

## **Customer Release Notes/ Install Instruction for DocuColor 2240/1632 Macintosh OS X PPD**

### **Using Microsoft Applications (Word / Excel)**

When setting up the printer to print the first page out of one tray and the rest of the document to print from another tray, the printer will print the whole document from the first tray selected.

### **Install instruction.**

Copy the macosx\_030130\_mx.hqx file to the Mac Os X hard drive.

Un-stuff the macosx-030130\_mx.hqx file. You will get an install file.

Double click on the Xerox ppd install icon.

This will bring up an install window where to install the PPD. Select "Install".

When Installation is complete select "Quit".
