

Statement of Volatility

Xerox Phaser 3250

Statement of Volatility

Xerox Phaser 3250

Notice

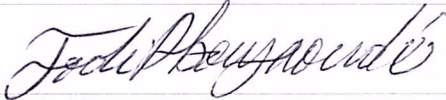

This document describes the locations, capacities and contents of volatile and non-volatile memory devices within the Phaser 3250

The context of the information in this document is that normal means of access or data extraction are being attempted in order to reproduce, read, or extract stored or latent data. This does not include attempts to reproduce, read or extract data or reverse engineer storage methods by individuals or organizations with advanced skills or through the use of extraordinary resources and measures or specialty equipment not normally available in the industry or to the public.

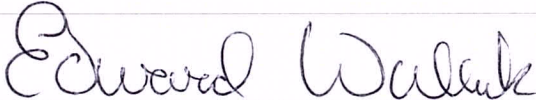

The content of this document is provided for information purposes only. Performance of the products referenced herein is exclusively subject to the applicable Xerox Corporation terms and conditions of sale and/or lease. Nothing stated in this document constitutes the establishment of any additional agreement or binding obligations between Xerox Corporation and any third party.

Statement of Volatility

Xerox Phaser 3250

Introduction

The Xerox Phase 3250 is used to perform the following tasks:

- Printing

This document describes the amounts and types of memory contained in the device in an easy to read tabular format. To allow security issues to be addressed as needed, specific commentary has been included about job data and where Personally Identifiable Information (PII) can be found in the system.

For larger Xerox systems that may contain multiple media feeders or multiple finishers, tabulated data is shown even though these devices never contain any job or PII data in electronic form. Also, in larger Xerox systems, another vendor may supply a Digital Front End (DFE) that is connected to the Xerox Print Engine. In these cases, the vendor of the DFE must provide their own Statement of Volatility for the hardware which comprises their additions to Xerox products.

The information contained in this document has been verified at the time the product is released for sale. Manufacturing process changes may require that memory amounts are increased but, the purpose or contents of the memory will not change.

General Memory Information

Volatile Memory

- All volatile memory listed is cleared after power is removed (decay occurs generally within 20 seconds at room temperature).

- All volatile memory listed is required for normal system operation and during service and diagnostic procedures.

- Removal of any volatile memory will void the warranty.

Non-Volatile Memory

- All non-volatile memory listed is required for normal system operation and during service and diagnostic procedures.

- Removal of any non-volatile memory will void the warranty.

- All non-volatile memory cannot be accessed by accidental keystrokes

Hard Drive Information

1st Hard Drive / Partition Description					
Complete this table if the device has media storage capability					
Drive / Partition (System, Image):	Removable Y / N	Size:	User Modifiable: Y / N	Function:	Process to Sanitize:
None	None	None	None	None	None

Statement of Volatility

Xerox Phaser 3250

System Descriptions

Volatile Memory				
Type (SRAM, DRAM, etc)	Size	User Modifiable (Y/N)	Function or Use	Process to Sanitize
SDRAM	32MB	No	System working memory	Power off machine
SDRAM	128MB(Optional)	No	Extends system working memory for large printing jobs	Power off machine

Non-Volatile Memory				
Type (Flash, EEPROM, etc)	Size	User Modifiable (Y/N)	Function or Use	Process to Sanitize
NOR Flash	8MB	No	System program and Resident fonts	Not modifiable nothing to sanitize.
EEPROM	4KB	Yes	System unique value, CRUM Module counter	Memory clear through CWIS, Reset, Restore Network Defaults
EEPROM	4KB	Yes	Network configuration booting data	Memory clear through CWIS, Reset, Restore Network Defaults

Media and Storage					
Complete this table if the device has media storage capability					
Type (disk drives, tape drives, CF/SD/XD memory cards, etc.):	Removable Y / N	Size:	User Modifiable: Y / N	Function:	Process to Sanitize:
None	None	None	None	None	None
Additional Information:					

USB	
Complete an entry for each USB port	
USB port and location	Purpose
One 2.0 rear of machine	For communication of data when printing and bidirectional communication

RFID Devices	
Complete an entry for each RFID tag	
RFID Tag location	Purpose
CRUM	Xerox genuine identification and compatibility
