Windows XP 64-bit Print Drivers for Splash

These drivers provide standard PPD style print driver support for Splash products for 64-bit Windows XP systems. To install, unzip the archives, and go through the Add Printer process as normal. When prompted for the drivers, browse to the location of the unzipped driver for the specific product, then continue the process. See the instructions in the Splash User Guide for installing print drivers for more details.

All languages originally supported as clients for these products are supported in this release.

Products Supported

G640
G3535

Limitations

- The driver has the same limitations as the PM driver, specifically no support for entering a UserName, Password, Account Number, and Job Comment, and no support for Secure Access.

- The driver is not WHQL certified, so the WHQL error message will appear. You need to choose to ignore this message.
