## Accessing Extended Features

### Overview

This document describes how to access the extended features of the Xerox<sup>®</sup> AltaLink<sup>®</sup> Products for environments that do not have a custom driver.

Some of the commands & syntax used in this document requires familiarity with PostScript (PS) or Printer Command Language (PCL).

This document provides the Printer Description Language (PDL) commands and syntax for each feature. The following tables are also included:

Features supported by the AltaLink Products

Commands to use in a PCL print job

Commands to use in a PS print job

The information contained in this document is not intended as a PS or PCL reference manual, but a guide for using the extended features in PS, PCL or ASCII print jobs.

### Using this Guide

Refer to the Feature List for the feature you would like to implement. Select the page number to jump to that page.

Follow the syntax listed for the command required. Read the "Dependencies/Caveats" section for additional information.

### Feature Listing

PCL and ASCII print jobs can use PJL commands or PCL commands to access the attributes of the printer. PostScript print jobs can use Document Structuring Commands (DSC) or PS commands. If there is more than one method listed to access a specific feature, determine the best method for your application and use that method. In this document, both PJL COMMENT and DSC are referred to as Comment commands.

## **Comment Commands**

To process all PJL COMMENT commands and DSC, enclose them with XRXBegin and XRXEnd commands.

Example for a PCL or ASCII print job: @PJL COMMENT XRXbegin @PJL COMMENT OID\_ATT\_START\_SHEET OID\_VAL\_JOB\_SHEET\_NONE; @PJL COMMENT XRXend Example PS print job: % % XRXbegin % % OID\_ATT\_START\_SHEET OID\_VAL\_JOB\_SHEET\_NONE; % % XRXend

The first parameter of the command is an attribute followed by a value.

Comment commands must end with a semicolon except for the XRXbegin and XRXend commands.

A comment command not enclosed by XRXbegin and XRXend is not a Xerox specific command and is treated as a real comment with no functional attachment to its contents.

## PJL SET Commands

PJL SET commands are available for some features. If you choose to use these commands, do not enclose them with the XRXBegin and XRXEnd commands. PJL SET commands do not require a semicolon at the end of the command line.

### PCL Commands

PCL commands are available for some features. If you choose to use these commands do not enclose them with the XRXBegin and XRXEnd commands. Refer to a PCL reference manual for more specific information regarding PCL commands.

### **PS** Commands

PS commands are available for some features. If you choose to use these commands, do not enclose them with the XRXBegin and XRXEnd commands. Refer to a PS reference manual for more specific information regarding PS commands.

# **Reference Topics**

XRXBegin		
When interpreter receives XRXBegin it begins to parse PJL COMMENT commands checking for Xerox-specific commands until it receives the command to stop parsing.		
PJL COMMENT Command	DSC Comment Command	
@PJL COMMENT XRXbegin	% % XRXbegin	
XRXEnd		
When the interpreter receives this command it stops parsing PJL COMMENT commands.		
PJL COMMENT Command	DSC Comment Command	
@PJL COMMENT XRXend	% % XRXend	

### General Commands

Copies	Copies		
Use the follow	ing commands to specify the number of copies or collated sets of a document.		
Language	Collated		
PS	<int /Collate true >> setpagedevice <int /Collate true >> setpagedevice		
PJL	@PJL SET QTY= <i>int</i>		
PCL5	No PCL5 command available, use PJL		
Language	Uncollated		
PS	<> setpagedevice		
PJL	@PJL SET COPIES = int		
PCL5	<esc>&amp;l#X</esc>		
PDL	No PCL5 command available, use PJL		

#### Banner Sheet (Start Sheet) – Device Generated

This command turns on/off the banner sheet that prints at the beginning of every job. It only applies to the job that contains the command; it does not affect any other jobs. If the device is configured to disable banner sheets, this command is ignored.

