Xerox® ConnectKey™ for SharePoint® User Guide

Purpose of This Guide

This Quick Start Guide is designed for use by the scan users of the Xerox® ConnectKey™ for SharePoint® solution using Xerox EIP multifunction printers to send documents to SharePoint or to network folder destinations.

Application

The Xerox ConnectKey for SharePoint solution is a software application for scan users to submit documents from the Xerox multifunction printers to the Xerox ConnectKey for SharePoint server for processing and routing to network folders and SharePoint.

User Interfaces

Scan User Interface Details:	Comment:
Supported Xerox EIP multifunctional printer Panel Interface:	Panel integration for authenticated (or non-authenticated) users for access to the ConnectKey for SharePoint user interface and scan buttons.

Using the Xerox EIP Printer Panel Interface to Scan to SharePoint or to Scan to Folder

To index and submit documents for processing, the scan user does the following:

- Logs in (if required):
 - Authenticates via network authentication with their Windows Active Directory user credentials.
 - Authenticates using a Xerox Secure Access card peripheral.
- Chooses a ConnectKey for SharePoint button for scanning
 - Selects the desired destination option.
 - Indexes the document if required, when scanning to SharePoint libraries. Indexing is a way to map information to SharePoint columns. For example a SharePoint library may have a column for Invoice Date. Connect Key will allow the user to enter this information when scanning the document.
 - Processes the paper document through the feeder or from the platen glass.

The following procedures describe the process for scanning and routing a document to SharePoint or a network folder destination:

Accessing the Xerox ConnectKey for SharePoint application

1. Press **ConnectKey SharePoint**.

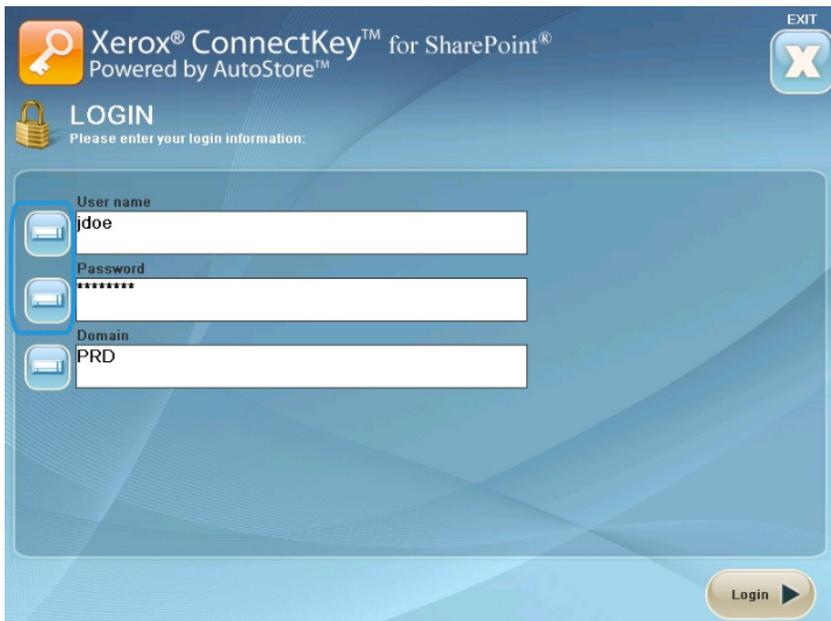

2. Authenticate, providing your user credentials or card, if required.

Note

There are multiple authentication methods for multifunction printers available, and the experience varies slightly depending on your deployment environment and business requirements.

For example, if you use Windows Authentication, enter a Windows (Active Directory) User name and Password at the printer panel when prompted to login.

The screenshot shows the Xerox ConnectKey for SharePoint login interface. At the top left is the Xerox logo and the text "Xerox® ConnectKey™ for SharePoint® Powered by AutoStore™". At the top right is an "EXIT" button with a blue 'X' icon. Below the header is a "LOGIN" section with a padlock icon and the text "Please enter your login information:". There are three input fields: "User name" with the text "jdoe", "Password" with masked characters "*****", and "Domain" with the text "PRD". Each field has a small icon to its left. At the bottom right is a "Login" button with a right-pointing arrow.

