]Center for Distributed Object Computing of Washington University, St. Louis for the development of open-source software as part of the open-source software community.

Submissions are provided by the submitter ``as is" with no warranties whatsoever, including any warranty of merchantability, noninfringement of third party intellectual property, or fitness for any particular purpose.

In no event shall the submitter be liable for any direct, indirect, special, exemplary, punitive, or consequential damages, including without limitation, lost profits, even if advised of the possibility of such damages. Likewise, DOC software is provided as is with no warranties of any kind, including the warranties of design, merchantability, and fitness for a particular purpose, noninfringement, or arising from a course of dealing, usage or trade practice.

Washington University, UC Irvine, Vanderbilt University, their employees, and students shall have no liability with respect to the infringement of copyrights, trade secrets or any patents by DOC software or any part thereof. Moreover, in no event will Washington University, UC Irvine, or Vanderbilt University, their employees, or students be liable for any lost revenue or profits or other special, indirect and consequential damages.

DOC software is provided with no support and without any obligation on the part of Washington University, UC Irvine, Vanderbilt University, their employees, or students to assist in its use, correction, modification, or enhancement. A [20]number of companies around the world provide commercial support for DOC software, however.

DOC software is Y2K-compliant, as long as the underlying OS platform is Y2K-compliant. Likewise, DOC software is compliant with the new US daylight savings rule passed by Congress as "The Energy Policy Act of 2005," which established new daylight savings times (DST) rules for the United States that expand DST as of March 2007. Since DOC software obtains time/date and calendaring information from operating systems users will not be affected by the new DST rules as long as they upgrade their operating systems accordingly.

The names ACE(TM), TAO(TM), CIAO(TM), DAnCE(TM), CoSMIC(TM), Washington University, UC Irvine, and Vanderbilt University, may not be used to endorse or promote products or services derived from this source without express written permission from Washington University, UC Irvine, or Vanderbilt University. This license grants no permission to call products or services derived from this source ACE(TM), TAO(TM), CIAO(TM), DAnCE(TM), or CoSMIC(TM), nor does it grant permission for the name Washington University, UC Irvine, or Vanderbilt University to appear in their names.

If you have any suggestions, additions, comments, or questions, please let [21]me know.

Copyright and Licensing Information for JAWS Adaptive Web Server, version 3 (JAWS3).

JAWS3 is **copyrighted by James Hu and Entera, Inc., Copyright (c) 2000, all rights reserved.**

Since JAWS3 is open source, free software, you are free to use, modify, and distribute the JAWS3 source code and object code produced or otherwise derived from JAWS3, provided you include this copyright statement in all versions of such code.

In particular, you can use JAWS3 in proprietary software and are under no obligation to redistribute any of your source code that is derived from JAWS3. Note, however, that you may not modify the JAWS3 code in any way, or take any other action such as copyrighting it yourself or claiming authorship of the JAWS3 code, that will prevent JAWS3 from being distributed freely using an open source development model.

document version 2.60

JAWS3 is provided as is with no warranties of any kind, including the warranties of design, merchantability and fitness for a particular purpose, noninfringement, or arising from a course of dealing, usage or trade practice. Moreover, JAWS3 is provided with no support and without any obligation on the part of Entera, Inc., or its employees.

Entera, Inc., and its employees shall have no liability with respect to the infringement of copyrights, trade secrets or any patents by jaws3 or any part thereof. Moreover, in no event will Entera, Inc., or its employees, be liable for any lost revenue or profits or other special, indirect and consequential damages.

By submitting comments, suggestions, code, code snippets, techniques (including that of usage), and algorithms, submitters acknowledge that they have the right to do so, that any such submissions are given freely and unreservedly, and that they waive any claims to copyright or ownership. In addition, submitters acknowledge that any such submission might become part of the copyright maintained on the overall body of code, which comprises the JAWS3 software. By making a submission, submitters agree to these terms. Furthermore, submitters acknowledge that the incorporation or modification of such submissions is entirely at the discretion of the moderators of the open source JAWS3 project or their designees.

The names JAWS3 and Entera, Inc., may not be used to endorse or promote products or services derived from this source without express written permission from Entera, Inc. Further, products or services derived from this source may not be called JAWS3 nor may the name Entera, Inc., appear in their names, without express written permission from Entera, Inc.

If you have any suggestions, additions, comments, or questions, please let me know.
James C. Hu, Entera, Inc., jxh@entera.com

Files:
Copyright: © 1993-2008 Douglas C. Schmidt and his research group at Washington University, University of California, Irvine, and Vanderbilt University

License: other-BSD
Copyright and Licensing Information for ACE(TM), TAO(TM), CIAO(TM), and CoSMIC(TM) [1]ACE(TM), [2]TAO(TM), [3]CIAO(TM), and [4]CoSMIC(TM) (henceforth referred to as "DOC software") are copyrighted by [5]Douglas C. Schmidt and his [6]research group at [7]Washington University, [8]University of California, Irvine, and [9]Vanderbilt University, Copyright (c) 1993-2008, all rights reserved.

Since DOC software is open-source, freely available software, you are free to use, modify, copy, and distribute--perpetually and irrevocably--the DOC software source code and object code produced from the source, as well as copy and distribute modified versions of this software. You must, however, include this copyright statement along with any code built

document version 2.60

using DOC software that you release. No copyright statement needs to be provided if you just ship binary executables of your software products.

You can use DOC software in commercial and/or binary software releases and are under no obligation to redistribute any of your source code that is built using DOC software. Note, however, that you may not do anything to the DOC software code, such as copyrighting it yourself or claiming authorship of the DOC software code, that will prevent DOC software from being distributed freely using an open-source development model. You needn't inform anyone that you're using DOC software in your software, though we encourage you to let [10]us know so we can promote your project in the [11]DOC software success stories.

The [12]ACE, [13]TAO, [14]CIAO, and [15]CoSMIC web sites are maintained by the [16]DOC Group at the [17]Institute for Software Integrated Systems (ISIS) and the [18]Center for Distributed Object Computing of Washington University, St. Louis for the development of open-source software as part of the open-source software community. By submitting comments, suggestions, code, code snippets, techniques (including that of usage) and algorithms (collectively ``Submissions"), submitters acknowledge that they have the right to do so, that any such Submissions are given freely and unreservedly, and that they waive any claims to copyright or ownership. In addition, submitters acknowledge that any such Submission might become part of the copyright maintained on the overall body of code that comprises the DOC software. By making a Submission, submitter agree to these terms. Moreover, submitters acknowledge that the incorporation or modification of such Submissions is entirely at the discretion of the moderators of the open-source DOC software projects or their designees.

Submissions are provided by the submitter ``as is" with no warranties whatsoever, including any warranty of merchantability, noninfringement of third party intellectual property, or fitness for any particular purpose.

In no event shall the submitter be liable for any direct, indirect, special, exemplary, punitive, or consequential damages, including without limitation, lost profits, even if advised of the possibility of such damages. Likewise, DOC software is provided as is with no warranties of any kind, including the warranties of design, merchantability, and fitness for a particular purpose, noninfringement, or arising from a course of dealing, usage or trade practice. Washington University, UC Irvine, Vanderbilt University, their employees, and students shall have no liability with respect to the infringement of copyrights, trade secrets or any patents by DOC software or any part thereof. Moreover, in no event will Washington University, UC Irvine, or Vanderbilt University, their employees, or students be liable for any lost revenue or profits or other special, indirect and consequential damages.

DOC software is provided with no support and without any obligation on the part of Washington University, UC Irvine, Vanderbilt University, their employees, or students to assist in its use, correction, modification, or enhancement. A [19]number of companies around the world provide commercial support for DOC software, however.

DOC software is Y2K-compliant, as long as the underlying OS platform is Y2K-compliant. Likewise, DOC software is compliant with the new US daylight savings rule passed by Congress as "The Energy Policy Act of 2005," which established new daylight savings times (DST) rules for the United States that expand DST as of March 2007. Since DOC software obtains time/date and calendaring information from operating systems users will not be affected by the new DST rules as long as they upgrade their operating systems accordingly.

The names ACE(TM), TAO(TM), CIAO(TM), CoSMIC(TM), Washington University, UC Irvine, and Vanderbilt University, may not be used to endorse or promote products or services derived from this source without express written permission from Washington University, UC Irvine, or Vanderbilt University. Further, products or services derived from this source may not be called ACE(TM), TAO(TM), CIAO(TM), or CoSMIC(TM) nor may the name Washington University, UC Irvine, or Vanderbilt University appear in their names, without express written permission from Washington University, UC Irvine, and Vanderbilt University.

If you have any suggestions, additions, comments, or questions, please let [20]me know.

[21]Douglas C. Schmidt

Copyright: © 2003-2006 OCI. St. Louis MO USA

License: other-BSD

MPC (Licensed Product) is protected by copyright, and is distributed under the following terms.

MPC (Make, Project and workspace Creator) is an open source tool, developed by OCI and written in Perl. It is designed to generate a variety of tool specific project files from a common baseline. Through the powerful combination of inheritance and defaults MPC is able to reduce the maintenance burden normally associated with keeping multiple target platforms, their unique build tools, and inconsistent feature sets current.

It is also easily extensible to support new build environments. The objective is to solve the prevalent problem of fragile build environments, usually experienced by developer groups, by replacing it with a singular

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

robust build environment, and an active community of users committed to its evolution.

Since MPC is open source and free of licensing fees, you are free to use, modify, and distribute the source code, as long as you include this copyright statement.

In particular, you can use MPC to build proprietary software and are under no obligation to redistribute any of your source code that is built using MPC. Note, however, that you may not do anything to the MPC code, such as copyrighting it yourself or claiming authorship of the MPC code, that will prevent MPC from being distributed freely using an open source development model.

Warranty

LICENSED PRODUCT IS PROVIDED AS IS WITH NO WARRANTIES OF ANY KIND INCLUDING THE WARRANTIES OF DESIGN, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, OR ARISING FROM A COURSE OF DEALING, USAGE OR TRADE PRACTICE.

Support

LICENSED PRODUCT IS PROVIDED WITH NO SUPPORT AND WITHOUT ANY OBLIGATION ON THE PART OF OCI OR ANY OF ITS SUBSIDIARIES OR AFFILIATES TO ASSIST IN ITS USE, CORRECTION, MODIFICATION OR ENHANCEMENT.

Support may be available from OCI to users who have agreed to a support contract.

Liability

OCI OR ANY OF ITS SUBSIDIARIES OR AFFILIATES SHALL HAVE NO LIABILITY WITH RESPECT TO THE INFRINGEMENT OF COPYRIGHTS, TRADE SECRETS OR ANY PATENTS BY LICENSED PRODUCT OR ANY PART THEREOF.

IN NO EVENT WILL OCI OR ANY OF ITS SUBSIDIARIES OR AFFILIATES BE LIABLE FOR ANY LOST REVENUE OR PROFITS OR OTHER SPECIAL, INDIRECT AND CONSEQUENTIAL DAMAGES, EVEN IF OCI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

This software product (LICENSED PRODUCT), implementing the Object Management Group's "Internet Inter-ORB Protocol", is protected by copyright and is distributed under the following license restricting its use. Portions of LICENSED PRODUCT may be protected by one or more U.S. or foreign patents, or pending applications.

LICENSED PRODUCT is made available for your use provided that you include this license and copyright notice on all media and documentation and the software program in which this product is incorporated in whole or part.

You may copy, modify, distribute, or sublicense the LICENSED PRODUCT without charge as part of a product or software program developed by you, so long as you preserve the functionality of interoperating with the Object Management Group's "Internet Inter-ORB Protocol" version one. However, any uses other than the foregoing uses shall require the express written consent of Sun Microsystems, Inc.

The names of Sun Microsystems, Inc. and any of its subsidiaries or affiliates may not be used in advertising or publicity pertaining to distribution of the LICENSED PRODUCT as permitted herein.

This license is effective until terminated by Sun for failure to comply with this license. Upon termination, you shall destroy or return all code and documentation for the LICENSED PRODUCT.

LICENSED PRODUCT IS PROVIDED AS IS WITH NO WARRANTIES OF ANY KIND INCLUDING THE WARRANTIES OF DESIGN, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, NONINFRINGEMENT, OR ARISING FROM A COURSE OF DEALING, USAGE OR TRADE PRACTICE.

LICENSED PRODUCT IS PROVIDED WITH NO SUPPORT AND WITHOUT ANY OBLIGATION ON THE PART OF SUN OR ANY OF ITS SUBSIDIARIES OR AFFILIATES TO ASSIST IN ITS USE, CORRECTION, MODIFICATION OR ENHANCEMENT.

SUN OR ANY OF ITS SUBSIDIARIES OR AFFILIATES SHALL HAVE NO LIABILITY WITH RESPECT TO THE INFRINGEMENT OF COPYRIGHTS, TRADE SECRETS OR ANY PATENTS BY LICENSED PRODUCT OR ANY PART THEREOF.

IN NO EVENT WILL SUN OR ANY OF ITS SUBSIDIARIES OR AFFILIATES BE LIABLE FOR ANY LOST REVENUE OR PROFITS OR OTHER SPECIAL, INDIRECT AND CONSEQUENTIAL DAMAGES, EVEN IF SUN HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Use, duplication, or disclosure by the government is subject to restrictions as set forth in subparagraph (c)(1)(ii) of the Rights in Technical Data and Computer Software clause at DFARS 252.227-7013 and FAR 52.227-19.

Copyright and Licensing Information for JAWS Adaptive Web Server, version 3 (JAWS3).
JAWS3 is **copyrighted by James Hu and Entera, Inc., Copyright (c) 2000, all rights reserved.**

Since JAWS3 is open source, free software, you are free to use, modify, and distribute the JAWS3 source code and object code produced or otherwise derived from JAWS3, provided you include this copyright statement in all versions of such code.

In particular, you can use JAWS3 in proprietary software and are under no obligation to redistribute any of your source code that is derived from JAWS3. Note, however, that you may not modify the JAWS3 code in any way, or take any other action such as copyrighting it yourself or claiming authorship of the JAWS3 code, that will prevent JAWS3 from being distributed freely using an open source development model.

JAWS3 is provided as is with no warranties of any kind, including the warranties of design, merchantability and fitness for a particular purpose, noninfringement, or arising from a course of dealing, usage or trade practice. Moreover, JAWS3 is provided with no support and without any obligation on the part of Entera, Inc., or its employees.

Entera, Inc., and its employees shall have no liability with respect to the infringement of copyrights, trade secrets or any patents by jaws3 or any part thereof. Moreover, in no event will Entera, Inc., or its employees, be liable for any lost revenue or profits or other special, indirect and consequential damages.

By submitting comments, suggestions, code, code snippets, techniques (including that of usage), and algorithms, submitters acknowledge that they have the right to do so, that any such submissions are given freely and unreservedly, and that they waive any claims to copyright or ownership. In addition, submitters acknowledge that any such submission might become part of the copyright maintained on the overall body of code, which comprises the JAWS3 software. By making a submission, submitters agree to these terms. Furthermore, submitters acknowledge that the incorporation or modification of such submissions is entirely at the discretion of the moderators of the open source JAWS3 project or their designees.

The names JAWS3 and Entera, Inc., may not be used to endorse or promote products or services derived from this source without express written permission from Entera, Inc. Further, products or services derived from this source may not be called JAWS3 nor may the name Entera, Inc., appear in their names, without express written permission from Entera, Inc.

If you have any suggestions, additions, comments, or questions, please let me know.

From:
ACE+TAO-src-6.0.0/ACE_wrappers/MPC/docs/license
MPC (Licensed Product) is protected by copyright, and is distributed under the following terms.

MPC (Make, Project and workspace Creator) is an open source tool, developed by OCI and written in Perl. It is designed to generate a variety of tool specific project files from a common baseline. Through the powerful combination of inheritance and defaults MPC is able to reduce the maintenance burden normally associated with keeping multiple target platforms, their unique build tools, and inconsistent feature sets current. It is also easily extensible to support new build environments. The objective is to solve the prevalent problem of fragile build environments, usually experienced by developer groups, by replacing it with a singular robust build environment, and an active community of users committed to its evolution.

Since MPC is open source and free of licensing fees, you are free to use, modify, and distribute the source code, as long as you include this copyright statement.

In particular, you can use MPC to build proprietary software and are under no obligation to redistribute any of your source code that is built using MPC. Note, however, that you may not do anything to the MPC code, such as copyrighting it yourself or claiming authorship of the MPC code, that will prevent MPC from being distributed freely using an open source development model.

Warranty

LICENSED PRODUCT IS PROVIDED AS IS WITH NO WARRANTIES OF ANY KIND INCLUDING THE WARRANTIES OF DESIGN, MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, OR ARISING FROM A COURSE OF DEALING, USAGE OR TRADE PRACTICE.

Support

LICENSED PRODUCT IS PROVIDED WITH NO SUPPORT AND WITHOUT ANY OBLIGATION ON THE PART OF OCI OR ANY OF ITS SUBSIDIARIES OR AFFILIATES TO ASSIST IN ITS USE, CORRECTION, MODIFICATION OR ENHANCEMENT.

Support may be available from OCI to users who have agreed to a support contract.

Liability

OCI OR ANY OF ITS SUBSIDIARIES OR AFFILIATES SHALL HAVE NO LIABILITY WITH RESPECT TO THE INFRINGEMENT OF COPYRIGHTS, TRADE SECRETS OR ANY PATENTS BY LICENSED PRODUCT OR ANY PART THEREOF.

IN NO EVENT WILL OCI OR ANY OF ITS SUBSIDIARIES OR AFFILIATES BE LIABLE FOR ANY LOST REVENUE OR PROFITS OR OTHER SPECIAL, INDIRECT AND CONSEQUENTIAL DAMAGES,

document version 2.60

EVEN IF OCI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

MPC copyright OCI. St. Louis MO USA, 2003-2006

This code is a modified version of crypting code in Infozip distribution. The encryption/decryption parts of this source code (as opposed to the non-echoing password parts) were originally written in Europe. The whole source package can be freely distributed, including from the USA. (Prior to January 2000, re-export from the US was a violation of US law.)

This encryption code is a direct transcription of the algorithm from Roger Schlafly, described by Phil Katz in the file appnote.txt. This file (appnote.txt) is distributed with the PKZIP program (even in the version without encryption capabilities). If you don't need crypting in your application, just define symbols NOCRYPT and NOUNCRYPT. This code support the "Traditional PKWARE Encryption". The new AES encryption added on Zip format by Winzip (see the page http://www.winzip.com/aes_info.htm) and PKWare PKZip 5.x Strong Encryption is not supported.

Decryption code comes from crypt.c by Info-ZIP but has been greatly reduced in terms of compatibility with older software. The following is from the original crypt.c. Code woven in by Terry Thorsen 1/2003.

Copyright (c) 1990-2000 Info-ZIP. All rights reserved.

See the accompanying file LICENSE, version 2000-Apr-09 or later (the contents of which are also included in zip.h) for terms of use. If, for some document version 2.60

reason, all these files are missing, the Info-ZIP license also may be found at: <ftp://ftp.info-zip.org/pub/infozip/license.html>

The encryption/decryption parts of this source code (as opposed to the non-echoing password parts) were originally written in Europe. The whole source package can be freely distributed, including from the USA. (Prior to January 2000, re-export from the US was a violation of US law.)

This encryption code is a direct transcription of the algorithm from Roger Schlafly, described by Phil Katz in the file appnote.txt. This file (appnote.txt) is distributed with the PKZIP program (even in the version without encryption capabilities).

<ftp://ftp.info-zip.org/pub/infozip/license.html> [as of 03/22/11]
License

In December 1999, with the release of Zip 2.3, Info-ZIP switched from its old, ad hoc license (embodied in the COPYING file) to a new, more standard version based on the BSD license. Here is the text of the new license, which applies to all source files in Zip 2.3 and later, UnZip 5.41 and later, WiZ 5.0 and later, and MacZip 1.05 and later, except where explicitly stated otherwise:

This is version 2007-Mar-4 of the Info-ZIP license. The definitive version of this document should be available at <ftp://ftp.info-zip.org/pub/infozip/license.html> indefinitely and a copy at <http://www.info-zip.org/pub/infozip/license.html>.

Copyright (c) 1990-2007 Info-ZIP. All rights reserved.

