Xerox VersaLink Multifunction Printer Product Enhancement Document for Version 121.xxx.004.22726

Description of new features and enhancements to the products specified below.

Release Date: March 4, 2025 dc24rn4221

Product Model	System Software	Network Controller
VersaLink B415	121.029.004.22726	121.029.22726
VersaLink C415	121.028.004.22726	121.028.22726
VersaLink B620	121.027.004.22726	121.027.22726
VersaLink C620	121.026.004.22726	121.026.22726
VersaLink B625	121.025.004.22726	121.025.22726
VersaLink C625	121.024.004.22726	121.024.22726

Latest release information:

Firmware 121.xxx.004.22726 (D8.0 General Release replacing 121.xxx.004.22723)
March 2025

Various Bug Fixes

- Performance and supplies reporting improvements have been made in this release.
- A crash that could occur when using LAN Fax, faxing from the PCL print driver, has been fixed in the printer version.
- Improves PCL IQ problems introduced in the previous release.
- This software fixes an intermittent issue where login using Convenience Authentication, Xerox Secure Access, or Xerox Workplace Cloud results in failure to log in with one of the following messages:
    - "The Remote Server has not responded."
    - "Authentication Error. Access Denied."
    - "Login to register card."
    - "Associate Card."

- For customers using this device for embedded fax, see link to super patch readme. Install this post-upgrade patch to improve fax reliability.

Trellix for VersaLink

- Trellix is now supported on the entire Atlantis based VersaLink® product line.

Security Made Simple

- **Server-less card authentication** where customers can utilize cards and card readers without the need for a solution and a server.

- **EIP Authentication** allows EIP developers to create a ConnectKey app that can be configured as the blocking screen for the device. Once configured, the ConnectKey app fully assumes the responsibility of authenticating and authorizing users, or it can leverage device authentication / authorization configuration.

- **Security Templates** are available to simplify the security configuration process. A template can be selected during the installation process or modified later through the Embedded Web Server (ESW). The templates available are Default, Elevated and High.

- **Secure Print with Microsoft Universal Print** Universal Print now supports the option to send jobs with a Secure Print PIN that is encrypted with the job. These jobs align with the Device Policies and Defaults settings that the device administrator can set in the "Secure Print" section of the Embedded Web Server (EWS).

- **Secure Release with Microsoft Universal Print** where the walk-up user authenticates with the device and their secure print jobs are available to print without entering a pin.

Workflow Automation

- **Metadata for Scan To** enables the 'Scan To' app the ability to apply metadata as part of the scan job.

- **Scan To Print** within the 'Scan To' app, now allows you to select "Print Scanned Document" as a destination for a multi-destination scan.

Supporting Accessibility with Assistive Technology

- **Updated Touchscreen Interface** supports zoom and pan to allow the user to zoom via pinch/zoom gestures.

- **Touchscreen keyboard navigation** which allows users to navigate and operate the touchscreen via an attached USB keyboard.
- **Speech output** that works in conjunction with the keyboard to enable the user to navigate through the touchscreen and in return receive audible sounds for the information displayed on screen (i.e., Print, Copy, Scan To).
- **Updated Embedded Web Server guest pages** that meet Web Content Accessibility Guidelines (WCAG) success criteria.

Firmware 120.xxx.003.20003 (General Release) July 2024

Various Bug Fixes

- Reliability Improvements

Firmware 120.xxx.003.20002 (General Release) April 2024

Various Bug Fixes

- Resolved Remote Services Communication Issue
- Service and Reliability Improvements

Firmware 120.028.003.20001 (General Release) Oct. 2023

Supports New Components (C415 Model Only)

- Intermittent black page issue seen on Copy / Print jobs has been fixed.

Firmware 120.028.003.20000 (General Release) Sept. 2023

Supports New Components

- OCR -- Support scanning to searchable PDF
- Light sleep mode enables a faster recovery from power saver to a ready to print state, thus improving performance from sleep to printing.
- Fax Remote Configuration - Support full remote configuration for fax features via Xerox® Easy Assist app,
- Xerox Device Managed Services.
- Includes support for Thales SafeNet IDPrime 930 Smartcards
- The User Guide for Smart Cards Enablement including the IDPrime driver implementation and support for VersaLink products is available at this link: https://s3s.smartcentre.xerox.com/products-and-supplies/production/customization/customization/office-customization-xcis/xcis-solutions/
- Reliability Improvements
- Performance Improvements

Firmware 119.028.003.04616 (General Release) June 2023

Supports New Components

- Accessibility to inverting Display Color
- Cloud & Mobile Ready
- Remove DocuShare Go In-Box App

- Security Improvements, Certificate Management TLS
- SIPRNet Support
- Auto-Configure Low Toner Messaging
- Reliability and Robustness
- Memory Footprint Reduction
- Enablement of a customer installable Productivity Kit (HDD)