3. One or more workflow buttons display, as defined by the ConnectKey for SharePoint administrator.
 - Click **Network Folder Workflows** to route documents to a network destination. The configured network routing scan buttons display.
 - Click **SharePoint Workflows** to route documents to a SharePoint library destination. The configured SharePoint routing scan buttons display.

The screenshot shows the Xerox ConnectKey for SharePoint "Start Workflow" screen. At the top left is the Xerox logo and the text "Xerox® ConnectKey™ for SharePoint® Powered by AutoStore™". At the top right are "LOGOUT" and "EXIT" buttons. Below the header is a "Start Workflow" section with a book icon and the text "Select a form from the list or navigate to a menu to see more available forms.". There are two buttons: "Network Folder Workflows" and "SharePoint Workflows", both with a small icon to their left. A blue rounded rectangle highlights both buttons.

Note

While traversing the Menu options and the Scan Action buttons, a Please Wait dialog indicates that Xerox EIP printer is communicating with the server across the network. The screen refreshes.

The following pages describe example configurations for network folder workflows and SharePoint workflows.

Using the Network Folder Workflows

The following buttons and instructions are designed to provide a view into a sample Network Folder Workflow environment.

Note

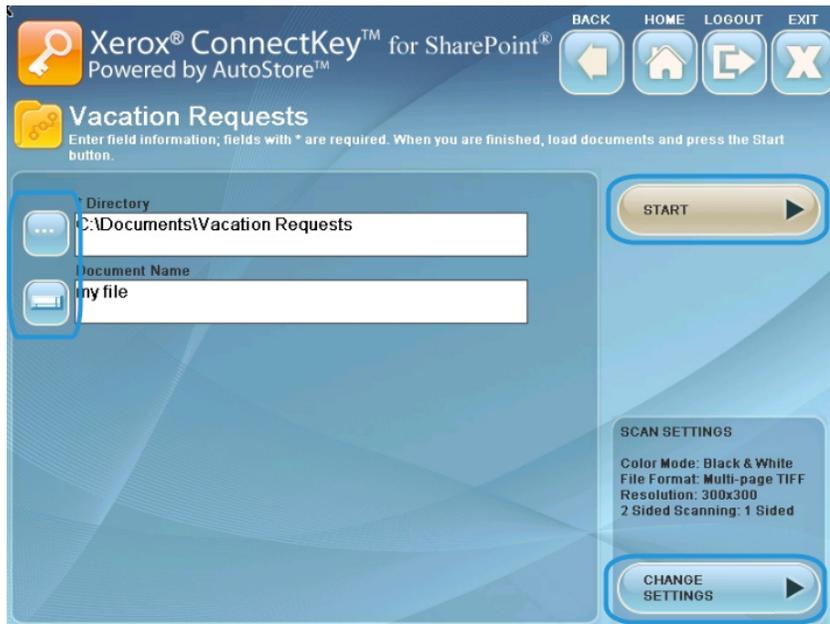

An asterisk “*” indicates a required field.

- Use **BACK** to navigate to the previous menu.
- Use **HOME** to navigate to main menu.
- Use **LOGOUT** to log out of scanning options and to log on as another user.
- Use **EXIT** to close out the application.

1. Click **Vacation Requests** to enter the workflow.

2. An ellipsis button indicates the ability to browse to a sub folder location. Browse to the destination folder location.

3. Click the keyboard icon and type a filename for your scan. This indexes the document, allowing you to search on the filename entered.
4. Optional: **CHANGE SETTINGS** displays if the administrator has enabled scan setting to be set at the panel for document scanning. Click **CHANGE SETTINGS** if you wish to modify the scan settings. This could be a setting such as the resolution of the scan dots per inch (DPI).
5. Once you have configured your scan job settings at the panel, load your documents and click **START** to initiate your scan.

