Release date: 28 Aug 2005

Technical bulletin

Supporting Pre-separated Files on the Spire Color Server

Using the DeComposer Utility

To use the DeComposer utility:

1. Download the **DeCompose.zip** file and extract to your local desktop.
2. Double-click the **DeCompose.exe** file.
3. Drag and drop one or more of the pre-separated PostScript® files onto the open window.
Note: File names cannot be modified. It is recommended to save a copy of the original file for backup purposes.

4. Import the files to the required hot folder or virtual printer.

The files will print with four black separations.

About Creo

Creo is a world leader in solutions for the graphic arts industry. Core product lines include image capture systems; inkjet proofers; thermal imaging devices for films, plates, and proofs; professional color and copydot scanning systems; workflow management software; and proofing and printing consumables. Creo is also an original equipment manufacture supplier of on-press imaging technology, components for digital presses, and color servers for high-speed, print-on-demand digital printers.
