General Release 75.3.1

Release Date: April 5, 2010

dc10rn2492crn

Software Release Details

Component	Xerox Europe / DMO (220v)	Xerox North America (110v)
System Software	75.3.1	75.3.1
Controller	1.222.18	1.182.18
IOT	41.1.0	41.1.0
IIT	22.13.1	22.13.1
Fax	1.1.9	1.1.9
C Fin	32.27.0	32.27.0
SB Fin	3.8.0	3.8.0

Purpose

This release provides the following enhancements:

- The Xerox Secure Access Unified ID System™
The Xerox Secure Access Unified ID System® USB card reader configuration eliminates the need for the Authentication Device (also known as the flat box controller). The USB card reader connects directly to the device controller eliminating the need for a second IP address. Device plug-ins must be installed to enable the device functionality. The plug-ins are available at the Xerox Secure Access Unified ID System® and WC74xx download pages on www.xerox.com.
- Includes additional CAC functionality including the support of single sign-on for SMB (scanning) and LDAP (address book) using the smart card, as well as support for sending a single encrypted email to multiple recipients or sending the encrypted email to each recipient separately.
- LDAP lookup is now able to use Authenticated User's credentials across multiple domains without the need for the User to enter or select the Domain.
- Now able to chargeback for color prints or copies when Autodetect or Color is chosen while allowing unlimited use of black and white.
- The ID Card Copy feature now defaults to 129% from 100% to ensure easy to read copies.
- Can now be configured to support only SSLv3 and above encryption.
- Ability to increase digital certificate expiration to 9999 days.
- EIP 1.5 is now included which supports customer workflow enablement through walkup application setup (workflow startup), proxy configuration, as well as programmatic digital certificate management. EIP 1.5 also adds increased device security via programmatic digital certificate management.

Installation Instructions

Software and installation instructions are available from <http://www.xerox.com>.
