

Storing a Document to be Polled in a Multi-poll Box

This feature stores a document in a Multi-poll box and prepares your machine to be polled multiple times by various remote machines. You can only store one document in a Multi-poll box. The document is retained in memory regardless of how many times it is polled.

If a document is stored in a Poll-once box (without security), you cannot store a document in a Multi-poll box (see “Polling a Remote Document (Poll-once or Multi-poll Box)”, in this Chapter).

1. Load the document face down in the Document Tray.
2. Select the desired **Resolution** and **Contrast**.
3. Open the Access Cover and press:

Polling

2

Scan to be polled:

1. Poll-once box
2. Multi-poll box

Note: *If a document is reserved in a Multi-poll box you are prompted to delete it, retain it or add the new document to it.*

4. To store the document in a Multi-poll box, press **2**. If you stored a document without a security code in a Poll-once box you cannot store a document in the Multi-poll box.

The document is scanned and stored in the Multi-poll box. When a polling machine calls, the document will be transmitted.