For the purposes of this copyright and license, "Info-ZIP" is defined as the following set of individuals: **Mark Adler, John Bush, Karl Davis, Harald Denker, Jean-Michel Dubois, Jean-loup Gailly, Hunter Goatley, Ed Gordon, Ian Gorman, Chris Herborth, Dirk Haase, Greg Hartwig, Robert Heath, Jonathan Hudson, Paul Kienitz, David Kirschbaum, Johnny Lee, Onno van der Linden, Igor Mandrichenko, Steve P. Miller, Sergio Monesi, Keith Owens, George Petrov, Greg Roelofs, Kai Uwe Rommel, Steve Salisbury, Dave Smith, Steven M. Schweda, Christian Spieler, Cosmin Truta, Antoine Verheijen, Paul von Behren, Rich Wales, Mike White.**

This software is provided "as is," without warranty of any kind, express or implied. In no event shall Info-ZIP or its contributors be held liable for any direct, indirect, incidental, special or consequential damages arising out of the use of or inability to use this software. Permission is granted to anyone to use this software for any purpose, including commercial applications, and to alter it and redistribute it freely, subject to the above disclaimer and the following restrictions:

Redistributions of source code (in whole or in part) must retain the above copyright notice, definition, disclaimer, and this list of conditions.

Redistributions in binary form (compiled executables and libraries) must reproduce the above copyright notice, definition, disclaimer, and this list of conditions in documentation and/or other materials provided with the distribution. The sole exception to this condition is redistribution of a standard UnZipSFX binary (including SFXWiz) as part of a self-extracting archive; that is permitted without inclusion of this license, as long as the normal SFX banner has not been removed from the binary or disabled.

Altered versions--including, but not limited to, ports to new operating systems, existing ports with new graphical interfaces, versions with

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

modified or added functionality, and dynamic, shared, or static library versions not from Info-ZIP--must be plainly marked as such and must not be misrepresented as being the original source or, if binaries, compiled from the original source. Such altered versions also must not be misrepresented as being Info-ZIP releases--including, but not limited to, labeling of the altered versions with the names "Info-ZIP" (or any variation thereof, including, but not limited to, different capitalizations), "Pocket UnZip," "WiZ" or "MacZip" without the explicit permission of Info-ZIP. Such altered versions are further prohibited from misrepresentative use of the Zip-Bugs or Info-ZIP e-mail addresses or the Info-ZIP URL(s), such as to imply Info-ZIP will provide support for the altered versions.

Info-ZIP retains the right to use the names "Info-ZIP," "Zip," "UnZip," "UnZipSFX," "WiZ," "Pocket UnZip," "Pocket Zip," and "MacZip" for its own source and binary releases.

ACE+TAO-src-6.0.0/ACE_wrappers/TAO/README.sun
Welcome to the Inter-ORB Engine! This is the source code version of SunSoft's portable implementation of the CORBA 2.0 mandatory "IIOP" interoperability protocol for networked ORBs.

This is a preliminary version. This software is made available AS IS and WITH NO GUARANTEES. Please make sure you read and understand the copyright and license notice under which this software is distributed. This notice may be found in the "LICENSE" file that is part of this distribution, and also in the *corba/orb.hh* header file used by every source file. Note that both commercial and noncommercial usage is allowed.

acl 2.2.49-4

Software:	acl
Version:	2.2.49-4
File or Package:	acl-2.2.49-4.fc13.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2.1, LGPLv2.1+, FreeBSD
Other Licenses:	Custom
URL:	http://download.savannah.gnu.org/releases-noredirect/acl/acl-2.2.49.src.tar.gz
Group:	User Space Apps / System Environment/Base
Description:	Access control list utilities; An access control list (ACL), with respect to a computer file system, is a list of permissions attached to an object. An ACL specifies which users or system processes are granted access to objects, as well as what operations are allowed on given objects. Each entry in a typical ACL specifies a subject and an operation. The entry (Alice, delete) on the ACL for file WXY, for example, gives Alice permission to delete file WXY.
Common Usage:	Utility
Package Size:	2.8 MB
Folders / Files:	24 / 213
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

agent-proxy 1.95

Software: agent-proxy
Version: 1.95
File or Package: agent-proxy-1.95.tar.gz
OSI Licenses: GPLv2
Other Licenses:
URL: <http://www.windriver.com>
Group: Applications/Internet
Description: Proxy for UDP/TCP connection; This is a simple, small proxy which was intended for use with kgdb, or gdbserver type connections where you want to share a text console and a debug session. The idea is that you use the agent-proxy to connect to a serial port directly or to a remote terminal server.
Common Usage: Proxy
Package Size: 108 KB (0.11 MB)
Folders / Files: 2 / 8
Source Path: wrlinux-4.0/layers/ldat-tools/packages

Other Licenses:	
URL:	ftp://ftp.sanguine.net/pub/linux/fedora/releases/9/Everything/source/SRPMS/alsa-plugins-1.0.16-4.fc9.src.rpm
Group:	System Environment/Libraries
Description:	The Advanced Linux Sound Architecture (ALSA) provides audio and MIDI functionality to the Linux operating system. This package includes plugins for ALSA. This plugin allows any program that uses the ALSA API to access a PulseAudio sound daemon. In other words, native ALSA applications can play and record sound across a network. There are two plugins in the suite, one for PCM and one for mixer control.
Common Usage:	Library
Package Size:	2.8 MB
Folders / Files:	14 / 99
Source Path:	wrlinux-4.0/layers/wrll-userspace/media/packages

This is the Debian GNU/Linux prepackaged version of the deferred execution scheduler called at. This package was debianized by its author Thomas Koenig <ig25@rz.uni-karlsruhe.de>, taken over and re-packaged first by Martin Schulze <joe@debian.org> and then by Siggy Brentrup <bsb@winnegan.de>, and then taken over by Ryan Murray <rmurray@debian.org>. In August 2009 the upstream development and Debian packaging were taken over by Ansgar Burchardt <ansgar@43-1.org> and Cyril Brulebois <kibi@debian.org>. This may be considered the experimental upstream source, and since there doesn't seem to be any other upstream source, the only upstream source.

document version 2.60

URL: http://ftp.de.debian.org/debian/pool/main/a/atftp/atftp_0.7.dfsg.orig.tar.gz
Group: System Environment/Daemons/Applications/Internet
Description: The client for the Trivial File Transfer Protocol (TFTP). atftp stands for Advanced Trivial File Transfer Protocol. It is called "advanced", by contrast to others TFTP servers, for two reasons. Firstly, it is intended to be fully compliant with all related RFCs, including RFC1350, RFC2090, RFC2347, RFC2348 and RFC2349. Secondly, atftp is intended for serving boot files to large clusters. It is multi-threaded and support multicast (RFC2090 and PXE), allowing faster boot of hundreds of machine simultaneously.

audiofile 0.2.6

Software:	audiofile
Version:	0.2.6
File or Package:	audiofile-0.2.6.tar.gz
OSI Licenses:	GPLv2+, GPLv2+ w/exception, LGPLv2+, MIT/X11, BSDv2
Other Licenses:	Custom
URL:	http://www.68k.org/~michael/audiofile/ audiofile-0.2.6.tar.gz
Group:	System/Libraries
Description:	The Audio File Library provides a uniform programming interface to standard digital audio file formats. The Audio File library is an implementation of the Audio File Library from SGI, which provides an API for accessing audio file formats like AIFF/AIFF-C, WAVE, and NeXT/Sun .snd/.au files. This library is used by the Esound daemon.
Common Usage:	Library
Package Size:	6.3 MB
Folders / Files:	10 / 403
Source Path:	wrlinux-4.0/layers/wrll-userspace/media/packages

<http://www.68k.org/~michael/audiofile/>

Audio File Library provides a uniform programming interface to standard digital audio file formats. This library allows the processing of audio data to and from audio files of many common formats (currently AIFF, AIFF-C, WAVE, NeXT/Sun .snd/.au, IRCAM, AVR, Amiga IFF/8SVX, and NIST SPHERE). The library also supports compression (currently G.711 mu-law and A-law and IMA and MS ADPCM) as well as PCM formats of all flavors (signed and unsigned integer, single- and double-precision floating point).

One premise of the Audio File Library is that the data presented to an application need not be in the same format as the data contained in the file. Another, however, is that the capabilities of the file format are exposed to the application programmer should the programmer wish to take advantage of them.

The Audio File Library itself is available under the GNU Library General Public License, and the programs in this package are available under the document version 2.60

GNU General Public License. The two licenses are included in the files COPYING and COPYING.GPL, respectively.

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Library General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Library General Public License for more details.

autoconf 2.63-5

Software:	autoconf
Version:	2.63-5
File or Package:	autoconf-2.63-5.fc12.src.rpm
OSI Licenses:	GPLv3, GPLv3+, GPLv2, GPLv2+, GPLv2+ w/exception, FDLv1.2, FDLv1.2+, MIT/X11
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Fedora/source/SRPMS/autoconf-2.63-5.fc12.src.rpm
Group:	User Space Apps
Description:	GNU Autoconf is a tool for producing shell scripts that automatically configure software source code packages to adapt to many kinds of UNIX-like systems without manual user intervention. The configuration scripts produced by Autoconf are independent of it when they are run. Autoconf creates a configuration script for a package from a template file that lists the operating system features that the package can use, in the form of M4 macro calls. Together with Automake and Libtool, Autoconf forms the GNU build system.
Common Usage:	Utility
Package Size:	12.9 MB
Folders / Files:	17 / 168
Source Path:	wrlinux-4.0/layers/ldat-tools/packages

Licensing - Autoconf is released under the General Public License (GPL). Additionally, Autoconf includes a licensing exception in some of its source files; see the respective copyright notices for how your project is impacted by including scripts generated by Autoconf.

This version of Autoconf uses GPLv2+ plus the above-mentioned exceptions for its installed executables, as described in COPYING. Meanwhile, several source files within the Autoconf project are under GPLv3+, as described in COPYINGv3; these files are used for building and installing Autoconf, but are not present in the installed programs. The entire Autoconf project will move to GPLv3+ when the exception statements have been reformulated in terms of the Additional Permissions as described in section 7 of GPLv3. For more licensing information, see <<http://www.gnu.org/licenses/gpl-faq.html>>.

Group:	User Space Apps / Programming tool
Description:	This is Automake, a Makefile generator. GNU Automake is a programming tool that produces portable makefiles for use by the make program, used in compiling software. It is made by the Free Software Foundation as one of GNU programs, and is part of the GNU build system. The makefiles produced follow the GNU Coding Standards. Automake is a Perl script, written in the Perl programming language and must be used with GNU Autoconf. It was inspired by the 4.4BSD make and include files, but aims to be portable and to conform to the GNU Coding Standards for Makefile variables and targets. The input files are called Makefile.am. The output files are called Makefile.in; they are intended for use with Autoconf. Automake requires certain things to be done in your configure.ac.

Copyright (C) 1989, 2000 Aladdin Enterprises. All rights reserved.

ansi2knr is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY. No author or distributor accepts responsibility to anyone for the consequences of using it or for whether it serves any particular purpose or works at all, unless he says so in writing. Refer to the GNU General Public License (the "GPL") for full details.

Everyone is granted permission to copy, modify and redistribute ansi2knr, but only under the conditions described in the GPL. A copy of this license is supposed to have been given to you along with ansi2knr so you can know your rights and responsibilities. It should be in a file named COPYLEFT, or, if there is no file named COPYLEFT, a file named COPYING. Among other things, the copyright notice and this notice must be preserved on all copies.

We explicitly state here what we believe is already implied by the GPL: if the ansi2knr program is distributed as a separate set of sources and a separate executable file which are aggregated on a storage medium together with another program, this in itself does not bring the other program under the GPL, nor does the mere fact that such a program or the procedures for constructing it invoke the ansi2knr executable bring any other part of the program under the GPL.

automake17 1.7.9-13

Software:	automake17
Version:	1.7.9-13
File or Package:	automake17-1.7.9-13.fc12.1.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, MIT/X11
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Fedora/source/SRPMS/automake17-1.7.9-13.fc12.1.src.rpm
Group:	User Space Apps
Description:	This is Automake, a Makefile generator. It was inspired by the 4.4BSD make and include files, but aims to be portable and to conform to the GNU standards for Makefile variables and targets. Automake is a Perl script. The input files are called Makefile.am. The output files are called Makefile.in; they are intended for use with Autoconf. Automake requires certain things to be done in your configure.in.
Common Usage:	Utility, Tool
Package Size:	5.5 MB
Folders / Files:	8 / 600
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

basesystem-10.0-3.src/basesystem.spec
Summary: The skeleton package which defines a simple Fedora system
Name: basesystem
Version: 10.0
Release: 3
License: Public Domain
Group: System Environment/Base

bash 3.2-30

Software: bash
Version: 3.2-30
File or Package: bash-3.2-30.fc10.src.rpm
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2+, LGPLv2.1+, FDLv1.2, MIT/X11, BSDv1 (UCB & non-UCB)
Other Licenses: Custom
URL: <http://archives.fedoraproject.org/pub/archive/fedora/linux/updates/10/SRPMS/bash-3.2-30.fc10.src.rpm>
Group: User Space Apps / System Environment/Shells
Description: The GNU Bourne Again shell (Bash) is a shell or command language interpreter that is compatible with the Bourne shell (sh). Bash incorporates useful features from the Korn shell (ksh) and the C shell(csh). Most sh scripts can be run by bash without modification. This package (bash) contains bash version 3.2, which improves POSIX compliance over previous versions. Bash is intended to be a conformant implementation of the Shell and Utilities portion of the IEEE POSIX specification (IEEE Standard 1003.1). Bash can be configured to be POSIX-conformant by default.
Common Usage: Shell, Tool
Package Size: 26.4 MB

basesystem 10.0-3

Software: basesystem
Version: 10.0-3
File or Package: basesystem-10.0-3.src.rpm
OSI Licenses: Public Domain
Other Licenses:
URL:
Group: User Space Apps / System Environment/Base
Description: The skeleton package which defines a simple Fedora system. The package does not actually perform any function, other than force the inclusion of the "setup" and "filesystem" packages. No files are provided, compiled or shipped -- other than the .spec file. Basesystem defines the components of a basic Fedora system (for example, the package installation order to use during bootstrapping). Basesystem should be in every installation of a system, and it should never be removed.
Common Usage:
Package Size: 12 KB (0.01 MB)

About BeeCrypt:
BeeCrypt started its life when the need for a portable and fast cryptography library arose at Virtual Unlimited in 1997. I'm still trying to make it faster, easier to use and more portable, in addition to providing better documentation.

Note that depending on where you are, the use of cryptography may be limited or forbidden by law. Before using this library, make sure you are legally entitled to do so.

If you want to report bugs, make suggestions, contribute fixes or enhancements, please see the beecrypt-specific website: <http://sourceforge.net/projects/beecrypt> or contact me at <mailto:bob.deblrier@telenet.be>

Sincerely, Bob Deblrier

Intellectual Property

The IETF takes no position regarding the validity or scope of any Intellectual Property Rights or other rights that might be claimed to pertain to the implementation or use of the technology described in this document or the extent to which any license under such rights might or might not be available; nor does it represent that it has made any independent effort to identify any such rights. Information on the procedures with respect to rights in RFC documents can be found in BCP 78 and BCP 79.

Copies of IPR disclosures made to the IETF Secretariat and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this specification can be obtained from the IETF on-line IPR repository at <http://www.ietf.org/ipr>.

The IETF invites any interested party to bring to its attention any copyrights, patents or patent applications, or other proprietary rights that may cover technology that may be required to implement this standard. Please address the information to the IETF at ietf-ipr@ietf.org.

Intellectual Property

The IETF takes no position regarding the validity or scope of any Intellectual Property Rights or other rights that might be claimed to pertain to the implementation or use of the technology described in this document or the extent to which any license under such rights might or might not be available; nor does it represent that it has made any independent effort to identify any such rights. Information on the procedures with respect to rights in RFC documents can be found in BCP 78 and BCP 79.

Copies of IPR disclosures made to the IETF Secretariat and any assurances of licenses to be made available, or the result of an attempt made to obtain a general license or permission for the use of such proprietary rights by implementers or users of this specification can be obtained from the IETF on-line IPR repository at <http://www.ietf.org/ipr>.

The IETF invites any interested party to bring to its attention any copyrights, patents or patent applications, or other proprietary rights that may cover technology that may be required to implement this standard. Please address the information to the IETF at ietf-ipr@ietf.org.

This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by Colin Plumb in 1993, no copyright is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

The algorithm is due to Ron Rivest. This code was written by Colin Plumb in 1993, no copyright is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

Changed so as no longer to depend on Colin Plumb's 'usual.h' header definitions; now uses stuff from dpkg's config.h

Ian Jackson <ijackson@nyx.cs.du.edu>.

Still in the public domain.

Additional notes (Rich Title) - This file is a reverse-engineered version of a file called "symtab.h" which exists internal to HP's Computer Languages Organization in /CLO/Components/DDE/obj/som/symtab.h. Because HP's version of the file is copyrighted and not distributed, it is © 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

necessary for GDB to use the reverse-engineered version that follows. Work was done by Cygnus to reverse-engineer the C subset of symtab.h. The WDB project has extended this to also contain the C++ symbol definitions, the F90 symbol definitions, and the DOC (debugging-optimized-code) symbol definitions. In some cases (the C++ symbol definitions) I have added internal documentation here that goes beyond what is supplied in HP's symtab.h. If we someday unify these files again, the extra comments should be merged back into HP's symtab.h.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

♦♦♦

From:
binutils-2.19/binutils-2.19/bfd/elf64-mips.c
(which was mostly stolen from elf32-mips.c and slightly adapted).

♦♦♦

From:
binutils-2.19/binutils-2.19/bfd/elf64-mmix.c
Copied from elf_link_add_object_symbols.

♦♦♦

From:
binutils-2.19/binutils-2.19/bfd/elf64-ppc.c
Written by Linus Nordberg, Swox AB <info@swox.com>, based on elf32-ppc.c by Ian Lance Taylor.

♦♦♦

From:
binutils-2.19/binutils-2.19/bfd/mmo.c
Written by Hans-Peter Nilsson (hp@bitrange.com). Infrastructure and other bits originally copied from srec.c and binary.c.

♦♦♦

From:
binutils-2.19/binutils-2.19/bfd/pei-ppc.c
setting up for a PE environment stolen directly from the i386 structure

♦♦♦

From:
binutils-2.19/binutils-2.19/bfd/rs6000-core.c
Borrowed from <sys/inttypes.h> on recent AIX versions.

♦♦♦

From:
binutils-2.19/binutils-2.19/bfd/vms-hdr.c
stolen from obj-vms.c.

♦♦♦

From:
binutils-2.19/binutils-2.19/bfd/vms-misc.c
This hash routine borrowed from GNU-EMACS, and strengthened slightly

♦♦♦

From:
binutils-2.19/binutils-2.19/bfd/vms.c
This is just copied from ecoff-alpha, needs to be fixed probably.

♦♦♦

From:
binutils-2.19/binutils-2.19/binutils/addr2line.c
Derived from objdump.c and nm.c by Ulrich.Lauther@mchp.siemens.de

♦♦♦

From:
binutils-2.19/binutils-2.19/binutils/resrc.c
This is copied from rcl.

♦♦♦

From:
binutils-2.19/binutils-2.19/binutils/testsuite/binutils-all/windres/README
The files .rc are hand-edited or copied from elsewhere.

♦♦♦

From:
binutils-2.19/binutils-2.19/config.rpath
Code taken from libtool.m4's AC_LIBTOOL_PROG_LD_SHLIBS.
Code taken from libtool.m4's AC_LIBTOOL_SYS_DYNAMIC_LINKER.
Code taken from libtool.m4's AC_LIBTOOL_PROG_COMPILER_PIC.

♦♦♦

From:
binutils-2.19/binutils-2.19/config/enable.m4
This whole bit snagged from libstdc++-v3.

♦♦♦

From:
binutils-2.19/binutils-2.19/config/futex.m4
This whole bit snagged from libgomp.

♦♦♦

From:
binutils-2.19/binutils-2.19/config/proginstall.m4
This macro is stolen from Autoconf 2.61a-341.