#### PJL COMMENT Command

@PJL COMMENT OID\_ATT\_START\_SHEET OID\_VAL\_JOB\_SHEET\_"string";

DSC Cor	DSC Command		
% % OID	% % OID_ATT_START_SHEET OID_VAL_JOB_SHEET_" <i>string</i> ";		
Where <b>s</b> t	tring is:		
NONE	Do not create a banner sheet for this job.		
FULL	Create a banner sheet for this job. By default, if the START SHEET comment is not included a banner sheet is generated unless the device has banner sheet disabled.		
USER	A custom start sheet is included in this job.		

## Media Commands

Media Source		
This command specifies the t	ay to supply the job's media.	
PS	<> setpagedevice	
	where <i>int</i> is from the table below.	
PCL5	<esc>&amp;l<b>#</b>H</esc>	
	where <b>#</b> is from the table below.	
PCL6	ubyte <b>##</b> attr_ubyte MediaSource	
	Tray 1 example: 0xc0 0x04 0xf8 0x26	
	where ## is the hex number assigned to each selection.	

Tray	PS int	PCL5 #	PCL6
Auto select	null	7	0x01
1	1	4, 2, 3, or 6	0x04
2	2	1	0x05
3	3	5 or 23	0x07
4	4	8 or 24	0x08
5	5	21	0x0A
6	6	22	0x09

### PCL5 Command Tray Mapping Tool

A user with Administrator access rights to the device has the opportunity to change the PCL5 command used to identify a specific paper tray.

A user can do this by opening Xerox<sup>®</sup> CentreWare<sup>®</sup> Internet Services by entering the printer's IP address in their favorite Web browser.

To get to the PCL Tray Mapping page select the Properties tab  $\rightarrow$  Services  $\rightarrow$  Printing  $\rightarrow$  Page Description Languages  $\rightarrow$  PCL  $\rightarrow$  Tray Mapping. Once there the user is able to select which listed command will be used for a paper tray.

**Note:** Changing the device's default mapping may cause issues when trying to select a paper tray with the PCL 5 driver.

Status Jobs Print Scan			
Status Jobs Plint Stan	Address Book Propert	s Support	
Status     Jobs     Print     Jobs       Properties     Configuration Overview       Description       > General Setup       > Connetivity       -Services       Service Registration       -Printing       General       Secure Print       Hold All Jobs       Printer Fonts       Problem       Pict       TIF       XPS (XML Paper Specification)       > Scan Services       > Workflow Scanning       > Scan to Home       > Scan to Home       > Scan to Home       > Scan to Home       > Scanto Services       > Accounting       > Security	Page Description Language

	32 maps to	Auto Select	•
	33 maps to	Auto Select	

#### Media Size

This command specifies the size of media on which to print the job.

Note: some sizes may not apply to every printer model.

PCL5

<Esc> &l**#**A

Where **#** is the number from the table below.

PS

<</PageSize [*width height*] /CustomPageSize false >> setpagedevice Where *width* and *height* [*w h*] are the numbers from the table below.

#### PCL6

Defined Paper Size

ubyte\_array ubyte **## string** attr\_ubyte MediaSize **example**: 0xc8 0xc0 **## string** 0xf8 0x25

where **## string** is from the table below.

Media Sizes	PCL5 #	PCL6 ## String	PS [w h] Points
Letter 8.5 x 11" (216 x 279 mm)	2	0x06 LETTER	[612 792]
Legal 8.5 x 14" (216 x 356 mm)	3	0x05 LEGAL	[612 1008]
Tabloid/ Ledger (304 x 482 mm)	6	0x06 LEDGER	[792 1224]
A3 (297 x 420 mm)	27	0x02 A3	[842 1191]
A4 (210 x 297 mm)	26	0x02 A4	[595 842]
B6 JIS (128 x 182 mm)	44	0x06 JIS B6	[363 516]
Executive 7.25 x 10.5" (184 x 266 mm)	1	0x04 EXEC	[522 756]
Postcard 6 x 9" (152 x 228 mm)	160	0x06 na-6x9	[432 648]
Postcard Hagaki (100 x 148 mm)	71	0x05 JPOST	[284 420]
Postcard Oufuku Hagaki Dbl (148 x 200 mm)	72	0x06 JPOSTD	[420 566]

