

## **Xerox Phaser 7400 Firmware Update**

### **Technical Change Notes**

November 18, 2005

This firmware update improves printer usability and reliability by addressing problems that were discovered after the initial introduction of the product. This firmware update is recommended for all customers, but it is not mandatory. New printers and replacement logic boards have this updated firmware preinstalled.

This firmware update is delivered in a PostScript file, listed in the table below:

<b>File name</b>	<b>Description</b>
Phaser7400_FW_Update.ps	Updates the printer's <u>OS</u> (operating system), <u>PS</u> (PostScript), and <u>Net</u> (Network) firmware

This document describes the changes in the updated firmware from the original firmware release version. The firmware versions are:

<b>Release Date</b>	<b>Description</b>	<b>Version Numbers</b>
August, 2005	Original Release	OS 6.16 / PS 3.9.0 / Net 25.30.08.19.2005
October, 2005	Updated Firmware Release	OS 6.26 / PS 4.2.0 / Net 25.72.10.07.2005

See the “[Installation Instructions for Xerox Phaser Printer Firmware Updates](#)” document in the file “Installation Instructions.pdf” that is included in the maintenance release package for detailed instructions on how to install the printer firmware update.

No printer settings are changed by installing this update.

**Xerox Phaser 7400 Color Laser Printer**  
**Maintenance Firmware Release Change Notes**

**Postscript Firmware Changes:**

Item No.	Affected Feature/ Problem Description
<b>1.</b>	<b>Job Accounting reports toner usage in the wrong columns for some combinations of standard and hi-capacity toners</b>
Details	When a combination of standard-capacity toners and high-capacity toners are present in the printer, Job Accounting may report the toner usages in the incorrect color column. This problem is fixed in this firmware update.
<b>2.</b>	<b>The Advanced Color Calibration pages do not select the widest available media</b>
Details	The Advanced Color Calibration pages should automatically print on the widest available media loaded into the printer, but were not doing so. This problem is fixed by this firmware update.
<b>3.</b>	<b>The Advanced Color Calibration “snowflake” pattern is misaligned when printed on larger paper sizes</b>
Details	If the Advanced Color Calibration Page is printed on tabloid size media the “snowflake” pattern covers part of the text. This problem is fixed in this firmware update.
<b>4.</b>	<b>The Office Demo internal page has an artifact near the image of the printer.</b>
Details	The internal “Office Demo” page displayed a small artifact near the image of the printer. This problem is fixed in this firmware update.
