The latest documentation and support can be found at www.xerox.com/support.
Locate the FreeFlow[®] configuration and access the information you need.

Welcome to the Product Differences Document for the Xerox FreeFlow Print Manager product.

- FreeFlow Print Manager 7.0 is a standalone Microsoft Windows[®] only application for XP[®], Vista[®] and Server[®] 2003
 - No Support for Mac, Unix and Linux Operating Systems
 - Similar in Functionality to FreeFlow Print Manager 6.0
 - FreeFlow Print Manager 7.0 is customer-installable and does require a site license
 - 30 day trial version available
 - FreeFlow Print Manager 7.0 Command Line Interface
 - The Command Line Interface commands are the same as FreeFlow Print Manager 6.0
 - The exception is Print.exe, it is the same as FreeFlow Print Manager 6.0. However, the supported print path is limited to the printer custom names that are registered in Printer settings
- FreeFlow Print Manager - Advanced Print Path 7.0 is a standalone Windows application and also the integrated application for the FreeFlow products for Windows Vista, XP and Windows Server 2003
 - Not sold separately. Available only as a 'bundled' application with FreeFlow applications. However, the standalone FreeFlow Print Manager - Advanced Print Path 7.0 is available to the customers who already have standalone configuration in FreeFlow 6.0
 - Supports Submission File Formats of JPEG, RDO, Tiff/IT, Microsoft Office, and Adobe CS3.
 - FreeFlow Print Manager - Advanced Print Path 7.0 Command Line Interface commands are the same as FreeFlow Print Manager - Advanced Print Path 6.0