Envelope Sizes	PCL5#	PCL6 ## String	PS [w h] Points
#9 ½ Booklet 9 x 12" (228 x 304 mm)	180	0x10 na-9x12-envelope	[648 864]
#10 4.125" x 9.5"	81	0x05 COM10	[297 684]
C4 (229 x 324 mm)	171	0x12 iso-c4-envelope-c4	[649 918]
C5 (162 x 229 mm)	91	0x02 C5	[459 649]
DL (110 x 220mm)	90	0x02 DL	[312 624]
Monarch 3.875" x 7.5"	80	0x07 MONARCH	[279 540]

#### Custom Media Sizes

This command specifies the custom media size on which to print the job. Insert a media size command within the PCL portion of the print job.

PS	<width height] /CustomPageSize true >> setpagedevice	
	where <b>[width height]</b> is the physical dimension of the paper at 72 points/inch (PS points)	
PCL5	[Esc]&f <b>####</b> I ← for the width	
	[Esc]&f <b>####</b> J ← for the length	
	[Esc]&l101A	
	where ##### is the physical dimension of the paper at 720 points/inch (decipoints).	
PCL6	uint16_xy <b>x y</b> attr_ubyte CustomMediaSize ubyte eTenthsOfAMillimeter attr_ubyte CustomMediaSizeUnits	
	ISO B6 example: 0xd1 0xe2 0x04 0xe0 0x06 0xf8 0x2f 0xc0 0x02 0xf8 0x30	
	where <b>x</b> is the width (1/10mm) in hex (lsb, msb) and <b>y</b> is the length (1/10mm) in hex (lsb, msb)	

Media T	Media Type		
Media ty	pes are used to	distinguish the type of media a job requ	iires.
PS	< <th>(<b>string</b>) &gt;&gt; setpagedevice</th> <th></th>	( <b>string</b> ) >> setpagedevice	
PCL5	<esc>&amp;n<b>#</b>Wd<b>string</b> where <b>#</b> is the length of string+1, and <b>string</b> from the table below</esc>		
PCL6	ubyte_array uint16 <b>## ## string</b> attr_ubyte MediaType <b>Example</b> : 0xc8 0xc1 <b>0x0C 0x00 transparency</b> 0xf8 0x27 where <b>## ##</b> is the length of the string in hex (lsb, msb), and <b>string</b> from the table below.		
PS (strin	PS (string) value PCL5 examples		PCL6 Hexadecimal and String
cardstoc	k	<esc>&amp;n<b>10</b>Wd<b>cardstock</b></esc>	0x09 0x00 cardstock
envelope		<esc>&amp;n<b>9</b>Wd<b>envelope</b></esc>	0x08 0x00 envelope
Labels	s <esc>&amp;n<b>7</b>Wd<b>labels</b></esc>		0x06 0x00 labels
Letterhe	ad	<esc>&amp;n<b>11</b>Wd<b>letterhead</b></esc>	

## Formatting Commands

Feed Edge		
The values indicate the feed edge to use. Feeds paper so that Leading Edge of paper is the shorter side.		
PJL COMMENT Command String	DSC Comment Command String	
@PJL COMMENT OID_ATT_FEED_EDGE	% % OID_ATT_FEED_EDGE	
Where <i>string</i> is: OID_VAL_FEED_EDGE_SHORT_LEADING OID_VAL_FEED_EDGE_SHORT_TRAILING OID_VAL_FEED_EDGE_LONG_LEADING OID_VAL_FEED_EDGE_LONG_TRAILING		
PS		
<< /Leading Edge <i>int &gt;&gt; setpagedevice</i>		
<b>null</b> = use default orientation for specified /PageSize to select which edge is the top of the page.		