♦♦♦

From:
binutils-2.19/binutils-2.19/etc/texi2pod.pl
stolen from Symbol.pm

♦♦♦

From:
binutils-2.19/binutils-2.19/gas/ChangeLog-9295
These are based on patches from Minh Tran-le <mtranle@paris.intellicorp.com>.

♦♦♦

From:
binutils-2.19/binutils-2.19/gas/ChangeLog-9295
Based on code from Eric Freudenthal <freudenthal@nyu.edu>.

♦♦♦

From:
binutils-2.19/binutils-2.19/gas/config/tc-dlx.c
This borrowed from tc-ppc.c on a whim.

♦♦♦

From:
binutils-2.19/binutils-2.19/gas/config/tc-m68hc11.c
The rest is stolen from relax_frag.

♦♦♦

From:
binutils-2.19/binutils-2.19/gas/config/tc-h8300.c
Cribbed from get_symbol_end.

♦♦♦

From:
binutils-2.19/binutils-2.19/gas/config/tc-m32r.c
This is copied from perform_an_assembly_pass.

♦♦♦

From:
binutils-2.19/binutils-2.19/gas/config/tc-mmix.c
Stolen from tc-mcore.c.

♦♦♦

From:
binutils-2.19/binutils-2.19/gas/config/tc-mmix.c
General idea and code stolen from the tic80 port.

♦♦♦

From:
binutils-2.19/binutils-2.19/gas/config/tc-msp430.c
Mostly stolen from hc11 and mcore which arches I think I know.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

bison 2.4.1-4

Software: bison
Version: 2.4.1-4
File or Package: bison-2.4.1-4.fc12.src.rpm
OSI Licenses: GPLv3, GPLv3+, GPLv2+ w/exception, FDLv1.2, FDLv1.2+, MIT/X11
Other Licenses: Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Fedora/source/SRPMS/bison-2.4.1-4.fc12.src.rpm>
Group: User Space Apps
Description: Bison is a general-purpose parser generator that converts an annotated context-free grammar into an LALR(1) or GLR parser for that grammar. Once you are proficient with Bison, you can use it to develop a wide range of language parsers, from those used in simple desk calculators to complex programming languages.
Common Usage: Tool
Package Size: 14.6 MB

From:

bison-2.4.1-4.fc12.src/bison-2.4.1/bison-2.4.1/data/m4sugar/foreach.m4
Copyright (C) 2008 Free Software Foundation, Inc.

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <<http://www.gnu.org/licenses/>>.

As a special exception, the Free Software Foundation gives unlimited permission to copy, distribute and modify the configure scripts that are the output of Autoconf. You need not follow the terms of the GNU General Public License when using or distributing such scripts, even though portions of the text of Autoconf appear in them. The GNU General Public License (GPL) does govern all other use of the material that constitutes the Autoconf program.

document version 2.60

Certain portions of the Autoconf source text are designed to be copied (in certain cases, depending on the input) into the output of Autoconf. We call these the "data" portions. The rest of the Autoconf source text consists of comments plus executable code that decides which of the data portions to output in any given case. We call these comments and executable code the "non-data" portions. Autoconf never copies any of the non-data portions into its output.

This special exception to the GPL applies to versions of Autoconf released by the Free Software Foundation. When you make and distribute a modified version of Autoconf, you may extend this special exception to the GPL to apply to your modified version as well, unless your modified version has the potential to copy into its output some of the text that was the non-data portion of the version that you started with. (In other words, unless your change moves or copies text from the non-data portions to the data portions.) If your modification has such potential, you must delete any notice of this special exception to the GPL from your modified version.

Software: boost
Version: 1_42_0
File or Package: boost_1_42_0.tar.bz2
OSI Licenses: GPLv2, GPLv2+ w/exception, MIT/X11, FreeBSD, zlib/libpng, Apache v2, Python, Public Domain, Academic
Other Licenses: Custom
URL: <http://www.boost.org>
Group: System Environment/Libraries / Development/Tools
Description: The Boost C++ Libraries are a collection of peer-reviewed, open source libraries that extend the functionality of C++. Most of the libraries are licensed under the Boost Software License, designed to allow Boost to be used with both open and closed source projects. Many of Boost's founders are on the C++ standard committee and several Boost libraries have been accepted for incorporation into both the Technical Report 1 and C++0x. The libraries are aimed at a wide range of C++ users and application domains. They range from general-purpose libraries like the smart_ptr library, to operating system abstractions like Boost Filesystem, to libraries primarily aimed at other library developers and advanced C++ users, like the metaprogramming template (MPL) and DSL creation (Proto). In order to ensure efficiency and flexibility, Boost makes extensive use of templates. Boost has been a source of extensive work and research into generic programming and metaprogramming in C++.

Common Usage: Library
Package Size: 298.3 MB
Folders / Files: 2,464 / 28,495
Source Path: wrlinux-4.0/layers/wrll-userspace/cgl/packages

The implementation of splay trees is based on the article and code published in C++ Users Journal "Implementing Splay Trees in C++" (September 1, 2005). The code has been modified and (supposedly) improved by Ion Gaztanaga. Here is the header of the file used as base code: *splay_tree.h* -- implementation of a STL compatible splay tree.

<http://docs.jquery.com/License>

♦♦♦

From:
<http://docs.jquery.com/License>
The MIT License is recommended for most projects. It is simple and easy to understand and it places almost no restrictions on what you can do with a jQuery project. If the GPL suits your project better you are also free to use a jQuery project under that license. You don't have to do anything special to choose one license or the other and you don't have to notify anyone which license you are using. You are free to use a jQuery project in commercial projects as long as the copyright header is left intact.

Permission is hereby granted to use or copy this program for any purpose, provided the above notices are retained on all copies. Permission to modify the code and to distribute modified code is granted, provided the above notices are retained, and a notice that the code was modified is included with the above copyright notice.

A few files have other copyright holders. A few of the files needed to use the GNU-style build procedure come with a modified GPL license that appears not to significantly restrict use of the collector, though use of those files for a purpose other than building the collector may require the resulting code to be covered by the GPL.

Copyright (c) 1986 by University of Toronto.

Written by Henry Spencer. Not derived from licensed software. Permission is granted to anyone to use this software for any purpose on any computer system, and to redistribute it freely, subject to the following restrictions:

1. The author is not responsible for the consequences of use of this software, no matter how awful, even if they arise from defects in it.
2. The origin of this software must not be misrepresented, either by explicit claim or by omission.
3. Altered versions must be plainly marked as such, and must not be misrepresented as being the original software.

Beware that some of this code is subtly aware of the way operator precedence is structured in regular expressions. Serious changes in regular-expression syntax might require a total rethink.

bzip2/libbzip2 version 1.0.4 of 20 December 2006

♦♦♦

From:

busybox-1.18.4/busybox-1.18.4/archival/bbunzip.c

Licensed under GPLv2 or later, see file LICENSE in this source tree.

Based on GNU gzip v1.2.4

Copyright (C) 1992-1993 Jean-loup Gailly.

Originally adjusted for busybox by Sven Rudolph <sr1@inf.tu-dresden.de> based on gzip sources. Adjusted further by Erik Andersen <andersen@codepoet.org> to support files as well as stdin/stdout, and to generally behave itself wrt command line handling.

Licensed under GPLv2 or later, see file LICENSE in this source tree.

gzip (GNU zip) -- compress files with zip algorithm and 'compress' interface

Copyright (C) 1992-1993 Jean-loup Gailly

The unzip code was written and put in the public domain by **Mark Adler**. Portions of the lzw code are derived from the public domain 'compress' written by **Spencer Thomas, Joe Orost, James Woods, Jim McKie, Steve Davies, Ken Turkowski, Dave Mack and Peter Jannesen**.

See the license_msg below and the file COPYING for the software license.

Copyright (C) 2006 Aurelien Jacobs <aurel@gnuage.org>

Based on bunzip.c from busybox

Licensed under GPLv2, see file LICENSE in this source tree.

Copyright (C) 1996-2006 Julian Seward <jseward@bzip.org>

Please read the WARNING, DISCLAIMER and PATENTS sections in this file. This program is released under the terms of the license contained in the file LICENSE. Please read and be aware of the following:

WARNING:
This program and library (attempts to) compress data by performing several non-trivial transformations on it. Unless you are 100% familiar with all the algorithms contained herein, and with the consequences of modifying them, you should NOT meddle with the compression or decompression machinery. Incorrect changes can and very likely will lead to disastrous loss of data.

DISCLAIMER:
I TAKE NO RESPONSIBILITY FOR ANY LOSS OF DATA ARISING FROM THE USE OF THIS PROGRAM/LIBRARY, HOWSOEVER CAUSED.

Every compression of a file implies an assumption that the compressed file can be decompressed to reproduce the original. Great efforts in design, coding and testing have been made to ensure that this program works correctly. However, the complexity of the algorithms, and, in particular, the presence of various special cases in the code which occur with very low but non-zero probability make it impossible to rule out the possibility of bugs remaining in the program.

DO NOT COMPRESS ANY DATA WITH THIS PROGRAM UNLESS YOU ARE PREPARED TO ACCEPT THE POSSIBILITY, HOWEVER SMALL, THAT THE DATA WILL NOT BE RECOVERABLE.

That is not to say this program is inherently unreliable. Indeed, I very much hope the opposite is true. bzip2/libbzip2 has been carefully constructed and extensively tested.

PATENTS:
To the best of my knowledge, bzip2/libbzip2 does not use any patented algorithms. However, I do not have the resources to carry out a patent search. Therefore I cannot give any guarantee of the above statement.

busybox-1.18.4/busybox-1.18.4/archival/tar.c

Modified to use common extraction code used by ar, cpio, dpkg-deb, dpkg by Glenn McGrath. Note, that as of BusyBox-0.43, tar has been completely rewritten from the ground up. It still has remnants of the old code lying about, but it is very different now (i.e., cleaner, less global variables, etc.)

Copyright (C) 1999-2004 by Erik Andersen <andersen@codepoet.org>

Based in part in the tar implementation in sash

Copyright (c) 1999 by David I. Bell

Permission is granted to use, distribute, or modify this source, provided that this copyright notice remains intact. Permission to distribute sash derived code under GPL has been granted.

Based in part on the tar implementation from busybox-0.28

From:
busybox-1.18.4/busybox-1.18.4/shell/hush.c
Intended to follow the original Thompson and Ritchie "small and simple is beautiful" philosophy, which incidentally is a good match to today's BusyBox.

Copyright (C) 2000,2001 Larry Doolittle <larry@doolittle.boa.org>
Copyright (C) 2008,2009 Denys Vlasenko
<vda.linux@googlemail.com>
Licensed under GPLv2 or later, see file LICENSE in this source tree.

Credits: The parser routines proper are all original material, first written Dec 2000 and Jan 2001 by Larry Doolittle. The execution engine, the builtins, and much of the underlying support has been adapted from busybox-0.49pre's lash, which is

Copyright (C) 1999-2004 by Erik Andersen <andersen@codepoet.org>
written by Erik Andersen <andersen@codepoet.org>. That, in turn, is based in part on ladsh.c, by

Michael K. Johnson and Erik W. Troan,
which they placed in the public domain.
I don't know how much of the Johnson/Troan code has survived the repeated rewrites.

♦♦♦

From:

busybox-1.18.4/busybox-1.18.4/libbb/README

Please see the LICENSE file for copyright information (GPLv2)

libbb is BusyBox's utility library. All of this stuff used to be stuffed into a single file named utility.c. When I split utility.c to create libbb, some of the very oldest stuff ended up without their original copyright and licensing information (which is now lost in the mists of time). If you see something that you wrote that is mis-attributed, do let me know so we can fix that up. Erik Andersen <andersen@codepoet.org>

From:
busybox-1.18.4/busybox-1.18.4/networking/nc_bloaty.c
Based on netcat 1.10 RELEASE 960320 written by **hobbit@avian.org**.
Released into public domain by the author.

Copyright (C) 2007 Denys Vlasenko.
Licensed under GPLv2, see file LICENSE in this source tree.

Author's comments from nc 1.10:
Netcat is entirely my own creation, although plenty of other code was used as examples. It is freely given away to the Internet community in the hope that it will be useful, with no restrictions except giving credit where it is due. No GPLs, Berkeley copyrights or any of that nonsense. The author assumes NO responsibility for how anyone uses it. If netcat makes you rich somehow and you're feeling generous, mail me a check. If you are affiliated IN ANY WAY with Microsoft Network, get a life. Always ski in control. Comments, questions, and patches to hobbit@avian.org. ...

Netcat and the associated package is a product of **Avian Research**, and is freely available in full source form with no restrictions save an obligation to give credit where due.

From:
busybox-1.18.4/busybox-1.18.4/networking/traceroute.c
I stole the idea for this program from Steve Deering. Since the first release, I've learned that had I attended the right IETF working group meetings, I also could have stolen it from Guy Almes or Matt Mathis. I don't know (or care) who came up with the idea first. I envy the originators' perspicacity and I'm glad they didn't keep the idea a secret.

From:
busybox-1.18.4/busybox-1.18.4/util-linux/fbset.c
Stuff stolen from the kernel's fb.h

♦♦♦

From:
busybox-1.18.4/busybox-1.18.4/util-linux/findfs.c
Some portions cribbed from e2fsprogs, util-linux, dosfstools

♦♦♦

From:
busybox-1.18.4/busybox-1.18.4/libbb/progress.c
Original copyright notice which applies to the
CONFIG_FEATURE_WGET_STATUSBAR stuff, much of which was
blatantly stolen from openssh.

♦♦♦

From:
busybox-1.18.4/busybox-1.18.4/networking/traceroute.c
I stole the idea for this program from Steve Deering. Since the first
release, I've learned that had I attended the right IETF working group
meetings, I also could have stolen it from Guy Almes or Matt Mathis. I
don't know (or care) who came up with the idea first. I envy the
originators' perspicacity and I'm glad they didn't keep the idea a secret.

♦♦♦

From:
busybox-1.18.4/busybox-1.18.4/scripts/checkstack.pl
Stolen from Linux kernel :)

♦♦♦

From:
busybox-1.18.4/busybox-1.18.4/archival/dpkg.c
This code is taken from dpkg and modified slightly to work with busybox

♦♦♦

From:
busybox-1.18.4/busybox-1.18.4/archival/lzop.c
Lzop file signature (shamelessly borrowed from PNG)
This coding is derived from Alexander Lehmann's pngcheck code.

♦♦♦

From:
busybox-1.18.4/busybox-1.18.4/util-linux/hexdump.c
Based on code from util-linux v 2.11l

Group:	User Space Apps / Development/Tools
Description:	Berkeley Yacc (byacc) is a reimplementation of the Unix parser generator Yacc written in ANSI C. Berkeley Yacc is an LALR(1) parser generator. Berkeley Yacc has been made as compatible as possible with AT&T Yacc. Berkeley Yacc can accept any input specification that conforms to the AT&T Yacc documentation. Specifications that take advantage of undocumented features of AT&T Yacc will probably be rejected.
Common Usage:	Utility

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

lossless data compressor based on the Burrows-Wheeler transform. bzip2 compresses most files more effectively than the older LZW (.Z), and Deflate (.zip and .gz) compression algorithms, but is considerably slower (~12 times vs. Deflate on typical data). Like gzip, bzip2 is only a data compressor. It is not an archiver like RAR or ZIP; the program itself has no facilities for multiple files, encryption or archive-splitting, but, in the UNIX tradition, relies instead on separate external utilities such as tar and GnuPG for these tasks. In most cases, bzip2's absolute compression efficiency is surpassed by PPM algorithms. bzip2 gets within ten to fifteen percent of PPM, while being roughly twice as fast at compression and six times faster at decompression.

bzip2-1.0.5-6.fc12.src/bzip2-1.0.5/bzip2-1.0.5/readme
Copyright (C) 1996-2007 Julian Seward <jseward@bzip.org>

Please read the WARNING, DISCLAIMER and PATENTS sections in this file. This program is released under the terms of the license contained in the file LICENSE. Please read and be aware of the following:

WARNING:

This program and library (attempts to) compress data by performing several non-trivial transformations on it. Unless you are 100% familiar with all the algorithms contained herein, and with the consequences of modifying them, you should NOT meddle with the compression or decompression machinery. Incorrect changes can and very likely will lead to disastrous loss of data.

DISCLAIMER:

I TAKE NO RESPONSIBILITY FOR ANY LOSS OF DATA ARISING FROM THE USE OF THIS PROGRAM/LIBRARY, HOWSOEVER CAUSED.

Every compression of a file implies an assumption that the compressed file can be decompressed to reproduce the original. Great efforts in design, coding and testing have been made to ensure that this program works correctly. However, the complexity of the algorithms, and, in particular, the presence of various special cases in the code which occur with very low but non-zero probability make it impossible to rule out the possibility of bugs remaining in the program.

DO NOT COMPRESS ANY DATA WITH THIS PROGRAM UNLESS YOU ARE PREPARED TO ACCEPT THE POSSIBILITY, HOWEVER SMALL, THAT THE DATA WILL NOT BE RECOVERABLE.

That is not to say this program is inherently unreliable. Indeed, I very much hope the opposite is true. bzip2/libbzip2 has been carefully constructed and extensively tested.

PATENTS:

To the best of my knowledge, bzip2/libbzip2 does not use any patented algorithms. However, I do not have the resources to carry out a patent search. Therefore I cannot give any guarantee of the above statement.

cairo 1.10.2

Software: cairo
Version: 1.10.2
File or Package: cairo-1.10.2.tar.gz
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2.1, LGPLv2.1+, GPLv3, GPLv3+, Mozilla Public v1.1 (MPLv1.1), FreeBSD, BSDv2, MIT/X11, Academic, Public Domain
Other Licenses:
URL:
Group: User Space Libraries / System Environment/Libraries
Description: Cairo is a 2D graphics library with support for multiple output devices. Currently supported output targets include the X Window System, win32, and image buffers, as well as PDF, PostScript, and SVG file output. Experimental backends include OpenGL (through glitz), Quartz, XCB, BeOS, OS/2, and DirectFB. Cairo is designed to produce consistent output on all output media while taking advantage of display hardware acceleration when available (for example, through the X Render Extension).
Common Usage: Library
Package Size: 55.71 MB
Folders / Files: 24 / 2,294
Source Path: wrlinux-4.0/layers/wrll-userspace/graphics/packages

From:
cairo-1.10.2/cairo-1.10.2/copying
Cairo is free software. Every source file in the implementation[] of cairo is available to be redistributed and/or modified under the terms of either the GNU Lesser General Public License (LGPL) version 2.1 or the Mozilla Public License (MPL) version 1.1. Some files are available under more liberal terms, but we believe that in all cases, each file may be used under either the LGPL or the MPL.

See the following files in this directory for the precise terms and conditions of either license: COPYING-LGPL-2.1, COPYING-MPL-1.1. Please see each file in the implementation for copyright and licensing information, (in the opening comment of each file).

The implementation of cairo is contained entirely within the "src" directory of the cairo source distribution. There are other components of the cairo source distribution (such as the "test", "util", and "perf") that are auxiliary to the library itself. None of the source code in these directories contributes to a build of the cairo library itself, (libcairo.so or cairo.dll or similar). These auxiliary components are also free software, but may be under different license terms than cairo itself. For example, most of the test cases in the perf and test directories are made available under an MIT license to simplify any use of this code for reference purposes in using cairo itself. Other files might be available under the GNU General

This is the Glitter paths scan converter incorporated into cairo. The source is from commit 734c53237a867a773640bd5b64816249fa1730f8 of <http://gitweb.freedesktop.org/?p=users/joonas/glitter-paths>. Glitter-paths is a stand alone polygon rasteriser derived from David Turner's reimplement of Tor Anderssons's 15x17 supersampling rasteriser from the Apparition graphics library.

From:
cairo-1.10.2/cairo-1.10.2/ChangeLog
This code is stolen straight from cairo-drm-intel.c.

This is significantly cribbed from Zach Laine's work, but reworked so that gradients can be plugged in as either source or mask operands for any of the paths.

Based on the work by Øyvind Kolås and Pierre Tardy -- many thanks to Pierre for pushing this backend for inclusion as well as testing and reviewing my initial patch. And many more thanks to pippin for writing the backend in the first place!

