Product Enhancement Document Connectkey EC7836/7856 Firmware Release 073.xxx.029.17700

Release Date: December 23, 2019   dc19rn3901

Software Release Details

Products	Firmware Version
Firmware EC 7836	073.050.029.17700
Firmware EC 7856	073.020.029.17700

I. Fixes/Features new in this release

- CAC/Smartcard login no longer fails after removing pre-installed Root/Intermediate Certificates

- Eliminated E* splash screen

- Updates to comply with 2020 California Password law (SB-327).
  This software release supports the California password law SB-327 effective January 1, 2020. The device admin password and SNMP private string will be the device serial number if a forced altboot reload is performed. The password is case sensitive.

II. Installation Instructions

Standard Installation instructions are associated with the firmware download location.