- ${\pmb 0}$  = Short edge, leading edge is the top of the page.
- **2** = Short edge, trailing edge is the top of the page.

#### Simplex / Duplex Printing

This command specifies if a job is to print on one side or both sides of the sheet. Choose one of the methods below for indicating this feature.

Simplex/Duplex	PS	PCL5	PJL		
one-sided	<< /Duplex false /Tumble false >> setpagedevice	<esc>&amp;l<b>0</b>S</esc>	@PJL SET DUPLEX= <i>OFF</i>		
two-sided long-edge	<< /Duplex true /Tumble false >> setpagedevice	<esc>&amp;I<b>1</b>S</esc>	@PJL SET DUPLEX= <i>ON</i> @PJL SET BINDING= <i>LONGEDGE</i>		
two-sided short-edge	<< /Duplex true /Tumble true >> setpagedevice	<esc>&amp;l<b>2</b>S</esc>	@PJL SET DUPLEX= <i>ON</i> @PJL SET BINDING= <i>SHORTEDGE</i>		

## Finishing Commands

Offset				
This feature provides a physical offset of hard copy that distinguishes between sets or stacks within a job.				
PJL	PS			
@PJL SET JOBOFFSET= <i>string</i>	<< /Jog <i>int</i> >> setpagedevice			
Where <i>string</i> is ON or OFF	Where <i>int</i> is: 0 = no offset, 3 = offset each set			

#### **Output Destination**

Indicates the output bin where the print job is sent. **Note:** Some output options may not be available on every product model

Output Tray	PS	PJL Comment Command		
Simple Catch Tray Offset Catch Tray	<< /OutputType (MiddleTray) >> setpagedevice	@PJL COMMENT OID_ATT_OUTPUT_BINS OID_VAL_OUTPUT_BIN_MIDDLE;		
Top output tray of finisher	<< /OutputType (TopTray) >> setpagedevice	@PJL COMMENT OID_ATT_OUTPUT_BINS OID_VAL_OUTPUT_BIN_TOP;		
Finisher stacker tray	<< /OutPutType (Stacker) >> setpagedevice	@PJL COMMENT OID_ATT_OUTPUT_BINS OID_VAL_OUTPUT_BIN_STACKER;		

#### Staple

This command indicates use and location of staple(s).

#### PJL COMMENT Command

@PJL COMMENT XRXSTAPLE=string;

#### Where *string* is:

PORTRAIT, LANDSCAPE, DUAL For multiple staples (4) use the command below: @PJL COMMENT OID\_ATT\_FINISHING OID\_VAL\_FINISHING\_STAPLE\_MULTIPLE;

#### PS

<< /Staple *int* /StapleDetails << /Type 1 /StapleLocation (*string*) >> >> setpagedevice

Where *int* is: 0 = No Staple, 3 = Staple at end of set

Where **string** is:

SinglePortrait, SingleLandscape, DualLandscape, Multiple

Hole Punch					
This command indicates hole punches for a print job on a device with hole punch capability.					
Note: Some hole punch options may not be available on every product model.					
PJL COMMENT Command	DSC Comment Command				
@PJL COMMENT OID_ATT_PUNCH <i>int</i> ;	% % OID_ATT_PUNCH <i>int</i> ;				
Where <i>int</i> is:					
0 = Punch Off					
1 = Punch On, 2 = Use 2 Hole Punch					
3 = Use 3 Hole Punch, 4 = Use 4 Hole Punch					
Note: <i>int</i> 1 will be emitted to invoke the default punch setting on the device.					
PS					
<< /Punch <i>int1</i> /PunchDetails << /Type 6 /NumHoles <i>int2</i> >> >> setpagedevice					
Where <i>int1</i> is:					
0 = Punch Off					
4 = Punch On (after each showpage or copy page operation)					
Where <i>int2</i> is:					
0 = Punch Off,					
1 = Punch On, 2 = 2 Hole Punch,					
3 = 3 Hole Punch, 4 = 4 Hole Punch					
Note: Setting NumHoles to 1 causes a punch with the default number of holes.					

