

## **One Time Fax Options**

---

Before sending a document, you can set up various options that effect only the current job. With the document in the Document Tray, set each option you want to apply to that job, then using one of the dialing methods, send the fax. The following options can be set for an individual transmission:

<b>Option</b>	<b>Description</b>
Number of Pages	Prints the designated number of pages at the top of the recording paper for Direct Send Transmissions only.
Listen to Dial	Turns the speaker ON to monitor the line tones.
ECM Disable	When the ECM default mode is set to On, allows you to disable ECM for the current transmission .
Send then Poll	Sends a document, then polls a document from the remote machine during the same transmission.
Secure Send Transmission	The Document WorkCentre compares the number you dialed with the remote machine's ID. If the numbers do not match, the document is not sent.
