

Imposition Update 5-1-07 Release Notes

This update is for RPX-i, GP5065, G640, G3535, and G630. It adds updates to support Quark Xpress 7.1 on Mac and Windows and Acrobat 8 on Mac and Windows.

It includes fixes from previous imposition updates, including

- Quark 7.01 Mac files not recognized
- Acrobat from Mac 10.3.9 not recognized
- Postscript errors on particular Word Windows files
- InDesign CS2 not recognized
- Postscript errors reported by some Word Windows XP jobs
- bad font rendering in some Word Windows XP jobs
- bad page positioning in some Word Windows XP jobs
- Postscript errors reported by some Word Windows XP jobs
- InDesign CS from Mac OS X errors
- Postscript errors from Microsoft Word and PowerPoint on Windows XP
- Files printed from Acrobat 6 on MacOS X do not impose correctly.
- Quark 6 Mac imposition jobs do not center correctly
- Quark Xpress 6 files not recognized
- Acrobat 5 files from Windows XP not recognized
- Acrobat 6 files not recognized
- Very large Quark 5 landscape files cause imposition to hang
- Large files from Word on XP produce Postscript errors
- Large PDF files produce errors
- Certain Freehand files produce blank output

Installation instructions

- quit the Splash Server
- expand the archive
- double-click the installer
- select Install
- launch the Splash Server

The archive will install a file named "Imposition Updated 5-1-07" into the Splash Folder.