### Print Job Accounting Commands

Networ	K (A		ntina
Networ	N /-	iccou	nung

Allows User ID data to be sent with job for the purposes of Job-based accounting.

PJL COMMENT Command

@PJL COMMENT OID\_ATT\_ACCOUNTING\_INFORMATION\_AVP "XRX\_USERID, xxxx";

Where **xxxx** is actual User ID entered by user.

DSC Comment Command

%%OID\_ATT\_ACCOUNTING\_INFORMATION\_AVP "XRX\_USERID, **XXXX**";

Where **xxxx** is actual User ID entered by user.

Allows Account ID data to be sent with job for the purposes of Job-based accounting.

PJL COMMENT Command

@PJL COMMENT OID\_ATT\_ACCOUNTING\_INFORMATION\_AVP "XRX\_ACCTID, yyyy";

Where **yyyy** is actual Account ID entered by user.

**DSC Comment Command** 

%%OID\_ATT\_ACCOUNTING\_INFORMATION\_AVP "XRX\_ACCTID, yyyy";

Where **yyyy** is actual Account ID entered by user.

#### Internal Auditron or Xerox<sup>®</sup> Standard Accounting

This PJL command sends the users pin number for use by devices that support the Internal Auditron or Xerox<sup>®</sup> Standard Accounting (XSA). You must provide at least a valid USERID. You may also provide a GENERAL Account number or GROUP Account number if required.

#### PJL COMMENT Command

@PJL COMMENT OID\_ATT\_ACCOUNTING\_INFORMATION\_AVP "XRX\_USERID, xxxx";
@PJL COMMENT OID\_ATT\_ACCOUNTING\_INFORMATION\_AVP "XRX\_GENERALACCT, yyyy";
@PJL COMMENT OID ATT ACCOUNTING INFORMATION AVP "XRX GROUPACCT, zzzz";

Where **xxxx** is a valid USER Pin number. Where **yyyy** is a valid GENERAL Account number. Where **zzzz** is a valid GROUP Account number.

#### DSC Comment Command

% % OID\_ATT\_ACCOUNTING\_INFORMATION\_AVP "XRX\_USERID,**xxxx**";

% % OID\_ATT\_ACCOUNTING\_INFORMATION\_AVP "XRX\_GENERALACCT, **yyyy**";

% % OID\_ATT\_ACCOUNTING\_INFORMATION\_AVP "XRX\_GROUPACCT,**zzzz**";

Where *xxxx* is a valid USER Pin number. Where *yyyy* is a valid GENERAL Account number. Where *zzzz* is a valid GROUP Account number.

### PJL/PCL Dependencies/Caveats

- Locate all PJL commands in the beginning of the file before the image data starts (PS or PCL).
- To combine printer escape commands (not including PJL commands):
  - The first two characters after the <esc> **must** be the same.
  - All alpha characters **must** be lowercase, except the final terminating character.
  - The commands are read left to right. Combine them in the order you wish them executed.
  - For example, print 5 copies (<ESC>&l5X) and use letter size (<ESC>&l2A) is combined as:
     <ESC>&l5x2A
- In case of duplicate commands, the last one requested takes precedence.
- The PJL SET COPIES command takes precedence over the PCL command (<Esc>&l#X) to determine number of copies. In general, PJL commands takes precedence over PCL commands.
- Printing jobs with odd number of pages & duplex front and back imaged covers, the printer always prints on both sides of the front and back covers. Remaining pages are printed on the document body media type & color with a blank page inserted to allow an image on both sides of the back cover.
- When using the Blank Front or the Blank Front & Back Cover command, the Cover Media Size command is optional. If the cover size command is not in the PDL, the printer assumes the cover media size is the same as the document body.

