

Kit Installation Instructions

XOG SPAR Team

Product(s):	EX260 v2.0 for DC242/252/260	Date:	05/09/08
Title:	Patch 1-WUBU9 Installation instructions	Page:	1 of 1
Instruction #:	Kit Part #:		

Purpose

This software kit provides an EX260 v2.0 software update in response to an EX260 SPAR. Refer to the included customer letter for more information.

In the event of an EX260 v2.0 system reinstall this software should be reapplied.

CAUTION 1: When executing 1-WUBU9.exe, if you choose Restart later when prompted by the Fiery Patch Downloader, please make sure you manually reboot the server for changes to take effect.

CAUTION 2: This patch is Exclusive which means it must be installed independently and the server rebooted/restarted once. After which, other patches can be applied to the server.

Kit Contents

Qty.	Description
1	Kit Installation Instructions

1	1-WUBU9.exe

Prerequisites

- Previous working knowledge with the EX260.
- The EX260 must be at v2.0 prior to performing this install. This software is supplemental to the v2.0 launch software.

Installation Instructions

NOTE: This software may be installed by the customer.

Install the EX260 1-WUBU9 patch:

- ___ 1. Execute **1-WUBU9.exe** and follow the instructions in the Fiery Patch Downloader.
- ___ 2. Notes about the Fiery Patch Downloader:
 - ___ a. Login must be **admin**. This is fixed and cannot be modified.
 - ___ b. Password is the Fiery administrator login password.
 - ___ c. Hostname can be either the IP address or the Fiery server name.
- ___ 3. After the patch is downloaded, and when prompted by Fiery Patch Downloader, wait at least 60 seconds, and then choose **Reboot**.
- ___ 4. When the Fiery has come to **Idle**, verify the **Update Info** section in the configuration page. It should contain the patch number **1-WUBU9**.
