

Aug 27,2003

**Microsoft Security Bulletin MS 03-026 -
Support the Hot Fix for CSX2000 (with Win NT operating system), and
CXP6000
(with Win 2000 operating system) Color Servers for the Xerox
DocuColor printers.**

General

Creo approves the use of the Hot Fix for the specific color servers mentioned above.

Customers that are running the following Software versions can use the specific Hot Fix that fits the required operating system.

- For CSX2000 version 2.0 and up, and CXP6000 version 1.0 and up, use the **“For_WinNT.EXE”** Hot Fix.
- For CXP6000 versions 3.0 use the **“Windows2000-KB823980-x86-ENU.exe”** Hot Fix.

To Install the Hot Fix

- 1) Exit the Creo application.
- 2) Copy the specific Hot Fix (for Windows NT or Windows 2000) to the Desktop.
- 3) Double-click the Hot Fix to run.

This completes the installation of the Hot Fix.
