     FIT100537507**

2. The following prerequisite(s) must be installed in the order specified before applying the **SP3.ps** patch:
   - SP1
   - SP2

3. Do NOT install any of the following patch(es) <u>after</u> installing the **SP3.ps** patch. If you must install any of the patch(es) below, do so <u>before</u> installing the **SP3.ps** patch:

EFI Fiery™ for the Xerox® 570 Integrated Color Server

PostScript patch release note

- None.
4. This patch is exclusive, it must be installed by itself, and the server must be rebooted or restarted once. After that, other patches can be applied to the server.

Patch installation instructions

1. Make sure that the Fiery controller has reached Idle.
2. Import the patch file **SP3.ps** using Command WorkStation to the Direct connection.
3. You must wait until the file finishes processing and Command WorkStation or the LCD show Idle.
4. From Command WorkStation, choose Server, Reboot Server, or from the Fiery LCD, select Shut down, Reboot System.
5. Wait until the Fiery controller reaches Idle and print the configuration page.
6. Verify that the Update Info section contains the patch number **SP3**.