- Use one of the following methods to specify media selection:
  - Describe the media attributes with size, color, and type to allow the device to select the
    matching source tray. If this media description method is used, leave the tray source
    command out of the job, or set to Auto. If not, the tray source command takes
    precedence over the tray selection capabilities of the device.
  - Indicate the tray source for the job. If the tray source command is used, the system automatically defaults paper type to the defined SYSTEM DEFAULT unless specified otherwise. This prevents inadvertent use of special paper types. To override, include a paper type specification of UNSPECIFIED in the job.

## DSC/PS Dependencies/Caveats

- All % % commands (DSC comments) must be in the first 64KB of the job.
- WorkCentre and ColorQube devices support PostScript resolutions up to and including 1800 x 1800. Some PostScript jobs may not print if the high resolution is indicated. If this occurs, print the same job at a lower resolution.
- The following media sizes do not print duplex and do not support staple commands: A6, B6, 5 x 7" Postcard (4.5 x 6"), envelopes and any custom sized media where the page width is less than 5.5". A request to duplex or staple these media sizes is ignored.
- Jobs that indicate Transparencies, Labels, Envelopes or Tab-Stock do not support duplex commands. The duplex print request is ignored when any of these media types are used.
- When printing an odd number of pages in a document with duplex front and back imaged covers, the printer always prints on both sides of the front and back covers. The remaining pages print on the document body media type and color with a blank page inserted to allow an image on both sides of the back cover.
- When using the Blank Front or the Blank Front and Back Cover command, the Cover Media Size command is optional. If the Cover Media Size command is not in the PDL, the printer assumes the cover media size as that of the document body.
- Use one of the following methods to specify media selection (where applicable):
  - Describe the media attributes with size, color, and type to allow the device to select the
    matching source tray. If this media description method is used, leave the tray source
    command out of the job, or set to Auto. If not, the tray source command takes
    precedence over the tray selection capabilities of the device.
  - Indicate the tray source for the job. If the tray source command is used, the system automatically defaults paper type to the defined SYSTEM DEFAULT unless specified otherwise. This prevents inadvertent use of special paper types. To override, include a paper type specification of UNSPECIFIED in the job.

## Examples

### Basic PCL/PJL Template

This section illustrates a standard PCL template example that is used to access general print features. This example lists each feature and the syntax, both PCL commands and PJL, required to use these features.

**Note:** This section is only an example that may include features & commands that do not exist on all products.

This print job specifies the following items: Job owner; Job name; 11 x 17 paper size; Heavyweight, Green paper, 1 staple, draft mode.

#### Section 1 (Opening Command, Required for all files)

<Esc>%-12345X

#### Section 2 (PJL Set Commands)

@PJL SET RESOLUTION=600
@PJL SET COPIES=1
@PJL SET DENSITY=4
@PJL SET JOBOFFSET=ON

Section 3 (XRXbegin – Opening Comment Statement, Required)

@PJL COMMENT XRXbegin

#### Section 4 (PJL Comments)

@PJL COMMENT OID\_ATT\_JOB\_NAME "Readme.txt"; (Quotation marks are required)
@PJL COMMENT OID\_ATT\_START\_SHEET OID\_VAL\_JOB\_SHEET\_NONE;
@PJL COMMENT OID\_ATT\_JOB\_OWNER "John Smith"; (Quotation marks are required)
@PJL COMMENT OID\_ATT\_JOB\_TYPE OID\_VAL\_JOB\_TYPE\_PRINT;
@PJL COMMENT OID\_ATT\_DEFAULT\_MEDIUM\_TYPE "Cardstock";
@PJL COMMENT OID\_ATT\_DEFAULT\_MEDIUM\_COLOUR "Green";
@PJL COMMENT OID\_ATT\_PRINT\_QUALITY OID\_VAL\_PRINT\_QUALITY\_DRAFT;
@PJL COMMENT OID\_ATT\_FINISHING OID\_VAL\_FINISHING\_STAPLE;
@PJL COMMENT XXXSTAPLE=PORTRAIT;