Your scanned document is routed to the network location for retrieval.

Using the SharePoint Workflows

The following buttons and instructions are designed to provide a view into a sample SharePoint Workflow environment.

Note

An asterisk “*” indicates a required field.

- Use **BACK** to navigate to the previous menu.
- Use **HOME** to navigate to main menu.
- Use **LOGOUT** to log out of scanning options and to log on as another user.
- Use **EXIT** to close out the application.

1. Click **SharePoint Invoices** to enter the workflow.

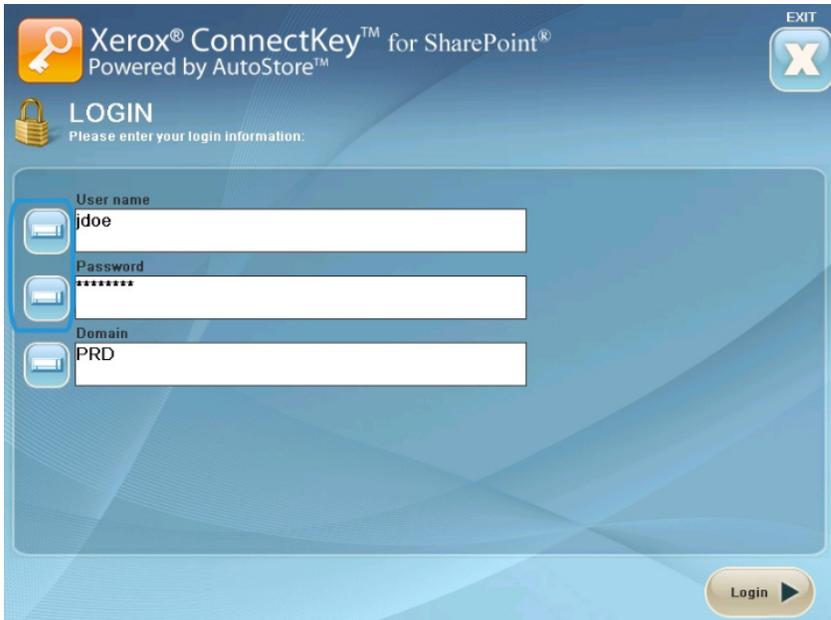

2. An ellipsis button indicates the ability to browse to a sub folder location. Browse to the destination folder location.

3. Click the keyboard icon to type a Document Name for your scan.
 4. Document Library presents the configured destination SharePoint library name. Browse to the destination folder location in the SharePoint library.
 5. Click the keyboard icon to type a Title for your scan.
 6. Optional: **CHANGE SETTINGS** displays if the administrator has enabled scan setting to be set at the panel for document scanning. Click **CHANGE SETTINGS** if you wish to modify the scan settings. This could be a setting such as the resolution of the scan dots per inch (DPI).
 7. Once you have completed indexing the document and configuring the scan settings at the panel, load your documents and click **START** to initiate your scan.
- Your scanned document is routed to the SharePoint library for retrieval.

Using the My Site Workflows

1. My Site workflows will require Windows Authentication. Enter a Windows (Active Directory) User name and Password at the printer panel when prompted to login.