Patch based on the original by Jeff Muizelaar

From:
canutils-4.0.6/canutils-4.0.6/src/canconfig.c
this is shamelessly stolen from iproute and slightly modified

ccache 2.4

Software:	ccache
Version:	2.4
File or Package:	ccache-2.4.tar.gz
OSI Licenses:	GPLv2, GPLv2+
Other Licenses:	Custom
URL:	
Group:	
Description:	ccache is a compiler cache, a tool which caches the output of C/C++ compilation so that the next time the same compilation can be omitted. It acts as a caching pre-processor to C/C++ compilers, using the -E compiler switch and a hash to detect when a compilation can be satisfied from cache. This often results in a 5 to 10 times speedup in common compilations. The program counts on the fact that identical preprocessed source code compiled using the identical compiler settings results in identical output being generated.

cdparanoia alpha9.8-30

Software: cdparanoia
Version: alpha9.8-30
File or Package: cdparanoia-alpha9.8-30.src.rpm
OSI Licenses: GPLv2+, GPLv2+ w/exception
Other Licenses: Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/9/Fedora/source/SRPMS/cdparanoia-alpha9.8-30.src.rpm>
Group: Application/Multimedia
Description: A Compact Disc Digital Audio (CDDA) extraction tool (or ripper). Cdparanoia is a compact disc ripper for Unixes and BeOS, developed by Xiph.org. It was designed to be a minimalistic, high-quality CD ripper that would be able to compensate for and adjust to poor hardware to produce a flawless rip. The Paranoia library, libparanoia, is the standard CD ripping library in KDE and GNOME.

document version 2.60

cdrkit 1.1.9-10

Software: cdrkit
Version: 1.1.9-10
File or Package: cdrkit-1.1.9-10.fc12.src.rpm
OSI Licenses: GPLv2, GPLv2+, LGPLv2+, LGPLv2.1+, MIT/X11, FreeBSD, BSDv2, Public Domain
Other Licenses: Custom
URL: ftp://download.fedora.redhat.com/pub/fedora/linux/releases/12/Fedora/source/SRPMS/cdrkit-1.1.9-10.fc12.src.rpm
Group: User Space Apps
Description: cdrkit is a collection of CD/DVD utilities.
Common Usage: Utility
Package Size: 9.8 MB
Folders / Files: 30 / 586
Source Path: wrlinux-4.0/layers/ldat-tools/installer/packages

From:
cdrrkit-1.1.9-10.fc12.src/cdrrkit-1.1.9/cdrrkit-1.1.9/genisoimage/md5.c
This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by Colin Plumb in 1993, no copyright is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

This code was modified in 1997 by Jim Kingdon of Cyclic Software to not require an integer type which is exactly 32 bits. This work draws on the changes for the same purpose by Tatu Ylonen <ylo@cs.hut.fi> as part of SSH, but since I didn't actually use that code, there is no copyright issue. I hereby disclaim copyright in any changes I have made; this code remains in the public domain.

From:
<http://en.wikipedia.org/wiki/Cdrkit>
License issues in 2006 cdrtools versions prompted Debian cdrtools maintainers to fork cdrtools into cdrkit.[1][2][3]

Jörg Schilling, the primary developer of cdrtools, changed cdrtools to use a new build system under the Common Development and Distribution License license. Schilling had in previous occasions also released code for cdrecord with a license prohibiting certain changes,[clarification needed] thereby preventing distribution of cdrtools as free software.[4] The Debian developers who packaged cdrtools stated publicly that Debian could no longer distribute cdrtools because the GPL forbids packaging GPL code with code under a license that includes incompatible restrictions. Debian developer Don Armstrong suggested dual-licensing as one possible solution.

Jörg Schilling argued that there was no license problem, and did not agree to make any changes to cdrtools.[5] Faced with an impasse, the Debian developers made copies of the last cdrtools source files licensed under the GPL, renamed the tools, and released the result under the GPL as cdrkit.[6] Jörg Schilling stated on the cdrecord website that the whole licensing issue is a "fairy tale" fabricated by people after a patch to support UTF-8 on mkisofs was rejected by Schilling because "the code quality of this patch was lousy", and called the fork an attack on the cdrtools project.[7] According to him, the Debian fork is in conflict with GPL and Copyright and uses the original program names without permission from the authors, so it cannot be legally distributed. [8]

checkpolicy 2.0.21

Software:	checkpolicy
Version:	2.0.21
File or Package:	checkpolicy-2.0.21.tar.gz
OSI Licenses:	GPLv2, LGPLv2.1+
Other Licenses:	
URL:	http://userspace.selinuxproject.org/trac/wiki/Releases/checkpolicy-2.0.21.tar.gz
Group:	User Space Libraries / User Space Apps / Development / System
Description:	This package contains checkpolicy, the SELinux policy compiler, required for building SELinux policies. checkpolicy is a program that checks and compiles a SELinux security policy configuration into a binary representation that can be loaded into the kernel. If no input file name is specified, checkpolicy will attempt to read from policy.conf or policy, depending on whether the -b flag is specified.
Common Usage:	Library, Utility

claws-mail_2.10.0.orig/claws-mail-2.10.0/manual/gpl.xml

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

[Above file contains a full copy of the GNU General Public License version 2 (GPLv2). A copy of the GPLv2 can be found in the addendum of this document.]

The code in this distribution is Copyright 1999-2006 by Hiroyuki Yamamoto and the Claws Mail team. As a special exception, the Claws document version 2.60

Mail team gives permission to link the code of its release of Claws Mail with the OpenSSL project's "OpenSSL" library (or with modified versions of it that use the same license as the "OpenSSL" library), and distribute the linked executables.

You must obey the GNU General Public License in all respects for all of the code used other than "OpenSSL". If you modify this file, you may extend this exception to your version of the file, but you are not obliged to do so. If you do not wish to do so, delete this exception statement from your version.

As a special exception, the Claws Mail team gives permission to link the code of its release of Claws Mail with the four Spamassassin files `src/plugins/spamassassin/libspamc.c`, `src/plugins/spamassassin/libspamc.h`, `src/plugins/spamassassin/utls.c` and `src/plugins/spamassassin/utls.h` included in the releases, which are licenced under the Apache License version 2.0. The Claws Mail team allow the compilation and distribution of Claws Mail with these files without invoking GPL clause 2(b).

Description:	CLooG is a software which generates loops for scanning Z-polyhedra. That is, CLooG finds the code or pseudo-code where each integral point of one or more parametrized polyhedron or parametrized polyhedra union is reached. CLooG is designed to avoid control overhead and to produce a very efficient code. Its input is some data on the polyhedra to scan, basically the system of affine inequalities that define them, and a context that defines some properties known on

CLooG is a free software and library generating loops for scanning Z-polyhedra. That is, it finds a code (e.g. in C, FORTRAN...) that reaches each integral point of one or more parameterized polyhedra. CLooG has been originally written to solve the code generation problem for optimizing compilers based on the polytope model. Nevertheless it is used now in various area, e.g., to build control automata for high-level synthesis or to find the best polynomial approximation of a function. CLooG may help in any situation where scanning polyhedra matters. It uses the best state-of-the-art code generation algorithm known as the Quillere' et al. algorithm (note Qui00::) with our own improvements and extensions (note Bas04::). The user has full control on generated code quality. On one hand, generated code size has to be tuned for sake of readability or instruction cache use. On the other hand, we must ensure that a bad control management does not hamper performance of the generated code, for instance by producing redundant guards or complex loop bounds. CLooG is specially designed to avoid control overhead and to produce a very efficient code.

Group:	User Space Libraries
Description:	A collection of common tools (reusable cluster components) that are useful for writing cluster managers such as Pacemaker. Provides a local resource manager that understands the OCF and LSB standards, and an interface to common STONITH devices. Cluster Glue is a set of libraries, tools and utilities suitable for the Heartbeat/Pacemaker cluster stack. In essence, Glue is everything that is not the cluster messaging layer (Heartbeat), nor the cluster resource manager (Pacemaker), nor a Resource Agent.
Common Usage:	Library
Package Size:	3.5 MB
Folders / Files:	28 / 301

This code implements the MD5 message-digest algorithm. The algorithm is due to Ron Rivest. This code was written by Colin Plumb in 1993, no copyright is claimed. This code is in the public domain; do with it what you wish.

Equivalent code is available from RSA Data Security, Inc. This code has been tested against that, and is equivalent, except that you don't need to include two pages of legalese with every copy.

From:
cluster-glue-1.0.2-1.fc13.src/aa1f9dee2793/Reusable-Cluster-Components-aa1f9dee2793/replace/scandir.c

This code borrowed from 'libit', which can be found here:
<http://www.iro.umontreal.ca/~pinard/libit/dist/scandir/>

The original author put this code in the public domain. It has been modified slightly to get rid of warnings, etc. Below is the email I received from pinard@iro.umontreal.ca (François Pinard) when I sent him an email asking him about the license, etc. of this code which I obtained from his site. I think the correct spelling of his name is Rich Salz. I think he's now rsalz@datapower.com...

Rich Salz, Chief Security Architect
DataPower Technology <http://www.datapower.com>
XS40 XML Security Gateway
<http://www.datapower.com/products/xs40.html>

Copyright(C): none (public domain)
License: none (public domain)
Author: Rich Salz <rsalz@datapower.com>

- Alan Robertson
alanr@unix.sh
Subject: Re: Scandir replacement function
Date: 18 May 2001 12:00:48 -0400
From: pinard@iro.umontreal.ca (François Pinard)
To: Alan Robertson <alanr@unix.sh>
References: 1 [Alan Robertson]

Hi, I'd like to use your scandir replacement function found here:
<http://www.iro.umontreal.ca/~pinard/libit/dist/scandir/> But, it does not indicate authorship or licensing terms in it. Could you tell me who wrote this code, under what license you distribute it, and whether and under what terms I may further distribute it?

Hello, Alan. These are (somewhat) explained in UNSHAR.HDR found in the same directory. The routines have been written by Rick Saltz (I'm not completely sure of the spelling) a long while ago. I think that nowadays, Rick is better known as the main author of the nice INN package.

I spent a little time verifying this with Rick Salz. The results are below:

Date: Tue, 20 Sep 2005 21:52:09 -0400 (EDT)

yes, it's most definitely in the public domain. I'm glad you find it useful. I'm surprised it hasn't been replaced by, e.g., something in GLibC. I'm impressed you tracked me down.

Forget my previous message -- I just decided for completeness's sake to implement the SysV ftw(3) routine, too. To repeat, these are public-domain implementations of the SystemV ftw() routine, the BSD scandir() and alphasort() routines, and documentation for same. The FTW manpage could be more readable, but so it goes.

Anyhow, feel free to post these, and incorporate them into your existing packages. I have readdir() routines for MSDOS and the Amiga if anyone wants them, and should have them for VMS by the end of January; let me know if you want copies.

Yours in filesystems, /r\$
Anyhow, feel free to post

Group:	User Space Libraries / Development/Tools
Description:	CMake is a cross-platform system for build automation. It is comparable to the Unix Make program in that the build process is ultimately controlled by configuration files, in the case of CMake called CMakeLists.txt files. Unlike Make, it does not directly build the final software, but instead generates standard build files (e.g., makefiles on Unix and projects/workspaces in Windows Visual C++ or Eclipse CDT) which are used in the standard way, allowing an easier approach for developers familiar with a particular development environment. It is this use of the native build environment that distinguishes CMake from most other similar systems like SCons. CMake can compile source code, create libraries, generate wrappers, and build executables in arbitrary combinations. CMake supports in-place and out-of-place builds, and can therefore support multiple builds from a single source tree. CMake also supports static and dynamic library builds. CMake is used to control the software compilation process using simple platform and compiler independent configuration files. CMake generates

From:
cmake-2.6.4-4.fc12.src/cmake-2.6.4/cmake-
2.6.4/Source/kwsys/RegularExpression.cxx
Copyright (c) 1986 by University of Toronto.
Written by Henry Spencer. Not derived from licensed software.

Permission is granted to anyone to use this software for any purpose on any computer system, and to redistribute it freely, subject to the following restrictions:

1. The author is not responsible for the consequences of use of this software, no matter how awful, even if they arise from defects in it.
2. The origin of this software must not be misrepresented, either by explicit claim or by omission.
3. Altered versions must be plainly marked as such, and must not be misrepresented as being the original software.

Beware that some of this code is subtly aware of the way operator precedence is structured in regular expressions. Serious changes in regular-expression syntax might require a total rethink.

WXWINDOWS LIBRARY LICENCE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND
MODIFICATION
This library is free software; you can redistribute it and/or modify it under the terms of the GNU Library General Public Licence as published by the Free Software Foundation; either version 2 of the Licence, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Library General Public Licence for more details.

You should have received a copy of the GNU Library General Public Licence along with this software, usually in a file named COPYING.LIB. If not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307.

EXCEPTION NOTICE

1. As a special exception, the copyright holders of this library give permission for additional uses of the text contained in this release of the library as licenced under the wxWindows Library Licence, applying either version 3 of the Licence, or (at your option) any later version of the Licence as published by the copyright holders of version 3 of the Licence document.

2. The exception is that you may use, copy, link, modify and distribute under the user's own terms, binary object code versions of works based on the Library.

3. If you copy code from files distributed under the terms of the GNU General Public Licence or the GNU Library General Public Licence into a copy of this library, as this licence permits, the exception does not apply to the code that you add in this way. To avoid misleading anyone as to the status of such modified files, you must delete this exception notice from such code and/or adjust the licensing conditions notice accordingly.

4. If you write modifications of your own for this library, it is your choice whether to permit this exception to apply to your modifications. If you do not wish that, you must delete the exception notice from such code and/or adjust the licensing conditions notice accordingly.

As a special exception, you may create a larger work that contains part or all of the Bison parser skeleton and distribute that work under terms of your choice, so long as that work isn't itself a parser generator using the skeleton or a modified version thereof as a parser skeleton. Alternatively, if you modify or redistribute the parser skeleton itself, you may (at your option) remove this special exception, which will cause the skeleton and the resulting Bison output files to be licensed under the GNU General Public License without this special exception. This special exception was added by the Free Software Foundation in version 2.2 of Bison.

Linking src/oracle.c ("the oracle plugin") statically or dynamically with other modules is making a combined work based on the oracle plugin. Thus, the terms and conditions of the GNU General Public License cover the whole combination.

In addition, as a special exception, the copyright holders of the oracle plugin give you permission to combine the oracle plugin with free software programs or libraries that are released under the GNU LGPL and with code included in the standard release of the Oracle® Call Interface (OCI) under the Oracle® Technology Network (OTN) License (or modified versions of such code, with unchanged license). You may copy and distribute such a system following the terms of the GNU GPL for the oracle plugin and the licenses of the other code concerned.

Note that people who make modified versions of the oracle plugin are not obligated to grant this special exception for their modified versions; it is their choice whether to do so. The GNU General Public License gives permission to release a modified version without this exception; this exception also makes it possible to release a modified version which carries forward this exception. However, without this exception the OTN License does not allow linking with code licensed under the GNU General Public License.

Oracle® is a registered trademark of Oracle Corporation and/or its affiliates. Other names may be trademarks of their respective owners.

coreutils 6.9-9

Software: coreutils
Version: 6.9-9
File or Package: coreutils-6.9-9.fc8.src.rpm
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2.1+, FDLv1.2, FDLv1.2+, MIT/X11, BSDv2
Other Licenses: Custom
URL: http://archives.fedoraproject.org/pub/archive/fedora/linux/releases/8/Fedora/source/SRPMS/coreutils-6.9-9.fc8.src.rpm
Group: User Space Apps / System Environment/Base
Description: The GNU core utilities: a set of tools commonly used in shell scripts. This package is the combination of the old GNU fileutils, sh-utils, and textutils packages. Most of these programs have significant advantages over their Unix counterparts, such as greater speed, additional options, and fewer arbitrary limits.
Common Usage: Tool, Utility
Package Size: 47.0 MB
Folders / Files: 60 / 2,955
Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

document version 2.60

corosync 1.2.7-1

Software:	corosync
Version:	1.2.7-1
File or Package:	corosync-1.2.7-1.fc13.src.rpm
OSI Licenses:	GPLv2+ w/exception, BSDv2, MIT/X11, Academic, Public Domain
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/development/13/source/SRPMS/corosync-1.2.7-1.fc13.src.rpm
Group:	User Space Libraries / Group Communication System
Description:	The Corosync Cluster Engine and Application Programming Interfaces. This package contains the Corosync Cluster Engine Executive, several default APIs and libraries, default configuration files, and an init script. The Corosync Cluster Engine is an open source project Licensed under the New BSD License derived from the OpenAIS project. Corosync's mission is to develop, release, and support a community defined de-facto open source cluster executive for use by multiple open source and commercial cluster projects or products.
Common Usage:	API, Daemon, Library
Package Size:	5.3 MB
Folders / Files:	19 / 309
Source Path:	wrlinux-4.0/layers/wrll-userspace/cgl/packages

NOTICES:

From:

corosync-1.2.7-1.fc13.src/corosync-1.2.7/corosync-1.2.7/license

All cryptographic software in this package is subject to the following legal notice:

This package includes publicly available encryption source code which, together with object code resulting from the compiling of publicly available source code, may be exported from the United States under License Exception TSU pursuant to 15 C.F.R Section 740.13(e).

The following license applies to every file in this package except for the files `exec/crypto.c` and `exec/crypto.h`. The license for these files is described later in this document. Some files are contributed by other authors and hence not copyright MontaVista Software. In this case, the license is still as follows:

Copyright (c) 2002-2004 MontaVista Software, Inc. All rights reserved.

This software licensed under BSD license, the text of which follows:

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Neither the name of the MontaVista Software, Inc. nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED.

IN NO EVENT SHALL THE COPYRIGHT OWNER OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The corosync project uses software from the LibTomCrypt project www.libtomcrypt.org. This software is contained the files `exec/crypto.c` and `exec/crypto.h`. The following license applies to the files `exec/crypto.c` and `exec/crypto.h`:

LibTomCrypt is public domain. As should all quality software be. All of the software was either written by or donated to Tom St Denis for the purposes of this project. The only exception is the SAFER.C source which has no known license status (assumed copyrighted) which is why SAFER.C is shipped as disabled. - **Tom St Denis**

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Group:	User Space Apps / Applications/Archiving
Description:	GNU cpio copies files into or out of a cpio or tar archive. Archives are files which contain a collection of other files plus information about them, such as their file name, owner, timestamps, and access permissions. The archive can be another file on the disk, a magnetic tape, or a pipe. GNU cpio supports the following archive formats: binary, old ASCII, new ASCII, crc, HPUX binary, HPUX old ASCII, old tar and POSIX.1 tar. By default, cpio creates binary format archives, so that they are compatible with older cpio programs. When it is extracting files from archives, cpio automatically recognizes which kind of archive it is reading and can read archives created on machines with a different byte-order.

cracklib 2.8.13-6

Software:	cracklib
Version:	2.8.13-6
File or Package:	cracklib-2.8.13-6.src.rpm
OSI Licenses:	GPLv2, GPLv2+, GPLv2+ w/exception, LGPLv2, MIT/X11
Other Licenses:	Custom
URL:	http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Everything/source/SRPMS/cracklib-2.8.13-6.src.rpm
Group:	User Space Apps / System Environment/Libraries
Description:	A password-checking library; CrackLib tests passwords to determine whether they match certain security-oriented characteristics, with the purpose of stopping users from choosing passwords that are easy to guess. CrackLib performs several tests on passwords: it tries to generate words from a username and gecoc entry and checks those words against the password; it checks for simplistic patterns in passwords; and it checks for the password in a dictionary.
Common Usage:	Library
Package Size:	32.8 MB
Folders / Files:	39 / 206
Source Path:	wrlinux-4.0/layers/wrll-userspace/core/packages

♦♦♦

From:

cracklib-2.8.13-6.src/cracklib-2.8.13/cracklib-2.8.13/readme

This package is an updated/modernized distribution of CrackLib as previously release by Alec Muffett. Pretty much all of the files have been modified in some way to allow for this modernization and to apply numerous bug fixes and patches.

Copyright in the original source is assigned to **Alec Muffett**, numerous authors have contributed the patches applied to these sources, and are included here without attribution as there are no good records.

CrackLib is a library containing a C function (well, lots of functions really, but you only need to use one of them) which may be used in a "passwd"-like program.