#### Section 5 (XRXend - Closing Statement for Comment Section, Required)

@PJL COMMENT XRXend

#### Section 6 (PCL Code used to invoke PCL Language)

@PJL ENTER LANGUAGE=PCL

Section 7 (PCL Data Stream or ASCII Document inserted here for Options such as Selecting Different Fonts, Simplex, Duplex, etc.)

[Document or Text to print inserted here]

Section 8 (Closing Command, Required at end of Document)

<Esc>%-12345X

### Sample PJL Headers

Note: This section is only an example that may include features and commands that do not exist for every product model.

#### **Example 1 Header for Simple Print**

<Esc> %-12345X @PJL SET COPIES = 1 @PJL COMMENT XRXbegin @PJL COMMENT OID\_ATT\_JOB\_OWNER "John Smith"; @PJL COMMENT OID\_ATT\_JOB\_NAME "Print Job"; @PJL COMMENT XRXend @PJL ENTER LANGUAGE=PCL [Insert PCL document or text to be printed here] <Esc> %-12345X

#### **Example 2 Header for Proof Print**

This is a proof print job header that requests 6 copies

<Esc>%-12345X @PJL SET COPIES= 6 @PJL COMMENT XRXbegin @PJL COMMENT OID\_ATT\_JOB\_TYPE OID\_VAL\_JOB\_TYPE\_ PROOF\_PRINT @PJL COMMENT XRXend @PJL ENTER LANGUAGE=PCL [Insert PCL document or text to print here] <Esc>%-12345X

#### **Example 3 Header for Finishing Options**

This is a proof print job header requesting the staple option. You must send the job to the stacker using the native PCL command.

<Esc> %-12345X @PJL COMMENT XRXbegin @PJL COMMENT OID\_ATT\_JOB\_OWNER "John Smith" @PJL COMMENT OID\_ATT\_JOB\_TYPE OID\_VAL\_JOB\_TYPE\_PROOF\_PRINT; @PJL COMMENT OID\_ATT\_FINISHING OID\_VAL\_FINISHING\_STAPLE; @PJL COMMENT XRXSTAPLE=PORTRAIT; @PJL COMMENT XRXend @PJL ENTER LANGUAGE=PCL <Esc>&l2G [Insert PCL document or text to print here] <Esc> %-12345X

\*\*\* Some Products will need to only select the Stapler, the stacker will be automatically added.

### Basic PostScript/DSC Template

This section is an example of a standard PostScript template that is used to access general print features. This template lists each feature and the syntax, both Postscript commands and DSC (Document Structuring Conventions) required.

**Note:** This section is only an example that may include features and commands that do not exist for every product model.

This example print job specifies the following items; Job owner; Job name; 11 x 17 paper size; Drilled; Ivory paper; 1200 x 1200 resolution; Staple off; Landscape; Sample set; Draft mode; Offset off; Banner sheet off; Duplex long edge; One copy

#### Section 1 (Adobe Reference Command)

%!PS

#### Section 2 (XRXbegin - Opening Comment Statement, Required)

% % XRXbegin

#### Section 3 (OID Commands)

% % OID\_ATT\_JOB\_OWNER "John Smith"; (Quotation marks are required) % % OID\_ATT\_JOB\_TYPE OID\_VAL\_JOB\_TYPE\_PRINT; % % OID\_ATT\_START\_SHEET OID\_VAL\_JOB\_SHEET\_NONE; % % OID\_ATT\_JOB\_NAME "Readme.txt"; (Quotation marks are required) % % OID\_ATT\_PRINT\_QUALITY OID\_VAL\_PRINT\_QUALITY\_DRAFT;
