

Data Coupler Information

United States of America
Federal Communications Commission
Part 68 rules
Telephone line Connection

The Document WorkCentre Pro facsimile system contains an internal data coupler. Its use is restricted by the Federal Communications Commission (FCC). To comply with the FCC rules, you must carefully read and follow with the instructions listed below.

This equipment complies with Part 68 of the FCC rules. On the rear of this equipment is a label that contains, among other information, the FCC registration number and ringer equivalence number (REN) for this equipment. If requested, this information must be provided to the telephone company.

WARNING

An FCC compliant telephone cord and modular plug is provided with this equipment. This equipment is designed to be connected to the telephone network or premises wiring using a compatible modular jack which is Part 68 compliant. You may safely connect the system to the following standard modular jack: USOC RJ-11C. You, not Xerox, assume all responsibility and/or liability for any damage caused by the connection of this system to a non-compliant jack.

The REN is used to determine the quantity of devices which may be connected to the telephone line. Excessive RENs on the telephone line may result in the devices not ringing in response to an incoming call. In most, but not all areas, the sum of the RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company.

If this machine causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the