♦♦♦

From:

cracklib-2.8.13-6.src/cracklib-2.8.13/cracklib-2.8.13/readme-license

CrackLib was originally licensed with a variant of the Artistic license. In the interests of wider acceptance and more modern licensing, it was switched with the original author's blessing to GPL v2.

This approval was carried out in email discussions in 2005, and has been reconfirmed as of 2007-10-01 with the following email from Alec Muffett. The below email references nneul@umr.edu address, as that is the address that was used at the time. For any future emails regarding this, please use nneul@neulinger.org.

Subject: RE: cracklib license

To: alecm@crypto.dircon.co.uk

>Any chance you could write me a self-contained email stating clearly that the license is being changed to GPL, so I could include that email in the repository and clean up the repository/tarballs? I have all the original discussion, but something succinct and self contained would be ideal.

The license for my code in the Cracklib distribution is henceforth GPL.

Happy now? :-)

-a

From:

cracklib-2.8.13-6.src/cracklib-2.8.13/cracklib-2.8.13/README-WORDS

Please note, the licenses on some of those word lists are restrictive, so please read the licenses before redistributing them. The cracklib-words distribution from the cracklib sourceforge project page has been built solely from word lists previously distributed with cracklib or crack packages and/or public domain word lists.

cramfs 1.1

Software:	cramfs
Version:	1.1
File or Package:	cramfs-1.1.tar.gz
OSI Licenses:	GPLv2, GPLv2+
Other Licenses:	None identified
URL:	
Group:	
Description:	The Compressed ROM File System (cramfs) is a read-only Linux file system designed for simplicity and space-efficiency. It is mainly used in embedded systems and small-footprint systems. Unlike a compressed image of a conventional file system, a cramfs image can be used as it is, i.e. document version 2.60

without the need to decompress the image first.
Common Usage: Utility
Package Size: 116 KB (0.11 MB)
Folders / Files: 3 / 9
Source Path: wrlinux-4.0/layers/wrll-kernel/packages

NOTICES:

cramfsswap 1.3.1

Software: cramfsswap
Version: 1.3.1
File or Package: cramfsswap_1.3.1.tar.gz
OSI Licenses: GPLv2
Other Licenses: None identified
URL:
Group:
Description: "cramfs" is a highly compressed and size optimized Linux filesystem which is mainly used for embedded applications. The problem with cramfs is that it is endianness sensitive, meaning you can't mount a cramfs for a big endian target on a little endian machine and vice versa. cramfsswap solves that problem by allowing you to swap to endianness of a cramfs filesystem.
Common Usage: Utility
Package Size: 84 KB (0.08 MB)
Folders / Files: 3 / 13
Source Path: wrlinux-4.0/layers/wrll-kernel/packages

NOTICES:

This package was debianized by Michael Holzt <kju@debian.org> on Tue, 4 Jan 2005 12:26:00 +0100. This is a native debian package, debian maintainer and upstream author are the same person. The source can be downloaded from <http://kju.de/projekte/cramfsswap/> (sorry, German only)

License: cramfsswap is released under the GNU GPL license as free, open source software. Hopefully it will seem useful to someone. NO WARRANTY. GPLv2 only! On Debian GNU/Linux systems, the complete text of the GNU General Public License can be found in '/usr/share/common-licenses/GPL'.

CUPS License Agreement

Copyright 2007-2009 by Apple Inc.

1 Infinite Loop, Cupertino, CA 95014 USA

<http://www.cups.org/>

INTRODUCTION - CUPS(tm) is provided under the GNU General Public License ("GPL") and GNU Library General Public License ("LGPL"), Version 2, with exceptions for Apple operating systems and the OpenSSL toolkit. A copy of the exceptions and licenses follow this introduction.

The GNU LGPL applies to the CUPS and CUPS Imaging libraries located in the "cups" and "filter" subdirectories of the CUPS source distribution and in the "cups" include directory and library files in the binary distributions. The GNU GPL applies to the remainder of the CUPS distribution, including the "pdftops" filter which is based upon Xpdf.

For those not familiar with the GNU GPL, the license basically allows you to:

- Use the CUPS software at no charge.

document version 2.60

- Distribute verbatim copies of the software in source or binary form.
- Sell verbatim copies of the software for a media fee, or sell support for the software.

What this license does not allow you to do is make changes or add features to CUPS and then sell a binary distribution without source code. You must provide source for any changes or additions to the software, and all code must be provided under the GPL or LGPL as appropriate. The only exceptions to this are the portions of the CUPS software covered by the Apple operating system license exceptions outlined later in this license agreement.

The GNU LGPL relaxes the "link-to" restriction, allowing you to develop applications that use the CUPS and CUPS Imaging libraries under other licenses and/or conditions as appropriate for your application, driver, or filter.

LICENSE EXCEPTIONS

In addition, as the copyright holder of CUPS, Apple Inc. grants the following special exceptions:

1. Apple Operating System Development License Exception;

a. Software that is developed by any person or entity for an Apple Operating System ("Apple OS-Developed Software"), including but not limited to Apple and third party printer drivers, filters, and backends for an Apple Operating System, that is linked to the CUPS imaging library or based on any sample filters or backends provided with CUPS shall not be considered to be a derivative work or collective work based on the CUPS program and is exempt from the mandatory source code release clauses of the GNU GPL.

You may therefore distribute linked combinations of the CUPS imaging library with Apple OS-Developed Software without releasing the source code of the Apple OS-Developed Software. You may also use sample filters and backends provided with CUPS to develop Apple OS-Developed Software without releasing the source code of the Apple OS-Developed Software.

b. An Apple Operating System means any operating system software developed and/or marketed by Apple Computer, Inc., including but not limited to all existing releases and versions of Apple's Darwin, Mac OS X, and Mac OS X Server products and all follow-on releases and future versions thereof.

c. This exception is only available for Apple OS-Developed Software and does not apply to software that is distributed for use on other operating systems.

d. All CUPS software that falls under this license exception have the following text at the top of each source file: This file is subject to the Apple OS-Developed Software exception.

2. OpenSSL Toolkit License Exception;

a. Apple Inc. explicitly allows the compilation and distribution of the CUPS software with the OpenSSL Toolkit. No developer is required to provide these exceptions in a derived work.

KERBEROS SUPPORT CODE

The Kerberos support code ("KSC") is copyright 2006 by Jelmer Vernooij and is provided 'as-is', without any express or implied warranty.

In no event will the author or Apple Inc. be held liable for any damages arising from the use of the KSC.

Sources files containing KSC have the following text at the top of each source file: This file contains Kerberos support code, copyright 2006 by Jelmer Vernooij.

The KSC copyright and license apply only to Kerberos-related feature code in CUPS. Such code is typically conditionally compiled based on the presence of the HAVE_GSSAPI preprocessor definition.

Permission is granted to anyone to use the KSC for any purpose, including commercial applications, and to alter it and redistribute it freely, subject to the following restrictions:

1. The origin of the KSC must not be misrepresented; you must not claim that you wrote the original software. If you use the KSC in a product, an acknowledgment in the product documentation would be appreciated but is not required.
2. Altered source versions must be plainly marked as such, and must not be misrepresented as being the original software.
3. This notice may not be removed or altered from any source distribution.

TRADEMARKS

CUPS and the CUPS logo (the "CUPS Marks") are trademarks of Apple Inc. Apple grants you a non-exclusive and non-transferable right to use the CUPS Marks in any direct port or binary distribution incorporating CUPS software and in any promotional material therefor. You agree that your products will meet the highest levels of quality and integrity for similar goods, not be unlawful, and be developed, manufactured, and distributed in compliance with this license. You will not interfere with Apple's rights in the CUPS Marks, and all use of the CUPS Marks shall inure to the benefit of Apple. This license does not apply to use of the CUPS Marks in a derivative products, which requires prior written permission from Apple Inc.

♦♦♦

From:

cups-1.4.1-source/cups-1.4.1/readme.txt

INTRODUCTION - CUPS is a standards-based, open source printing system developed by Apple Inc. for Mac OS® X and other UNIX®-like operating systems. CUPS uses the Internet Printing Protocol ("IPP") and provides System V and Berkeley command-line interfaces, a web interface, and a C API to manage printers and print jobs. It supports printing to both local (parallel, serial, USB) and networked printers, and printers can be shared from one computer to another, even over the Internet!

Internally, CUPS uses PostScript Printer Description ("PPD") files to describe printer capabilities and features and a wide variety of generic and device-specific programs to convert and print many types of files. Sample drivers are included with CUPS to support many Dymo, EPSON, HP, Intellitach, OKIDATA, and Zebra printers. Many more drivers are available online and (in some cases) on the driver CD-ROM that came with your printer.

CUPS is licensed under the GNU General Public License and GNU Library General Public License versions 2. See the file "LICENSE.txt" for more information.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. Use MD5 passwords without the benefit of PAM; this is for Slackware Linux, and the algorithm was taken from the old shadow-19990827/lib/md5crypt.c source code... :(

curl 7.20.0-1

Software:	curl
Version:	7.20.0-1
File or Package:	curl-7.20.0-1.fc13.src.rpm
OSI Licenses:	GPLv2+ w/exception, MIT/X11, BSDv1 (UCB), BSDv2, Apache (variant), zlib/libpng (variant), Public Domain
Other Licenses:	Custom
URL:	ftp://download.fedora.redhat.com/pub/fedora/linux/development/13/source/SRPMS/curl-7.20.0-1.fc13.src.rpm
Group:	User Space Apps / Applications/Internet
Description:	cURL is a tool for getting files from FTP, HTTP, Gopher, Telnet, and Dict servers, using any of the supported protocols. cURL is designed to work without user interaction or any kind of interactivity. cURL offers many useful capabilities, like proxy support, user authentication, FTP upload, HTTP post, and file transfer resume. A utility for getting files from remote servers (FTP, HTTP, and others), Curl is a command line tool for transferring data specified with URL syntax.
Common Usage:	API, Library, Utility

From:

`curl-7.20.0-1.fc13.src/curl-7.20.0/curl-7.20.0/docs/DISTRO-DILEMMA`

Date: February 11, 2007

Author: Daniel Stenberg <daniel@haxx.se>

URL: <http://curl.haxx.se/legal/distro-dilemma.html>

Condition

This document is written to describe the situation as it is right now. libcurl 7.16.1 is currently the latest version available. Things may of course change in the future. This document reflects my view and understanding of these things. Please tell me where and how you think I'm wrong, and I'll try to correct my mistakes.

Background

The Free Software Foundation has deemed the Original BSD license[1] to be "incompatible"[2] with GPL[3]. I'd rather say it is the other way around, but the point is the same: if you distribute a binary version of a GPL program, it MUST NOT be linked with any Original BSD-licensed parts or libraries. Doing so will violate the GPL license. For a long time, very many GPL licensed programs have avoided this license mess by adding an exception[8] to their license. And many others have just closed their eyes for this problem.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

libcurl is MIT-style[4] licensed - how on earth did this dilemma fall onto our plates?

libcurl is only a little library. libcurl can be built to use OpenSSL for its SSL/TLS capabilities. OpenSSL is basically Original BSD licensed[5]. If libcurl built to use OpenSSL is used by a GPL-licensed application and you decide to distribute a binary version of it (Linux distros - for example - tend to), you have a clash.

GPL vs Original BSD.

This dilemma is not libcurl-specific nor is it specific to any particular Linux distro. (This article mentions and refers to Debian several times, but only because Debian seems to be the only Linux distro to have faced this issue yet since no other distro is shipping libcurl built with two SSL libraries.)

Part of the Operating System

This would not be a problem if the used lib would be considered part of the underlying operating system, as then the GPL license has an exception clause[6] that allows applications to use such libs without having to be allowed to distribute it or its sources. Possibly some distros will claim that OpenSSL is part of their operating system. Debian does however not take this stance and has officially(?) claimed that OpenSSL is not a required part of the Debian operating system. Some people claim that this paragraph cannot be exploited this way by a Linux distro, but I am not a lawyer and that is a discussion left outside of this document.

GnuTLS

Since May 2005 libcurl can get built to use GnuTLS instead of OpenSSL. GnuTLS is an LGPL[7] licensed library that offers a matching set of features as OpenSSL does. Now, you can build and distribute an TLS/SSL capable libcurl without including any Original BSD licensed code. I believe Debian is the first (only?) distro that provides libcurl/GnuTLS packages.

yassl

libcurl can get also get built to use yassl for the TLS/SSL layer. yassl is a GPL[3] licensed library.

GnuTLS vs OpenSSL vs yassl

While these three libraries offer similar features, they are not equal. libcurl does not (yet) offer a standardized stable ABI if you decide to switch from using libcurl-openssl to libcurl-gnutls or vice versa. The GnuTLS and yassl support is very recent in libcurl and it has not been tested nor used very extensively, while the OpenSSL equivalent code has been used and thus matured since 1999.

GnuTLS

- LGPL licensed
- supports SRP
- lacks SSLv2 support
- lacks MD2 support (used by at least some CA certs)
- lacks the crypto functions libcurl uses for NTLM

OpenSSL

- Original BSD licensed
- lacks SRP
- supports SSLv2
- older and more widely used
- provides crypto functions libcurl uses for NTLM
- libcurl can do non-blocking connects with it in 7.15.4 and later

yassl

- GPL licensed

- much untested and unproven in the real work by (lib)curl users so we don't know a lot about restrictions or benefits from using this

The Better License, Original BSD, GPL or LGPL?

It isn't obvious or without debate to any objective interested party that either of these licenses are the "better" or even the "preferred" one in a generic situation. Instead, I think we should accept the fact that the SSL/TLS libraries and their different licenses will fit different applications and their authors differently depending on the applications' licenses and their general usage pattern (considering how GPL and LGPL libraries for example can be burdensome for embedded systems usage).

In Debian land, there seems to be a common opinion that LGPL is "maximally compatible" with apps while Original BSD is not. Like this: <http://lists.debian.org/debian-devel/2005/09/msg01417.html>

More SSL Libraries

In libcurl, there's no stopping us here. There are more Open Source/Free SSL/TLS libraries out there and we would very much like to support them as well, to offer application authors an even wider scope of choice.

Application Angle of this Problem

libcurl is built to use one SSL/TLS library. It uses a single fixed name (by default) on the built/created lib file, and applications are built/linked to use that single lib. Replacing one libcurl instance with another one that uses the other SSL/TLS library might break one or more applications (due to ABI differences and/or different feature set). You want your application to use the libcurl it was built for.

Project cURL Angle of this Problem

We distribute libcurl and everyone may build libcurl with either library at their choice. This problem is not directly a problem of ours. It merely affects users - GPL application authors only - of our lib as it comes included and delivered on some distros.

libcurl has different ABI when built with different SSL/TLS libraries due to these reasons:

1. No one has worked on fixing this. The mutex/lock callbacks should be set with a generic libcurl function that should use the proper underlying functions.
2. The `CURLOPT_SSL_CTX_FUNCTION` option is not possible to "emulate" on GnuTLS but simply requires OpenSSL.
3. There might be some other subtle differences just because nobody has yet tried to make a fixed ABI like this.

Distro Angle of this Problem

To my knowledge there is only one distro that ships libcurl built with either OpenSSL or GnuTLS.

Debian Linux is now (since mid September 2005) providing two different libcurl packages, one for libcurl built with OpenSSL and one built with GnuTLS. They use different .so names and can this both be installed in a single system simultaneously. This has been said to be a transitional system not desired to keep in the long run.

From:

curl-7.20.0-1.fc13.src/curl-7.20.0/curl-7.20.0/docs/FAQ

1. Philosophy

1.1 What is cURL?

cURL is the name of the project. The name is a play on 'Client for URLs', originally with URL spelled in uppercase to make it obvious it deals with URLs. The fact it can also be pronounced 'see URL' also helped, it works as an abbreviation for "Client URL Request Library" or why not the recursive version: "Curl URL Request Library".

The cURL project produces two products:

libcurl

A free and easy-to-use client-side URL transfer library, supporting FTP, FTPS, HTTP, HTTPS, SCP, SFTP, TFTP, TELNET, DICT, FILE, LDAP and LDAPS.

libcurl supports HTTPS certificates, HTTP POST, HTTP PUT, FTP uploading, kerberos, HTTP form based upload, proxies, cookies, user+password authentication, file transfer resume, http proxy tunneling and more!

libcurl is highly portable, it builds and works identically on numerous platforms, including Solaris, NetBSD, FreeBSD, OpenBSD, Darwin, HP-UX, IRIX, AIX, Tru64, Linux, UnixWare, HURD, Windows, Amiga, OS/2, BeOS, Mac OS X, Ultrix, QNX, OpenVMS, RISC OS, Novell NetWare, DOS, Symbian, OSF, Android, Minix, IBM TPF and more...

libcurl is free, thread-safe, IPv6 compatible, feature rich, well supported and fast.

curl

A command line tool for getting or sending files using URL syntax.

Since curl uses libcurl, it supports a range of common Internet protocols, currently including HTTP, HTTPS, FTP, FTPS, SCP, SFTP, TFTP, LDAP, LDAPS, DICT, TELNET and FILE.

We pronounce curl and cURL with an initial k sound: [kurl]. There are numerous sub-projects and related projects that also use the word curl in the project names in various combinations, but you should take notice that this FAQ is directed at the command-line tool named curl (and libcurl the library), and may therefore not be valid for other curl-related projects. (There is however a small section for the PHP/CURL in this FAQ.)

1.2 What is libcurl?

libcurl is a reliable and portable library which provides you with an easy interface to a range of common Internet protocols. You can use libcurl for free in your application, be it open source, commercial or closed-source.

libcurl is most probably the most portable, most powerful and most often used C-based multi-platform file transfer library on this planet - be it open source or commercial.

1.3 What is curl not?

Curl is not a wget clone. That is a common misconception. Never, during curl's development, have we intended curl to replace wget or compete on its market. Curl is targeted at single-shot file transfers.

document version 2.60

Curl is not a web site mirroring program. If you want to use curl to mirror something: fine, go ahead and write a script that wraps around curl to make it reality (like curlmirror.pl does).

Curl is not an FTP site mirroring program. Sure, get and send FTP with curl but if you want systematic and sequential behavior you should write a script (or write a new program that interfaces libcurl) and do it.

Curl is not a PHP tool, even though it works perfectly well when used from or with PHP (when using the PHP/CURL module).

Curl is not a program for a single operating system. Curl exists, compiles, builds and runs under a wide range of operating systems, including all modern Unixes (and a bunch of older ones too), Windows, Amiga, BeOS, OS/2, OS X, QNX etc.

1.7 What about CURL from curl.com?

During the summer 2001, curl.com was busy advertising their client-side programming language for the web, named CURL. We are in no way associated with curl.com or their CURL programming language.

Our project name curl has been in effective use since 1998. We were not the first computer related project to use the name "curl" and do not claim any first-hand rights to the name. We recognize that we will be living in parallel with curl.com and wish them every success.

4.9 Curl can't authenticate to the server that requires NTLM?

This is supported in curl 7.10.6 or later. No earlier curl version knows of this magic. Later versions require the OpenSSL, GnuTLS or Microsoft Windows libraries to provide this functionality. Using the NSS library will not provide NTLM authentication functionality in curl. NTLM is a Microsoft proprietary protocol. Proprietary formats are evil. You should not use such ones.

6. License Issues

Curl and libcurl are released under a MIT/X derivate license. The license is very liberal and should not impose a problem for your project. This section is just a brief summary for the cases we get the most questions. (Parts of this section was much enhanced by Bjorn Reese.)

We are not lawyers and this is not legal advice. You should probably consult one if you want true and accurate legal insights without our prejudice.

6.1 I have a GPL program, can I use the libcurl library?

Yes!

Since libcurl may be distributed under the MIT/X derivate license, it can be used together with GPL in any software.

6.2 I have a closed-source program, can I use the libcurl library?

Yes!

libcurl does not put any restrictions on the program that uses the library.

6.3 I have a BSD licensed program, can I use the libcurl library?

Yes!

libcurl does not put any restrictions on the program that uses the library.

6.4 I have a program that uses LGPL libraries, can I use libcurl?

Yes!

The LGPL license doesn't clash with other licenses.

6.5 Can I modify curl/libcurl for my program and keep the changes secret?

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Yes!

The MIT/X derivate license practically allows you to do almost anything with the sources, on the condition that the copyright texts in the sources are left intact.

6.6 Can you please change the curl/libcurl license to XXXX?

No.

