

## DocuColor 250/240

February 2008

Dear Xerox DocuColor 250/240 Customer:

Your DocuColor CX250 color server can now be upgraded with the enclosed HF-Spot\_Patch. Please read the enclosed documentation regarding your SPAR software prior to installation. Included are the Release Notes, which list detailed installation instructions, prerequisites and any known limitations.

This updated software release was tested to specifically resolve the System Problem Action Requests (SPARs) noted below. Some SPAR numbers may not appear on the list if there were multiple customers who submitted SPARs for the same problem. If your SPAR number is not listed, Xerox is providing you this software in an attempt to resolve a reported problem that may resemble one of the listed fixes. Should this software fail to resolve your problem, Xerox will require a detailed job scenario and sample job(s) for further investigation, testing, and resolution. *Any new problems that arise from installing this software must be addressed in a new SPAR.*

This SPAR CX250 patch will address the following SPAR:

	SPAR	Problem Description
1.	<b>717013208</b>	Prinergy Pdf files sent to Hot Folder are not deleted after being printed.

***NOTE:*** *Not all child SPARs will be reflected in this document.*

Thank you,

Xerox Corporation
