

Customer Release Notes

WorkCentre[®] 5945/5955

General Release 072.091.054.31606

Revision Date: April 7, 2015
dc14rn3353crn

Software Release Details

System Software	Version
System Software	072.091.054.31606
Network Controller	072.094.33000
User Interface	072.094.31600

Important

Please ensure you review the important information contained in the Installation Instructions.

Purpose

This release provides the following ConnectKey[®] 1.5 enhancements:

External Keyboard Support

External keyboard support for ConnectKey[®] enabled MFP's provides ease of access and greater flexibility to help with quick data entry and setup for address books or standard scan to destinations. This feature requires the customer to provide their own USB wired keyboard, or there is a bracket and mini keyboard that is available via CAS only. The external keyboard is not functional with Xerox or partner solutions, including scanning solutions such as Scan to PC Desktop and ConnectKey[®] Apps.

Rearrange Service icons (on the Local User Interface)

For greater ease of use and customization, the service buttons on the User Interface can be moved into any order.

This can be done by going into the devices CentreWare Internet Services (CWIS) page by entering the device's IP address into your favorite browser. Once within CWIS go to 'Properties / Service / Display'

Printing: Scale PS/PCL between common metric and US paper sizes

ConnectKey[®] enabled MFP's provide the ability to scale PCL files (PS was already enabled) between common metric and US paper sizes. This feature simplifies the use of ConnectKey[®] products worldwide with customers who regularly do business globally and receive documents in both metric and US sizes. Print image scaling is enabled/disabled via the WEB UI (Default is disabled) and is a clone-able setting.

Additional Enhancements

- Addresses bash (ShellShock) vulnerabilities
- Tabloid printing improvements
- 5.5 x 7 plain white paper is now detected
- Improved default language retention after power cycle
- Envelope Tray no longer reverts back to C5 after it wakes from sleep mode
- Improved finishing reliability when switching between copy and print jobs
- Improved feeding performance for trays 3 and 4
- Improvements in jam clearance messaging/timing sequence to address un-clearable jam situations observed in trays 3 and 4. - Jam clearance direction is now to open left door first before the paper tray
