

# Customer Release Notes

## WorkCentre 4265

### Firmware 50.004.00.000

Release Date: May 4, 2018

dc18rn3772

## Software Release Details

Component	Version
System	50.004.00.000
MCB	2.50.04.00
Engine(IOT)	3.00.26
Network	4.00.95.00

## I. Fixes/Features new in this release

- Work Flow Scanning - Templates on local user interface will only display 100 templates
- The 3DES encryption protocol has been removed, which removes the possibility of the vulnerability known as Sweet32 (CVE 2016-2183) from being exploited.
- TLSv1.1 and 1.2 are now enabled on this device. SSLv3 and below are no longer supported on this device, and all references to SSL have been removed. If you would like to enable TLSv1.0, you now have to explicitly select it.
- Fixed an issue was discovered in the IPv6 protocol specification, related to ICMP Packet Too Big (PTB) messages. Systems can be subject to DoS attacks as a result of the generation of IPv6 atomic fragments.
- Fixed multiple Liptiff issues related to buffer overflows.CVE-2016-9534
- Updated OpenSSL to fix multiple memory leaks.CVE-2016-6304
