連接設定

印表機會將大量資訊儲存成可列印頁面。下列頁面為針對此主題的可列印頁面樣本。

所有的可列印頁面皆具有此格式，即頁面上下方皆有彩色橫軸。在印表機前面板上列印這些頁面。

使用可列印頁面

可由**可列印頁面功能表**使用這些頁面：

1. 在前面板上，使用**下箭號**或**上箭號**鍵捲動到**可列印頁面功能表**，然後按 **OK（確定）** 鍵。
2. 請使用**下箭號**或**上箭號**鍵捲動到想要的可列印頁面（如 **連結設定**），然後按 **OK（確定）** 鍵。

功能表項目

如需可列印頁面的完整清單，請列印「功能表項目」：

1. 請選擇前面板上的**功能表**，然後按 **OK（確定）** 鍵。
2. 請選擇**列印功能表項目**，然後按 **OK（確定）** 鍵。

PHASER® 7300 COLOR PRINTER

Connection Setup

USB Connection

The USB connection requires a standard A/B USB cable. The "A" end of the cable connects to the computer's USB port; the "B" end connects to the printer's USB port.

Windows 98 or later

Connect the USB cable to the PC and follow the Add New Hardware Wizard to create the USB port. Follow the Add Printer Wizard to install the printer driver from your printer's software CD-ROM. For more details, refer to the infoSMART Knowledge Base at www.xerox.com/officeprinting/infoSMART, Document # 18215.

Macintosh (requires OS 9.0.4 or later)

A USB-connected printer will not show in the Chooser. Install the printer driver from your printer's software CD-ROM. Use the Desktop Printer Utility (version 1.2 or later) to create a desktop USB printer. The utility is located in the PhaserTools folder created during the software install. For more details, refer to the infoSMART Knowledge Base at www.xerox.com/officeprinting/infoSMART, Document # 33225.

Parallel Connection

The printer's parallel connection uses a parallel cable to connect your computer's parallel port to the printer's parallel port. Install the printer driver from your printer's software CD-ROM. Select the appropriate LPT parallel port.

Ethernet Connection (recommended)

Network

Use an Ethernet connection with two twisted-pair (Category 5/RJ-45) cables and an Ethernet hub. Connect the computer to the hub with one cable and connect the printer to the hub with the second cable. Use any port on the hub except the uplink port. TCP/IP and EtherTalk are the most common protocols used with Ethernet cables. To print using TCP/IP, each computer and the printer requires a unique IP address. See Setting IP Addresses.

Standalone Use

Use a crossover cable to connect the printer directly to the computer via the Ethernet port.

Setting an IP address

If your computer is on a large network, contact your network administrator for the appropriate TCP/IP addresses and additional configurations.

If you are creating your own small Local Area Network, or connecting the printer directly to your computer over Ethernet, use this basic procedure. The printer and computer(s) should have unique IP addresses. It is important that the addresses are similar, but not the same. For example, your printer can have the address 192.168.1.2 while your computer has the address 192.168.1.3. Another device can have the address 192.168.1.4, and so on.

For more details, refer to the infoSMART Knowledge Base at www.xerox.com/officeprinting/infoSMART, Document # 18545.

Note: If you use the installer from your printer's software CD-ROM, the IP Address is set automatically.

To manually set the printer's IP address:

1. At the printer's front panel, select **Menus** and press **OK**.
2. Scroll to the **Connection Setup Menu** and press **OK**.
3. Scroll to **TCP/IP Address Menu** and press **OK**.
4. Scroll to **DCHP/BootP** and press **OK** until it displays **OFF**.
5. Scroll to **TCP/IP Address** and press **OK**.
6. Enter an IP address like the example above.
7. Scroll to **TCP/IP Network Mask** and press **OK**.
8. Enter a network (subnet) address. (If you use the IP address in the above example, set a Subnet Mask of 255.255.255.0)
9. Scroll to **TCP/IP Gateway** and press **OK**.
10. Enter a Gateway (router) address. (If you use the IP address in the above example, set a Gateway address of 192.168.1.1)
11. Scroll to **Exit** and press **OK**.

To set a static IP address on your computer:

Windows 95/98/Me

1. From the Start menu, right-click **Network Neighborhood** and select **Properties**.
2. On the **Configuration** tab, select the TCP/IP protocol for your network card, then select **Properties**.
3. On the **IP Address** tab, select **Specify an IP address**. Enter an IP address and Subnet Mask, and click **OK**. (If you use the IP address noted above, set a Subnet Mask of 255.255.255.0).
4. Click **OK** and restart Windows.