We have carefully picked this license after years of development and discussions and a large amount of people have contributed with source code knowing that this is the license we use. This license puts the restrictions we want on curl/libcurl and it does not spread to other programs or libraries that use it. It should be possible for everyone to use libcurl or curl in their projects, no matter what license they already have in use.

6.7 What are my obligations when using libcurl in my commercial apps?

Next to none. All you need to adhere to is the MIT-style license (stated in the COPYING file) which basically says you have to include the copyright notice in "all copies" and that you may not use the copyright holder's name when promoting your software. You do not have to release any of your source code. You do not have to reveal or make public any changes to the libcurl source code. You do not have to reveal or make public that you are using libcurl within your app.

As can be seen here: <http://curl.haxx.se/docs/companies.html> and elsewhere, more and more companies are discovering the power of libcurl and take advantage of it even in commercial environments.

curl-7.20.0-1.fc13.src/curl-7.20.0/curl-7.20.0/docs/LICENSE-MIXING

License Mixing with apps, libcurl and Third Party Libraries

libcurl can be built to use a fair amount of various third party libraries, libraries that are written and provided by other parties that are distributed using their own licenses. Even libcurl itself contains code that may cause problems to some. This document attempts to describe what licenses libcurl and the other libraries use and what possible dilemmas linking and mixing them all can lead to for end users.

I am not a lawyer and this is not legal advice!

One common dilemma is that GPL[1]-licensed code is not allowed to be linked with code licensed under the Original BSD license (with the announcement clause). You may still build your own copies that use them all, but distributing them as binaries would be to violate the GPL license - unless you accompany your license with an exception[2]. This particular problem was addressed when the Modified BSD license was created, which does not have the announcement clause that collides with GPL.

libcurl

<http://curl.haxx.se/docs/copyright.html>

Uses an MIT (or Modified BSD)-style license that is as liberal as possible. Some of the source files that deal with KRB4 have Original BSD-style announce-clause licenses. You may not distribute binaries with krb4-enabled libcurl that also link with GPL-licensed code!

OpenSSL

<http://www.openssl.org/source/license.html>

(May be used for SSL/TLS support) Uses an Original BSD-style license with an announcement clause that makes it "incompatible" with GPL. You are not allowed to ship binaries that link with OpenSSL that includes GPL code (unless that specific GPL code includes an exception for OpenSSL -

a habit that is growing more and more common). If OpenSSL's licensing is a problem for you, consider using GnuTLS or yassl instead.

GnuTLS

<http://www.gnutls.org/>

(May be used for SSL/TLS support) Uses the LGPL[3] license. If this is a problem for you, consider using OpenSSL instead. Also note that GnuTLS itself depends on and uses other libs (libgcrypt and libgpg-error) and they too are LGPL- or GPL-licensed.

yassl

<http://www.yassl.com/>

(May be used for SSL/TLS support) Uses the GPL[1] license. If this is a problem for you, consider using OpenSSL or GnuTLS instead.

NSS

<http://www.mozilla.org/projects/security/pki/nss/>

(May be used for SSL/TLS support) Is covered by the MPL[4] license, the GPL[1] license and the LGPL[3] license. You may choose to license the code under MPL terms, GPL terms, or LGPL terms. These licenses grant you different permissions and impose different obligations. You should select the license that best meets your needs.

c-ares

<http://daniel.haxx.se/projects/c-ares/license.html>

(Used for asynchronous name resolves) Uses an MIT license that is very liberal and imposes no restrictions on any other library or part you may link with.

zlib

http://www.gzip.org/zlib/zlib_license.html

(Used for compressed Transfer-Encoding support) Uses an MIT-style license that shouldn't collide with any other library.

krb4

While nothing in particular says that a Kerberos4 library must use any particular license, the one I've tried and used successfully so far (kth-krb4) is partly Original BSD-licensed with the announcement clause. Some of the code in libcurl that is written to deal with Kerberos4 is Modified BSD-licensed.

MIT

Kerberos <http://web.mit.edu/kerberos/www/dist/>

(May be used for GSS support) MIT licensed, that shouldn't collide with any other parts.

Heimdal

<http://www.pdc.kth.se/heimdal/>

(May be used for GSS support) Heimdal is Original BSD licensed with the announcement clause.

GNU GSS

<http://www.gnu.org/software/gss/>

(May be used for GSS support) GNU GSS is GPL licensed. Note that you may not distribute binary curl packages that uses this if you build curl to also link and use any Original BSD licensed libraries!

fbopenssl

(Used for SPNEGO support) Unclear license. Based on its name, I assume that it uses the OpenSSL license and thus shares the same issues as described for OpenSSL above.

libidn

<http://josefsson.org/libidn/>

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

(Used for IDNA support) Uses the GNU Lesser General Public License [3]. LGPL is a variation of GPL with slightly less aggressive "copyleft". This license requires more requirements to be met when distributing binaries, see the license for details. Also note that if you distribute a binary that includes this library, you must also include the full LGPL license text. Please properly point out what parts of the distributed package that the license addresses.

OpenLDAP

<http://www.openldap.org/software/release/license.html>

(Used for LDAP support) Uses a Modified BSD-style license. Since libcurl uses OpenLDAP as a shared library only, I have not heard of anyone that ships OpenLDAP linked with libcurl in an app.

libssh2

<http://www.libssh2.org/>

(Used for scp and sftp support) libssh2 uses a Modified BSD-style license.

[1] = GPL - GNU General Public License:

<http://www.gnu.org/licenses/gpl.html>

How cURL Became Like This

In the second half of 1997, Daniel Stenberg came up with the idea to make currency-exchange calculations available to Internet Relay Chat (IRC) users. All the necessary data are published on the Web; he just needed to automate their retrieval. Daniel simply adopted an existing command-line open-source tool, httpget, that Brazilian Rafael Sagula had written. After a few minor adjustments, it did just what he needed.

Soon, he found currencies on a GOPHER site, so support for that had to go in, and not before long FTP download support was added as well. The name of the project was changed to urlget to better fit what it actually did now, since the http-only days were already passed. The project slowly grew bigger. When upload capabilities were added and the name once again was misleading, a second name change was made and on March 20, 1998 curl 4 was released. (The version numbering from the previous names was kept.)

(Unrelated to this project a company called Curl Corporation registered a US trademark on the name "CURL" on May 18 1998. That company had then already registered the curl.com domain back in November of the previous year. All this was revealed to us much later.)

October 1998, with the curl 4.9 release and the introduction of cookie support, curl was no longer released under the GPL license. Now we're at 4000 lines of code, we switched over to the MPL license to restrict the effects of "copyleft".

January 2001, Daniel released curl 7.5.2 under a new license again: MIT (or MPL). The MIT license is extremely liberal and can be used combined with GPL in other projects. This would finally put an end to the "complaints" from people involved in GPLed projects that previously were prohibited from using libcurl while it was released under MPL only. (Due to the fact that MPL is deemed "GPL incompatible".)

August 2001. curl is bundled in Mac OS X, 10.1. It was already becoming more and more of a standard utility of Linux distributions and a regular in the BSD ports collections. The curl web site gets 8000 visits weekly. Curl Corporation contacted Daniel to discuss "the name issue". After Daniel's reply, they have never since got in touch again.

September 2002, with the release of curl 7.10 it is released under the MIT license only.

curl-7.20.0-1.fc13.src/curl-7.20.0/curl-7.20.0/docs/curl.1
The NTLM authentication method was designed by Microsoft and is used by IIS web servers. It is a proprietary protocol, reverse-engineered by clever people and implemented in curl based on their efforts. This kind of behavior should not be endorsed, you should encourage everyone who uses NTLM to switch to a public and documented authentication method instead, such as Digest.

document version 2.60

The license and distribution terms for any publically available version or derivative of this code cannot be changed. i.e. this code cannot simply be copied and put under another distribution license [including the GNU Public License.] The reason behind this being stated in this direct manner is past experience in code simply being copied and the attribution removed from it and then being distributed as part of other packages. This implementation was a non-trivial and unpaid effort.

APPLE PUBLIC SOURCE LICENSE Version 1.1 - April 19,1999

Please read this License carefully before downloading this software. By downloading and using this software, you are agreeing to be bound by the terms of this License. If you do not or cannot agree to the terms of this License, please do not download or use the software.

1. General; Definitions. This License applies to any program or other work which Apple Computer, Inc. ("Apple") publicly announces as subject to this Apple Public Source License and which contains a notice placed by Apple identifying such program or work as "Original Code" and stating that it is subject to the terms of this Apple Public Source License version 1.1 (or subsequent version thereof), as it may be revised from time to time by Apple ("License"). As used in this License:

1.1 "Affected Original Code" means only those specific portions of Original Code that allegedly infringe upon any party's intellectual property rights or are otherwise the subject of a claim of infringement.

1.2 "Applicable Patent Rights" mean: (a) in the case where Apple is the grantor of rights, (i) claims of patents that are now or hereafter acquired, owned by or assigned to Apple and (ii) that cover subject matter contained in the Original Code, but only to the extent necessary to use, reproduce and/or distribute the Original Code without infringement; and (b) in the case where You are the grantor of rights, (i) claims of patents that are now or hereafter acquired, owned by or assigned to You and (ii) that cover subject matter in Your Modifications, taken alone or in combination with Original Code.

© 2009-2011 Wind River Systems, Inc.

document version 2.60

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

1.3 "Covered Code" means the Original Code, Modifications, the combination of Original Code and any Modifications, and/or any respective portions thereof.

1.4 "Deploy" means to use, sublicense or distribute Covered Code other than for Your internal research and development (R&D), and includes without limitation, any and all internal use or distribution of Covered Code within Your business or organization except for R&D use, as well as direct or indirect sublicensing or distribution of Covered Code by You to any third party in any form or manner.

1.5 "Larger Work" means a work which combines Covered Code or portions thereof with code not governed by the terms of this License.

1.6 "Modifications" mean any addition to, deletion from, and/or change to, the substance and/or structure of Covered Code. When code is released as a series of files, a Modification is: (a) any addition to or deletion from the contents of a file containing Covered Code; and/or (b) any new file or other representation of computer program statements that contains any part of Covered Code.

1.7 "Original Code" means (a) the Source Code of a program or other work as originally made available by Apple under this License, including the Source Code of any updates or upgrades to such programs or works made available by Apple under this License, and that has been expressly identified by Apple as such in the header file(s) of such work; and (b) the object code compiled from such Source Code and originally made available by Apple under this License.

1.8 "Source Code" means the human readable form of a program or other work that is suitable for making modifications to it, including all modules it contains, plus any associated interface definition files, scripts used to control compilation and installation of an executable (object code).

1.9 "You" or "Your" means an individual or a legal entity exercising rights under this License. For legal entities, "You" or "Your" includes any entity which controls, is controlled by, or is under common control with, You, where "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of fifty percent (50%) or more of the outstanding shares or beneficial ownership of such entity.

2. Permitted Uses; Conditions & Restrictions. Subject to the terms and conditions of this License, Apple hereby grants You, effective on the date You accept this License and download the Original Code, a world-wide, royalty-free, non-exclusive license, to the extent of Apple's Applicable Patent Rights and copyrights covering the Original Code, to do the following:

2.1 You may use, copy, modify and distribute Original Code, with or without Modifications, solely for Your internal research and development, provided that You must in each instance:

(a) retain and reproduce in all copies of Original Code the copyright and other proprietary notices and disclaimers of Apple as they appear in the Original Code, and keep intact all notices in the Original Code that refer to this License;

(b) include a copy of this License with every copy of Source Code of Covered Code and documentation You distribute, and You may not offer or impose any terms on such Source Code that alter or restrict this License or the recipients' rights hereunder, except as permitted under Section 6; and

(c) completely and accurately document all Modifications that you have made and the date of each such Modification, designate the version of the Original Code you used, prominently include a file carrying such information with the Modifications, and duplicate the notice in Exhibit A in each file of the Source Code of all such Modifications.

2.2 You may Deploy Covered Code, provided that You must in each instance:

(a) satisfy all the conditions of Section 2.1 with respect to the Source Code of the Covered Code;

(b) make all Your Deployed Modifications publicly available in Source Code form via electronic distribution (e.g. download from a web site) under the terms of this License and subject to the license grants set forth in Section 3 below, and any additional terms You may choose to offer under Section 6. You must continue to make the Source Code of Your Deployed Modifications available for as long as you Deploy the Covered Code or twelve (12) months from the date of initial Deployment, whichever is longer;

(c) if You Deploy Covered Code containing Modifications made by You, inform others of how to obtain those Modifications by filling out and submitting the information found at <http://www.apple.com/publicsource/modifications.html>, if available; and

(d) if You Deploy Covered Code in object code, executable form only, include a prominent notice, in the code itself as well as in related documentation, stating that Source Code of the Covered Code is available under the terms of this License with information on how and where to obtain such Source Code.

3. Your Grants. In consideration of, and as a condition to, the licenses granted to You under this License:

(a) You hereby grant to Apple and all third parties a non-exclusive, royalty-free license, under Your Applicable Patent Rights and other intellectual property rights owned or controlled by You, to use, reproduce, modify, distribute and Deploy Your Modifications of the same scope and extent as Apple's licenses under Sections 2.1 and 2.2; and

(b) You hereby grant to Apple and its subsidiaries a non-exclusive, worldwide, royalty-free, perpetual and irrevocable license, under Your Applicable Patent Rights and other intellectual property rights owned or controlled by You, to use, reproduce, execute, compile, display, perform, modify or have modified (for Apple and/or its subsidiaries), sublicense and distribute Your Modifications, in any form, through multiple tiers of distribution.

4. Larger Works. You may create a Larger Work by combining Covered Code with other code not governed by the terms of this License and distribute the Larger Work as a single product. In each such instance, You must make sure the requirements of this License are fulfilled for the Covered Code or any portion thereof.

5. Limitations on Patent License. Except as expressly stated in Section 2, no other patent rights, express or implied, are granted by Apple herein. Modifications and/or Larger Works may require additional patent licenses from Apple which Apple may grant in its sole discretion.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

6. Additional Terms. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations and/or other rights consistent with the scope of the license granted herein ("Additional Terms") to one or more recipients of Covered Code. However, You may do so only on Your own behalf and as Your sole responsibility, and not on behalf of Apple. You must obtain the recipient's agreement that any such Additional Terms are offered by You alone, and You hereby agree to indemnify, defend and hold Apple harmless for any liability incurred by or claims asserted against Apple by reason of any such Additional Terms.

7. Versions of the License. Apple may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Once Original Code has been published under a particular version of this License, You may continue to use it under the terms of that version. You may also choose to use such Original Code under the terms of any subsequent version of this License published by Apple. No one other than Apple has the right to modify the terms applicable to Covered Code created under this License.

8. NO WARRANTY OR SUPPORT. The Original Code may contain in whole or in part pre-release, untested, or not fully tested works. The Original Code may contain errors that could cause failures or loss of data, and may be incomplete or contain inaccuracies. You expressly acknowledge and agree that use of the Original Code, or any portion thereof, is at Your sole and entire risk.

THE ORIGINAL CODE IS PROVIDED "AS IS" AND WITHOUT WARRANTY, UPGRADES OR SUPPORT OF ANY KIND AND APPLE AND APPLE'S LICENSOR(S) (FOR THE PURPOSES OF SECTIONS 8 AND 9, APPLE AND APPLE'S LICENSOR(S) ARE COLLECTIVELY REFERRED TO AS "APPLE") EXPRESSLY DISCLAIM ALL WARRANTIES AND/OR CONDITIONS, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES AND/OR CONDITIONS OF MERCHANTABILITY OR SATISFACTORY QUALITY AND FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF THIRD PARTY RIGHTS.

APPLE DOES NOT WARRANT THAT THE FUNCTIONS CONTAINED IN THE ORIGINAL CODE WILL MEET YOUR REQUIREMENTS, OR THAT THE OPERATION OF THE ORIGINAL CODE WILL BE UNINTERRUPTED OR ERROR-FREE, OR THAT DEFECTS IN THE ORIGINAL CODE WILL BE CORRECTED. NO ORAL OR WRITTEN INFORMATION OR ADVICE GIVEN BY APPLE OR AN APPLE AUTHORIZED REPRESENTATIVE SHALL CREATE A WARRANTY OR IN ANY WAY INCREASE THE SCOPE OF THIS WARRANTY.

You acknowledge that the Original Code is not intended for use in the operation of nuclear facilities, aircraft navigation, communication systems, or air traffic control machines in which case the failure of the Original Code could lead to death, personal injury, or severe physical or environmental damage.

9. Liability.

9.1 Infringement. If any portion of, or functionality implemented by, the Original Code becomes the subject of a claim of infringement, Apple may, at its option: (a) attempt to procure the rights necessary for Apple and You to continue using the Affected Original Code; (b) modify the Affected Original Code so that it is no longer infringing; or (c) suspend Your rights to use, reproduce, modify, sublicense and distribute the Affected Original Code until a final determination of the claim is made by a court or governmental administrative agency of competent jurisdiction and Apple lifts the suspension as set forth below. Such suspension of rights will be

document version 2.60

effective immediately upon Apple's posting of a notice to such effect on the Apple web site that is used for implementation of this License.

Upon such final determination being made, if Apple is legally able, without the payment of a fee or royalty, to resume use, reproduction, modification, sublicensing and distribution of the Affected Original Code, Apple will lift the suspension of rights to the Affected Original Code by posting a notice to such effect on the Apple web site that is used for implementation of this License. If Apple suspends Your rights to Affected Original Code, nothing in this License shall be construed to restrict You, at Your option and subject to applicable law, from replacing the Affected Original Code with non-infringing code or independently negotiating for necessary rights from such third party.

9.2 LIMITATION OF LIABILITY. UNDER NO CIRCUMSTANCES SHALL APPLE BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES ARISING OUT OF OR RELATING TO THIS LICENSE OR YOUR USE OR INABILITY TO USE THE ORIGINAL CODE, OR ANY PORTION THEREOF, WHETHER UNDER A THEORY OF CONTRACT, WARRANTY, TORT (INCLUDING NEGLIGENCE), PRODUCTS LIABILITY OR OTHERWISE, EVEN IF APPLE HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES AND NOTWITHSTANDING THE FAILURE OF ESSENTIAL PURPOSE OF ANY REMEDY.

In no event shall Apple's total liability to You for all damages under this License exceed the amount of fifty dollars (\$50.00).

10. Trademarks. This License does not grant any rights to use the trademarks or trade names "Apple", "Apple Computer", "Mac OS X", "Mac OS X Server" or any other trademarks or trade names belonging to Apple (collectively "Apple Marks") and no Apple Marks may be used to endorse or promote products derived from the Original Code other than as permitted by and in strict compliance at all times with Apple's third party trademark usage guidelines which are posted at <http://www.apple.com/legal/guidelinesfor3rdparties.html>.

11. Ownership. Apple retains all rights, title and interest in and to the Original Code and any Modifications made by or on behalf of Apple ("Apple Modifications"), and such Apple Modifications will not be automatically subject to this License. Apple may, at its sole discretion, choose to license such Apple Modifications under this License, or on different terms from those contained in this License or may choose not to license them at all. Apple's development, use, reproduction, modification, sublicensing and distribution of Covered Code will not be subject to this License.

12. Termination.

12.1 Termination. This License and the rights granted hereunder will terminate:

(a) automatically without notice from Apple if You fail to comply with any term(s) of this License and fail to cure such breach within 30 days of becoming aware of such breach;

(b) immediately in the event of the circumstances described in Section 13.5(b); or

(c) automatically without notice from Apple if You, at any time during the term of this License, commence an action for patent infringement against Apple.

12.2 Effect of Termination. Upon termination, You agree to immediately stop any further use, reproduction, modification, sublicensing and

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

distribution of the Covered Code and to destroy all copies of the Covered Code that are in your possession or control. All sublicenses to the Covered Code which have been properly granted prior to termination shall survive any termination of this License. Provisions which, by their nature, should remain in effect beyond the termination of this License shall survive, including but not limited to Sections 3, 5, 8, 9, 10, 11, 12.2 and 13. Neither party will be liable to the other for compensation, indemnity or damages of any sort solely as a result of terminating this License in accordance with its terms, and termination of this License will be without prejudice to any other right or remedy of either party.