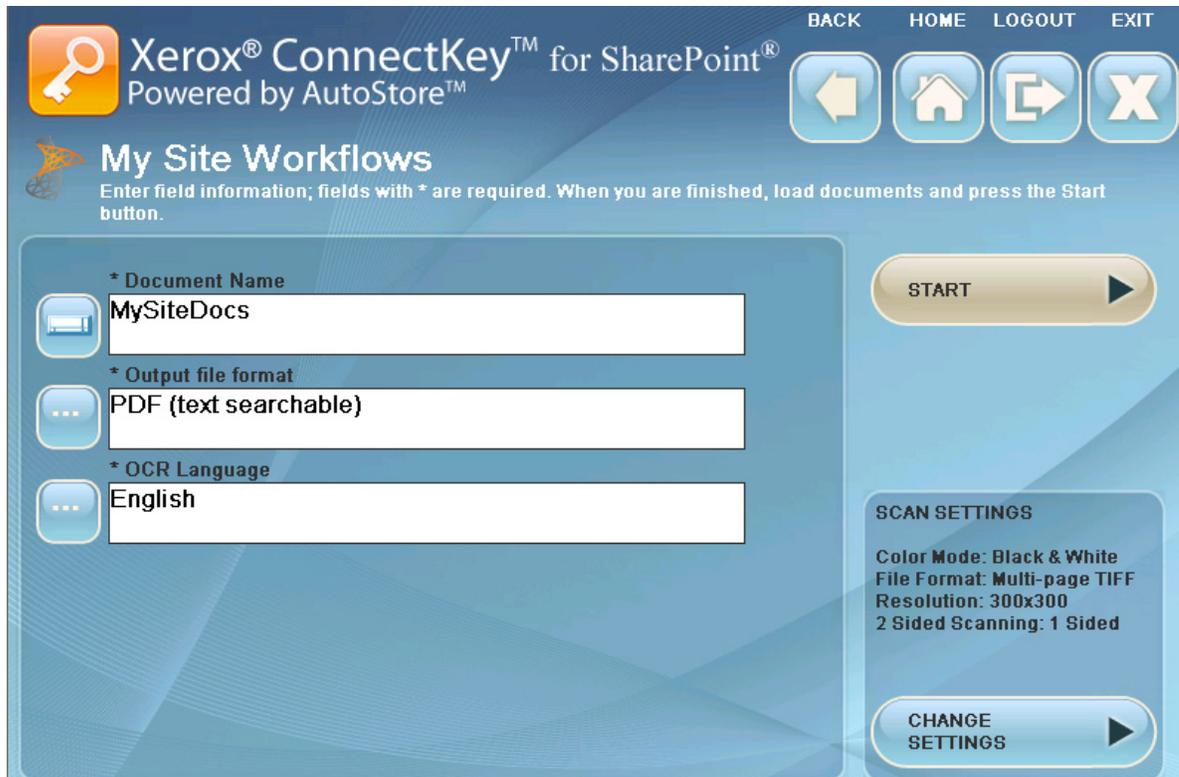

The image shows the login interface for Xerox ConnectKey for SharePoint. At the top left is the Xerox logo and the text "Xerox® ConnectKey™ for SharePoint® Powered by AutoStore™". In the top right corner is an "EXIT" button with a blue 'X' icon. Below the header is a "LOGIN" section with a padlock icon and the instruction "Please enter your login information:". There are three input fields: "User name" containing "jdoe", "Password" containing "*****", and "Domain" containing "PRD". Each field has a keyboard icon on its left. At the bottom right is a "Login" button with a right-pointing arrow.

2. Click **My Site Workflows** to enter the workflow.

3. If the Administrator configured a default Document Name, it will be presented. Click the keyboard icon to type a different Document Name for your scan.

4. Optional: The Administrator can configure the workflow such that you can change the Output File Type or the OCR Language. Click on the ellipses to change these settings.
5. Optional: **CHANGE SETTINGS** displays if the administrator has enabled scan setting to be set at the panel for document scanning. Click **CHANGE SETTINGS** if you wish to modify the scan settings. This could be a setting such as the resolution of the scan dots per inch (DPI).
6. Once you have completed indexing the document and configuring the scan settings at the panel, load your documents and click **START** to initiate your scan.

Your scanned document is routed to the “Personal Documents” library in your SharePoint My Site library for retrieval.

Note

The URL for this location is based on the path specified under the advanced settings option in the SharePoint tab. This path combined with the scan user’s name is used to determine the My Site Location in SharePoint.
