Language
Use this button to select your preferred language, if available

Access
Use this administrator level feature to change machine default settings, and to setup or modify user accounts.

Power Saver
Lights up green and is initiated automatically if the machine is left idle for a specific amount of time. Press the Power Saver button to bring the machine back to full power after the warm-up period.

Online
Indicator lights when data is being received from a client.

Clear All
Returns the machine to the original Default State. When the Clear All button is selected in Interrupt mode, default settings are applied only to the interrupting job.

Job Memory
Indicator lights when data is stored in the machine's memory.

Interrupt
Stops the printer/copier during the current job. This allows another job to be run.

Features
Allows you to display features settings to program a copy job. It also allows you to alternate between scanning and copying feature screens.

Job Status
Allows you to check or cancel jobs currently executing, or to check or print saved documents.

Stop
Pressing Stop will halt the copy job in process at the completion of the current activity. A message asking if you want to press Start to continue the job or Clear All to cancel the job is displayed on the Touch Screen.

Start
Initiates a job or continues the copying process.

machine Status
Allows you to check the machine status, meters, the state of consumables, and output reports.

Clear
Clears an incorrect numeric.

Numeric Keypad
Is used to enter copy quantity or other numeric information.
