## SPAR Release Page

There are two different methods for upgrading to the .073.xxx.xxx.xxxxx versions of software:

- 1 - Manual Upgrade (CWIS).
- 2 - The Software Upgrade Tool (new).

The manual upgrade method is unchanged from previous versions and uses CentreWare Internet Services (CWIS). It is important to follow the instructions to ensure the machine is configured correctly after the upgrade.

The new Software Upgrade Tool was created to simplify the process of upgrading from either an 071.xxx.xxx.xxxxx or 072.xxx.xxx.xxxxx release to an 073.xxx.xxx.xxxxx release. This is a Java based tool that will query the device being upgraded and submit the appropriate files in the correct order.

**ALERT! Print and keep a configuration report for reference until after the software update has been completed.**

	I Have Version:	Upgrade Option	Link to Software Upgrade Files
1	071.xxx.xxx.xxxxx	<b><u>Manual Upgrade*</u></b> from an 071.xxx version requires the application of a pre-upgrade patch, an 072.xxx release, a 2 <sup>nd</sup> pre-upgrade patch, then an upgrade to the 073.xxx release.	<a href="#">071-073 Upgrade Files</a> (~1000MB)
2	072.xxx.xxx.xxxxx	<b><u>Manual Upgrade*</u></b> from an 072.xxx version requires the application of a pre-upgrade patch then an upgrade to the 073.xxx release.	<a href="#">072-073 Upgrade Files</a> (~500MB)
3	073.xxx.xxx.xxxxx	<b><u>Manual Upgrade*</u></b> from an 073.xxx version requires just the upgrade to the 073.xxx release.	<a href="#">073-073 Upgrade Files</a> (~500MB)
4	071.xxx or 072.xxx	<b><u>Software Upgrade Tool</u></b> will submit all the necessary files in the proper order to ensure a machine at any 071.xxx or 072.xxx version is upgraded to the 073.xxx release.	<a href="#">SW Upgrade Tool</a> (~1000MB)

**\*Ensure you follow the upgrade instructions and use the supplied pre-upgrade patches as directed. Failure to do so may cause issues after the upgrade completes.**

### Print a Configuration Page

#### From the local user interface

1. Press the [Machine Status button] on the Control Panel.
2. Select the [Machine Information] tab.
3. Select [Information Pages], then [Configuration Report], and then [Print].
4. Select [Close] after the report prints

#### From the web interface

1. Enter the device ip number of host name in a web browser address link.
2. On the Status Tab, select Configuration Report.
3. Select Print Configuration Page.