Windows 2000/XP

1. From the Start menu, right-click **My Network Places** and select **Properties**.
2. Right-click **Local Area Connection** and select **Properties**.
3. If you do not have TCP/IP available, you should first click **Add** and select **Protocol**. Click **Add** and select **Internet Protocol TCP/IP**.
4. On the **General** tab, select the TCP/IP protocol for your network card. Click **Properties**.
5. On the **General** tab, select **Use the following IP address**. Enter an IP address and Subnet Mask, and then click **OK**. (If you use the IP address in the above example, set a Subnet Mask of 255.255.255.0).
6. Click **OK** and restart Windows, if prompted.

Windows NT 4.x

1. From the start menu, right-click **Network Neighborhood** and select **Properties**.
2. On the **Protocols** tab, select **TCP/IP Protocol** and click **Properties**.
3. On the **IP Address** tab, select **Specify an IP Address**. Enter an IP Address and Subnet Mask in the field and click **OK**. (If you use the IP address noted above, set a Subnet Mask to 255.255.255.0)
4. Click **OK** and restart Windows.

Installing the Printer Driver

To download the latest printer drivers, access the Xerox web site at: www.xerox.com/officeprinting/support.

Windows 95/98/Me, Windows 2000/XP, and Windows NT 4.x

Install the printer driver from your printer's software CD-ROM. The software CD-ROM installer automatically installs and identifies the printer during the installation process.

For more details, refer to the infoSMART Knowledge Base at www.xerox.com/officeprinting/infoSMART, Document # 9178 for Windows 95/98/Me, Document # 36894 for Windows 2000, and Document # 11338 for Windows NT.

Macintosh

EtherTalk

If you use EtherTalk, Macintosh computers do not require IP addresses.

1. Open the **AppleTalk** Control Panel.
2. Verify that the **Ethernet** port is the selected network port.
3. To install the printer driver, double-click the installer on your printer's software CD-ROM.
4. Open the **Chooser**, select the **LaserWriter** driver.
5. From the right column of the **Chooser**, select the printer. Click **Create** to create the desktop printer.

For more details, refer to the infoSMART Knowledge Base at www.xerox.com/officeprinting/infoSMART, Document # 2562.

Macintosh OS X

Macintosh OS X supports TCP/IP as the default protocol, as well as AppleTalk. For a TCP/IP installation, follow the instructions provided to set an IP address in the printer.

1. Open the **Print Center Utility**.
2. Select the **Add Printer...** button.
3. Choose the connection type you desire.

For LPR, enter the IP address of the printer that you set previously. The **Queue Name** field can remain blank if the **Use default queue on server** box is checked (by default). Other options are **PS**, or **AUTO**. Select the appropriate PPD for the printer model under the **Printer Model** pull-down menu.

For AppleTalk, select the appropriate printer from the list that is displayed. The printer should autoconfigure at this point.

Note: You may need to enable AppleTalk via the Network Control Panel. Follow the onscreen instructions provided.

PHASER® 7300 COLOR PRINTER

Moving Guide

Follow these guidelines to move the printer within the office or to prepare the printer for shipment.

Precautions regarding moving the printer

WARNING: Follow these guidelines to avoid injuring yourself or damaging the printer.

- Always use at least three people to lift the printer.
- Always turn off the printer using the power switch.
- Failure to repackage the printer properly for shipment can result in damage to the printer not covered by the printer's warranty.
- Damage to the printer caused by improper moving is not covered by the printer's warranty.

Moving the printer within the office

The printer can be safely moved from one location within an office to another as long as it travels gently over smooth surfaces. Any jarring movement, such as pushing the printer over a raised door threshold or across a parking lot, can damage the printer.

Preparing the printer for shipment

To transport the printer by vehicle, the printer must be prepared according to a specific procedure. Special hardware inserts (removed during the installation procedure) must be installed in the printer so that it can be shipped safely. Additionally, the printer must be repackaged in an appropriate shipping carton.

If you do not have all of the original packaging, order the repackaging kit from www.xerox.com/officeprinting/7300supplies or contact your local Xerox service representative. Instructions for repackaging the printer are provided in the repackaging kit. If you are unable to repackage the printer, contact your local Xerox service representative regarding our repacking services.
