Electronics For Imaging (EFI) Printer drivers and utility software is stored on the Fiery Controller for the WorkCentre 7328/7335/7345/7346.

It may be downloaded from the web pages of these machines. Software for both Windows (2000, XP and Vista) and Macintosh (OS 10.x) is available.

To access the machine, open a web browser (Internet Explorer, Safari, etc.) and type the IP address of the Fiery printer into the address field. To access the software go to the "Downloads" tab.
"Printer Files" is the printer drivers.
"Client Software Installer" is the utility software. You will be given the option of installing all or part. Available software:
NOTE: Some software depends on enablement and purchase of the feature.