13. Miscellaneous.

13.1 Government End Users. The Covered Code is a "commercial item" as defined in FAR 2.101. Government software and technical data rights in the Covered Code include only those rights customarily provided to the public as defined in this License. This customary commercial license in technical data and software is provided in accordance with FAR 12.211 (Technical Data) and 12.212 (Computer Software) and, for Department of Defense purchases, DFAR 252.227-7015 (Technical Data -- Commercial Items) and 227.7202-3 (Rights in Commercial Computer Software or Computer Software Documentation). Accordingly, all U.S. Government End Users acquire Covered Code with only those rights set forth herein.

13.2 Relationship of Parties. This License will not be construed as creating an agency, partnership, joint venture or any other form of legal association between You and Apple, and You will not represent to the contrary, whether expressly, by implication, appearance or otherwise.

13.3 Independent Development. Nothing in this License will impair Apple's right to acquire, license, develop, have others develop for it, market and/or distribute technology or products that perform the same or similar functions as, or otherwise compete with, Modifications, Larger Works, technology or products that You may develop, produce, market or distribute.

13.4 Waiver; Construction. Failure by Apple to enforce any provision of this License will not be deemed a waiver of future enforcement of that or any other provision. Any law or regulation which provides that the language of a contract shall be construed against the drafter will not apply to this License.

13.5 Severability.

(a) If for any reason a court of competent jurisdiction finds any provision of this License, or portion thereof, to be unenforceable, that provision of the License will be enforced to the maximum extent permissible so as to effect the economic benefits and intent of the parties, and the remainder of this License will continue in full force and effect.

(b) Notwithstanding the foregoing, if applicable law prohibits or restricts You from fully and/or specifically complying with Sections 2 and/or 3 or prevents the enforceability of either of those Sections, this License will immediately terminate and You must immediately discontinue any use of the Covered Code and destroy all copies of it that are in your possession or control.

13.6 Dispute Resolution. Any litigation or other dispute resolution between You and Apple relating to this License shall take place in the Northern District of California, and You and Apple hereby consent to the personal jurisdiction of, and venue in, the state and federal courts within that District with respect to this License. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded.

document version 2.60

13.7 Entire Agreement; Governing Law. This License constitutes the entire agreement between the parties with respect to the subject matter hereof. This License shall be governed by the laws of the United States and the State of California, except that body of California law concerning conflicts of law. Where You are located in the province of Quebec, Canada, the following clause applies: The parties hereby confirm that they have requested that this License and all related documents be drafted in English. Les parties ont exigé que le présent contrat et tous les documents connexes soient rédigés en anglais.

EXHIBIT A.

"Portions **Copyright (c) 1999 Apple Computer, Inc. All Rights Reserved.**

This file contains Original Code and/or Modifications of Original Code as defined in and that are subject to the Apple Public Source License Version 1.1 (the "License"). You may not use this file except in compliance with the License. Please obtain a copy of the License at <http://www.apple.com/publicsource> and read it before using this file.

The Original Code and all software distributed under the License are distributed on an "AS IS" basis, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, AND APPLE HEREBY DISCLAIMS ALL SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. linux/development/source/SRPMS/
db4-4.8.30-1.fc14.src.rpm
Group: User Space Apps / System Environment/Libraries
Description: Berkeley DB database library (version 4) for C. The Berkeley Database (Berkeley DB) is a programmatic toolkit that provides embedded database support for both traditional and client/server applications. The Berkeley DB includes B+tree, Extended Linear Hashing, Fixed and Variable-length record access methods, transactions, locking, logging, shared memory caching, and database recovery. The Berkeley DB supports C, C++, Java, and Perl APIs. It is used by many applications, including Python and Perl, so this should be installed on all systems.
Common Usage: Library
Package Size: 153.6 MB
Folders / Files: 359 / 7,289
Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

NOTICES:

db4-4.8.30-1.fc14.src/db-4.8.30/db-4.8.30/dist/aclocal/tcl.m4

The SC_ macros in this file are from the unix/tcl.m4 files in the Tcl 8.3.0 distribution, with some minor changes. For this reason, license terms for the Berkeley DB distribution dist/aclocal/tcl.m4 file are as follows (copied from the license.terms file in the Tcl 8.3 distribution):

This software is **copyrighted by the Regents of the University of California, Sun Microsystems, Inc., Scriptics Corporation, and other parties**. The following terms apply to all files associated with the software unless explicitly disclaimed in individual files.

The authors hereby grant permission to use, copy, modify, distribute, and license this software and its documentation for any purpose, provided that existing copyright notices are retained in all copies and that this notice is included verbatim in any distributions. No written agreement, license, or royalty fee is required for any of the authorized uses. Modifications to this software may be copyrighted by their authors and need not follow the licensing terms described here, provided that the new terms are clearly indicated on the first page of each file where they apply.

IN NO EVENT SHALL THE AUTHORS OR DISTRIBUTORS BE LIABLE TO ANY PARTY FOR DIRECT, INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OF THIS SOFTWARE, ITS DOCUMENTATION, OR ANY DERIVATIVES THEREOF, EVEN IF THE AUTHORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

THE AUTHORS AND DISTRIBUTORS SPECIFICALLY DISCLAIM ANY WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NON-INFRINGEMENT. THIS SOFTWARE IS PROVIDED ON AN "AS IS" BASIS, AND THE AUTHORS AND DISTRIBUTORS HAVE NO OBLIGATION TO PROVIDE MAINTENANCE, SUPPORT, UPDATES, ENHANCEMENTS, OR MODIFICATIONS.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Here are few words taken from the Berkeley DB FAQ (at <<http://www.oracle.com/technology/products/berkeley-db/db/index.html>>) regarding the license:

Do I have to license DB to use it in Perl scripts?
No. The Berkeley DB license requires that software that uses Berkeley DB be freely redistributable. In the case of Perl, that software is Perl, and not your scripts. Any Perl scripts that you write are your property, including scripts that make use of Berkeley DB. Neither the Perl license nor the Berkeley DB license place any restriction on what you may do with them.

If you are in any doubt about the license situation, contact either the Berkeley DB authors or the author of BerkeleyDB. See <"AUTHOR"> for details. Paul Marquess pmqs@cpan.org.

This program is free software; you can redistribute it and/or modify it under the same terms as Perl itself. See
<<http://www.perl.com/perl/misc/Artistic.html>>

♦♦♦

From:

<http://www.perl.com/language/misc/Artistic.html>

Preamble

The intent of this document is to state the conditions under which a Package may be copied, such that the Copyright Holder maintains some semblance of artistic control over the development of the package, while giving the users of the package the right to use and distribute the Package in a more-or-less customary fashion, plus the right to make reasonable modifications.

Definitions

"Package" refers to the collection of files distributed by the Copyright Holder, and derivatives of that collection of files created through textual modification.

"Standard Version" refers to such a Package if it has not been modified, or has been modified in accordance with the wishes of the Copyright Holder as specified below.

"Copyright Holder" is whoever is named in the copyright or copyrights for the package.

"You" is you, if you're thinking about copying or distributing this Package.

"Reasonable copying fee" is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)

"Freely Available" means that no fee is charged for the item itself, though there may be fees involved in handling the item. It also means that recipients of the item may redistribute it under the same conditions they received it.

You may make and give away verbatim copies of the source form of the Standard Version of this Package without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.

You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Package modified in such a way shall still be considered the Standard Version.

You may otherwise modify your copy of this Package in any way, provided that you insert a prominent notice in each changed file stating how and when you changed that file, and provided that you do at least ONE of the following:

place your modifications in the Public Domain or otherwise make them Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or placing the modifications on a major archive site such as uunet.uu.net, or by allowing the Copyright Holder to include your modifications in the Standard Version of the Package.

use the modified Package only within your corporation or organization.

rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide a

separate manual page for each non-standard executable that clearly documents how it differs from the Standard Version.

make other distribution arrangements with the Copyright Holder.

You may distribute the programs of this Package in object code or executable form, provided that you do at least ONE of the following:

distribute a Standard Version of the executables and library files, together with instructions (in the manual page or equivalent) on where to get the Standard Version.

accompany the distribution with the machine-readable source of the Package with your modifications.

give non-standard executables non-standard names, and clearly document the differences in manual pages (or equivalent), together with instructions on where to get the Standard Version.

make other distribution arrangements with the Copyright Holder.

You may charge a reasonable copying fee for any distribution of this Package. You may charge any fee you choose for support of this Package. You may not charge a fee for this Package itself. However, you may distribute this Package in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution provided that you do not advertise this Package as a product of your own. You may embed this Package's interpreter within an executable of yours (by linking); this shall be construed as a mere form of aggregation, provided that the complete Standard Version of the interpreter is so embedded.

The scripts and library files supplied as input to or produced as output from the programs of this Package do not automatically fall under the copyright of this Package, but belong to whomever generated them, and may be sold commercially, and may be aggregated with this Package. If such scripts or library files are aggregated with this Package via the so-called "undump" or "unexec" methods of producing a binary executable image, then distribution of such an image shall neither be construed as a distribution of this Package nor shall it fall under the restrictions of Paragraphs 3 and 4, provided that you do not represent such an executable image as a Standard Version of this Package.

C subroutines (or comparably compiled subroutines in other languages) supplied by you and linked into this Package in order to emulate subroutines and variables of the language defined by this Package shall not be considered part of this Package, but are the equivalent of input as in Paragraph 6, provided these subroutines do not change the language in any way that would cause it to fail the regression tests for the language.

Aggregation of this Package with a commercial distribution is always permitted provided that the use of this Package is embedded; that is, when no overt attempt is made to make this Package's interfaces visible to the end user of the commercial distribution. Such use shall not be construed as a distribution of this Package.

The name of the Copyright Holder may not be used to endorse or promote products derived from this software without specific prior written permission.

THIS PACKAGE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE

CodePlex: Terms of Use

ACCEPTANCE OF TERMS.

The services that Microsoft provides to you are subject to the following Terms of Use ("TOU"). Microsoft reserves the right to update the TOU at any time without notice to you. The most current version of the TOU can be reviewed by clicking on the "Terms of Use" hypertext link located at the bottom of our Web pages. By accessing or using the CodePlex web site in any way, including using any Services, downloading Materials, contributing to a Project or merely browsing the CodePlex web site, you agree to and are bound by the terms of this TOU. If you do not agree to all of the terms and conditions contained in the TOU, do not access or use the CodePlex web site.

DESCRIPTION OF SERVICES.

Throughout this Web site, Microsoft provides you with access to a variety of resources, including download areas, communication forums and product information (collectively "Services"). The Services, including any updates, enhancements, and/or new features, are subject to the TOU.

PRIVACY AND PROTECTION OF PERSONAL INFORMATION.

See the Privacy Statement disclosures relating to the collection and use of your information.

NOTICE SPECIFIC TO SOFTWARE AVAILABLE ON THIS WEB SITE.

Any software that is made available to download from the Services ("Software") is the copyrighted work of the registered users of the Services posting the Software, or their suppliers. Use of the Software is governed by the terms of the end user license agreement, if any, which accompanies or is included with the Software ("License Agreement"). An end user will be unable to download any Software that is accompanied by or includes a License Agreement, unless he or she first agrees to the License Agreement terms. The Software is made available for download solely for use by end users according to the License Agreement. Any reproduction or redistribution of the Software not in accordance with the License Agreement is expressly prohibited by law.

WITHOUT LIMITING THE FOREGOING, COPYING OR REPRODUCTION OF THE SOFTWARE TO ANY OTHER SERVER OR LOCATION FOR FURTHER REPRODUCTION OR REDISTRIBUTION IS EXPRESSLY PROHIBITED, UNLESS SUCH REPRODUCTION OR REDISTRIBUTION IS EXPRESSLY PERMITTED BY THE LICENSE AGREEMENT ACCOMPANYING SUCH SOFTWARE.

THE SOFTWARE IS WARRANTED, IF AT ALL, ONLY ACCORDING TO THE TERMS OF THE LICENSE AGREEMENT. EXCEPT AS WARRANTED DIRECTLY BY MICROSOFT IN THE LICENSE AGREEMENT, MICROSOFT CORPORATION HEREBY DISCLAIMS ALL WARRANTIES AND CONDITIONS WITH REGARD TO THE SOFTWARE, INCLUDING ALL WARRANTIES AND CONDITIONS OF MERCHANTABILITY, WHETHER EXPRESS, IMPLIED OR STATUTORY, FITNESS FOR A PARTICULAR PURPOSE, TITLE AND NON-INFRINGEMENT.

PERFORMANCE OF INFORMATION AVAILABLE FROM THE SERVICES. THE DOCUMENTS AND RELATED GRAPHICS PUBLISHED ON THE SERVICES COULD INCLUDE TECHNICAL INACCURACIES OR TYPOGRAPHICAL ERRORS. CHANGES ARE PERIODICALLY ADDED TO THE INFORMATION HEREIN. MICROSOFT AND/OR ITS RESPECTIVE SUPPLIERS MAY MAKE IMPROVEMENTS AND/OR CHANGES IN THE PRODUCT(S) AND/OR THE PROGRAM(S) DESCRIBED HEREIN AT ANY TIME. NOTICES REGARDING SOFTWARE, DOCUMENTS AND SERVICES AVAILABLE ON THIS WEB SITE

IN NO EVENT SHALL MICROSOFT AND/OR ITS RESPECTIVE SUPPLIERS BE LIABLE FOR ANY SPECIAL, INDIRECT OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF SOFTWARE, DOCUMENTS, PROVISION OF OR FAILURE TO PROVIDE SERVICES, OR INFORMATION AVAILABLE FROM THE SERVICES.

MEMBER ACCOUNT, PASSWORD, AND SECURITY.

If any of the Services requires you to open an account, you must complete the registration process by providing us with current, complete and accurate information as prompted by the applicable registration form. You also will choose a password and a user name. You are entirely responsible for maintaining the confidentiality of your password and account. Furthermore, you are entirely responsible for any and all activities that occur under your account. You agree to notify Microsoft immediately of any unauthorized use of your account or any other breach of security. Microsoft will not be liable for any loss that you may incur as a result of someone else using your password or account, either with or without your knowledge. However, you could be held liable for losses incurred by Microsoft or another party due to someone else using your account or password. You may not use anyone else's account at any time, without the permission of the account holder.

NO UNLAWFUL OR PROHIBITED USE.

As a condition of your use of the Services, you will not use the Services for any purpose that is unlawful or prohibited by these terms, conditions, and notices. You may not use the Services in any manner that could damage, disable, overburden, or impair any Microsoft server, or the network(s) connected to any Microsoft server, or interfere with any other party's use and enjoyment of any Services. You may not attempt to gain unauthorized access to any Services, other accounts, computer systems or networks connected to any Microsoft server or to any of the Services, through hacking, password mining or any other means. You may not obtain or attempt to obtain any materials or information through any means not intentionally made available through the Services.

USE OF SERVICES.

The Services may contain email services, bulletin board services, chat areas, news groups, forums, communities, and/or other message or communication facilities designed to enable you to communicate with others (each a "Communication Service" and collectively "Communication Services"). You agree to use the Communication Services only to post, send and receive messages and material that are proper and, when applicable, related to the particular Communication Service. By way of example, and not as a limitation, you agree that when using the Communication Services, you will not:

Use the Communication Services in connection with surveys, contests, pyramid schemes, chain letters, junk email,

spamming or any duplicative or unsolicited messages (commercial or otherwise).

Defame, abuse, harass, stalk, threaten or otherwise violate the legal rights (such as rights of privacy and publicity) of others.

Publish, post, upload, distribute or disseminate any inappropriate, profane, defamatory, obscene, indecent or unlawful topic, name, material or information.

Use any material or information, including images or photographs, which are made available through the Services in any manner that infringes any copyright, trademark, patent, trade secret, or other proprietary right of any party.

Upload files that contain viruses, Trojan horses, worms, time bombs, cancelbots, corrupted files, or any other similar software or programs that may damage the operation of another's computer or property of another.

Advertise or offer to sell or buy any goods or services for any business purpose, unless such Communication Services specifically allows such messages.

Download any file posted by another user of a Communication Service that you know, or reasonably should know, cannot be legally reproduced, displayed, performed, and/or distributed in such manner.

Falsify or delete any copyright management information, such as author attributions, legal or other proper notices or proprietary designations or labels of the origin or source of software or other material contained in a file that is uploaded.

Restrict or inhibit any other user from using and enjoying the Communication Services.

Violate any code of conduct or other guidelines which may be applicable for any particular Communication Service.

Harvest or otherwise collect information about others, including email addresses.

Violate any applicable laws or regulations.

Create a false identity for the purpose of misleading others.

Use, download or otherwise copy, or provide (whether or not for a fee) to a person or entity any directory of users of the Services or other user or usage information or any portion thereof.

Microsoft has no obligation to monitor the Communication Services. However, Microsoft reserves the right to review materials posted to the Communication Services and to remove any materials in its sole discretion. Microsoft reserves the right to terminate your access to any or all of the Communication Services at any time, without notice, for any reason whatsoever.

Microsoft reserves the right at all times to disclose any information as Microsoft deems necessary to satisfy any applicable law, regulation, legal process or governmental request, or to edit, refuse to post or to remove any information or materials, in whole or in part, in Microsoft's sole discretion.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

Always use caution when giving out any personally identifiable information about yourself or your children in any Communication Services. Microsoft does not control or endorse the content, messages or information found in any Communication Services and, therefore, Microsoft specifically disclaims any liability with regard to the Communication Services and any actions resulting from your participation in any Communication Services. Managers and hosts are not authorized Microsoft spokespersons, and their views do not necessarily reflect those of Microsoft.

Materials uploaded to the Communication Services may be subject to posted limitations on usage, reproduction and/or dissemination; you are responsible for adhering to such limitations if you download the materials.

MATERIALS PROVIDED TO MICROSOFT OR POSTED AT ANY MICROSOFT WEB SITE.

Microsoft does not claim ownership of the materials you provide to Microsoft (including feedback and suggestions regarding CodePlex or other Microsoft material posted on the site) or post, upload, input or submit to any Services or its associated services for review by the general public, or by the members of any public or private community, (each a "Submission" and collectively "Submissions"). However, by posting, uploading, inputting, providing or submitting ("Posting") your Submission you understand and agree that you're giving a license under your intellectual property rights to all authorized users, including the rights to download, copy, modify, distribute and repost, unless the project licenses specify otherwise. In addition, you're giving Microsoft all the necessary rights to make your Submission(s) available on this site and to make improvements to the CodePlex site based on your suggestions. Microsoft does not control, review, revise, endorse or distribute third-party Submissions. Microsoft is hosting the CodePlex site solely as a web storage site as a service to the developer community.

No compensation will be paid with respect to the use of your Submission, as provided herein. Microsoft is under no obligation to post or use any Submission you may provide and Microsoft may remove any Submission at any time in its sole discretion.

By Posting a Submission you warrant and represent that you own or otherwise control all of the rights to your Submission as described in these Terms of Use including, without limitation, all the rights necessary for you to provide, post, upload, input or submit the Submissions.

In addition to the warranty and representation set forth above, by Posting a Submission that contain images, photographs, pictures or that are otherwise graphical in whole or in part ("Images"), you warrant and represent that (a) you are the copyright owner of such Images, or that the copyright owner of such Images has granted you permission to use such Images or any content and/or images contained in such Images consistent with the manner and purpose of your use and as otherwise permitted by these Terms of Use and the Services, (b) you have the rights necessary to grant the licenses and sublicenses described in these Terms of Use, and (c) that each person depicted in such Images, if any, has provided consent to the use of the Images as set forth in these Terms of Use, including, by way of example, and not as a limitation, the distribution, public display and reproduction of such Images. By Posting Images, you are granting (a) to all members of your private community (for each such Images available to members of such private community), and/or (b) to the general public (for each such Images available anywhere on the Services, other than a private community), permission to use your Images in connection with the use, as permitted by these Terms of Use, of any of the Services, (including, by way of example, and not as a limitation, making prints and gift items which include such

dbus-1.2.16-9.fc12.src/dbus-1.2.16/dbus-1.2.16/copying

Copyright (C) 1989, 1991 Free Software Foundation, Inc.

[Above file contains a full copy of the GNU General Public License version 2 (GPLv2). A copy of the GPLv2 can be found in the addendum of this document.]

