

Firmware Release Notes

Phaser 6600

General Release 201305012027

Release Date: January 31, 2013

Software Release Details

System Software	Version
Controller Version	201305012027

Purpose

This release provides the following enhancements:

- Added support for AirPrint
- Enforces a digital signature for all future FW updates

Software Release Details

Before updating, please read the important information below.

- All network settings will be reset to default values if updating from firmware versions 201209101357 or earlier. ***** Please print a configuration page before updating to retain a copy of your current network settings.**
- For security reasons the setting for "Software Download" is disabled by default and the printer will not allow any FW updates to be processed. You must first enable the "Software Download" setting from the printers web interface (CWIS) or from the control panel before attempting to update the FW. For additional information please reference the printers User Guide.
 - CWIS location for the "Software Download" setting:
Properties tab > Security > Secure Settings > Software Download
 - Control Panel location for the "Software Download" setting:
Machine Status > Tools > Admin Settings > Secure Settings > Software Download
- After the update is complete, all future FW updates will require a digital signature for enhanced security, and you will not be able to downgrade to FW versions earlier than 201301301313.

Software and installation instructions are available from <http://www.xerox.com>.
