# Statement of Volatility

## Xerox Phaser 3124/3125

### Notice

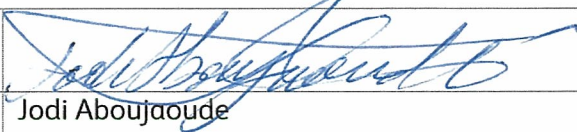

This document describes the locations, capacities and contents of volatile and non-volatile memory devices within the 3124.

The context of the information in this document is that normal means of access or data extraction are being attempted in order to reproduce, read, or extract stored or latent data. This does not include attempts to reproduce, read or extract data or reverse engineer storage methods by individuals or organizations with advanced skills or through the use of extraordinary resources and measures or specialty equipment not normally available in the industry or to the public.

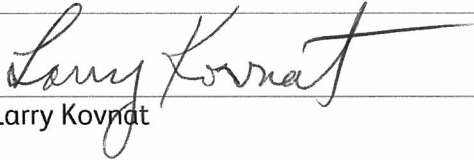

The content of this document is provided for information purposes only. Performance of the products referenced herein is exclusively subject to the applicable Xerox Corporation terms and conditions of sale and/or lease. Nothing stated in this document constitutes the establishment of any additional agreement or binding obligations between Xerox Corporation and any third party.

### Primary Signature Block

This evaluation and summary was completed by:

Signature	
Printed Name	Jodi Aboujaoude
Job Title	Program Manager
Job Function	Program management
Preparation Date	January 21 2010

### Optional Signature Block

Signature	
Printed Name	Larry Kovnat
Job Title	Program Security Manager
Job Function	Program Security
Preparation Date	January 21 2010

# Statement of Volatility

## Xerox Phaser 3124/3125

### Introduction

The Xerox Phase 3124 is used to perform the following tasks:

Printing

This document describes the amounts and types of memory contained in the device in an easy to read tabular format. To allow security issues to be addressed as needed, specific commentary has been included about job data and where Personally Identifiable Information (PII) can be found in the system.

For larger Xerox systems that may contain multiple media feeders or multiple finishers, tabulated data is shown even though these devices never contain any job or PII data in electronic form. Also, in larger Xerox systems, another vendor may supply a Digital Front End (DFE) that is connected to the Xerox Print Engine. In these cases, the vendor of the DFE must provide their own Statement of Volatility for the hardware which comprises their additions to Xerox products.

The information contained in this document has been verified at the time the product is released for sale. Manufacturing process changes may require that memory amounts are increased but, the purpose or contents of the memory will not change.

### General Memory Information

#### Volatile Memory

All volatile memory listed is cleared after power is removed (decay occurs generally within 20 seconds at room temperature).

All volatile memory listed is required for normal system operation and during service and diagnostic procedures.

Removal of any volatile memory will void the warranty.

#### Non-Volatile Memory

All non-volatile memory listed is required for normal system operation and during service and diagnostic procedures.

Removal of any non-volatile memory will void the warranty.

All non-volatile memory cannot be accessed by accidental keystrokes (with exception of BIOS access keys).

### Hard Drive Information

Hard Drive / Partition Description					
Complete this table if the device has media storage capability					
Drive / Partition (System, Image):	Removable Y / N	Size:	User Modifiable: Y / N	Function:	Process to Sanitize:
No hard drives	None	None	None	None	None

# Statement of Volatility

## Xerox Phaser 3124/3125

### System Descriptions

Volatile Memory				
Type (SRAM, DRAM, etc)	Size	User Modifiable(Y/N)	Function or Use	Process to Sanitize
DRAM (Phaser 3125)	32MB	No	It is used as a Swath Buffer during printing and System Working Memory. It also stores the PCL Font List, decompressed from Flash memory.	Power off machine
DRAM (Phaser 3124)	8MB	No	It is used as a Swath Buffer during printing and a System Working Memory Area.	Power off machine

Non-Volatile Memory				
Type (Flash, EEPROM, etc)	Size	User Modifiable(Y/N)	Function or Use	Process to Sanitize
Flash (Phaser 3125)	8MB	No	It stores System Program and system updates downloaded via the PC Interface. It also stores the PCL Font List, compressed.	No user image data stored. Nothing to sanitize.
Flash (Phaser 3124)	0.5MB	No	It stores System Program and system updates downloaded via the PC Interface.	No user image data stored. Nothing to sanitize.

Media and Storage					
Complete this table if the device has media storage capability					
Type (disk drives, tape drives, CF/SD/XD memory cards, etc.):	Removable Y / N	Size:	User Modifiable: Y / N	Function:	Process to Sanitize:
None	None	None	None	None	None
Additional Information:					

USB	
Complete an entry for each USB port	
Port and location	Purpose
Phaser 3124: USB 1.1 (Device rear)	For communication of data when printing and bidirectional communication
Phaser 3125: USB 2.0 Compliant (Device rear)	For communication of data when printing and bidirectional communication
RFID Devices	
Complete an entry for each RFID tag	
RFID Tag location	Purpose
None	None