D-Bus is licensed to you under your choice of the Academic Free License version 2.1, or the GNU General Public License version 2. Both licenses are included here. Some of the standalone binaries are under the GPL only; in particular, but not limited to, `tools/dbus-cleanup-sockets.c` and `test/decode-gcov.c`. Each source code file is marked with the proper copyright information - if you find a file that isn't marked please bring it to our attention.

The Academic Free License v. 2.1

This Academic Free License (the "License") applies to any original work of authorship (the "Original Work") whose owner (the "Licensor") has placed the following notice immediately following the copyright notice for the Original Work:

Licensed under the Academic Free License version 2.1

1) Grant of Copyright License. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, sublicenseable license to do the following:

- a) to reproduce the Original Work in copies;
- b) to prepare derivative works ("Derivative Works") based upon the Original Work;
- c) to distribute copies of the Original Work and Derivative Works to the public;
- d) to perform the Original Work publicly; and
- e) to display the Original Work publicly.

2) Grant of Patent License. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, sublicenseable license, under patent claims owned or controlled by the Licensor that are embodied in the Original Work as furnished by the Licensor, to make, use, sell and offer for sale the Original Work and Derivative Works.

3) Grant of Source Code License. The term "Source Code" means the preferred form of the Original Work for making modifications to it and all available documentation describing how to modify the Original Work. Licensor hereby agrees to provide a machine-readable copy of the Source Code of the Original Work along with each copy of the Original Work that Licensor distributes.

Licensor reserves the right to satisfy this obligation by placing a machine-readable copy of the Source Code in an information repository reasonably calculated to permit inexpensive and convenient access by You for as long as Licensor continues to distribute the Original Work, and by publishing the address of that information repository in a notice immediately following the copyright notice that applies to the Original Work.

4) Exclusions From License Grant. Neither the names of Licensor, nor the names of any contributors to the Original Work, nor any of their trademarks or service marks, may be used to endorse or promote products derived from this Original Work without express prior written permission of the Licensor. Nothing in this License shall be deemed to grant any rights to trademarks, copyrights, patents, trade secrets or any other intellectual property of Licensor except as expressly stated herein.

© 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

No patent license is granted to make, use, sell or offer to sell embodiments of any patent claims other than the licensed claims defined in Section 2. No right is granted to the trademarks of Licensor even if such marks are included in the Original Work. Nothing in this License shall be interpreted to prohibit Licensor from licensing under different terms from this License any Original Work that Licensor otherwise would have a right to license.

5) This section intentionally omitted.

6) Attribution Rights. You must retain, in the Source Code of any Derivative Works that You create, all copyright, patent or trademark notices from the Source Code of the Original Work, as well as any notices of licensing and any descriptive text identified therein as an "Attribution Notice." You must cause the Source Code for any Derivative Works that You create to carry a prominent Attribution Notice reasonably calculated to inform recipients that You have modified the Original Work.

7) Warranty of Provenance and Disclaimer of Warranty. Licensor warrants that the copyright in and to the Original Work and the patent rights granted herein by Licensor are owned by the Licensor or are sublicensed to You under the terms of this License with the permission of the contributor(s) of those copyrights and patent rights.

Except as expressly stated in the immediately preceding sentence, the Original Work is provided under this License on an "AS IS" BASIS and WITHOUT WARRANTY, either express or implied, including, without limitation, the warranties of NON-INFRINGEMENT, MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY OF THE ORIGINAL WORK IS WITH YOU. This DISCLAIMER OF WARRANTY constitutes an essential part of this License. No license to Original Work is granted hereunder except under this disclaimer.

8) Limitation of Liability. Under no circumstances and under no legal theory, whether in tort (including negligence), contract, or otherwise, shall the Licensor be liable to any person for any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or the use of the Original Work including, without limitation, damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses. This limitation of liability shall not apply to liability for death or personal injury resulting from Licensor's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

9) Acceptance and Termination. If You distribute copies of the Original Work or a Derivative Work, You must make a reasonable effort under the circumstances to obtain the express assent of recipients to the terms of this License. Nothing else but this License (or another written agreement between Licensor and You) grants You permission to create Derivative Works based upon the Original Work or to exercise any of the rights granted in Section 1 herein, and any attempt to do so except under the terms of this License (or another written agreement between Licensor and You) is expressly prohibited by U.S. copyright law, the equivalent laws of other countries, and by international treaty. Therefore, by exercising any of the rights granted to You in Section 1 herein, You indicate Your acceptance of this License and all of its terms and conditions.

10) Termination for Patent Action. This License shall terminate automatically and You may no longer exercise any of the rights granted

document version 2.60

to You by this License as of the date You commence an action, including a cross-claim or counterclaim, against Licensor or any licensee alleging that the Original Work infringes a patent. This termination provision shall not apply for an action alleging patent infringement by combinations of the Original Work with other software or hardware.

11) Jurisdiction, Venue and Governing Law. Any action or suit relating to this License may be brought only in the courts of a jurisdiction wherein the Licensor resides or in which Licensor conducts its primary business, and under the laws of that jurisdiction excluding its conflict-of-law provisions. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any use of the Original Work outside the scope of this License or after its termination shall be subject to the requirements and penalties of the U.S. Copyright Act, 17 U.S.C. §101 et seq., the equivalent laws of other countries, and international treaty. This section shall survive the termination of this License.

12) Attorneys Fees. In any action to enforce the terms of this License or seeking damages relating thereto, the prevailing party shall be entitled to recover its costs and expenses, including, without limitation, reasonable attorneys' fees and costs incurred in connection with such action, including any appeal of such action. This section shall survive the termination of this License.

13) Miscellaneous. This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

14) Definition of "You" in This License. "You" throughout this License, whether in upper or lower case, means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with you. For purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

15) Right to Use. You may use the Original Work in all ways not otherwise restricted or conditioned by this License or by law, and Licensor promises not to interfere with or be responsible for such uses by You.

This license is
Copyright (C) 2003-2004 Lawrence E. Rosen. All rights reserved.

Permission is hereby granted to copy and distribute this license without modification. This license may not be modified without the express written permission of its copyright owner.

END OF ACADEMIC FREE LICENSE.

The following is intended to describe the essential differences between the Academic Free License (AFL) version 1.0 and other open source licenses:

The Academic Free License is similar to the BSD, MIT, UoI/NCSA and Apache licenses in many respects but it is intended to solve a few problems with those licenses.

The AFL is written so as to make it clear what software is being licensed (by the inclusion of a statement following the copyright notice in the

software). This way, the license functions better than a template license. The BSD, MIT and UoI/NCSA licenses apply to unidentified software.

The AFL contains a complete copyright grant to the software. The BSD and Apache licenses are vague and incomplete in that respect.

The AFL contains a complete patent grant to the software. The BSD, MIT, UoI/NCSA and Apache licenses rely on an implied patent license and contain no explicit patent grant.

The AFL makes it clear that no trademark rights are granted to the licensor's trademarks. The Apache license contains such a provision, but the BSD, MIT and UoI/NCSA licenses do not.

The AFL includes the warranty by the licensor that it either owns the copyright or that it is distributing the software under a license. None of the other licenses contain that warranty. All other warranties are disclaimed, as is the case for the other licenses.

The AFL is itself copyrighted (with the right granted to copy and distribute without modification). This ensures that the owner of the copyright to the license will control changes. The Apache license contains a copyright notice, but the BSD, MIT and UoI/NCSA licenses do not.

dbus-glib 0.82-2

Software: dbus-glib
Version: 0.82-2

document version 2.60

File or Package: dbus-glib-0.82-2.fc12.src.rpm
OSI Licenses: GPLv2, GPLv2+, GPLv2+ w/exception, Academic Free v2.1, MIT/X11
Other Licenses: Custom
URL: <http://download.fedora.redhat.com/pub/fedora/linux/releases/12/Everything/source/SRPMS/dbus-glib-0.82-2.fc12.src.rpm>
Group: User Space Libraries/System Environment/Libraries
Description: GLib bindings for D-Bus. D-BUS is a simple IPC library based on messages. D-Bus add-on library to integrate the standard D-Bus library with the GLib thread abstraction and main loop. D-BUS is a message bus, used for sending messages between applications. Conceptually, it fits somewhere in between raw sockets and CORBA in terms of complexity. D-BUS supports broadcast messages, asynchronous messages (thus decreasing latency), authentication, and more. It is designed to be low-overhead; messages are sent using a binary protocol, not using XML. D-BUS also supports a method call mapping for its messages, but it is not required; this makes using the system quite simple.
Common Usage: Library
Package Size: 4.8 MB
Folders / Files: 18 / 196
Source Path: wrlinux-4.0/layers/wrll-userspace/core/packages

NOTICES:

From:
 dbus-glib-0.82-2.fc12.src/dbus-glib-0.82/dbus-glib-0.82/copying
Copyright (C) 1989, 1991 Free Software Foundation, Inc.
[Above file contains a full copy of the GNU General Public License version 2 (GPLv2). A copy of the GPLv2 can be found in the addendum of this document.]

The D-Bus glib bindings are licensed to you under your choice of the Academic Free License version 2.1, or the GNU General Public License version 2. Both licenses are included here. Some of the standalone binaries are under the GPL only; in particular, but not limited to, tests/decode-gcov.c. Each source code file is marked with the proper copyright information.

The Academic Free License v. 2.1

This Academic Free License (the "License") applies to any original work of authorship (the "Original Work") whose owner (the "Licensor") has placed the following notice immediately following the copyright notice for the Original Work:

Licensed under the Academic Free License version 2.1

1) Grant of Copyright License. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, sublicenseable license to do the following:

- a) to reproduce the Original Work in copies;
- b) to prepare derivative works ("Derivative Works") based upon the Original Work;
- c) to distribute copies of the Original Work and Derivative Works to the public;
- d) to perform the Original Work publicly; and
- e) to display the Original Work publicly.

2) Grant of Patent License. Licensor hereby grants You a world-wide, royalty-free, non-exclusive, perpetual, sublicenseable license, under © 2009-2011 Wind River Systems, Inc.

This information is provided for convenience only, to provide a general overview of our base product offering in a user-friendly format. It does not contain information for the build system, toolchain, board support packages or device drivers. This document is provided "as is" without any warranty whatsoever. This documentation may not be referenced or relied upon for its accuracy or comprehensiveness, or to determine legal obligations with respect to open source code contained in our products. Such determinations should be based upon recipient's independent legal analysis and by reference to the notices and licenses contained within the open source code itself. Wind River may change the contents of this document at any time at its sole discretion, and Wind River shall have no liability whatsoever arising from recipient's use of this information.

WIND RIVER CONFIDENTIAL INFORMATION. Recipient of the following materials shall protect Discloser's Confidential Information using the same degree of care, but no less than reasonable care, to prevent the unauthorized use or dissemination of the Confidential Information.

patent claims owned or controlled by the Licensor that are embodied in the Original Work as furnished by the Licensor, to make, use, sell and offer for sale the Original Work and Derivative Works.

3) Grant of Source Code License. The term "Source Code" means the preferred form of the Original Work for making modifications to it and all available documentation describing how to modify the Original Work. Licensor hereby agrees to provide a machine-readable copy of the Source Code of the Original Work along with each copy of the Original Work that Licensor distributes.

Licensor reserves the right to satisfy this obligation by placing a machine-readable copy of the Source Code in an information repository reasonably calculated to permit inexpensive and convenient access by You for as long as Licensor continues to distribute the Original Work, and by publishing the address of that information repository in a notice immediately following the copyright notice that applies to the Original Work.

4) Exclusions From License Grant. Neither the names of Licensor, nor the names of any contributors to the Original Work, nor any of their trademarks or service marks, may be used to endorse or promote products derived from this Original Work without express prior written permission of the Licensor. Nothing in this License shall be deemed to grant any rights to trademarks, copyrights, patents, trade secrets or any other intellectual property of Licensor except as expressly stated herein.

No patent license is granted to make, use, sell or offer to sell embodiments of any patent claims other than the licensed claims defined in Section 2. No right is granted to the trademarks of Licensor even if such marks are included in the Original Work. Nothing in this License shall be interpreted to prohibit Licensor from licensing under different terms from this License any Original Work that Licensor otherwise would have a right to license.

5) This section intentionally omitted.

6) Attribution Rights. You must retain, in the Source Code of any Derivative Works that You create, all copyright, patent or trademark notices from the Source Code of the Original Work, as well as any notices of licensing and any descriptive text identified therein as an "Attribution Notice." You must cause the Source Code for any Derivative Works that You create to carry a prominent Attribution Notice reasonably calculated to inform recipients that You have modified the Original Work.

7) Warranty of Provenance and Disclaimer of Warranty. Licensor warrants that the copyright in and to the Original Work and the patent rights granted herein by Licensor are owned by the Licensor or are sublicensed to You under the terms of this License with the permission of the contributor(s) of those copyrights and patent rights.

Except as expressly stated in the immediately proceeding sentence, the Original Work is provided under this License on an "AS IS" BASIS and WITHOUT WARRANTY, either express or implied, including, without limitation, the warranties of NON-INFRINGEMENT, MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY OF THE ORIGINAL WORK IS WITH YOU. This DISCLAIMER OF WARRANTY constitutes an essential part of this License. No license to Original Work is granted hereunder except under this disclaimer.

8) Limitation of Liability. Under no circumstances and under no legal theory, whether in tort (including negligence), contract, or otherwise, shall the Licensor be liable to any person for any direct, indirect, special,

document version 2.60

incidental, or consequential damages of any character arising as a result of this License or the use of the Original Work including, without limitation, damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses. This limitation of liability shall not apply to liability for death or personal injury resulting from Licensor's negligence to the extent applicable law prohibits such limitation. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so this exclusion and limitation may not apply to You.

9) Acceptance and Termination. If You distribute copies of the Original Work or a Derivative Work, You must make a reasonable effort under the circumstances to obtain the express assent of recipients to the terms of this License. Nothing else but this License (or another written agreement between Licensor and You) grants You permission to create Derivative Works based upon the Original Work or to exercise any of the rights granted in Section 1 herein, and any attempt to do so except under the terms of this License (or another written agreement between Licensor and You) is expressly prohibited by U.S. copyright law, the equivalent laws of other countries, and by international treaty. Therefore, by exercising any of the rights granted to You in Section 1 herein, You indicate Your acceptance of this License and all of its terms and conditions.

10) Termination for Patent Action. This License shall terminate automatically and You may no longer exercise any of the rights granted to You by this License as of the date You commence an action, including a cross-claim or counterclaim, against Licensor or any licensee alleging that the Original Work infringes a patent. This termination provision shall not apply for an action alleging patent infringement by combinations of the Original Work with other software or hardware.

11) Jurisdiction, Venue and Governing Law. Any action or suit relating to this License may be brought only in the courts of a jurisdiction wherein the Licensor resides or in which Licensor conducts its primary business, and under the laws of that jurisdiction excluding its conflict-of-law provisions. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any use of the Original Work outside the scope of this License or after its termination shall be subject to the requirements and penalties of the U.S. Copyright Act, 17 U.S.C. §101 et seq., the equivalent laws of other countries, and international treaty. This section shall survive the termination of this License.

12) Attorneys Fees. In any action to enforce the terms of this License or seeking damages relating thereto, the prevailing party shall be entitled to recover its costs and expenses, including, without limitation, reasonable attorneys' fees and costs incurred in connection with such action, including any appeal of such action. This section shall survive the termination of this License.

13) Miscellaneous. This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

14) Definition of "You" in This License. "You" throughout this License, whether in upper or lower case, means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with you. For purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise,

or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

15) Right to Use. You may use the Original Work in all ways not otherwise restricted or conditioned by this License or by law, and Licensor promises not to interfere with or be responsible for such uses by You.

This license is

Copyright (C) 2003-2004 Lawrence E. Rosen. All rights reserved.

Permission is hereby granted to copy and distribute this license without modification. This license may not be modified without the express written permission of its copyright owner.

END OF ACADEMIC FREE LICENSE.

The following is intended to describe the essential differences between the Academic Free License (AFL) version 1.0 and other open source licenses:

The Academic Free License is similar to the BSD, MIT, UoI/NCSA and Apache licenses in many respects but it is intended to solve a few problems with those licenses.

The AFL is written so as to make it clear what software is being licensed (by the inclusion of a statement following the copyright notice in the software). This way, the license functions better than a template license. The BSD, MIT and UoI/NCSA licenses apply to unidentified software.

The AFL contains a complete copyright grant to the software. The BSD and Apache licenses are vague and incomplete in that respect.

The AFL contains a complete patent grant to the software. The BSD, MIT, UoI/NCSA and Apache licenses rely on an implied patent license and contain no explicit patent grant.

The AFL makes it clear that no trademark rights are granted to the licensor's trademarks. The Apache license contains such a provision, but the BSD, MIT and UoI/NCSA licenses do not.

The AFL includes the warranty by the licensor that it either owns the copyright or that it is distributing the software under a license. None of the other licenses contain that warranty. All other warranties are disclaimed, as is the case for the other licenses.

The AFL is itself copyrighted (with the right granted to copy and distribute without modification). This ensures that the owner of the copyright to the license will control changes. The Apache license contains a copyright notice, but the BSD, MIT and UoI/NCSA licenses do not.

From:
dbus-python-0.83.0-6.fc12.src/dbus-python-0.83.0/dbus-python-0.83.0/copying

As of version 0.82.4, dbus-python is released under the following permissive non-copyleft license (the same one used for D-Bus core):

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions: The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT.

IN NO EVENT SHALL THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

Copyright holders and licensing are indicated in the source files.

device-mapper-multipath 0.4.9-14

Software: device-mapper-multipath

Version: 0.4.9-14

File or Package: device-mapper-multipath-0.4.9-14.fc13.src.rpm

OSI Licenses: GPLv2, GPLv2+, LGPLv2, Public Domain

Other Licenses: Custom

URL:

Group: User Space Libraries/System Environment/Base/Utilities/System

Description: The Device-mapper is a component of the 2.6 linux kernel that supports logical volume management. It is required by LVM2 and EVMS. The original LVM (included in stock 2.4 kernels) does not use it. Utilities to manage multipath devices. In the Linux kernel, the device-mapper serves as a generic framework to map one block device onto another. It forms the foundation of LVM2 and EVMS, software RAIDs, dm-crypt disk

document version 2.60

encryption, and offers additional features such as file-system snapshots.

Common Usage: Daemon, Docs, Driver, Library, Tool, Utility

Group:	User Space Libraries / User Space Apps / System Environment / Daemons
Description:	(Dynamic Host Configuration Protocol) server and relay agent. DHCP (Dynamic Host Configuration Protocol) is a protocol which allows individual devices on an IP network to get their own network configuration information (IP address, subnetmask, broadcast address, etc.) from a DHCP server. The overall purpose of DHCP is to make it easier to administer a large network. The dhcp package includes the ISC DHCP service and relay agent. Dynamic Host Configuration Protocol (DHCP) is a network application protocol used by devices (DHCP clients) to obtain configuration information for operation in an Internet Protocol network. This protocol reduces system administration workload, allowing devices to be added to the network with little or no manual intervention.
Common Usage:	API, Docs, Library, Client, Daemon, Server

NOTICES:

From:

dhcp-4.2.1-4.P1.fc15.src/dhcp.spec

Summary: Dynamic host configuration protocol software

Name: dhcp

Version: 4.2.1

Release: 4.0%{patchver}%{?dist}

NEVER CHANGE THE EPOCH on this package. The previous maintainer (prior to dcantrell maintaining the package) made incorrect use of the epoch and that's why it is at 12 now. It should have never been used, but it was. So we are stuck with it.

Epoch: 12

License: ISC

document version 2.60

Group: System Environment/Daemons
URL: <http://isc.org/products/DHCP/>
Source0: <ftp://ftp.isc.org/isc/dhcp/dhcp-%{VERSION}.tar.gz>

Description - DHCP (Dynamic Host Configuration Protocol) is a protocol which allows individual devices on an IP network to get their own network configuration information (IP address, subnetmask, broadcast address, etc.) from a DHCP server. The overall purpose of DHCP is to make it easier to administer a large network. The dhcp package includes the ISC DHCP service and relay agent. To use DHCP on your network, install a DHCP service (or relay agent), and on clients run a DHCP client daemon. The dhcp package provides the ISC DHCP service and relay agent.
