### Setting up Static IP for the Creo Color Server

In case of a static IP conflict at a customer site, and no keyboard, mouse and monitor attached to the Color server, the following procedure is recommended.

In case you are working with PC:

- 1. Connect a network cable between the scan network adapter of the CX print server to a PC.
- 2. On the connected PC, select Start > Settings > Network connections.
- 3. Right- click on the Local Area Connection.

4. Select the Internet Protocol (TCP/IP) and click the Properties button.

In case you are working in Mac environment:

- Make sure that Remote Desktop application (RDC) is installed on your Mac. If not, download and install It. Remote Desktop Connection (RDC) application is a free software that can be downloaded from Apple site at following location: <u>http://www.apple.com/downloads/macosx/networking\_security/remotedesktopconnectionclient.ht</u> <u>ml</u>
- 2. Go to System Preferences -> Network (appear under "Internet & Wireless")
- 3. Fill form as noted in image below:

has the IP
:
lvanced) (?

4. Using RDC application you can now connect to the Creo Color Server.

#### **About Print On-Demand Solutions Group**

The Print On-Demand Solutions Group develops high-performance CREO Color Servers and workflow solutions for a wide range of digital production printers and presses. CREO Color Servers offer the digital printing industry leading workflow connectivity solutions. They utilize intelligent, JDF-enabled automation of all print-production steps to help drive business performance and profit.

This independent unit of Eastman Kodak Company continues to unlock the power of print on-demand to maximize customers' success in digital printing and workflow solutions.
